Description of Events: I WAS CALLED TO RESPOND TO A LEAKING PACKAGE IN THE PRE-LOAD IN THE FRONT OF P-7. WHEN I GOT THERE I NOTICED THAT THE PACKAGE HAD A DIAMOND HAZARD LABEL. USING MY PPE AND THE DECISION TREE I PICK UP THE PACKAGE AND TOOK IT BACK TO THE PCS WHERE I PROCESSED IT THROUGH THE DMP.

Description of Events: I FOUND A LEAKING PACKAGE IN THE BACK ON P-3. I SAW THAT THE PACKAGE WAS LEAKING. I ALSO NOTICE THAT THE PACKAGE HAD A DIAMOND HAZARDOUS LABEL (3 FLAMMABLE LIQUID) AND UPS SHIPPING PAPPERS. USING MY PPE I PICKED UP THE PACKAGE AND TOOK IT BACK TO THE PSC. STILL WARNING MY PPE I PROCESSED THE PACKAGE THROUGH THE DMP.

Description of Events: PAM THOMAS PICKED UP A BOX FROM SLIDE 527. SHE CAME IN CONTACT WITH SUBSTANCE AND INDICATED SHE FELT A TINGLING SENSATION BETWEEN HER MIDDLE AND RING FINGERS. I THEN LOOKED AT THE PRODUCT LABEL AND READ ON LABEL TO RISE IN WATER FOR 10 MINUTES. PAM RINSED HER HAND FOR ABOUT 15 MINUTES AND WAS SENT FOR MEDICAL ATTENTION.

Description of Events: I WENT TO THE SPILL WEARING THE APPROPRIATE PPE AND IDENTIFIED THE PACKAGE AND CONTENTS USING THE RESPONSE SHEET FOR UNLABELED PACKAGES. I PH TAPED THE MATERIAL AND THE READING WAS OF THE 6-9 RANGE SO I USED THE CORROSIVE LIQUID RESPONSE SHEET. I SPRINKLED SODIUM BICARBONATE ON TO THE MATERIAL USING THE PH TAPE AND KEPT ADDING UNTIL THE COLOR OF THE TAPE FELL INTO THE 6-9 RANGE. I PUT THE ABSORBED MATERIAL INTO A PLASTIC BAG THEN PROCESSED THROUGH DMP.

Description of Events: I NOTICED A LEAKING PACKAGE. ON THE SIDE OF THE PACKAGE I NOTICED THAT THE PACKAGE HAD A FIVE PART HAZ-MAT FORM. ON THE SIDE OF THE BOX I SAW THAT THE PACKAGE WAS A FLAMMABLE LIQUID. USING MY PPE I PICKED UP THE PACKAGE AND BROUGHT IT BACK THE THE PACKAGE SERVICE AREA. USING MY PPE AND DECISION TREE I CLEANED UP THE PACKAGE THROUGH THE DMP.

Description of Events: I RESPONDED TO SPILL AT SPACE 317 WEARING PPE. USING DECISION TREE AND PROPER RESPONSE SHEETS I CONTAINED PACKAGE AND BROUGHT IT BACK TO DAMAGE/REWRAP. THEN I CLEANED AND CONTAINED PACKAGE. LABEL CONTENTS INDICATED POSSIBLE HAZARDOUS SUBSTANCE. SPILLED LIQUID WAS ABSORBED BY CARDBOARD BOX. THEN PROCESSED THROUGH DMP.

Case Worker: TS
File Location: Local Agency
Local Agency: SAN DIEGO COUNTY LOP
Potential Media Of Concern: Gasoline
Potential Media Affected: Other Groundwater (uses other than drinking water), Soil
How Discovered Description: SOIL SAMPLES- DISPENSER(2006) & TANK (2009)
Stop Description: OTHER MEANS
Cal Water Watershed Name: San Diego - Lower San Diego - Mission San Diego (907.11)
DWR Groundwater Subbasin Name:
Site History:

The case was opened in April 2006 after an elevated concentration of total petroleum hydrocarbons (TPH) was reported in a soil sample collected beneath a gasoline fuel dispenser. When the only underground storage tank (UST) and the dispenser were later removed in February 2009, an elevated TPH concentration was reported in a soil sample collected from the tank excavation. Although approximately 20 cubic yards (26.6 tons) of petroleum-contaminated soil was subsequently removed from the tank excavation and from beneath the dispenser, analytical results for confirmation soil samples indicated that significant contamination was still present. The contaminated soil was transported off site to Western Environmental in Mecca, CA for disposal. Between 2007 and 2012, nine groundwater monitoring wells were installed on site (seven) and off site (two) to delineate the extent of contamination resulting from the fuel releases. The contaminants of concern are dissolved benzene and methyl tertiary-butyl ether (MTBE), and the highest concentrations have been reported in a well located near the former UST system. No free product has been observed in the nine wells, and the extent of soil and groundwater contamination resulting from the previous gasoline releases has been adequately delineated. The consultant estimates that the volume of residual gasoline-impacted soil with TPH concentrations exceeding 15 milligrams per kilogram totals approximately 450 cubic yards. There are currently no fuel dispensing operations or UST systems on the property. According to the State's Basin Plan, groundwater beneath the site has designated beneficial uses. However, in a sensitive receptor survey conducted in July 2011, no residential properties or groundwater production wells were identified within 1000 feet of the site. In addition, the consultant stated that buried site utilities, including irrigation, sewer, and water lines are not suspected to pass through the residual gasoline plume. DEH has determined that "No Further Action" for the case is required, based on satisfaction of the general and media-specific closure criteria presented in the State Water Resources Control Board's "Low-Threat Underground Storage Tank Case Closure Policy" (LTCP). The areal extent of the groundwater plume is stable, and site conditions satisfy the characteristics required for closure under Class (1) of the Groundwater-Specific Criteria in the LTCP. These criteria include (a) The contaminant plume that exceeds water quality objectives is less than 100 feet in length, (b) There is no free product, and (c) The nearest existing water supply well or surface water body is greater than 250 feet from the defined plume boundary. A Public Notice stating DEH's intent to close the case under the LTCP was issued on January 31, 2014. No comments were received during the required 60-day comment period, which ended on April 1, 2014.

Status History

Status:	Open - Eligible for Closure	**Status Date:**	2014-04-01 00:00:00

Description of Events: THE TANK OWNER/OPERATOR HAD A STOOL INSTEAD OF A LADDER INPLACE FOR EMPLOYEES TO USE DURING FUELING OPERATIONS. THE EMPLOYEE USED THE STOOL INSTEAD OF THE LADDER ON HIS UNIT HE WAS TRYING TO COMPLETE THE JOB IN A SHORTER TIME PERIOD RATHER THAN THINKING OF SAFETY FIRST. DURING THE FUELING PROCEDURE THE EMPLOYEE FELL FORM THE STOOL LOOSING CONTROL OF HIS EQUIPMENT. THIS LOSE OF CONTROL CAUSED 20-30 GALLONS OF FUEL TO SPILL ONTO THE PAVEMENT BEFORE THE EMPLOYEE COULD SHUT DOWN HIS EQUIPMENT. TO PREVENT FURTHER OCCURENCES OF THIS TYPE WE HAVE SUGGESTED THAT THE CUSTOMER PERMANENTLY MOUNT A LADDER TO THE TANK - THE EMPLOYEE HAD BEEEN INSTRUCTED TO USE HIS LADDER IF CUSTOMER DOES NOT ACCOMPLISH THIS SUGGESTION.

Potential Cntm of Concrn: Chromium, Lead, Benzene, Diesel, Ethylbenzene, Naphthalene, Polynuclear aromatic hydrocarbons (PAHs), Toluene, Total Petroleum Hydrocarbons (TPH)

Potential Media Affected: Soil

How Discovered Description:

Stop Description:

Cal Water Watershed Name: San Diego - Lower San Diego - Mission San Diego (907.11)

DWR Groundwater Subbasin Name:

Site History:

Soil assessment activities were performed at the Cabrillo Power II LLC (Cabrillo) Kearny 1 and Kearny 2 & 3 Gas Turbine Site to determine whether fuel-related operations had impacted subsurface soil. The gas turbines at the site are currently fueled by natural gas. As a result, at Kearny 1, three 20,000-gallon diesel fuel aboveground storage tanks (ASTs) were removed. At Kearny 2 & 3, two diesel fuel ASTs, including Tank 1 (787,500 gallons) and Tank 2 (4,725,000 gallons) were demolished and removed. The diesel fuel pipelines at the site had previously been closed in place. Cabrillo reports that during construction, diesel-impregnated soil had been placed only beneath Tank 2 as a method to reduce corrosion of the base of the tank. In May 2014, eleven soil samples were collected at Kearny 1. Based on the elevated petroleum hydrocarbon concentrations, it was determined by DEH that the fuel supply line location where Kearny 1 soil sample K1-SS11 was collected requires additional assessment to determine the vertical extent of contamination. However, Cabrillo reported that additional assessment cannot be conducted at K1-SS11 until the adjacent gas turbine and natural gas supply line are no longer in operation. Thirty-six soil samples were collected at Kearny 2 & 3 in May 2014. Two areas, the former Tank 2 footprint and a fuel supply line to former Tank 1, were impacted by petroleum hydrocarbons and identified for additional assessment of the vertical extent of contamination. In June 2014, four soil borings were advanced in the former Tank 2 footprint, and one soil boring was drilled adjacent to the fuel supply line. As required by DEH, the five borings were advanced until two consecutive soil samples had concentrations of TPH-d and TPH-o that were below the laboratory reporting limits. The maximum TPH-d and TPH-o concentrations were reported in a soil sample collected at a depth of three feet in the former Tank 2 footprint. Groundwater beneath the site has designated beneficial uses. However, groundwater was not encountered in the five soil borings, which were advanced to total depths ranging from 18 to 25 feet below ground surface (bgs). Based on industrial worker-based vapor risk calculations, the consultant proposed soil clean-up goals for benzene, toluene, ethylbenzene, xylenes, naphthalene, and benzo(a)pyrene. The soil clean-up goal (0.39 milligrams per kilogram [mg/kg]) for ethylbenzene in soil located at a depth of 0.5 feet was exceeded in several samples collected beneath former Tank 2. However, this soil was later excavated for off-site disposal. At a depth of three feet below former Tank 2, the clean-up goals for benzene (0.08 mg/kg) and ethylbenzene (2.3 mg/kg) were exceeded, but acceptable concentrations were present in the deeper samples collected at 4.5 feet and 5 feet bgs. In the August 2014 Soil Assessment Report, the consultant recommended the excavation and off-site disposal of soil beneath the former Tank 2 footprint down to a depth of three feet bgs. In a letter dated September 3, 2014, DEH responded that based on current site conditions and industrial land use, soil excavation at Kearny 2&3 was not required for case closure unless an occupied building will be built over the former Tank 2 footprint. No building construction was planned; however, Cabrillo voluntarily elected to remove impacted soil beneath former Tank 2 down to an approximate depth of three feet. Confirmation soil samples were not collected at the base of the excavation. Between November 17, 2014 and December 1, 2014, approximately 5,388 cubic yards of soil were excavated and transported off site for disposal at the South Yuma County Landfill in Arizona. In the December 2014 Closure Report, the consultant recommended case closure with no further assessment or remediation based on the laboratory data from soil assessment activities, the removal of diesel-impregnated sand below the former Tank 2 AST, and the fact that there are no future plans to build an occupied structure over the footprint of former Tank 2. DEH concurs with case closure with the following conditions: - If an occupied building is proposed to be built over the former Tank 2 footprint in the future, confirmation soil sample data must be evaluated to assess human-health risks. - Potential contamination in the Gas Turbine Area portion of Kearny 2 & 3 and at the Kearny 1 sample location K1-SS11 must be evaluated after the turbines and natural gas lines are no longer active.

Violation Notes:

Returned to compliance on 09/11/2014.

Violation Description:

Failure to provide employees within the first six months after the date of their employment, or assignment to the facility, or to work unsupervised, or to a new position at a facility with hazardous waste training to ensure employees are competent in the following areas: hazardous waste management procedures (including contingency plan implementation) relevant to the positions in which they are employed, emergency response and emergency equipment, and procedures for using, inspecting, repairing, and replacing facility emergency and monitoring equipment. In addition, the owner/operator

shall ensure facility personnel take part in an annual review of the initial training and training records training records on current personnel shall be kept until closure of the facility. Training records on former employees shall be kept for at least three years from the date the employee last worked at the facility. The records shall include the following: the job title for each position at the facility related to hazardous waste management, and the name of the employee filling each job; a written job description for each position, duties of facility personnel assigned to each position, and a written description of the type and amount of both introductory and continuing training that will be given to each person filling a position.

Violation Division: San Diego County Department of Env Health **Violation Source:** CERS
Citation: 22 CCR 15 66265.16 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.16
Violation Notes:

Returned to compliance on 06/28/2016.

Violation Description:

Failure to provide employees within the first six months after the date of their employment, or assignment to the facility, or to work unsupervised, or to a new position at a facility with hazardous waste training to ensure employees are competent in the following areas: hazardous waste management procedures (including contingency plan implementation) relevant to the positions in which they are employed, emergency response and emergency equipment, and procedures for using, inspecting, repairing, and replacing facility emergency and monitoring equipment. In addition, the owner/operator shall ensure facility personnel take part in an annual review of the initial training and training records training records on current personnel shall be kept until closure of the facility. Training records on former employees shall be kept for at least three years from the date the employee last worked at the facility. The records shall include the following: the job title for each position at the facility related to hazardous waste management, and the name of the employee filling each job; a written job description for each position, duties of facility personnel assigned to each position, and a written description of the type and amount of both introductory and continuing training that will be given to each person filling a position.

Violation Notes:

Returned to compliance on 07/01/2016.

Violation Description:

Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.

Violations

Violation Date: 5/17/2016 ***Violation Program:*** HW
Violation Division: San Diego County Department of Env Health ***Violation Source:*** CERS
Citation: 22 CCR 15 66265.52 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.52
Violation Notes:

Returned to compliance on 06/28/2016.

Violation Description:

Failure to include all of the following in the Contingency Plan:
1) A description of actions the facility personnel shall take response to fires, explosions, or any unplanned sudden or non-sudden release of hazardous waste or hazardous waste constituents to air, soil, or surface water at the facility;
2) A description of arrangements agreed to by local police departments, fire departments, hospitals, contractors, and State and local emergency response teams to coordinate emergency services;
3) All names, addresses, and phone numbers (office and home) of all persons qualified to act as emergency coordinator and this list shall be kept up to date. Where more than one person is listed, one shall be named as primary emergency coordinator and others shall be listed in the order in which they will assume responsibility as alternates;
4) A list of all emergency equipment at the facility (such as fire extinguishing systems, spill control equipment, communications and alarm systems (internal and external), and decontamination equipment), where this equipment is required. This list shall be kept up to date. In addition, the plan shall include the location and a physical description of each item on the list, and a brief outline of its capabilities;
5) An evacuation plan for facility personnel where there is a possibility that evacuation could be necessary. This plan is to describe signal(s) to be used to begin evacuation, evacuation routes, and alternate evacuation routes (in cases where the primary routes could be blocked by releases of hazardous waste or fires);
6) The current telephone number of the California Emergency Management Agency; and
7) If the owner or operator has already prepared a Spill Prevention, Control, and Countermeasures (SPCC) or some other emergency or contingency plan, the owner or operator need only amend that plan to incorporate hazardous waste management provisions that are sufficient to comply with the requirements of this chapter.

Admin Agency:	San Diego County Health Services Department
Notification Area:	AA/CUPA,DFG-OSPR,DTSC,RWQCB,US EPA,USFWS
Location:	5524 Kearny Villa Rd
Description:	A paint crew is painting the front of a building with a paint sprayer. They have no protection around the paint area so the paint spray is being caught by the wind and landing on cars and the surrounding area ground etc.

Cal Water Watershed Name:	San Diego - Lower San Diego - Mission San Diego (907.11)		
DWR Groundwater Subbasin Name:			
Site History:			

Atlas Construction located at 4640 Brinell Street, San Diego, CA This case was opened in response to a spill that occurred in October 1991. Diesel and concrete hardener moved with storm water to the fence line of the property where exposed soil is present. The spill was cleaned up. Soil samples were collected along the fence line. The soil samples contained a maximum of TRPH at 285 mg/kg. The depth to groundwater in the area is estimated at 50 feet. DEH is closing this case because there would be minimal impacts to human health and the environment from the residual soil contamination.

Violations

Violation Date: 12/8/2016 ***Violation Program:*** APSA
Violation Division: San Diego County Department of Env Health ***Violation Source:*** CERS
Citation: HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)
Violation Notes:

Returned to compliance on 12/09/2016.

Violation Description:

Failure to comply with one or more of the following requirements:

1. Have record of inspections and integrity tests signed by the appropriate supervisor or inspector.

2. Keep written procedures and records of inspections and integrity tests for at least three years.

3. Keep comparison records.

Violations

Violation Date: 1/13/2015
Violation Program: HW
Violation Division: San Diego County Department of Env Health
Violation Source: CERS
Citation: 22 CCR 15 66265.35 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.35
Violation Notes:

Returned to compliance on 02/20/2015.

Violation Description:

Failure to maintain aisle space to allow the unobstructed movement of personnel, fire protection, spill control equipment, and decontamination equipment to any area of facility operation in an emergency, unless it can be demonstrated to the Department that aisle space is not needed for any of these purposes.

Begin Date: 2009-03-03 00:00:00
How Discovered: Tank Closure
Stop Method: Close and Remove Tank
County: San Diego
Latitude: 32.8260161
Longitude: -117.1531837
File Location: Local Agency
Potential Media Of Concern: Diesel
Potential Media Affected: Other Groundwater (uses other than drinking water)
How Discovered Description: Tank Removal
Stop Description: Tank Removal
Cal Water Watershed Name: Penasquitos - Tecolote (906.50)
DWR Groundwater Subbasin Name:
Site History:

On March 3, 2009, an underground storage tank (UST) and associated piping was removed from the site. At that time, soil samples and a standing water grab sample in the tank excavation were taken under the direction of the Department of Environmental Health (DEH). Total petroleum hydrocarbons from gasoline (TPHg) and diesel (TPHd), and petroleum constituents were below laboratory detection limits in the soil samples. However, the standing water grab sample contained TPHg at 61 micrograms per liter (ug/l), TPHd at 12,400 ug/l, ethylbenzene at 0.48 ug/l, toluene at 0.31 ug/l, total xylenes at 2.34 ug/l, and naphthalene at 5.49 ug/l. The tank excavation was back-filled with native soil and clean, imported fill. The standing water in the tank excavation was not removed prior to back-filling the excavation, as it was assumed this was the level of naturally occurring groundwater on site. Kahl Evironmental Services (KES) drilled four soil borings to depths of 20-50 feet below ground surface (bgs) that were located to the northeast, west, east, and south of the UST excavation. TPH from gasoline and diesel and petroleum constituents were below laboratory detection limits in all soil samples. Due to the results of the standing water grab sample, three of the borings were completed as groundwater monitoring wells. Groundwater levels were at 24 to 31 feet during the two monitoring events that were completed. Results from groundwater sampling showed that TPH from gasoline and petroleum constituents were below laboratory detection limits, however, TPH from diesel was detected at 71 ug/l from monitoring well 3 during the second sampling event. Based upon these results, KES concluded that the water encountered within the UST cavity was ponded water, not groundwater, as it does not correspond to groundwater levels in the monitoring wells. The clayey soil encountered in the tank excavation further supports this conclusion. EnviroApplications, Inc. (EAI), the consultant that completed the second groundwater monitoring event, further concluded that the ponded water may have been due to a possible spill of petroleum products when the UST or product lines were removed. This is further supported by the observation that the UST had no corrosion or holes and that no soil contamination was observed when the UST was removed. EAI recommended no further action and requested case closure as petroleum hydrocarbons found in the ponded water within the UST excavation have not significantly impacted the groundwater beneath the site. DEH concurs with the consultant's conclusions and recommendation to close the case.

Group With Access Desc:	Publicly available, and accepts fleet cards or station-specific fueling cards 24 hours a day. See "Access Days Time" and "Cards Accepted" fields for more details.
LPG Primary:	true
LPG Primary Desc:	Primary: A propane station is considered primary because it meets the following criteria, developed based on feedback from the propane industry: 1. The station is staffed and able to fuel vehicles during normal business hours (e.g., 8am-5pm M-F), and does not require drivers to call ahead; 2. The station is equipped with a dedicated or purpose-built fuel dispenser for vehicle fueling; and 3. The station accepts credit cards or fleet cards.

5345 OVERLAND AV
SAN DIEGO CA 921231203 | LUST

Global ID: T0607300284
Case Type: LUST Cleanup Site
Status: Open - Remediation
Status Date: 2007-08-10 00:00:00
RB Case No: 9UT1459
LOC Case No: H12166-001
Lead Agency: SAN DIEGO COUNTY LOP
CUF Case: YES
Begin Date: 1989-06-21 00:00:00
How Discovered: Tank Closure
Stop Method: Other Means
County: San Diego
Latitude: 32.8324331712784
Longitude: -117.130206227303

Case Worker: EM
File Location: Local Agency
Local Agency: SAN DIEGO COUNTY LOP
Potential Media Of Concern: Diesel, Gasoline, Waste Oil / Motor / Hydraulic / Lubricating
Potential Media Affected: Aquifer used for drinking water supply
How Discovered Description: UST removal
Stop Description: OTHER MEANS
Cal Water Watershed Name: San Diego - Lower San Diego - Mission San Diego (907.11)
DWR Groundwater Subbasin Name:
Site History:

Seven USTs and related fueling equipment was removed in August 1989. Hydrocarbon-impacted soil was observed during UST removal activities and confirmed with regulatory directed soil sampling. Approximately 1,700 cubic yards of hydrocarbon impacted soil was excavated and stockpiled onsite. 350 cubic yards of soil was disposed offsite and the remaining soil was placed in two "biocells" to be remediated. Following attempted remedial activities, the larger of the two "biocells" was excavated in its entirety and disposed offsite. The smaller of the two biocells consisted of approximately 208 cubic feet and is currently present at the site. Moisture and nutrients were added to this biocell via piping in efforts to remediate hydrocarbon-impacted soil. Numerous borings and groundwater monitoring wells have been installed at the site to conducted both assessment and remediation activities. The consultant determined during the course of assessment activities that an acceptable vapor risk exists at the site and surrounding structures. The site is currently undergoing dual phase extraction, which started in August 2009.

Violations

Violation Date: 6/17/2014 **Violation Program:** HW
Violation Division: San Diego County Department of Env Health **Violation Source:** CERS
Citation: 22 CCR 12 66262.34(d) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(d)
Violation Notes:

Returned to compliance on 07/14/2014.

Violation Description:

Failure to dispose of hazardous waste within 180 days (or 270 if waste is transported over 200 miles) for the generator who generates less than 1000 kilogram per month, but more than 100 kilograms per month.

Violations

Violation Date: 6/17/2014 **Violation Program:** HW
Violation Division: San Diego County Department of Env Health **Violation Source:** CERS
Citation: 22 CCR 12 66262.40(c) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.40(c)
Violation Notes:

Returned to compliance on 07/14/2014.

Violation Description:

Failure to determine if the waste generated is a hazardous waste and to maintain analysis results for three years.

Violations

Violation Date: 2/9/2016 ***Violation Program:*** HMRRP
Violation Division: San Diego County Department of Env Health ***Violation Source:*** CERS
Citation: HSC 6.95 25505(a)(4) - California Health and Safety Code, Chapter 6.95, Section(s) 25505(a)(4)
Violation Notes:

Returned to compliance on 02/10/2016.

Violation Description:

Failure to provide initial and annual training to all employees in safety procedures in the event of a release or threatened release of a hazardous material or failure to document and maintain training records for a minimum of three years.

Violations

Violation Date: 1/26/2015 ***Violation Program:*** HW
Violation Division: San Diego County Department of Env Health ***Violation Source:*** CERS
Citation: 22 CCR 12 66262.34(d) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(d)
Violation Notes:

Returned to compliance on 09/30/2015.

Violation Description:

Failure to dispose of hazardous waste within 180 days (or 270 if waste is transported over 200 miles) for the generator who generates less than 1000 kilogram per month, but more than 100 kilograms per month.

Violations

Violation Date: 1/26/2015 ***Violation Program:*** HMRRP
Violation Division: San Diego County Department of Env Health ***Violation Source:*** CERS
Citation: HSC 6.95 25507 - California Health and Safety Code, Chapter 6.95, Section(s) 25507
Violation Notes:

Returned to compliance on 05/13/2015.

Violation Description:

Failure to adequately establish and implement a business plan when storing/handling a hazardous material at or above reportable quantities.

Violations

Violation Date: 1/26/2015 ***Violation Program:*** HW
Violation Division: San Diego County Department of Env Health ***Violation Source:*** CERS
Citation: 22 CCR 12 66262.40(c) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.40(c)
Violation Notes:

Returned to compliance on 09/30/2015.

Violation Description:

Failure to determine if the waste generated is a hazardous waste and to maintain analysis results for three years.

Citation: 22 CCR 15 66265.174 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.174
Violation Notes:

Returned to compliance on 03/03/2017.

Violation Description:

Failure to inspect weekly areas where hazardous waste containers are stored. The owner or operator must look for leaking containers and for deterioration of containers caused by corrosion or other factors.

Violations

Violation Date: 2/19/2015 ***Violation Program:*** HW
Violation Division: San Diego County Department of Env Health ***Violation Source:*** CERS
Citation: 22 CCR 15 66265.195(a) - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.195(a)
Violation Notes:

Returned to compliance on 03/18/2015.

Violation Description:

Failure of the owner or operator to conduct inspections and maintain inspection records at the facility of the following tank equipment:
1) Overfill/spill control equipment (e.g., waste-feed cutoff systems, bypass systems, and drainage systems) to ensure that it is in good working order;
2) The aboveground portions of the tank system, if any, to detect corrosion or releases of waste;
3) Data gathered from monitoring equipment and leak-detection equipment, (e.g., pressure and temperature gauges, monitoring wells) to ensure that the tank system is being operated according to its design;
4) The construction materials and the area immediately surrounding the externally accessible portion of the tank system including secondary containment structures (e.g., dikes) to detect erosion or signs of releases of hazardous waste (e.g., wet spots, dead vegetation); and
5) For uncovered tanks, the level of waste in the tank, to ensure compliance with section 66265.194(b)(3).
