Site History:			

INTRODUCTION

San Diego Gas and Electric (SDG&E), Kearny - Maintenance and Operations Facility occupies a 10.5 acre parcel zoned for industrial uses. The site is used for the following purposes; storage of hazardous waste, maintenance of a fleet of service vehicles, electrical transformer repair, electrical power substation.

PERMITTING

SDG&E has a Series C Standardized Permit for the storage of used oil containing poly-chlorinated biphenyls (PCBs). The PCB waste is derived from oil removed from electrical transformers. The waste oil is consolidated at the site for up to one year prior to being sent off-site for disposal. There are three permitted units at the site; (1) 7,400 gallon storage tank, (2) Shed # 1 for the storage of 5,610 gallons of containerized waste, (3) Shed # 2 for the storage of 6,215 gallons of containerized waste. The permit has an effective date of July 3, 2012, and a life time of ten (10) years.

CORRECTIVE ACTION

Corrective Action - Background
Permitted hazardous waste facilities are required to complete corrective action to address the release or potential releases of hazardous waste or hazardous waste constituents. In 1996, SDG&E completed a Phase I Environmental Assessment which identified 68 Solid Waste Management Units (SWMUs). Based on further evaluation it was determined that additional investigation was required at 28 SWMUs; these 28 SWMUs were listed in the Corrective Action Consent Agreement (Consent Agreement) [Docket HWCA: P2-03/04-010] dated April 2004.

Following execution of the Consent Agreement, SDG&E compiled information on historical investigations of 15 SWMUs which was documented in the Current Conditions Report dated December 2004. SDG&E investigated the remaining 13 SWMUs between 2005 and 2009.

Corrective Action - Investigation
A RCRA Facility Investigation (RFI) report for the SDG&E Facility was completed dated October 2009. The investigation determined that metals, volatile organic compounds, poly-chlorinated biphenyls and total petroleum hydrocarbons had been released at the site. No releases were identified from the permitted storage unit. The risk assessment completed as part of the RFI concluded that contaminants identified in a 1.3 acre impacted area in the center of the site required further remedy evaluation. The remaining 9.2 acres of the 10.5 acre site was deemed acceptable for unrestricted use.

As part of RFI activities, SDG&E excavated and removed 1.7 cubic yards of soil from the electrical power substation (SWMU No. 28). The removal action was completed during an unscheduled maintenance event at the substation. Confirmation samples were collected to verify that all contaminants were removed and the area was backfilled with clean soil.

Corrective Action - Remedy Selection
A Corrective Measures Study (CMS) report for the 1.3 acre impacted area of the site was completed dated January 2010. The CMS recommended a land use covenant (LUC) be enacted as the remedy for the impacted area. Natural attenuation was selected as the remedy for groundwater. The public comment period for the CMS report and DTSC's draft Statement of Basis ended on April 30, 2010. DTSC prepared a response to comments document and approved the remedy on May 20, 2010.

Corrective Action - Current Status
DTSC and SDG&E entered into an Operations & Maintenance (O&M) Agreement and Land Use Covenant (LUC) on March 8, 2011. The LUC was recorded with San Diego County on April 7, 2011.

Corrective Action - Planned Activities
SDG&E are required to implement the O&M Agreement and LUC. SDG&E will submit an annual self certification regarding compliance with the LUC. DTSC will conduct periodic inspections to ensure compliance; non-compliance will result in enforcement action by DTSC.

Facilities Details

Site Type 1:	CORRECTIVE ACTION	**Funding:**	
Site Type 2:	CORRECTIVE ACTION	**Area:**	IMPACTED AREA
Site Code:	400636	**Sub Area:**	

Special Program: | **Date Recorded:** 4/7/2011
National Priorities List: NO | **Assembly District:** 77
Acres: 20 ACRES
Status: CERTIFIED / OPERATION & MAINTENANCE
Cleanup Status: CERTIFIED / OPERATION & MAINTENANCE AS OF 4/25/2011
APN: 369-040-10, 3690401500
Summary Link: http://www.envirostor.dtsc.ca.gov/public/profile_report.asp?global_id=80001739&starttab=landuserestrictions
Cl Up Oversight AGCS: DTSC - SITE CLEANUP PROGRAM
Potential Cont. of Concern: POLYCHLORINATED BIPHENYLS (PCBS); 1,1-DICHLOROETHANE; 1,1-DICHLOROETHYLENE
Past Use(s) Caused Contaminants: ELECTRIC GENERATION/SUBSTATION, MAINTENANCE / CLEANING, TRANSFORMER REPAIR, UTILITY - ELECTRIC
Potential Media Affected: OTHER GROUNDWATER AFFECTED (USES OTHER THAN DRINKING WATER), SOIL, SOIL VAPOR
School District:

Address Desc: 5488 OVERLAND AVE
Address Desc 2: 5488 OVERLAND AVE
Clean Up Status: CERTIFIED / OPERATION & MAINTENANCE AS OF 4/25/2011
Clean Up Oversight Agencies:
School District:
Program Type: DTSC - SITE CLEANUP PROGRAM
Past Caused Contamination: ELECTRIC GENERATION/SUBSTATION, MAINTENANCE / CLEANING, TRANSFORMER REPAIR, UTILITY - ELECTRIC
APN: 369-040-10, 3690401500
Potential Media Affected: OTHER GROUNDWATER AFFECTED (USES OTHER THAN DRINKING WATER), SOIL, SOIL VAPOR
Potential Contaminants:

1,1-DICHLOROETHANE
1,1-DICHLOROETHYLENE

POLYCHLORINATED BIPHENYLS (PCBS)

Site History:

INTRODUCTION

San Diego Gas and Electric (SDG&E), Kearny - Maintenance and Operations Facility occupies a 10.5 acre parcel zoned for industrial uses. The site is used for the following purposes; storage of hazardous waste, maintenance of a fleet of service vehicles, electrical transformer repair, electrical power substation.

PERMITTING

SDG&E has a Series C Standardized Permit for the storage of used oil containing poly-chlorinated biphenyls (PCBs). The PCB waste is derived from oil removed from electrical transformers. The waste oil is consolidated at the site for up to one year prior to being sent off-site for disposal. There are three permitted units at the site; (1) 7,400 gallon storage tank, (2) Shed # 1 for the storage of 5,610 gallons of containerized waste, (3) Shed # 2 for the storage of 6,215 gallons of containerized waste. The permit has an effective date of July 3, 2012, and a life time of ten (10) years.

CORRECTIVE ACTION

Corrective Action - Background
Permitted hazardous waste facilities are required to complete corrective action to address the release or potential releases of hazardous waste or hazardous waste constituents. In 1996, SDG&E completed a Phase I Environmental Assessment which identified 68 Solid Waste Management Units (SWMUs). Based on further evaluation it was determined that additional investigation was required at 28 SWMUs; these 28 SWMUs were listed in the Corrective Action Consent Agreement (Consent Agreement)[Docket HWCA: P2-03/04-010] dated April 2004.

Following execution of the Consent Agreement, SDG&E compiled information on historical investigations of 15 SWMUs which was documented in the Current Conditions Report dated December 2004. SDG&E investigated the remaining 13 SWMUs between 2005 and 2009.

Corrective Action - Investigation
A RCRA Facility Investigation (RFI) report for the SDG&E Facility was completed dated October 2009. The investigation determined that metals, volatile organic compounds, poly-chlorinated biphenyls and total petroleum hydrocarbons had been released at the site. No releases were identified from the permitted storage unit. The risk assessment completed as part of the RFI concluded that contaminants identified in a 1.3 acre impacted area in the center of the site required further remedy evaluation. The remaining 9.2 acres of the 10.5 acre site was deemed acceptable for unrestricted use.

As part of RFI activities, SDG&E excavated and removed 1.7 cubic yards of soil from the electrical power substation (SWMU No. 28). The removal action was completed during an unscheduled maintenance event at the substation. Confirmation samples were collected to verify that all contaminants were removed and the area was backfilled with clean soil.

Corrective Action - Remedy Selection
A Corrective Measures Study (CMS) report for the 1.3 acre impacted area of the site was completed dated January 2010. The CMS recommended a land use covenant (LUC) be enacted as the remedy for the impacted area. Natural attenuation was selected as the remedy for groundwater. The public comment period for the CMS report and DTSC's draft Statement of Basis ended on April 30, 2010. DTSC prepared a response to comments document and approved the remedy on May 20, 2010.

Corrective Action - Current Status
DTSC and SDG&E entered into an Operations & Maintenance (O&M) Agreement and Land Use Covenant (LUC) on March 8, 2011. The LUC was recorded with San Diego County on April 7, 2011.

Corrective Action - Planned Activities
SDG&E are required to implement the O&M Agreement and LUC. SDG&E will submit an annual self certification regarding compliance with the LUC. DTSC will conduct periodic inspections to ensure compliance; non-compliance will result in enforcement action by DTSC.

Title: Consent Order with Enforcement and Settlement - Federal CA/FO (385)
Title Link:
Issued Completed Date: 12/18/2007

Permitting

Site Code: 400636
Site Facility Type: OPERATING PERMIT
- PERMITTED ACTIVITIES: CONTAINER, TANK STORAGE
- PERMIT AUTHORITY: Standardized

Program Type: HAZARDOUS WASTE FACILITY
Assembly District: 77
Senate District: 39
Facility Type: HIST PERMITTED
Facility History:

QUARTERLY UPDATE
Quarterly Update Period: April 2017 to June 2017

DTSC received no inquiries from the public or the facility. Also there were no significant oversight permitting activities.

FACILITY DESCRIPTION/ HISTORY
The San Diego Gas and Electric Co. (SDG&E) Kearny Polychlorinated Biphenyl (PCB) Storage Facility was constructed in 1982 and receives drummed liquid wastes generated on-site and off-site by SDG&E operations only. The liquids are generated from the collection of mineral oil contaminated with PCBs from the SDG&E system of transmission and distribution high voltage electrical lines. The liquids are relatively non-volatile oils and fluids which may contain PCBs in varying concentrations. The SDG&E Kearny PCB Storage Facility also receives solid wastes associated with the collection of PCB contaminated mineral oil. Generator knowledge and/or waste analyses will determine if the PCB contaminated waste also contains RCRA waste. No federal-regulated hazardous waste is stored in the Kearny PCB Storage Facility. If it is determined that the PCB contaminated hazardous waste also contains a federal-regulated hazardous waste, the hazardous waste is stored for no more than 30 days at the 90-day storage pad and then shipped off site to an authorized treatment/disposal facility.

The SDG&E Kearny PCBs Storage Facility is located in San Diego County. SDG&E is a combination public utility which owns and operates a high voltage electrical transmission and distribution system and a natural gas transmission and distribution system. The SDG&E is an "Operating Center" that includes construction and maintenance activities relating to the distribution of electricity. There are aboveground tanks, fueling stations and an electrical substation in addition to the Kearny PCB Storage Facility.

For information on corrective action activities at the site please refer to the EnviroStor Cleanup database

www.envirostor.dtsc.ca.gov/public/profile_report.asp?global_id=80001739 .

PERMITTING REGULATORY DESCRIPTION/ HISTORY
DTSC issued to SDG&E the first hazardous waste facility permit in November 28, 2000 and renewed the authorization by issuing a renewal permit on July 3, 2012. SDG&E, Kearny PCBs Storage Facility has a Series C Standardized Permit for the storage of waste containing PCBs which expires on July 2, 2022. There are three permitted units at the site:

(1) PCB Storage Tank (7,400 gallon).
(2) PCB Storage Building # 1 for the storage of waste in containers (5,610 gallons).
(3) PCB Storage Building # 2 for the storage of waste in containers (6,215 gallons).

Violations

Violation Date: 11/6/2014 ***Violation Program:*** UST
Violation Division: San Diego County Department of Env Health ***Violation Source:*** CERS
Citation: 23 CCR 16 2632, 2634, 2636, 2666 - California Code of Regulations, Title 23, Chapter 16, Section(s) 2632, 2634, 2636, 2666
Violation Notes:

Returned to compliance on 11/12/2015.

Violation Description:

Failure of the leak detection equipment to be properly programmed or properly operated.

Violations

Violation Date: 11/12/2015 ***Violation Program:*** UST
Violation Division: San Diego County Department of Env Health ***Violation Source:*** CERS
Citation: 23 CCR 16 2636(f)(2) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2636(f)(2)
Violation Notes:

Returned to compliance on 11/12/2015.

Violation Description:

Failure of the pressurized piping to meet one or more of the following requirements: monitored at least hourly with the capability of detecting a release of 3.0 gallons per hour, and will restrict the flow of product through the piping or trigger an alarm when a release occurs.

Violations

Violation Date: 11/6/2014 ***Violation Program:*** UST
Violation Division: San Diego County Department of Env Health ***Violation Source:*** CERS
Citation: 23 CCR 16 2666(c) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2666(c)
Violation Notes:

Returned to compliance on 11/06/2014.

Violation Description:

Failure of line leak detector to detect a leak and/or failure of audible and visual alarm.

Violations

Violation Date: 11/3/2016 ***Violation Program:*** UST
Violation Division: San Diego County Department of Env Health ***Violation Source:*** CERS
Citation: 23 CCR 16 2636(f)(2) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2636(f)(2)
Violation Notes:

Returned to compliance on 11/03/2016.

Violation Description:

Failure of the line leak detector (LLD) monitoring pressurized piping to meet one or more of the following requirements:Monitor at least hourly.Be capable of detecting a release of 3.0 gallons per hour at 10 p.s.i.g.
Restrict or shut off the flow of product through the piping when a leak is detected.

Violations

Violation Date: 11/12/2013 ***Violation Program:*** UST
Violation Division: San Diego County Department of Env Health ***Violation Source:*** CERS
Citation: 23 CCR 16 2715(c)(2) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2715(c)(2)
Violation Notes:

Returned to compliance on 11/12/2013.

Violation Description:

Failure to comply with one or more of the following: maintain the spill bucket in good condition, containment free of debris/liquid, and/or to remove the contents of the spill bucket when a release/leak/spill was observed.

Violation Description:

Failure to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month if all of the following conditions are met: (1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms.
(2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f).
(3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount greater than one kilogram for more than 90 days.

Violation Notes:

Returned to compliance on 01/14/2016.

Violation Description:

Failure of the owner or operator to conduct inspections and maintain inspection records at the facility of the following tank equipment:
1) Overfill/spill control equipment (e.g., waste-feed cutoff systems, bypass systems, and drainage systems) to ensure that it is in good working order;
2) The aboveground portions of the tank system, if any, to detect corrosion or releases of waste;
3) Data gathered from monitoring equipment and leak-detection equipment, (e.g., pressure and temperature gauges, monitoring wells) to ensure that the tank system is being operated according to its design;
4) The construction materials and the area immediately surrounding the externally accessible portion of the tank system including secondary containment structures (e.g., dikes) to detect erosion or signs of releases of hazardous waste (e.g., wet spots, dead vegetation); and
5) For uncovered tanks, the level of waste in the tank, to ensure compliance with section 66265.194(b)(3).

DWR Groundwater Subbasin Name:

Site History:

Comments: Alliance Realty Partners, LLC (Alliance) applied to the Department of Environmental Health (DEH) Voluntary Assistance Program (VAP) to seek DEH concurrence with the results of the human health risk analysis and approval of a Property Mitigation Plan (PMP). DEH concurrence was needed in order to meet the requirements of the City of San Diego MND/Development Permit for the proposed mixed-use project. Site development included construction of slab-on-grade three- and four-story wood-framed buildings, housing 360 residential apartments and approximately 5,000 square feet of retail space, surrounding a four-story above-grade parking structure. Pre-existing on-site buildings were demolished and associated utilities were removed to accommodate redevelopment. Remedial grading was conducted to accommodate site drainage and to adjust the existing expansive clay soil. Remedial grading consisted of over-excavating the upper 4 to 5 feet of native soil and mixing it with approximately 23,000 cubic yards (cy) of clean imported soil, which elevated the pre-existing grade by approximately 4 feet. In the Phase 1 dated November 8, 1999, ATC identified historical degreaser usage by Eurotherm (Action Instruments) in the 8589 and 8601 Aero Drive buildings from before 1982 until 1994. ATC inferred that 1,1,1-Trichloroethane (1,1,1-TCA) and Methylene chloride may have been used during degreasing operations. Based on historical degreaser usage, ATC recommended conducting a soil gas survey to assess for potential presence of VOCs in known former degreasing locations and hazardous materials storage areas at the 8589 and 8601 Aero Drive buildings, and the hazardous waste storage area in the southwest corner of the site. On November 23, 2004, N&M collected soil vapor samples at a depth of 2.5 feet bgs at fifteen locations at the 8601 Aero Drive building. The soil vapor sampling locations were located at indoor manufacturing areas and suspected outdoor hazardous materials storage locations. VOCs were detected at low concentrations in all fifteen samples. N&M concluded that low VOC concentrations in soil vapor did not suggest that these chemicals were present in on-site soil at elevated concentrations, and that the presence of VOCs in shallow soil vapor was possibly due to regional soil or groundwater contamination from one or more sources in the site vicinity. N&M made no recommendation for further assessment. On July 8, 2005, soil gas samples were collected at depths ranging from 2 to 5 feet bgs at ten locations (SV1 through SV10). Freon 113 was detected in six samples at concentrations ranging from 2.3 to 40 fÊg/l. Tetrachloroethene (PCE) was detected at a concentration of 788 micrograms per cubic meter (fÊg/m3) in a duplicate sample analyzed at a stationary laboratory. On June 28, 2012, Tetra Tech installed eleven soil gas sampling locations (SG-1 through SG-11) at depths of approximately 5 feet bgs within open areas of the site. Freon 113 was detected in all 11 soil gas sample locations at concentrations ranging from 0.27 to 69 fÊg/l. Benzene was detected in 10 sample locations at concentrations ranging from 0.02 to 0.06 fÊg/l, which exceeded the residential CHHSL of 0.036 fÊg/l. PCE was detected at one location at the laboratory method detection limit of 0.02 fÊg/l, which does not exceed the residential CHHSL of 0.18 fÊg/l. 1,1-dichloroethane (1,1-DCA) was also detected at one location at a concentration of 0.14 fÊg/l. No CHHSL exists for 1,1-DCA. Cursory vapor risk modeling performed by Tetra Tech for the highest benzene concentration at the site indicated an incremental cancer risk of 10-9 and a hazard index of 10-5, which is less than regulatory thresholds of 10-6 and 1, respectively. As part of a Phase II Assessment, dated September 18, 2012, Langan collected soil vapor samples at depths ranging from three to five feet bgs at nine locations inside and outside the 8589, 8593, and 8601 Aero Drive buildings. PCE was notdetected at concentrations exceeding residential or commercial CHHSLs. Benzene concentrations exceeded residential or commercial CHHSLs at three locations at the site. No benzene source was identified from a review of historical data. Langan conducted a human health risk evaluation for soil gas and groundwater. For indoor air inhalation via the vapor intrusion pathway, the total cancer risk was estimated at 6.8 ~ 10-8 and the chronic risk was estimated at 3.2 ~ 10-4. These risks are considered acceptable for residential receptors. Based on relatively low concentrations of PCE and benzene in soil vapor, depth to groundwater, and expected attenuation of contaminant concentration with increasing depth, Langan concluded that regional groundwater is unlikely to be impacted by concentrations of soil vapor at the site. The PMP was approved by DEH in a letter to Alliance on October 4, 2012. Over-excavation of the upper five feet of native soil was performed during remedial grading activities for geotechnical purposes. Over-excavated areas were screened for VOC impacts. Soil was screened during utility trenching whenever trench depths extended deeper than the over-excavated depths. Post-excavation confirmation soil sampling was conducted in the bottoms and sidewalls of excavations and in soil stockpiles to verify complete removal of impacted soil and to characterize suspect soil stockpiles. On May 3, 2013, approximately 5 to 10 cubic yards (cy) of concrete, asphalt, and soil construction debris was temporarily imported by American Wrecking from their 22nd and Commercial Street project in San Diego and placed on a concrete slab. The 5-10 cy debris stockpile was removed from the site by American Wrecking on May 15, 2013. On November 7, 2013, a hydraulic fluid release occurred near the southwest corner of the site during utility trench excavation. The segregated stockpiles, totaling less than 5 cy, were removed from the site on December 14, 2013 by Perrault Corporation. Soil was disposed of at Thermal Remediation Solutions in Azusa, California. On November 8, 2013, Langan was informed of a diesel release west of the parking structure. Alliance informed Langan that the spill of approximately 20 to 30 gallons of diesel had occurred approximately two weeks previously. Impacted soil was excavated to a depth of 3 feet bgs. One sample was collected from the soil stockpile and submitted for waste profile laboratory analysis. The approximately 15 cy segregated stockpile was removed from the site on December 14, 2013 by Perrault Corporation. Soil was disposed of at Thermal Remediation Solutions in Azusa, California. On August 6, 2014, Langan observed a chemical odor and elevated PID readings emanating from soil excavated from a joint utility trench near the southeast entrance of the site. Alliance indicated that the source of the suspected impacts was a small amount of diesel fuel (approximately one to two gallons) that spilled onto the soil while the utility contractor was refueling equipment. Step-out sampling was conducted, until bottom and sidewall samples confirmed that no TPH

was present in residual soil at concentrations exceeding laboratory method detection limits. A total of 5 cy of soil was placed in two segregated stockpiles as a result of confirmation sampling activities. Based on available laboratory analytical results, the soil was classified as non-hazardous and disposed of at EDCO Disposal Corporation in Lemon Grove, California, or its sister site, SANCO, in Lemon Grove, California. These facilities accept construction debris, including non-hazardous soil, for disposal. Approximately 23,000 cubic yards of soil was required for geotechnical remedial grading at the Site and to raise the overall grade by five feet across the site. Native soil from a site at Thorn Street and Fifth Avenue in San Diego was properly tested and used at the Kearny Mesa Site. In the Closure Report, it was concluded that impactedsoil was appropriately handled and properly disposed of at a state-approved waste management facility. Approximately 35 cubic yards of impacted soil was disposed of during construction activities. As a result of these activities, no further soil management activities were recommended with respect to the environmental conditions at the site. DEH concurs that No Further Action is required at the Site.

Potential Media Of Concern: Gasoline
Potential Media Affected: Aquifer used for drinking water supply
How Discovered Description: TANK REMOVAL
Stop Description: REPLACE VAPOR RECOVERY PIPING
Cal Water Watershed Name: San Diego - Lower San Diego - Mission San Diego (907.11)
DWR Groundwater Subbasin Name:
Site History:

The site was operated as a Mesa Fuels Service Station from 1965 to 1989. The station operated four 12,000-gallon fuel tanks. The case was opened on August 1, 1989, following the removal of the underground storage tank (UST) system in July 1989. Site investigation has continued from the time of the tank removal through November 13, 2006. Site investigations identified significant soil and groundwater impacts. Soil impacts were estimated to be approximately 90,139 cubic yards with a total mass of 50,000 to 70,000 pounds of petroleum hydrocarbons. These impacts extend from approximately 5 to 66 feet below ground surface. Free product was observed from April 1992 through July 2006 in one well. A vapor extraction system operated from October 1991 through June 1994. This system has recovered an estimated 53,464 pounds of petroleum hydrocarbons. Site has been in post remedial monitoring since June 1994 A vapor risk assessment has been completed and it has been concluded that the residual soil and groundwater impacts do not pose a risk to occupants of the existing site buildings.

Site History:

Site History: Moore Printed Circuits (MPC) facility is located at 8575 Aero Drive in San Diego. The site is in the block bounded by Glen Curtis Road and Sandrock Road, and located in a commercial / industrial area of San Diego. MPC operated a Permit by Rule onsite hazardous waste treatment facility between 1968 and 2001. An environmental site assessment was conducted by the operator following the closure. Copper, lead, chromium, and chlorinated solvents concentrations exceeding hazardous waste levels were detected in the soil and in the soil gas. San Diego Environmental Health

Department referred Moore Printed Circuits to DTSC for determination of the appropriate action and closure. In the Spring 2002, property owners excavated approximately 600 tons of soil from inside the building and stockpiled within the facility without prior approval by DTSC. In December 2002, DTSC signed a Corrective Action Consent Letter with the property owner. In fiscal year 2004/2005, DTSC approved Final Site Assessment Report and Risk Assessment that recommended a land use restriction as a final remedy for the site. DTSC issued No Further Action Letter and Implementation and Enforcement Agreement in July 2005. DTSC conducts annual LUC inspections at the Facility.

Citation: 22 CCR 15 66265.195(a) - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.195(a)
Violation Notes:

Returned to compliance on 08/10/2015.

Violation Description:

Failure of the owner or operator to conduct inspections and maintain inspection records at the facility of the following tank equipment:
1) Overfill/spill control equipment (e.g., waste-feed cutoff systems, bypass systems, and drainage systems) to ensure that it is in good working order;
2) The aboveground portions of the tank system, if any, to detect corrosion or releases of waste;
3) Data gathered from monitoring equipment and leak-detection equipment, (e.g., pressure and temperature gauges, monitoring wells) to ensure that the tank system is being operated according to its design;
4) The construction materials and the area immediately surrounding the externally accessible portion of the tank system including secondary containment structures (e.g., dikes) to detect erosion or signs of releases of hazardous waste (e.g., wet spots, dead vegetation); and
5) For uncovered tanks, the level of waste in the tank, to ensure compliance with section 66265.194(b)(3).

County Number:
County Name: SAN DIEGO
Regional Board Contact:
Region: SAN DIEGO REGION 9
Remarks: The SWAT report indicates that low concentrations of volatile organic compounds were identified in groundwater samples. A
determination of whether the site leaks hazardous waste could not be made due to a lack of water chemical data.

Violation Division: San Diego County Department of Env Health ***Violation Source:*** CERS
Citation: 23 CCR 16 2641(a) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2641(a)

Violation Notes:

Returned to compliance on 10/16/2015.

Violation Description:

Failure of sensor to be located in the proper position/location.

Violations

Violation Date: 10/16/2015 ***Violation Program:*** UST
Violation Division: San Diego County Department of Env Health ***Violation Source:*** CERS
Citation: 23 CCR 16 2715 - California Code of Regulations, Title 23, Chapter 16, Section(s) 2715
Violation Notes:

Returned to compliance on 10/16/2015.

Violation Description:

Failure to comply with one or more of the designated operator monthly inspection requirements: failed to inspect the monthly alarm history report; attach a copy of the alarm history; failed to inspect for the presence of liquid or debris in the spill container/spill bucket and under dispenser containment; failed to inspect the under dispenser containment to ensure that monitoring equipment is placed in the proper position; failure to inspect for liquid or debris in the containment sump where an alarm occurred or for which there is no record of a service visit; or failure to check that all testing and maintenance has been completed and documented.

Violations

Violation Date: 10/6/2016 ***Violation Program:*** UST
Violation Division: San Diego County Department of Env Health ***Violation Source:*** CERS
Citation: 23 CCR 16 2636(f)(5) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2636(f)(5)
Violation Notes:

Returned to compliance on 10/06/2016.

Violation Description:

"Failure to meet one or more of the following monitoring requirements in lieu of the requirement to be tightness tested annually: The monitoring system maintains all product piping outside the dispenser to be fail-safe and shut down the pump when a leak is detected. The monitoring system shuts down the pump or stops flow when a leak is detected in the under dispenser containment (UDC)."

Violations

Inspector: Central HC009 Inspection ID:5149537

Violations

Violation Date: 10/14/2014 ***Violation Program:*** HMRRP
Violation Division: San Diego County Department of Env Health ***Violation Source:*** CERS
Citation: HSC 6.95 25507 - California Health and Safety Code, Chapter 6.95, Section(s) 25507
Violation Notes:

Returned to compliance on 10/15/2014.

Violation Description:

Failure to adequately establish and implement a business plan when storing/handling a hazardous material at or above reportable quantities.

Violations

Violation Date: 10/14/2014 ***Violation Program:*** HW
Violation Division: San Diego County Department of Env Health ***Violation Source:*** CERS
Citation: 22 CCR 12 66262.34(d) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(d)
Violation Notes:

Returned to compliance on 10/31/2014.

Violation Description:

Failure to dispose of hazardous waste within 180 days (or 270 if waste is transported over 200 miles) for the generator who generates less than 1000 kilogram per month, but more than 100 kilograms per month.

Violations

Violation Date: 10/14/2014
Violation Program: HW
Violation Division: San Diego County Department of Env Health
Violation Source: CERS
Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Notes:

Returned to compliance on 10/31/2014.

Violation Description:

Failure to properly label hazardous waste accumulation containers with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.

Violations

Violation Date: 10/14/2014
Violation Program: HW
Violation Division: San Diego County Department of Env Health
Violation Source: CERS
Citation: 40 CFR 1 265.173 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.173
Violation Notes:

Returned to compliance on 10/31/2014.

Violation Description:

Failure to properly close hazardous waste containers when not in active use.

Violations

Violation Date: 7/16/2014 ***Violation Program:*** HW
Violation Division: San Diego County Department of Env Health ***Violation Source:*** CERS
Citation: 22 CCR 23 66273.34 - California Code of Regulations, Title 22, Chapter 23, Section(s) 66273.34
Violation Notes:

Returned to compliance on 08/11/2014.

Violation Description:

Failure to properly label the following categories of universal waste as:
1) Each batteries or the container in which the batteries are contained as "Universal Waste-Battery(ies)".
2) Each mercury-containing equipment or the container in which the mercury-containing equipment is contained as "Universal Waste -Mercury-Containing Equipment".
3) Each Florescent lamp or the container or package in which the lamps are contained as "Universal Waste-Lamp(s)".
4) Each electronic devices or the container or pallet in or on which the electronic devices are contained as "Universal Waste-Electronic Device(s)".
5) Each CRTs or the container or pallet in or on which the CRTs are contained as "Universal Waste-CRT(s)".
6) A container of CRT glass shall be labeled or marked clearly with the following phrase: "Universal Waste-CRT glass".
7) In lieu of labeling individual electronic devices, CRTs, and/or containers of CRT glass pursuant to subsections d) through f) of this section, a universal waste handler may combine, package, and accumulate those universal wastes in appropriate containers or within a designated area demarcated by boundaries that are clearly labeled with the applicable portion(s) of the following phrase: "Universal Waste-Electronic Device(s)/Universal Waste - CRT(s)/Universal Waste-CRT Glass".

Violations

Violation Date: 7/14/2016 ***Violation Program:*** UST

Citation: HSC 6.7 25290.1(e) - California Health and Safety Code, Chapter 6.7, Section(s) 25290.1(e)
Violation Notes:

Returned to compliance on 02/13/2017.

Violation Description:

Failure to maintain the interstitial space such that a breach in the primary or secondary containment is detected before the liquid or vapor phase of the hazardous substance stored in the UST tank is released into the environment, i.e., vapor, pressure, hydrostatic (VPH) monitoring.

Violations

Violation Date: 7/14/2016 ***Violation Program:*** UST
Violation Division: San Diego County Department of Env Health ***Violation Source:*** CERS
Citation: 23 CCR 16 2712 - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712
Violation Notes:

Returned to compliance on 02/13/2017.

Violation Description:

Failure to comply with any of the applicable requirements of the permit issued for the operation of the UST system.

Violations

Violation Date: 7/14/2016 ***Violation Program:*** UST
Violation Division: San Diego County Department of Env Health ***Violation Source:*** CERS
Citation: HSC 6.7 25299(a)(9) - California Health and Safety Code, Chapter 6.7, Section(s) 25299(a)(9)
Violation Notes:

Returned to compliance on 02/13/2017.

Violation Description:

Leak detection equipment disabled or tampered with in a manner that would prevent the monitoring system from detecting and/or alerting the owner/operator of a leak.

Violations

Violation Date: 7/14/2016 ***Violation Program:*** UST
Violation Division: San Diego County Department of Env Health ***Violation Source:*** CERS
Citation: 23 CCR 16 2631(g), 2632(c)(2)(A) & (B) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2631(g), 2632(c)(2)(A) & (B)
Violation Notes:

Returned to compliance on 02/13/2017.

Violation Description:

Failure of the double-walled interstitial space of the tank to be continuously monitored with an audible and visual alarm.

Violations

Violation Date: 7/14/2016 ***Violation Program:*** UST
Violation Division: San Diego County Department of Env Health ***Violation Source:*** CERS
Citation: 23 CCR 16 2715(c) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2715(c)
Violation Notes:

Returned to compliance on 02/13/2017.

Violation Description:

Failure to comply with one or more of the following designated operator (DO) monthly inspection requirements:
Be performed by an ICC certified DO.
Inspect monthly alarm history report, check that alarms are documented and responded to appropriately, and attach a copy. Inspect for the presence of liquid/debris in spill containers.
Inspect for the presence of liquid/debris in under dispenser containment (UDC) and ensure that the monitoring equipment is positioned correctly. Inspect for liquid or debris in containment sumps where an alarm occurred with no service visit. Check that all testing and maintenance has been completed and documented.
Verify that all facility employees have been properly trained.

Violation Source: CERS
Citation: HSC 6.95 25508.1(a)-(e) - California Health and Safety Code, Chapter 6.95, Section(s) 25508.1(a)-(e)
Violation Notes:

Returned to compliance on 02/18/2015.

Violation Description:

Failure to electronically update business plan within 30 days of any one of the following events:
A 100 percent or more increase in the quantity of a previously disclosed material.
Any handling of a previously undisclosed hazardous materials at or above reportable quantities.
A change of business address, business ownership, or business name.

DWR Groundwater Subbasin Name:			

Site History:

The City of San Diego operates the Fire Department Repair Facility (the Site) as a centralized repair station for heavy vehicles. In January 2010, two open unauthorized release cases at the Site, #H19194-004 (diesel release) and #H19194-005 (gasoline release), were consolidated into one case (#H19194-004). Case #H19194-005 was administratively closed. On April 28, 1998, a 550-gallon diesel underground storage tank (UST) and associated piping were removed from the site. Soil samples were collected in the tank excavation and below product piping. The maximum concentration of total petroleum hydrocarbons reported as diesel (TPH-d) was 5500 milligrams per kilogram (mg/kg) in a soil sample collected beneath piping adjacent to a former diesel dispenser. The following year, two more USTs were removed. On February 17, 1999, one 550-gallon waste oil UST was removed from within a shop bay, and one 1,000-gallon gasoline UST was removed from an area south of the former diesel UST excavation. The maximum concentration of total recoverable petroleum hydrocarbons was 48 mg/kg in a soil sample from the waste oil tank excavation. The maximum concentration of TPH reported as gasoline (TPH-g) was 2,000 mg/kg in a soil sample collected from the gasoline UST excavation. In August 2001, a site assessment workplan (SAP) was conditionally approved by DEH; however, the assessment was never completed. A revised SAP was approved in March 2011, and implemented in May 2011. One boring/groundwater monitoring well (MW1) was advanced next to the former diesel dispenser, and a second boring/groundwater monitoring well (MW2) was installed adjacent to the former gasoline UST excavation. TPH-d concentrations in soil samples collected from the MW1 boring ranged from 986 mg/kg to 5,470 mg/kg. The groundwater sample from MW1 contained elevated concentrations of benzene, ethylbenzene, and 1,2-dichloroethane (1,2-DCA), but dissolved methyl tertiary butyl ether (MTBE) was not detected. In contrast, the MW2 groundwater sample contained MTBE, but dissolved benzene, ethylbenzene, and 1,2-DCA were not detected. Soil samples collected from the MW2 boring contained low concentrations of TPH-d, but TPH-g was not detected. In October/November 2012, two additional monitoring wells and one boring were installed at the site. A maximum concentration of 7,600 mg/kg TPH-g was reported in a soil sample collected from the boring advanced next to the former diesel dispenser. Groundwater monitoring and sampling events were conducted between 2011 and 2014. No free product was observed at the site. The consultant estimates that approximately 1,051 cubic yards of impacted soil with TPH concentrations above 100 mg/kg remain at the site. Groundwater beneath the site has designated beneficial uses, including potential municipal use, in the State's Basin Plan. The consultant estimates that, based on stable and decreasing concentration trends, dissolved benzene, ethylbenzene, and 1,2-DCA concentrations will naturally degrade to concentrations below their Maximum Contaminant Levels (MCLs) in approximately 2033 (18 years), 2015 (this year), and 2021 (6 years), respectively. The consultant concludes that the dissolved contaminant plume is stable and has been adequately delineated, and recommends case closure. DEH

concurs with the conclusions and recommendation for case closure. A 60-day time period was provided for the public to review and comment on DEH's Intent to Close Case Notification letter. Comments were only received from the City of San Diego Public Utilities Department (PUD). In a response letter to PUD dated April 9, 2015, DEH acknowledges the City's right to develop groundwater sources, and states that the consultant estimates that contaminant concentrations will degrade to MCLs within twenty years. In addition, clean-up activities conducted at the site have remediated contaminants to levels which meet the State Water Resources Control Board's Low-Threat UST Case Closure Policy. The four groundwater monitoring wells on the site were destroyed on June 15, 2015, under DEH permit #DEH2015-LMWP-001645.

Location: 4075 Ruffin Rd.

Description: Ordered a dumpster from a vendor. It had a dirt and oil mixture on the bottom and it rained causing the mixture to run out of rusted holes in the bottom of the container. Previous contents of the container was scrap engine blocks. Analysis samples results not back yet The rain occurred over night and it is unknown how much if any entered the storm drain due to the storm drain being clogged .The area was bermed off.

Potential Media Of Concern: Gasoline
Potential Media Affected: Soil
How Discovered Description: TANK REMOVAL SOIL SAMPLES
Stop Description: OTHER MEANS
Cal Water Watershed Name: San Diego - Lower San Diego - Mission San Diego (907.11)
DWR Groundwater Subbasin Name:
Site History:

Note: Release H19194-005 (gasoline release- described below) is being administratively consolidated with case H19194-004 (diesel dispenser release) in January 2010, and case H19194-005 is being administratively closed. Both releases, -004 and -005, will be investigated under -004. Please see case H19194-004 (T0607302510) for additional case information. Release -005: On 2/17/1999, one 550-gallon waste oil tank was removed from within a shop bay at the facility. In addition, one 1,000 gallon gasoline UST and 80 feet of associated piping were removed from an area just south of the former diesel tank area and just west of the Maintenance Building. Based on a TPH-gas concentrations of 1100 (6 foot depth) to 2,000 mg/kg (12 foot depth) in soil samples collected from the gasoline tank excavation pit, release -005 was opened. DEH sent a Notice of Responsibility letter to the City on

3/31/1999, and in a subsequent letter, DEH requested a Workplan for site assessment. On July 16, 2001, DEH received a combined workplan to assess both releases (004- and -005) from the City's consultant entitled "Revised Work Plan for Site Assessment". The workplan, prepared by GeoCon, was initially dated May 21, 2001, then was revised and dated July 12, 2001. The revised workplan was conditionally approved by SAM in August 2001. Due to City budget issues, the workplan was not implemented. In a letter dated 12/4/2006, DEH requested a new workplan. Again, due to the ranking of the site as low priority (low risk), available City funds were allocated to higher risk sites. The City plans to address the site in 2010, if the funds are available.

Location: 4965 Convoy Street
Description: During the unloading of freight at a shipping terminal, a damaged container of UN1866 was identified by staff. The release was contained to the trailer floor of the delivery truck. The cause of the incident was due to improper blocking and bracing of the freight. A cleanup by a contractor is in progress. No waterways were impacted.

Description of Events: PAIL WAS PLACED AND SHRINK WRAPPED ON A PALLET BY THE SHIPPER SHIPMENT WAS TRANSFERRED TO TRAILER NUMBER 615-4084 AT THE ULA FACILITY ON 8/28/97. A 500 LB PALLET FROM SHIPMENT NUMBER 151-808204 WAS PLACED ON TOP OF THE PALLET FOR TRANSPORT TO SAN DIEGO. WHILE THE TRAILER WAS IN ROUTE TO THE USD FACILITY THE WEIGHT OF THE HEAVY SKID CAUSED THE FIVE GALLON PLASTIC PAIL TO BUCKLE AND SPILL THE CONTENTS OVER THE REMAINDER OF THE SHIPMENT AND ONTO THE TRAILER FLOOR. RECOMMEND THAT THE ULA FACILITY UTILIZE LOAD RACKS AND CHECK THE WEIGHT OF SHIPMENTS THAT ARE TO BE USED FOR TOP FREIGHT TO PREVENT THIS TYPE OF INCIDENT FROM OCCURING IN THE FUTURE.

Description of Events: IMPROPERLY SEALED CONTAINER LEAKED FROM TOP CAP DUE TO NORMAL MOTION IN TRANSIT. CORROSIVE MATERIAL SLOSHED AROUND INSIDE CONTAINER RAN DOWN SIDES OF CONTAINER AND ONTO TRAILER FLOOR. TRAILER ARRIVED IN SAN DIEGO WITH SMALL AMOUNT OF CORROSIVE MATERIAL DRIPPING FROM UNDERSIDES AND REAR DOOR. SPILLAGE WAS CLEANED UP BY COMPANY PERSONNEL IN SAN DIEGO USING ON-SITE HAZARDOUS MATERIAL SPILL KIT.

Description of Events: Approximately 2 gallons of UN1263 Clear Coat R 298D released from a 5 gallon metal pail that appeared to be punctured by an unknown object after it tipped over during transit. The release impacted the trailer floor and was confined to the inside of the trailer. XPO personnel on site cleaned the release with absorbents. The damaged container and cleanup debris was containerized into a 30 gallon steel drum and staged in the OS&D area on site.

Description of Events: carton was stacked on an old pallet with uneven slats there was no cardboard on the pallet when the cartons were loaded the uneven surface caused the end of carton to compress and a can of aerosol discharged 2 oz of product.

Recommend Actions Taken: a protective cardboard placed on the pallet would've prevented the cartons being exposed to the uneven surface that cause the compression of the aerosol can.

Description of Events: This incident pertains to a release of a UN1263 Paint 3 PGII (ACRYLIC WHITE TOPCOAT FLAT). There was (2) - 1 gallon metal pails damaged and approximately 1 gallon of this product released. This release was caused by improper loading by the terminal personnel. These pails fell to the trailer floor during transit. This release impacted a small portion of the trailer floor. No soils drains or waterways were impacted. XPO Logistics personnel conducted cleanup operations in response to this release. All generated waste was staged on site for XPO Logistics personnel to manage.

Description of Events: (1) - 5 gallon steel pail of UN1090 Acetone was punctured by a protruding nail from a wooden pallet. Approximately 1 cup released and evaporated from the trailer floor. No soils drains or waterways were impacted by this release. The terminal personnel cleaned and contained the release and staged it on site in OS&D for XPO to manage.

Description of Events: Shipper packaging failure. One of the 5 gallon pails containing the haz-mat was leaning up against another 5 gallon pail which caused the lid to pry open spilling about 1 cup of corrosive liquid. All shrink wrap was in tact and no visible damage to pallet or pails. All spilled material was contained on dock cleaned up and placed in a secure salvage drum.

Description of Events: An unsecured crate shifted while in transit comming in contact with the haz-mat shipment that had been secured to the wall of the trailer. The contact caused one of the haz-mat pails to topple over spilling about 10 ounces onto the trailer floor. The driver was in a remote area and was forced to use roadside dirt to contain the spill while using available PPE. Upon return to the San Diego facility the driver put the contaminated product and dirt into a salvage drum and placed it in OS&D.

Description of Events: WHEN TRAILER OPENED THE DRUM WAS WET FROM LIQUID THAT HAD SPILLED FROM THE TOP OF THE CONTAINER. UPON INSPECTION IT WAS OBSERVED THE THE STOPPER ON TOP OF THE DRUM HAD POPPED OUTWARD SLIGHTLY. THE DRUM WAS EQUIPPED BY SHIPPER WITH A PLASTIC HANDLE ON TOP TO CARRY DRUM. THE DRUM WAS PLACED ON A SMALL PALLET THEN TRANSFERRED TO A HOLIDAY AREA. THE CONSIGNEE WAS CONTACTED ABOUT THE SITUATION. THEY TOLD US THAT A NEW STOPPER COULD BE PICKED UP AT THEIR LOCATION TO RESEAL THE DRUM. THE CURRENT STOPPER COULD NOT BE PUSHED BACK INTO PLACE WITHOUT CAUSING LIQUID TO SPRAY OUT.

Description of Events: (1) 5 gallon metal pail of UN1263 caterpillar yellow was crushed during transit due to a load shift and released approximately 0.5 gallons of product to the trailer floor. Terminal personnel cleaned the release and containerized the damaged can and impacted absorbents and staged onsite awaiting disposition. No soils drains or waterways were impacted by this release.

Violations

Violation Date: 3/4/2015 ***Violation Program:*** UST
Violation Division: San Diego County Department of Env Health ***Violation Source:*** CERS
Citation: 23 CCR 16 2665 - California Code of Regulations, Title 23, Chapter 16, Section(s) 2665
Violation Notes:

Returned to compliance on 03/04/2015.

Violation Description:

Failure of the overfill prevention system to meet one of the following requirements:
1. Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or
2. Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or
3. Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or
4. Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling.

Violations

Violation Division: San Diego County Department of Env Health ***Violation Source:*** CERS
Citation: 40 CFR 1 265.171 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.171
Violation Notes:

Returned to compliance on 04/04/2014.

Violation Description:

Failure to accumulate hazardous waste in a container that is in good condition.

Violations

Violation Date: 3/4/2014 ***Violation Program:*** HW
Violation Division: San Diego County Department of Env Health ***Violation Source:*** CERS
Citation: 22 CCR 12 66262.34(d) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(d)
Violation Notes:

Returned to compliance on 04/04/2014.

Violation Description:

Failure to dispose of hazardous waste within 180 days (or 270 if waste is transported over 200 miles) for the generator who generates less than 1000 kilogram per month, but more than 100 kilograms per month.

Violations

Violation Date: 3/4/2014
Violation Program: HW
Violation Division: San Diego County Department of Env Health
Violation Source: CERS
Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Notes:

Returned to compliance on 03/05/2014.

Violation Description:

Failure to properly label hazardous waste accumulation containers with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.

Site History:

This was a small facility consisting of small container storage unit. The storage unit consisted of a four 55 gallon drums. The drums were used to store peciticide waste from the public/community.

Facility received a permit on 6/10/85. In 1986 facility decided to close. The closure work was completed in 1988 but closure certification report and verification did not take place until October 1994.

No information on corrective action is avaliable.

File available for this facility is very limited.
