RE: Records Search for Warner Center Specific Plan EIR

Dear Ms. Lockwood,

As per your request received on February 10, 2009, a records search was conducted for the above referenced project. The search includes a review of all recorded archaeological sites within a ½-mile radius of the project site as well as a review of cultural resource reports on file. In addition, the California Points of Historical Interest (PHI), the California Historical Landmarks (CHL), the California Register of Historical Resources (CR), the National Register of Historic Places (NR), the California State Historic Resources Inventory (HRI), and the City of Los Angeles Historic-Cultural Monuments (LAHCM) listings were reviewed for the above referenced project site. The following is a discussion of the findings.

Due to the sensitive nature of cultural resources, archaeological site locations are not released.

**Canoga Park, CA. USGS 7.5' Quadrangle**

**ARCHAEOLOGICAL RESOURCES:**

No archaeological sites have been identified within a ½-mile radius of the project site. No sites are located within the project site. This does not preclude the potential for archaeological sites to be identified during project activities. No isolates have been identified within a ½-mile radius of the project site. No isolates are located within the project site.

**HISTORIC RESOURCES:**

A review of the historic maps - Calabasas (1903) 15' USGS - indicated that in 1903, there was a network of improved and unimproved roads. The Southern Pacific Railroad ran through the project site. One intermittent stream ran through the project

site and was called Arroyo Calabasas. Place names nearby included Canoga, San Fernando Valley, and Ex Mission San Fernando.

The California Point of Historical Interest (2009) of the Office of Historic Preservation, Department of Parks and Recreation, lists no properties within a ½-mile radius of the project site.

The California Historical Landmarks (2009) of the Office of Historic Preservation, Department of Parks and Recreation, lists no properties within a ½-mile radius of the project site.

The California Register of Historical Resources lists two properties within a ½-mile radius of the project site (see enclosed list for properties marked with a +). These are properties determined to have a National Register of Historic Places Status of 1 or 2, a California Historical Landmark numbering 770 and higher, or a Point of Historical Interest listed after 1/1/1998.

The National Register of Historic Places lists no properties within a ½-mile radius of the project site.

The City of Los Angeles Historic-Cultural Monuments lists two properties within a ½-mile radius of the project site (see below).

**No. 93 Pepper Trees**

The approximately 300 pepper trees now growing in the city-owned parkway started from a seed (*Schinus molle*, native to South America) at the nursery owned by Victor Girard of the Boulevard Lan Company, owners of most of what is now an arch over the street. Located along Canoga Avenue from Ventura Boulevard south to Saltillo Street, Woodland Hills.  
Declared: 1/5/72.

**No. 488 Canoga Park (Originally Owensmouth) Southern Pacific Railroad Station**  
The structure at 21355 Sherman Way was built in 1912 and was one of the few surviving Spanish Revival Railroad Stations (destroyed by fire in 1993). Located at 21355 Sherman Way. Declared: 5/30/90.

The California Historic Resources Inventory lists 13 properties that have been evaluated for historical significance within a ½-mile radius of the project site (see enclosed list).

**PREVIOUS CULTURAL RESOURCES INVESTIGATIONS:**

Thirty-three studies (LA153\*, LA282\*, LA377\*, LA657\*, LA887\*, LA1258, LA1817, LA2409\*, LA2643, LA2657\*, LA3184, LA3565, LA3635\*, LA3723, LA3744, LA4108\*, LA4183, LA4327, LA4408, LA4565, LA5046\*, LA5047\*, LA5049\*, LA5052, LA6007, LA6141, LA6772\*, LA7143, LA7835\*, LA7840\*, LA8199, LA8686, and LA8691\*) have been conducted within a ½-mile radius of the project site. Of these, 16 are located within the project site. There are 18 additional investigations located on the Canoga Park, CA 7.5' USGS Quadrangle that are potentially within a ½-mile radius of the project site. The reports are not mapped due to insufficient locational information.  
(\* = Located within the project site)

## **RECOMMENDATIONS**

While much of the project area has been studied in the past, most of these studies are not current, and are greater than 5 years of age. Furthermore, the segment of project area with the highest likelihood of archaeological sensitivity does not appear to have been previously surveyed for cultural resources (archaeological and historical structures). This area is in the northern most boundary of the project site and includes the Southern Pacific Railroad line and the historical (pre-channelized) Arroyo Calabasas stream course. Prior to the approval of any ground disturbing activities, these areas should be studied for cultural resources by a qualified consultant. Additionally, areas that have been subjected to previous studies, should have updated cultural resource studies conducted on a project by project basis. Specifically, any historic properties (45 years and older, including archaeology) in the area of potential effect should be identified, recorded, and evaluated for local, state, or national significance prior to the approval of project plans. It is also recommended that the Native American Heritage Commission should be consulted to identify if any additional traditional cultural properties or other sacred sites are known to be in the area.

The professional consultant you retain may request the records search map, archaeological site records, and bibliography from the Information Center referencing the SCCIC number listed above for a fee (per the fee schedule). Any resulting reports by the qualified consultant should be submitted to the South Central Coastal Information Center as soon as possible.

If you have any questions regarding the results presented herein, please contact the office at 714.278.5395 Monday through Thursday 9:00 am to 3:30 pm.

Should you require any additional information for the above referenced project, reference the SCCIC number listed above when making inquiries. Requests made after initial invoicing will result in the preparation of a separate invoice.

Sincerely,  
SCCIC

re: Paleontological resources for the proposed Warner Center Specific Plan EIR, in the City of Los Angeles, Los Angeles County, project area

Dear Wendy:

I have thoroughly searched our paleontology collection records for the locality and specimen data for the proposed Warner Center Specific Plan EIR, in the City of Los Angeles, Los Angeles County, project area as outlined on the map covering a portion of the Canoga Park USGS topographic quadrangle map that you sent to me on 3 February 2009. We do not have any vertebrate fossil localities that lie directly within the project boundaries, but we do have localities nearby from sedimentary deposits similar to those that occur within the proposed project area.

Surface deposits in the entire proposed project route area consist of soil and younger Quaternary Alluvium, primarily as fan deposits of clays, sands and gravels derived from the surrounding hills. The uppermost layers of these deposits are unlikely to contain any significant vertebrate fossils, but vertebrate fossils are known from deeper layers. Our closest vertebrate fossil locality from similar older Quaternary deposits is LACM 1213, just west of due south of the proposed project area off Mulholland Highway south of Woodland Hills that contained a fauna of fossil horse, *Equus*, and ground sloth, *Paramylodon*. Our next closest vertebrate fossil locality from these deposits is LACM 5878, off Long Valley Road in Hidden Hills just south of due west of the proposed project area, that produced a fossil mastodon skeleton, *Mammut*. Farther to the north, just west of due north of the proposed project route area in Santa Susana Pass, we have the vertebrate fossil locality LACM 1406 that produced a fossil specimen of mastodon, *Mammut*.

Surface grading or shallow excavations in the proposed project area are unlikely to encounter significant vertebrate fossils in the younger Quaternary Alluvium. Deeper excavations that extend into older deposits, however, may well uncover significant fossil vertebrate remains. Any substantial excavations in the proposed project area below the uppermost layers, therefore, should be monitored closely to quickly and professionally recover any fossil remains discovered while not

impeding development. Any fossils recovered during mitigation should be deposited in an accredited and permanent scientific institution for the benefit of current and future generations.

This records search covers only the vertebrate paleontology records of the Natural History Museum of Los Angeles County. It is not intended to be a thorough paleontological survey of the proposed project area covering other institutional records, a literature survey, or any potential on-site survey.

Sincerely,
