County: Urban Transition / General AG, Part of City's Northwest Newman Master Plan: Planned Mixed Residential Project Description: (please use a separate page if necessary) The City proposes to construct a new Well 10 northwest of the city that will be drilled to a depth of approximately 500 feet – deep enough to tap into aquifers below Corcoran Clay and access water supplies with better water quality characteristics as well as replace lost water system capacity from existing well sources due to the prevalence of Cr6. The project also includes a million gallon storage tank, booster pump station, and 4130' of transmission lines. The Well 10 site is within the Northwest Master Plan (NWMP) area, adopted in 2017. The NWMP establishes a land use & development framework and identifies needed infrastructure improvements. A new well (and storage tank) site and connecting infrastructure was specifically identified as an infrastructure improvement that would occur within the NWMP area. (Well 10 MMRP is Attachment A of the Addendum.)
