1.0 PROJECT INFORMATION

1. Project Title:

West Capitol Avenue Road Rehabilitation Project (herein referred to as “Project”)

2. Lead Agency Name and Address:

City of West Sacramento, 1110 West Capitol Avenue, 1st Floor, West Sacramento, CA 95691

3. Contact Person and Phone Number:

Candido Ramirez, (916) 617-4611

4. Project Location:

The Project site is located along West Capitol Avenue and Jefferson Boulevard in West Sacramento, Yolo County, California. **Figure 1: Regional Location** and **Figure 2: Project Vicinity on Aerial Base** show the location of the Project site on a regional and local scale, respectively.

5. Project Sponsor’s Name and Address:

City of West Sacramento, 1110 West Capitol Avenue, 1st Floor, West Sacramento, CA 95691

6. General Plan Designation:

The Project does not have a General Plan Land Use designation, as it is a roadway. Project work would be primarily confined within City of West Sacramento (City) right-of-way. Project work would also occur within the California Department of Transportation (Caltrans) right-of-way at the West Capitol Avenue undercrossing of Interstate 80 (I-80) at the Jefferson Boulevard undercrossing and associated on-/off-ramps of United States Route 50 (US-50).

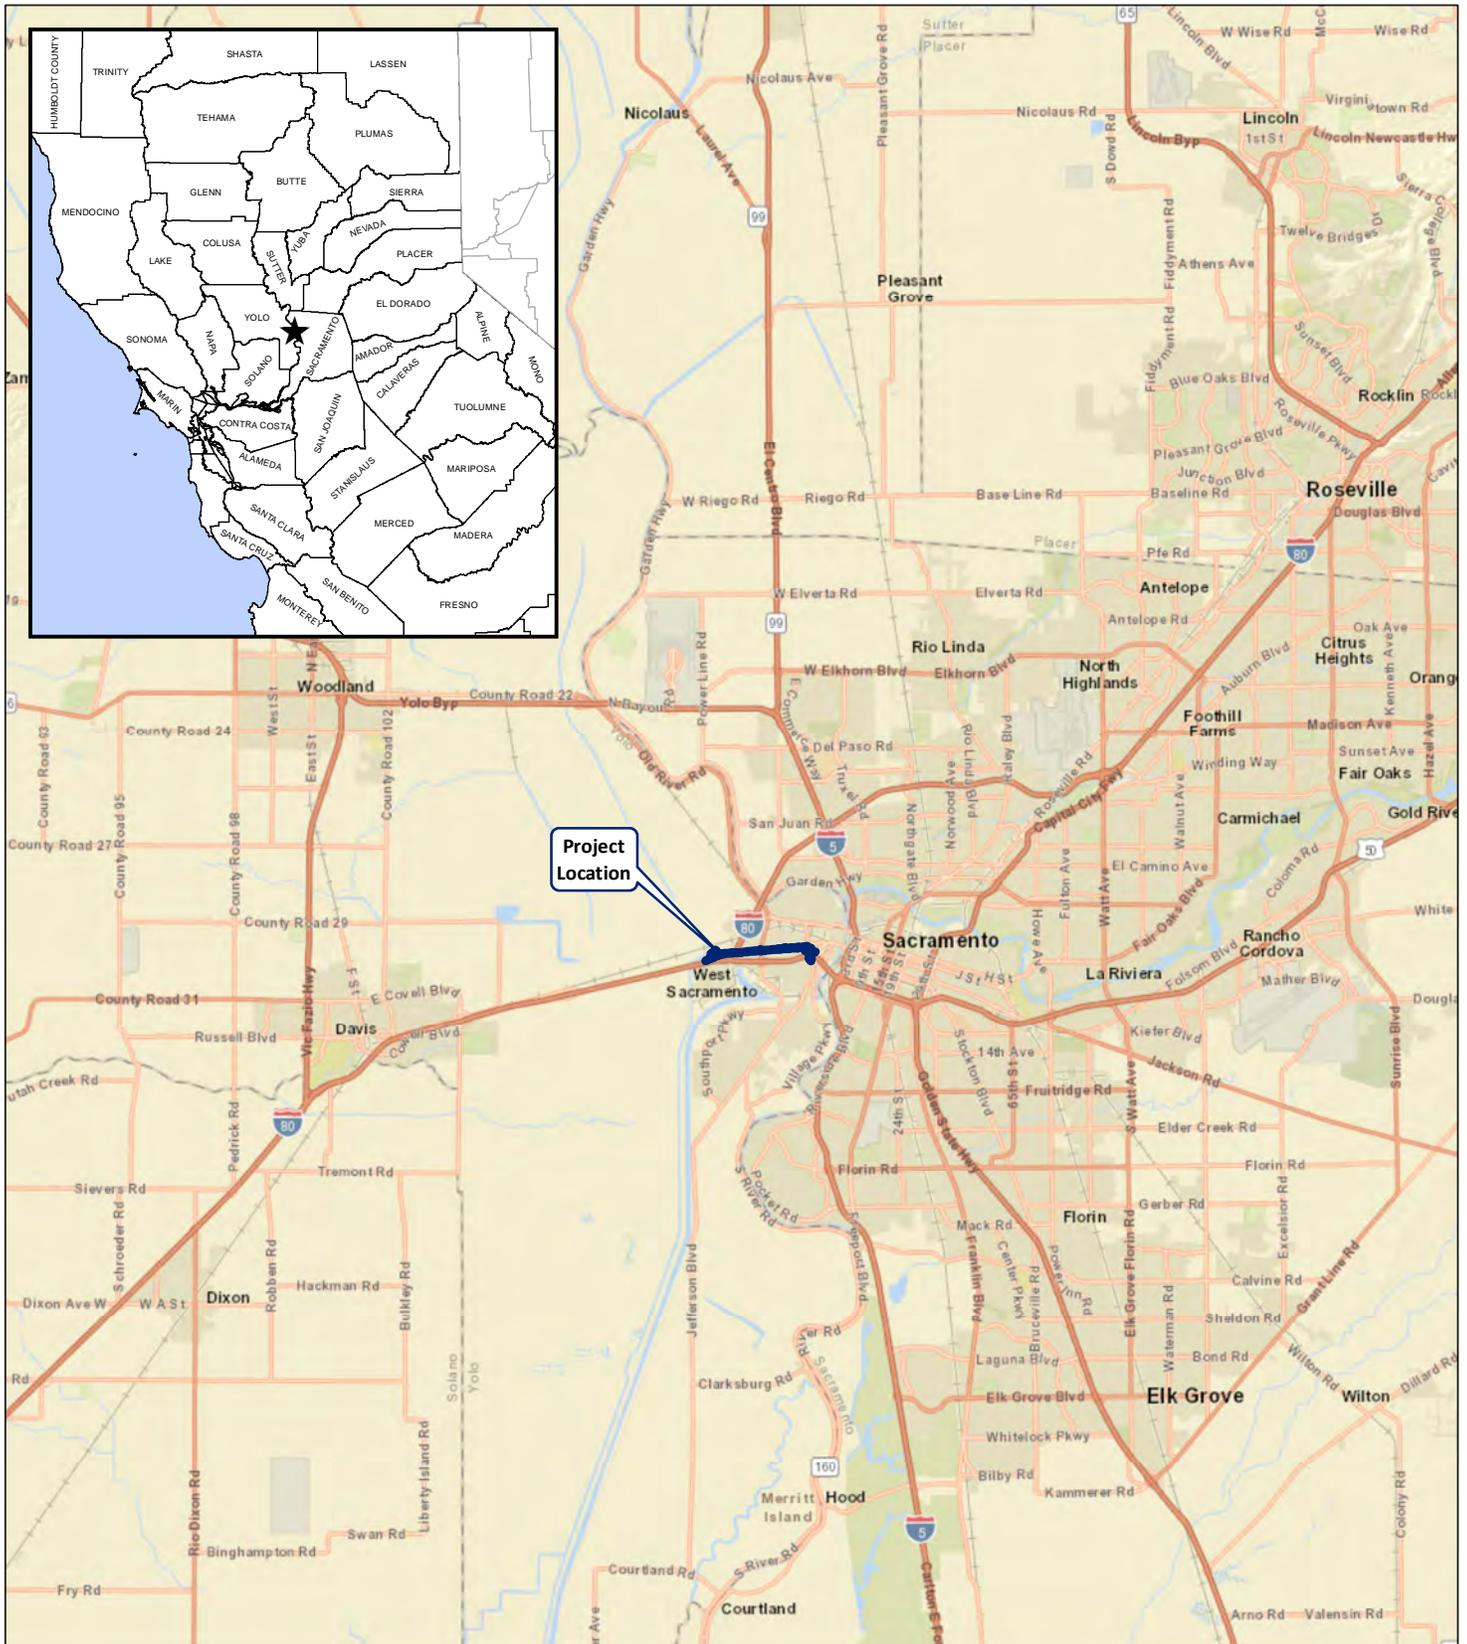

7. Zoning:

The Project is not zoned and will occur within roadway right-of-way. It would not require any temporary construction easement (TCE) on private property.

8. Description of Project :

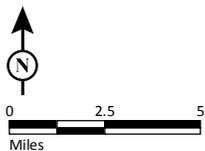

The limits of the Project include West Capitol Avenue between Enterprise Boulevard and Jefferson Boulevard and along Jefferson Boulevard between West Capitol Avenue and Park Boulevard. The Project area from Enterprise Boulevard to Harbor Boulevard does not have sidewalks, curbs, gutters, or bike lanes. The Project area from Harbor Boulevard to Jefferson Boulevard and the portion along Jefferson Boulevard south of West Capitol Avenue does include sidewalks, curbs, and gutters, but bike lanes are inconsistent or unmarked. Pavement shows visual signs of deterioration throughout the Project limits, although some areas are less damaged than others.

West Capitol Avenue Rehabilitation Project
City of West Sacramento, Yolo County, California
Federal Project No. HSIPL-5447(042)
Project Vicinity on Aerial Base

This page intentionally left blank

The City is proposing to rehabilitate the deteriorating pavement throughout the Project area as well as implement safety improvements, including adding separated bike lanes, enhancing the mid-block crossings for pedestrians, and improving lighting. In addition, vehicle travel lanes along segments of the Project area would be modified as warranted by traffic analysis. Traffic signalization at the intersection of Jefferson Boulevard and Merkely Avenue would be upgraded to include dedicated left turns. Traffic signal equipment along Jefferson Boulevard, Westacre Road, Poplar Avenue and Harbor Boulevard may be upgraded as well. This work would be conducted within existing right-of-way and existing fill,¹ and would not require bridge widening over the unnamed ditch between Enterprise Boulevard and Northport Drive.

Other infrastructure improvements that would be part of the Project include a new water line installation (excavation depth up to 7 feet) at the intersections of West Capitol Avenue and Sutter Avenue, Houston Street, and Glide Avenue; replacement of an existing 12-inch water line from Jefferson Boulevard to Westacre Road (excavation depth up to 5 feet); installation of a new 16-inch water transmission line from Enterprise Boulevard to Northport Drive (excavation depth up to 7 feet); and fiber-optic cabling for traffic signal interconnect along West Capitol Avenue (excavation depth up to 2 feet). The preliminary design for the Project is shown on **Figure 3: Project Area and Project Design**.

The final design of the Project is anticipated to be ready in January 2019, with construction commencing in June 2019. Construction would occur over a period of 18 months and is anticipated to end in December 2020. Temporary Construction Easements are not anticipated to be required; however, permission to enter on privately owned property may be required during construction. No planned detours would occur during construction, and existing driveways to businesses would be maintained. General construction equipment is anticipated to be needed, which includes: excavators, pavers, compaction equipment, dump trucks, and hauling equipment.

9. Surrounding Land Uses and Setting:

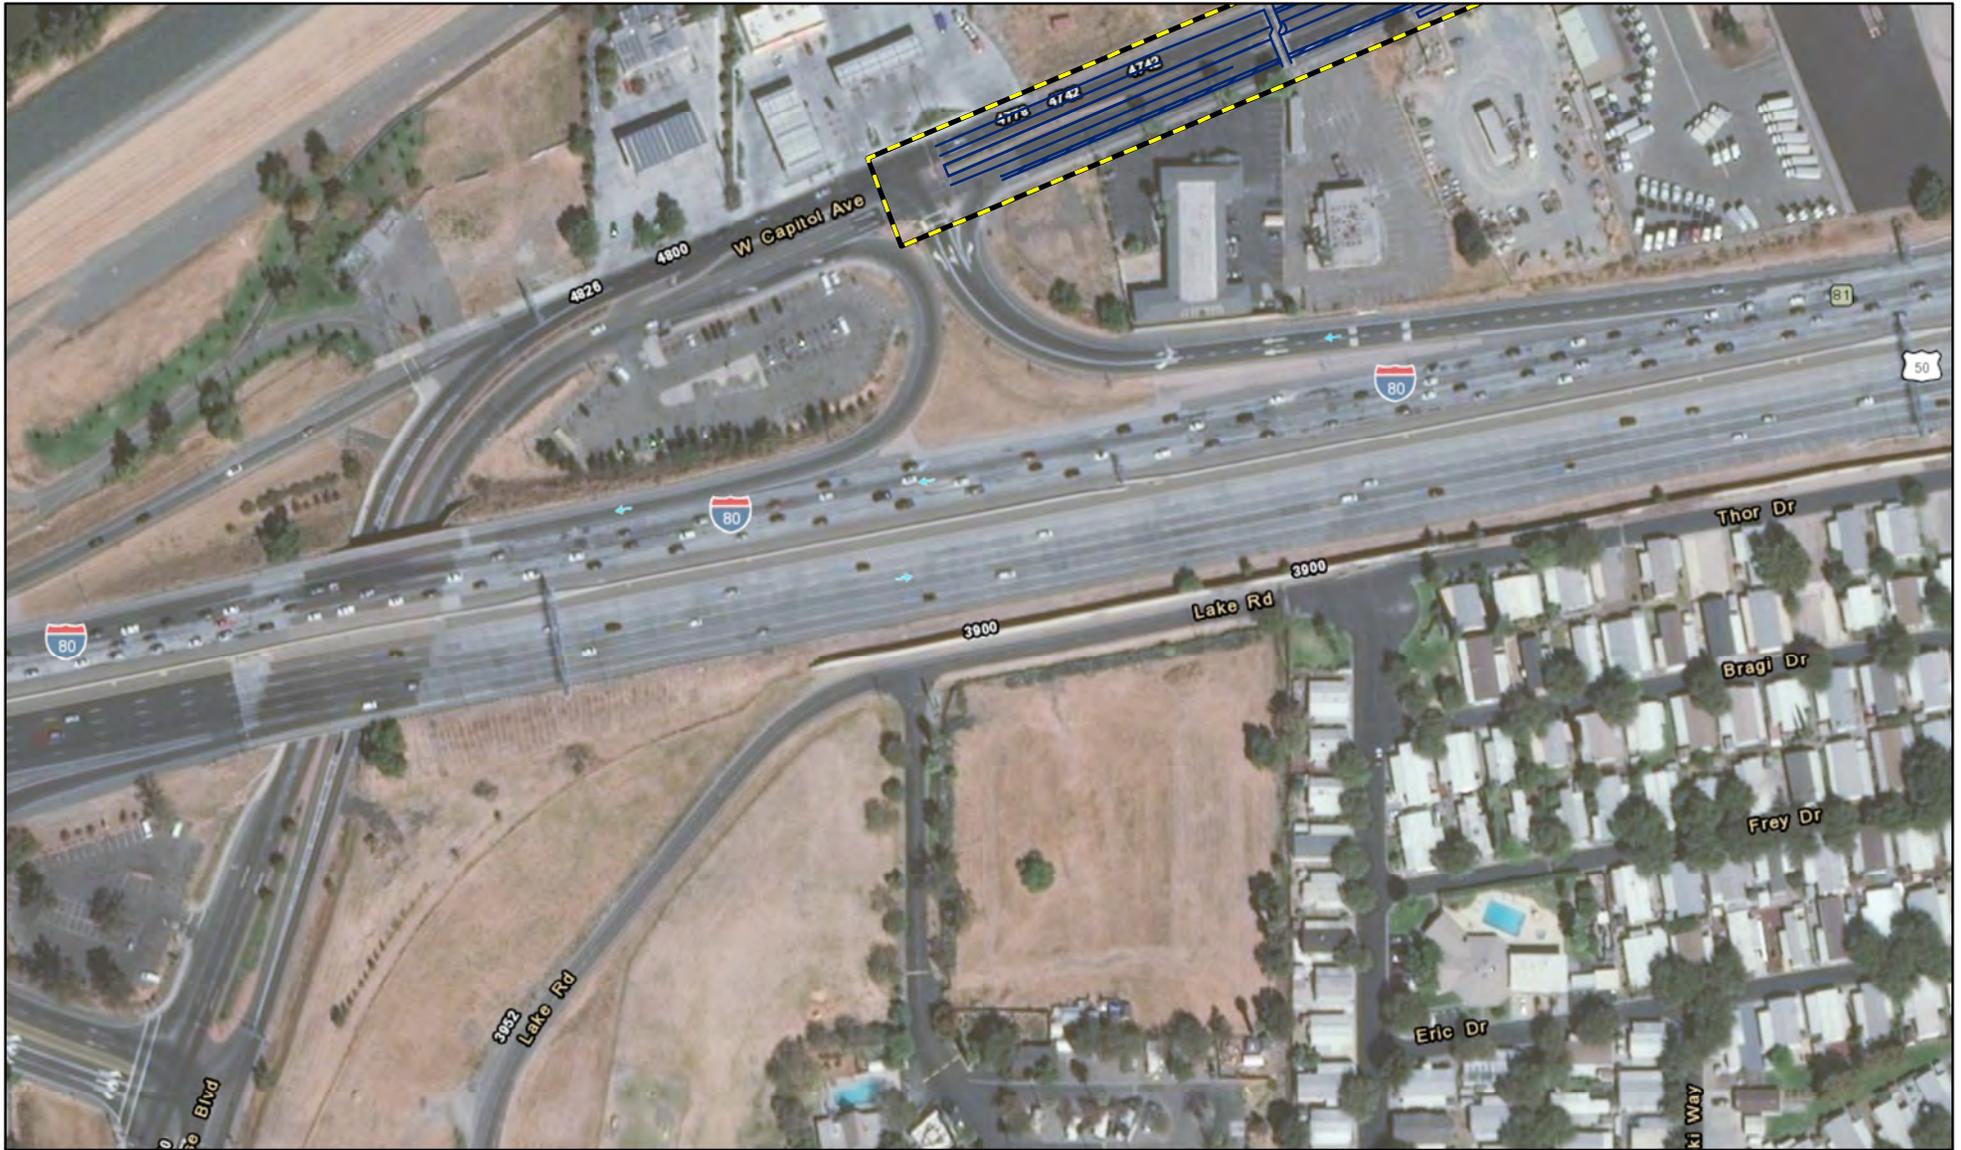

The area surrounding existing West Capitol Avenue is primarily categorized as “Corridor Mixed-Use” (MU-C). Other General Plan land use designations within the Project vicinity include Commercial (C), Mixed-Commercial/Industrial (MCI), Low-Density Residential (LR), Medium-Density Residential (MR), Light Industrial (LI), Heavy Industrial (HI), Recreation and Parks (RP), Public/Quasi-Public (PQP), Riverfront Mixed-Use (RMU), and Central Business District (CBD).

Zoning districts within the Project vicinity are as follows: CH (Commercial – Highway), C (Commercial), M-L (Limited Industrial), M-1 (Light Industrial), M-2 (Heavy Industrial), R-1-A (Residential One Family), MU-C (Mixed Use Corridor), R-2 (Residential – Medium Density), CBD (Central Business District), POS (Public Open Space), WF (Waterfront), and RP (Recreation and Parks).

West Capitol Avenue has also been historically dominated by motor inns and motels, a number of which are located along the perimeter of the Project area.

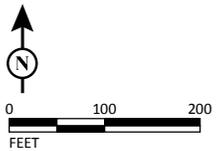

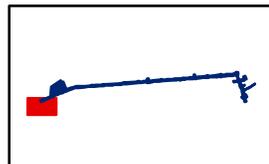

¹ No TCEs would be required on private property; however, work within Caltrans right-of-way would require an encroachment permit.

10. Other Public Agencies Whose Approval is Required (i.e., permits, financial approval, or participation agreements):

- Central Valley Regional Water Quality Control Board (CVRWQCB) – Water Quality Certification
- United States Army Corps of Engineers (ACOE) - Nationwide Permit

11. Have California Native American tribes traditionally and culturally affiliated with the project area requested consultation pursuant to Public Resource Code section 21080.3.1? If so, has consultation begun?

Consultation with tribes commenced July 2018. More information can be found in Sections 3.5 and 3.17 of this document.

2.0 ENVIRONMENTAL FACTORS POTENTIALLY AFFECTED

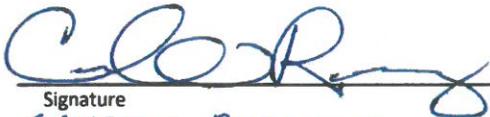

The environmental factors checked below would be potentially affected by this Project, involving at least one impact that is a "Potentially Significant Impact" as indicated by the checklist in Chapter 3.0.

- | | | |
|---|---|--|
| <input type="checkbox"/> Aesthetics | <input type="checkbox"/> Agriculture and Forestry Resources | <input type="checkbox"/> Air Quality |
| <input type="checkbox"/> Biological Resources | <input type="checkbox"/> Cultural Resources | <input type="checkbox"/> Geology/Soils |

2.1 DETERMINATION

On the basis of this initial evaluation:

- I find that the proposed project COULD NOT have a significant effect on the environment, and a NEGATIVE DECLARATION will be prepared.
- I find that although the proposed project could have a significant effect on the environment, there will not be a significant effect in this case because revisions in the project have been made by or agreed to by the project proponent. A MITIGATED NEGATIVE DECLARATION will be prepared.
- I find that the proposed project MAY have a significant effect on the environment, and an ENVIRONMENTAL IMPACT REPORT is required.
- I find that the proposed project MAY have a "Potentially Significant Impact" or "Potentially Significant Unless Mitigated" impact on the environment, but at least one effect (1) has been adequately analyzed in an earlier document pursuant to applicable legal standards, and (2) has been addressed by mitigation measures based on the earlier analysis as described on attached sheets. An ENVIRONMENTAL IMPACT REPORT is required, but it must analyze only the effects that remain to be addressed.
- I find that although the proposed project could have a significant effect on the environment, because all potentially significant effects (a) have been analyzed adequately in an earlier ENVIRONMENTAL IMPACT REPORT or NEGATIVE DECLARATION pursuant to applicable standards, and (b) have been avoided or mitigated pursuant to that earlier ENVIRONMENTAL IMPACT REPORT or NEGATIVE DECLARATION, including revisions or mitigation measures that are imposed upon the proposed project, nothing further is required.

3.0 CEQA ENVIRONMENTAL CHECKLIST

3.1 AESTHETICS

	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
Would the project:				
a. Have a substantial adverse effect on a scenic vista?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
b. Substantially damage scenic resources, including, but not limited to, trees, rock outcroppings, and historic buildings within a state scenic highway	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
c. Substantially degrade the existing visual character or quality of the site and its surroundings?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
d. Create a new source of substantial light or glare which would adversely affect day or nighttime views in the area?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>

3.1.1 Environmental Setting

The Project is located in West Sacramento, in the eastern portion of Yolo County. The Project site is within a heavily urbanized area and is surrounded by commercial, residential, and industrial development. The City’s General Plan describes West Capitol Avenue as the main street that connects the Central Business District (i.e., downtown) to the commercial centers. Information in this section was obtained from the *Visual Impact Assessment Memorandum* prepared by LSA for the proposed Project (LSA. 2018d).

The City’s General Plan recognizes that preservation of scenic features (both natural and working landscapes) enhances amenity value and adds to the quality of life for existing and future residents. The following policies, listed in the Natural and Cultural Resources Element of the City’s General Plan (City of West Sacramento 2016a), apply to the Project:

- **Policy NCR-8.1—Protecting Scenic Vistas:** The City shall protect scenic vistas from obstructions and visual clutter where it would negatively affect the public’s reasonable use and enjoyment of the resource.
- **Policy NCR-8.3—Reducing Light Pollution:** The City shall require project designs, lighting configurations, and operational practices that reduce light pollution and preserve views of the night sky.
- **Policy NCR-8.4—Minimize Obtrusive Lighting:** The City shall minimize obtrusive light by limiting outdoor lighting that is not necessary for public safety, and/or is misdirected or excessive.
- **Policy NCR-8.5—Glare:** The City shall require new development to incorporate design features that prevent excessive glare.

The General Plan does not identify any scenic vistas. The major features that give West Sacramento its visual character are the Sacramento River, the Sacramento Deepwater Ship Channel, agricultural fields, the nearby Yolo Bypass, and local architecture and neighborhoods. The City's historic communities, which are concentrated in the neighborhoods of Broderick, Bryte, and central West Sacramento, also add to the uniqueness and identity of West Sacramento.

The General Plan does not indicate any scenic routes or corridors within the Project area. The Caltrans Landscape Architecture Program administers the Scenic Highway Program, contained in Streets and Highways Code Sections 260–263. State highways are classified as either Officially Listed or Eligible. State Route (SR) 16, located approximately 40 miles northwest of the Project site, is classified as Eligible but is not an officially designated State Scenic Highway. The nearest officially designated State Scenic Highway is SR-160, located approximately 10 miles south of the Project site in Sacramento County.

The current alignment of West Capitol Avenue, within the Project area, was historically a part of the Lincoln Highway/United States Route 40 and there is an active preservation group in the area. In addition, a plaque is located within the Project area commemorating the West Capitol Raceway. These two resources could potentially increase viewer sensitivity to changes in the Project area.

3.1.2 Impact Analysis

a. Would the project have a substantial effect on a scenic vista?

NO IMPACT. There are no scenic vistas in the Project area. In addition, no views of the Sacramento River, the Sacramento Deepwater Ship Channel, agricultural fields, or the Yolo Bypass are provided within the Project site. The Project would not result in any obstructions that would block views of scenic resources. Therefore, implementation of the Project would have no impact on scenic vistas.

b. Would the project substantially damage scenic resources, including, but not limited to, trees, rock outcroppings, and historic buildings within a state scenic highway?

NO IMPACT. As listed above, no State Scenic Highways are within the Project area. The closest Officially Listed State Scenic Highway is SR-160, located 10 miles south of the Project site. Therefore, implementation of the Project would have no impact on scenic resources within a State Scenic Highway.

c. Would the project substantially degrade the existing visual character or quality of the site and its surroundings?

LESS THAN SIGNIFICANT WITH MITIGATION. Under existing conditions, the Project area from Enterprise Boulevard to Harbor Boulevard is mainly without sidewalks, curbs, or gutters, and has no bike lanes. Adjacent land uses along this portion of the Project consist of primarily industrial and commercial land uses, including the City's yard. The Project area from Harbor Boulevard to Jefferson Boulevard and the portion along Jefferson Boulevard south of West Capitol Avenue include sidewalks, curbs, and gutters, but bike lanes are inconsistent or unmarked. Adjacent land uses along this portion of the Project consist of primarily commercial, industrial, and mixed-use land uses.

Many visual changes to the Project footprint would be temporary (over the construction period) and minor. During construction, equipment would be visible along the roadway and staging areas, and may impede visibility from or to certain parts of the corridor. However, the Project site is within an urbanized setting, and would not include any scenic resources. Changes to the Project area would not degrade the existing visual character or quality of the site because such changes would be temporary and would not affect any scenic resources. Once the Project is operational, pedestrians and drivers traveling along West Capitol Avenue, employees and customers of businesses along the corridor, and other visitors may notice a visual change compared to existing conditions. These changes would bring increased visual cohesion to the corridor, and would provide access for pedestrians and bicyclists while also allowing vehicles to travel unimpeded by pedestrians and bicycles sharing the travel lane. Vehicle and bicycle travel lanes would be clearly marked, pedestrian crossings would be clear, and the roadway surface would be visibly improved compared to existing conditions. The Project would include as many of the aesthetic parameters required by the General Plan as feasible. This includes, but is not limited to, the following:

- The Project design shall include broad and well-appointed sidewalks (e.g., lighting, landscaping, adequate width).
- The Project design shall ensure that streetscape design includes features (e.g., sidewalks, lighting) that are appropriate for the intended use of the street and adjacent land uses, ensuring the streetscape design complements the existing visual environment and is consistent in materials and features.
- The Project design shall include planting strips and landscaped medians sized for canopy trees.

All of these Project features would be designed to be consistent with the City's engineering and design guidelines and would be compatible with other Complete Streets projects throughout West Sacramento. While these changes would be noticeably different from the existing condition, they represent a visual improvement and would not result in an adverse impact on visitors traveling along the corridor.

Construction of the Project would result in temporary changes to the visual character of Lincoln Highway. However, such changes would not be permanent and the Project would not result in a change of the alignment of West Capitol Avenue and therefore would not permanently impact this resource. In addition, interpretive plaques or signs for Lincoln Highway would be placed along West Capitol Avenue at the intersections of Harbor and Jefferson Boulevards. The Project would result in the removal of 16 crepe myrtle street trees and 1 valley oak in the western portion of the Project area between Garnet Street and the I-80 overpass. The crepe myrtle trees are not an important component to the visual character of this portion of the Project area. The removal of these trees would be most noticeable for residents whose homes back onto West Capitol Avenue where the crepe myrtle trees are planted, but it would not significantly or adversely alter their views. The trees do not currently block views to the roadway or the I-80 overpass from these residences. Removal of these trees would not create adverse impacts to residential or other viewers in the Project area. The overall visual character throughout the Project area would not be diminished by the removal of

these trees. In addition, **Mitigation Measures AES-1** and **AES-2** would further reduce impacts. The Project would result in less than significant impacts related to the existing visual character or quality of the site and its surroundings and with implementation of the mitigation measures described below.

AES-1 Following construction completion, the contractor shall restore all temporarily impacted and/or otherwise disturbed areas to pre-construction contours (if necessary) and revegetate them with native species.

AES-2 The City of West Sacramento shall continue coordination with Project-area businesses and residents throughout the planning and construction phases to document any aesthetic concerns or requests. To the extent feasible, incorporate as many of the aesthetic parameters requested by businesses and residents as possible into the Project's design in order to minimize both temporary and permanent visual impacts.

d. Would the project create a new source of substantial light or glare which would adversely affect day or nighttime views in the area?

LESS THAN SIGNIFICANT IMPACT. Implementation of the Project would include relocation of existing street lighting and installation of new street lighting as necessary along the corridor. New lighting would be installed predominately west of Harbor Boulevard. Increased street lighting is an essential safety feature and would include design features to manage glare. All street lighting installed in the Project area would comply with City design guidelines and the policies laid out in the 2035 General Plan (City of West Sacramento 2016a) that pertain to lighting and glare. Any lighting along the corridor would be directed onto the Project site to avoid spillage on adjacent and neighboring parcels. Therefore, any impacts due to street lighting installed as part of the Project would be minimized as part of design and would be less than significant.

3.2 AGRICULTURE AND FORESTRY RESOURCES

In determining whether impacts to agricultural resources are significant environmental effects, lead agencies may refer to the California Agricultural Land Evaluation and Site Assessment Model (1997) prepared by the California Dept. of Conservation as an optional model to use in assessing impacts on agriculture and farmland. In determining whether impacts to forest resources, including timberland, are significant environmental effects, lead agencies may refer to information compiled by the California Department of Forestry and Fire Protection regarding the state’s inventory of forest land, including the Forest and Range Assessment Project and the Forest Legacy Assessment Project; and the forest carbon measurement methodology provided in Forest Protocols adopted by the California Air Resources Board.

	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
Would the project:				
a. Convert Prime Farmland, Unique Farmland, or Farmland of Statewide Importance (Farmland), as shown on the maps prepared pursuant to the Farmland Mapping and Monitoring Program of the California Resources Agency, to non-agricultural use?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
b. Conflict with existing zoning for agricultural use, or a Williamson Act contract?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
c. Conflict with existing zoning for, or cause rezoning of, forest land (as defined in Public Resources Code Section 12220(g)), timberland (as defined by Public Resources Code Section 4526), or timberland zoned Timberland Production (as defined by Government Code Section 51104(g))?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
d. Result in the loss of forest land or conversion of forest land to non-forest use?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
e. Involve other changes in the existing environment which, due to their location or nature, could result in conversion of Farmland, to non-agricultural use or conversion of forest land to non-forest use?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

3.2.1 Impact Analysis

a. Would the project convert Prime Farmland, Unique Farmland, or Farmland of Statewide Importance (Farmland) as shown on the maps prepared pursuant to the Farmland Mapping and Monitoring Program of the California Resources Agency, to non-agricultural use?

NO IMPACT. The Project site would be located in a fully urbanized area of West Sacramento. According to the California Department of Conservation Farmland Mapping and Monitoring Program, no lands are designated as Prime Farmland, Unique Farmland, or Farmland of Statewide Importance within the Project area. No agricultural land uses are in the Project footprint, and the Project would not result in the conversion of any farmland to non-agricultural use. Therefore, implementation of the Project would have no impact on farmland conversion.

b. Would the project conflict with existing zoning for agricultural use, or a Williamson Act contract?

NO IMPACT. No lands are zoned for agricultural use or under a Williamson Act contract in the Project footprint. The Project would not conflict with existing zoning for agricultural use or Williamson Act contracts and would therefore have no impact.

c. Would the project conflict with existing zoning for, or cause rezoning of, forest land (as defined in Public Resources Code Section 12220(g)), timberland (as defined by Public Resources Code Section 4526), or timberland zoned Timberland Production (as defined by Government Code Section 51104(g))?

NO IMPACT. No land is zoned as forest land, timberland, or Timberland Production in the Project footprint, and the Project would not conflict with any such zoning. The Project would have no impact.

d. Would the project result in the loss of forest land or conversion of forest land to non-forest use?

NO IMPACT. No forest land is in the Project footprint, and the Project would not result in loss or conversion of existing forest land. The Project would have no impact.

e. Would the project involve other changes in the existing environment which, due to their location or nature, could result in conversion of Farmland, to non-agricultural use or conversion of forest land to non-forest use?

NO IMPACT. The Project would add bicycle lanes, sidewalks, curbs, and gutters to the West Capitol Avenue corridor, as well as roadway surface and lighting improvements in the area. No farmland or forest land is located within the Project vicinity, and no change would occur that would encourage or result in the conversion of farmland or forest land to nonfarmland or nonforest land use. The Project would have no impact.

3.3 AIR QUALITY

Where available, the significance criteria established by the applicable air quality management or air pollution control district may be relied upon to make the following determinations.

	Potentially Significant Impact	Less Than Significant with Mitigation	Less Than Significant Impact	No Impact
Would the project:				
a. Conflict with or obstruct implementation of the applicable air quality plan?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
b. Violate any air quality standard or contribute substantially to an existing or projected air quality violation?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
c. Result in a cumulatively considerable net increase of any criteria pollutant for which the project region is non-attainment under an applicable federal or state ambient air quality standard (including releasing emissions which exceed quantitative thresholds for ozone precursors)?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
d. Expose sensitive receptors to substantial pollutant concentrations?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
e. Create objectionable odors affecting a substantial number of people?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>

3.3.1 Impact Analysis

a. Would the project conflict with or obstruct implementation of the applicable air quality plan?

LESS THAN SIGNIFICANT IMPACT. The Project is located in West Sacramento, Yolo County, within the Sacramento Valley Air Basin, and is under the jurisdiction of the Yolo-Solano Air Quality Management District (YSAQMD). The YSAQMD is part of the Sacramento Federal Non-Attainment Area for ground-level ozone and fine particulate matter (i.e., particulate matter less than or equal to 2.5 microns in diameter, or PM_{2.5}) pollution set by the United States Environmental Protection Agency (USEPA) (YSAQMD 2018).

Air quality plans applicable to the Project site include the Sacramento Regional 2008 National Ambient Air Quality Standards (NAAQS) 8-Hour Ozone Attainment and Reasonable Further Progress (RFP) Plan (YSAQMD 2017) and the PM_{2.5} Implementation/Maintenance Plan (YSAQMD 2013). The 8-Hour Ozone Plan demonstrates how existing and new control strategies will provide the necessary future emission reductions to meet the federal Clean Air Act requirements for reasonable further progress and attainment of the 1997 8-hour ozone NAAQS for the Sacramento region. The PM_{2.5} Plan shows that the region has met the redesignation requirements and requests that the USEPA redesignate the area to attainment. The plan also analyzes measures that were implemented to achieve attainment and that will provide for maintenance of the PM_{2.5} NAAQS.

The YSAQMD’s California Environmental Quality Act (CEQA) Thresholds of Significance are shown below in **Table 3.A: Yolo-Solano Air Quality Management District Thresholds of Significance.**

Table 3.A: Yolo-Solano Air Quality Management District Thresholds of Significance

Pollutant	Yolo-Solano Air Quality Management District Thresholds
ROG	10 tons/year
NO _x	10 tons/year
CO	Violation of a State ambient air quality standard for CO
PM ₁₀	80 lbs/day

Source: Yolo-Solano Air Quality Management District (2007).

¹ Emissions of CO from construction activities are not considered to be an issue of concern because construction activities are not considered to be a major source of CO. In addition, the Yolo-Solano Air Quality Management District is in attainment status for CO.

CO = carbon monoxide

lbs/day = pounds per day

NO_x = nitrogen oxides

PM₁₀ = particulate matter less than or equal to 10 microns in diameter

ROG = reactive organic gases

The Project would include rehabilitation of the deteriorating pavement along the existing roadway as well as implementation of safety improvements, including adding separated bike lanes, enhancing the mid-block crossings for pedestrians, and improving lighting. The Project would also include improvements to utility infrastructure, which would require a maximum excavation depth of 7 feet. Work would be completed within existing right-of-way and existing fill (no TCEs are anticipated on private property; however, work within Caltrans right-of-way will require an encroachment permit). Construction duration would be approximately 18 months.

As detailed below in Response 3.3.1(b), the Project would not result in significant air quality impacts and would not increase exposure to air pollutants. Improved pedestrian and bicycle facilities would encourage nonmotorized transportation, which would contribute to the goals of the applicable implementation and maintenance plans. The Project would not conflict with or obstruct implementation of applicable air quality plans.

b. Would the project violate any air quality standard or contribute substantially to an existing or projected air quality violation?

LESS THAN SIGNIFICANT WITH MITIGATION. During construction, short-term degradation of air quality may occur due to the release of particulate emissions generated by excavation, grading, hauling, and other activities related to construction. Emissions from construction equipment also are anticipated and would include carbon monoxide (CO), nitrogen oxides (NO_x), reactive organic gases (ROG), coarse particulate matter (i.e., particulate matter less than or equal to 10 microns in diameter, or PM₁₀), PM_{2.5}, and toxic air contaminants (e.g., diesel exhaust particulate matter).

Site preparation and roadway construction would involve clearing, cut-and-fill activities, grading, and paving roadway surfaces. Construction-related effects on air quality from most roadway projects would be greatest during the site preparation phase because most engine emissions are associated with the excavation, handling, and transport of soils to and from the site. If not properly controlled, these activities would temporarily generate PM₁₀, PM_{2.5}, CO, sulfur dioxide (SO₂), NO_x, and volatile organic compounds (VOC). Sources of fugitive dust would include disturbed soils at the construction-site and trucks carrying uncovered loads of soils. Unless properly controlled, vehicles

leaving the site would deposit mud on local streets, which could be an additional source of airborne dust after drying. PM₁₀ emissions would vary from day to day, depending on the nature and magnitude of construction activity and local weather conditions. PM₁₀ emissions would depend on soil moisture, the silt content of soil, wind speed, and the amount of equipment operating at the time. Larger dust particles would settle near the source, while fine particles would be dispersed over greater distances from the construction-site.

In addition to dust-related PM₁₀ emissions, heavy trucks and construction equipment powered by gasoline and diesel engines would generate CO, SO₂, NO_x, VOCs, and some soot particulates (PM_{2.5} and PM₁₀) in exhaust emissions. If construction activities were to increase traffic congestion in the area, CO and other emissions from traffic would increase while those vehicles were delayed. These emissions would be temporary and limited to the immediate area surrounding the construction-site. Areas within 500 feet of California Air Resources Board (CARB) defined sensitive land uses would be labeled as no-idle areas where materials storage/transfer and equipment maintenance activities are not to occur.

SO₂ is generated by oxidation during combustion of organic sulfur compounds contained in diesel fuel. Off-road diesel fuel meeting federal standards can contain up to 5,000 parts per million (ppm) of sulfur, whereas on-road diesel is restricted to less than 15 ppm of sulfur. However, under California law and California Air Resources Board regulations, off-road diesel fuel used in California must meet the same sulfur and other standards as on-road diesel fuel; therefore, SO₂-related issues due to diesel exhaust would be minimal.

Asbestos consists of several types of naturally occurring fibrous minerals. When rock containing asbestos is broken or crushed, asbestos fibers may be released and become airborne. Exposure to asbestos fibers may result in health issues such as lung cancer, mesothelioma, and asbestosis (CARB 2017). West Sacramento is underlain by an alluvial widespread basin deposit (Qhb) made up of fine-grained sediments with horizontal stratification deposited by standing or slow-moving water in topographic lows. Soils included within the Project site are Sacramento silty clay loam, Valdez silt loam (clay substratum), Meyers clay, Lang sandy loam (deep), and Lang sandy loam (NRCS 2017). No ultramafic rock or serpentine rock is located within the Project vicinity; therefore, the potential for naturally occurring asbestos (NOA) is low.

The construction emissions were estimated for the Project using the Sacramento Metropolitan Air Quality Management District's Road Construction Emissions Model, Version 9.0, which is consistent with the guidance provided by the YSAQMD for evaluating construction impacts from roadway projects. The Project's maximum construction-related emissions during a peak construction day are presented in **Table 3.B: Maximum Emissions by Construction Activities** (model data are provided in **Appendix A: Air Quality Emissions Model**) (LSA. 2018b). It was assumed that the Project construction-site would be equivalent to a 2-mile length of roadway and that standard construction equipment would be used. The PM₁₀ and PM_{2.5} emissions assume 50 percent control of fugitive dust as a result of watering and associated dust-control measures. The emissions presented below are based on the best information available at the time of calculations and specify that the schedule for the Project is anticipated to take approximately 18 months, beginning in June 2019 and ending in December 2020.

Table 3.B: Maximum Emissions by Construction Activities

Construction Phase	VOC/ROG	NO _x	CO	Uncontrolled PM ₁₀
Drainage/Utilities/Sub-Grade	4 lbs/day	32 lbs/day	39 lbs/day	22 lbs/day
Grubbing/Land Clearing	1 lbs/day	12 lbs/day	15 lbs/day	21 lbs/day
Grading/Excavation (Including Import or Export Soil Hauling)	7 lbs/day	51 lbs/day	77 lbs/day	23 lbs/day
Paving	2 lbs/day	19 lbs/day	17 lbs/day	1 lb/day
Maximum Annual Emissions	0.72 ton/year	5.5 tons/year	8 tons/year	3 tons/year
Yolo-Solano AQMD Thresholds	10 tons/year	10 tons/year	AAQS	80 lbs/day

Sources: Yolo-Solano Air Quality Management District (2007); Sacramento Metropolitan Air Quality Management District (2018).

AAQS = ambient air quality standards

PM₁₀ = particulate matter smaller than 10 microns

CO = carbon monoxide

ROG = reactive organic gases

lb(s)/day = pounds per day

VOC = volatile organic compounds

NO_x = oxides of nitrogen

YSAQMD = Yolo-Solano Air Quality Management District

Caltrans Standard Specifications for construction (Section 14-9.03 [Dust Control] and Section 14-9.02 [Air Pollution Control]) would be adhered to in order to reduce emissions generated by construction equipment. Additionally, the YSAQMD has established rules for reducing fugitive dust emissions.

As shown in **Table 3.B**, the construction-related emissions would not exceed the YSAQMD thresholds of significance. The ambient CO concentration for 2017 at the 100 Bercut Drive, Sacramento Meteorological Station (approximately 1.5 miles northeast of the closest portion of the Project) was a maximum of 1.9 ppm. Since the AAQS is 20 ppm, both the peak daily CO emissions rate of 77 lbs/day and the annual CO emissions rate of 8 tons per year are low enough that an exceedance of the AAQS is extremely unlikely.

Once operational, the Project would include one additional travel lane along West Capitol Avenue between Harbor Boulevard and Jefferson Boulevard that would increase roadway capacity. However, improvements to pedestrian and bicycle facilities throughout the Project area would encourage the use of nonmotorized transportation. Such facilities would help offset motorized transportation emissions and would help meet air quality improvement goals.

With the implementation of standard construction measures (providing 50 percent effectiveness) such as frequent watering (e.g., a minimum of twice per day), as well as **Mitigation Measures AQ-1, AQ-2, AQ-3, AQ-4, and AQ-5**, fugitive dust and exhaust emissions from construction activities would result in less than significant impacts involving air quality standards.

AQ-1 During clearing, grading, earthmoving, or excavation operations, excessive fugitive dust emissions shall be controlled by regular watering or other dust preventive measures using the following procedures, as specified in YSAQMD Rule 403.

- All material excavated or graded will be sufficiently watered to prevent excessive amounts of dust.
- Watering will occur at least twice daily with complete coverage, preferably in the late morning and after work is done for the day.

- All material transported on or off-site will be either sufficiently watered or securely covered to prevent excessive amounts of dust.
- The area disturbed by clearing, grading, earthmoving, or excavation operations will be minimized so as to prevent excessive amounts of dust.

These control techniques will be indicated in the Project specifications. Visible dust beyond the property line emanating from the Project will be prevented to the maximum extent feasible.

- AQ-2** Project grading plans shall show the duration of construction. Ozone precursor emissions from construction equipment vehicles will be controlled by maintaining equipment engines in good condition and in proper tune per manufacturers' specifications.
- AQ-3** All trucks that are to haul excavated or graded material on-site shall comply with California Vehicle Code Section 23114, with special attention to Sections 23114(b)(F), (e)(2), and (e)(4), as amended, regarding the prevention of such material spilling onto public streets and roads.
- AQ-4** The contractor shall adhere to the Caltrans Standard Specifications for Construction (Sections 14.9-02 and 14-9.03).
- AQ-5** All construction vehicles both on and off-site shall be prohibited from idling in excess of 5 minutes.

c. Would the project result in a cumulatively considerable net increase of any criteria pollutant for which the project region is non-attainment under an applicable federal or state ambient air quality standard (including releasing emissions which exceed quantitative thresholds for ozone precursors)?

LESS THAN SIGNIFICANT IMPACT. CEQA defines a cumulative impact as two or more individual effects that, when considered together, are considerable or that compound or increase other environmental impacts. According to the YSAQMD, project emissions that are not consistent with the Air Quality Attainment Plan or State Implementation Plan, or that exceed district thresholds of significance, will have a significant cumulative impact unless offset. As discussed above, the Project would not conflict with any applicable air quality plan or violate an air quality standard. In addition, construction activities would not last for more than 5 years at one general location, so construction-related emissions do not need to be included in regional and project-level conformity analysis (Code of Federal Regulations [CFR] Title 40, Section 93.123[c][5]). As such, the Project would result in less than significant impacts.

d. Would the project expose sensitive receptors to substantial pollutant concentrations?

LESS THAN SIGNIFICANT WITH MITIGATION. According to the YSAQMD's *CEQA Handbook for Assessing and Mitigating Air Quality Impacts* (YSAQMD 2007), a sensitive receptor is generically

defined as a location where human populations—especially children, seniors, or sick persons—are found and there is a reasonable expectation of continuous human exposure according to the averaging period for the AAQS (e.g., 24-hour, 8-hour, 1-hour). Examples of sensitive receptors include residences, hospitals, and schools.

Surrounding land uses include corridor mixed-use, mixed commercial and industrial, and mixed residential. The Project is within 0.25 mile of six existing or proposed schools: Yolo Education Center and the James Marshall Parent Participatory Nursery School, both located at 919 Westacre Road; the Sacramento Valley Charter School, located at 2399 Sellers Way; the Heritage Peak Charter School, located at 840 Jefferson Boulevard; the Learning Ladder Preschool and Child Care Center located in the City of West Sacramento's Community Center at 1075 West Capitol Avenue; and the City of Dharma Realm Instilling Goodness Elementary School and Developing Virtue Secondary School, located at 1029 West Capitol Avenue. Eskaton Wilson Manor, a senior retirement community, is at 2140 Evergreen Avenue, approximately 0.1 mile from the Project site. No hospitals are located within the Project vicinity.

As described above, the Project may result in short-term degradation of air quality during construction. However, implementation of standard construction measures as well as **Mitigation Measures AQ-1, AQ-2, AQ-3, AQ-4, and AQ-5** would reduce such impacts to less than significant levels. Once operational, roadway, bicycle, pedestrian, and utility improvements to the Project area would not present substantial pollutant concentrations to sensitive receptors. As such, the Project would result in less than significant impacts with the implementation of **Mitigation Measures AQ-1, AQ-2, AQ-3, AQ-4, and AQ-5**.

e. Would the project create objectionable odors affecting a substantial number of people?

LESS THAN SIGNIFICANT IMPACT. The Project would result in short-term objectionable odors related to the operation of diesel-powered construction equipment, as well as potential odors related to decaying organic material disturbed during the excavation process. Such odors would be temporary during the construction period, would disperse quickly, and would not result in long-term impacts. Operation of the Project would not generate any source of objectionable odors. Therefore, impacts would be less than significant.

3.4 BIOLOGICAL RESOURCES

	Potentially Significant Impact	Less Than Significant with Mitigation	Less Than Significant Impact	No Impact
Would the project:				
a. Have a substantial adverse effect, either directly or through habitat modifications, on any species identified as a candidate, sensitive, or special-status species in local or regional plans, policies, or regulations, or by the California Department of Fish and Game or U.S. Fish and Wildlife Service?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
b. Have a substantial adverse effect on any riparian habitat or other sensitive natural community identified in local or regional plans, policies, regulations or by the California Department of Fish and Game or U.S. Fish and Wildlife Service?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
c. Have a substantial adverse effect on federally protected wetlands as defined by Section 404 of the Clean Water Act (including, but not limited to, marsh, vernal pool, coastal, etc.) through direct removal, filling, hydrological interruption, or other means?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
d. Interfere substantially with the movement of any native resident or migratory fish or wildlife species or with established native resident or migratory wildlife corridors, or impede the use of native wildlife nursery sites?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
e. Conflict with any local policies or ordinances protecting biological resources, such as a tree preservation policy or ordinance?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
f. Conflict with the provisions of an adopted Habitat Conservation Plan, Natural Community Conservation Plan, or other approved local, regional, or state habitat conservation plan?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

3.4.1 Environmental Setting

A Natural Environment Study (Minimal Impacts) (LSA 2018a) was prepared for the Project in August 2018 (see **Appendix B: Natural Environment Study [Minimal Impacts]**). The study included a general biological survey, habitat mapping, a preliminary jurisdictional delineation, and a tree inventory. The information for the following section is based on this study.

The Biological Study Area (BSA), totaling 63.44 acres, includes portions of West Capitol Avenue and Jefferson Boulevard to the edge of the road right-of-way. The BSA consists almost exclusively of urban developed areas, with small amounts of ruderal or disturbed and landscaped vegetation. No natural communities occur in the BSA. Aquatic features in the BSA include an unnamed canal and several roadside ditches. Topography is flat, with an elevation that ranges from approximately 10 to 24 feet above mean sea level. Land uses in the immediate vicinity consist of agriculture and open space to the west and dense urban residential, light industrial, and industrial uses in all other directions.

The BSA does not contain suitable habitat for any special-status plant or wildlife species or critical habitat.

The Project would result in permanent impacts to 0.03 acre of potential nonwetland waters of the United States. The Project would not result in any impact to potential seasonal wetlands. Therefore, the Project is likely to require an ACOE Nationwide Permit and a Water Quality Certification from the CVRWQCB. No California Department of Fish and Wildlife (CDFW) waters are present in the BSA. Therefore, it is not expected that a Lake or Streambed Alteration Agreement from CDFW will be required.

3.4.2 Impact Analysis

a. Would the project have a substantial adverse effect, either directly or through habitat modifications, on any species identified as a candidate, sensitive, or special-status species in local or regional plans, policies, or regulations, or by the California Department of Fish and Game or U.S. Fish and Wildlife Service?

NO IMPACT. No habitats or natural communities of special concern occur in the BSA; therefore, the Project is not expected to have impacts on habitats or natural communities of special concern.

No special-status plant species were observed in the BSA during the general biological survey conducted as part of the Natural Environment Study (Minimal Impacts). Potential habitat for five special-status plant species (woolly rose-mallow [*Hibiscus lasiocarpus*], Jepson's coyote thistle [*Eryngium jepsonii*], Northern California black walnut [*Juglans hindsii*], Mason's lilaopsis [*Lilaeopsis masonii*], and Sanford's arrowhead [*Sagittaria sanfordii*]) is present in the BSA. However, these species were not observed during the field survey during their normal blooming periods. Therefore, special-status plant species are considered absent from the BSA.

After evaluation of the special-status wildlife species potentially occurring in the BSA, no special-status wildlife species were determined to have a significant likelihood of occurring in the BSA.

The BSA supports a number of moderately invasive species, and five invasive species were observed at the site. These invasive species include foxtail brome (*Bromus madritensis*), yellow star thistle (*Centaurea solstitialis*), English ivy (*Hedera helix*), perennial pepperweed (*Lepidium latifolium*), and Himalayan blackberry (*Rubus armeniacus*). In compliance with Executive Order 13112, regulated by the United States Department of Agriculture, and to avoid the introduction of invasive species to other areas in the BSA during Project construction, contract specifications shall include, at a minimum, the following measures.

- All earthmoving equipment to be used during Project construction shall be cleaned thoroughly before arrival on the Project site.
- All seeding equipment (e.g., hydroseed trucks) shall be thoroughly rinsed at least three times prior to beginning seeding work.

- To avoid spreading any nonnative invasive species already existing on-site to off-site areas, all equipment shall be thoroughly cleaned before leaving the site.

As no special-status wildlife species are likely to occur within the BSA and measures would be implemented to reduce the spread of invasive species, the Project would have no impact, either directly or through habitat modifications, on any species identified as a candidate, sensitive, or special-status species.

b. Would the project have a substantial adverse effect on any riparian habitat or other sensitive natural community identified in local or regional plans, policies, regulations, or by the California Department of Fish and Game or U.S. Fish and Wildlife Service?

NO IMPACT. No riparian habitats or other sensitive natural communities are within the BSA. As noted above, no natural communities occur in the BSA. As such, no impact would occur with implementation of the Project.

c. Would the project have a substantial adverse effect on federally protected wetlands as defined by Section 404 of the Clean Water Act (including, but not limited to, marsh, vernal pool, coastal, etc.) through direct removal, filling, hydrological interruption, or other means?

NO IMPACT. A total of 0.11 acre of potential waters of the United States was mapped in the BSA, consisting of approximately 0.01 acre of potential seasonal wetlands and 0.10 acre of potential nonwetland waters. Of the 0.10 acre of potential nonwetland waters mapped in the BSA, the Project would result in 0.03 acre of permanent impacts to potential nonwetland waters as a result of roadway improvements and sidewalk installation. The Project would not result in any impact to the 0.01 acre of potential seasonal wetlands mapped in the BSA.

Potential waters of the United States affected by the Project are regulated by the ACOE under Section 404 of the Clean Water Act (CWA). It is expected that impacts to waters of the United States during Project construction can be authorized by the ACOE using Nationwide Permit (NWP) 14 – Linear Transportation Projects. In accordance with the conditions of NWP 14, a Preconstruction Notification must be submitted to the ACOE for verification that the Project complies with the conditions of the subject NWPs.

Impacts to waters of the State under Section 404 of the CWA also require a Water Quality Certification from the Regional Water Quality Control Board pursuant to Section 401 of the CWA. Waters of the State, and Project impacts to waters of the State, will be the same as for waters of the United States, as discussed above. The Regional Water Quality Control Board may opt to waive the water quality certification and instead issue waste discharge requirements for waters of the State pursuant to its authority under the Porter-Cologne Water Quality Control Act.

The aquatic features within the BSA do not fall under the definition of CDFW waters (i.e., CDFW regulates wetland areas only to the extent that those wetlands are part of a river, stream, or lake as defined by CDFW). Therefore, a Lake or Streambed Alteration Agreement, pursuant to Sections 1600–1616 of the California Fish and Game Code (CFG), is not required.

The Project has been designed to avoid wetlands. As such, the Project would not result in impacts to wetlands. The Project would adhere to the following avoidance and minimization measures for the protection of wetlands consistent with Executive Order 11990:

- All work in aquatic resources shall be minimized to the extent possible.
- Environmentally Sensitive Area fencing shall be placed along the limits of work to protect the adjacent wetland area and shall be maintained in good condition for the duration of construction activities.
- Staging areas, access routes, and construction areas shall be located outside of wetland areas to the maximum extent practicable.
- Measures consistent with the current Caltrans *Construction-site Best Management Practices (BMP) Manual* (Caltrans 2017) (including the Stormwater Pollution Prevention Plan [SWPPP] and Water Pollution Control Program [WPCP] manuals) shall be implemented to minimize effects to adjacent wetlands and riparian areas resulting from erosion, siltation, etc., during construction.
- A WPCP will be prepared by the contractor in accordance with typical provisions associated with a Regional General Permit for Construction Activities (on file with the CVRWQCB). The WPCP will contain a Spill Response Plan with instructions and procedures for reporting spills, the use and location of spill containment equipment, and the use and location of spill collection materials.

The Project would not result in any permanent impact to potential seasonal wetlands and would comply with all regulations defined by Section 404 of the CWA. Therefore, the Project would result in no impact.

d. Would the project interfere substantially with the movement of any native resident or migratory fish or wildlife species or with established native resident or migratory wildlife corridors, or impede the use of native wildlife nursery sites?

LESS THAN SIGNIFICANT WITH MITIGATION. The BSA is almost completely surrounded by highly developed urban areas, which likely impede significant wildlife movement. No significant migration corridors exist within the BSA. The Sacramento River corridor, located approximately 0.5 mile to the east, and the Yolo Bypass Wildlife Area with connectivity to surrounding agricultural lands, located approximately 0.5 mile to the west, are the best examples of migration corridors in the vicinity of the BSA.

The Project site does include tree canopy that may provide nesting habitat for migratory birds. Disturbance of migratory birds during their nesting season (February 1 to August 31) could result in “take,” which is prohibited under the Migratory Bird Treaty Act and Section 3513 of the CFGC. CFGC Section 3503 also prohibits take or destruction of bird nests or eggs.

The seasonal work restriction **Mitigation Measure BIO-1** would be implemented during construction to minimize the potential for take of nesting birds and reduce impacts related to wildlife to less than significant levels:

BIO-1

If work must begin during the nesting season (February 1 to August 31), a qualified biologist shall survey all suitable nesting habitat in the Biological Study Area (BSA) for presence of nesting birds. This survey shall occur no more than 10 days prior to the start of construction. If no nesting activity is observed, work may proceed as planned. If an active nest is discovered, a qualified biologist shall evaluate the potential for the Project to disturb nesting activities. The evaluation criteria shall include, but not be limited to, the location/orientation of the nest in the nest tree, the distance of the nest from the BSA, the line of sight between the nest and the BSA, and the feasibility of establishing no-disturbance buffers.

Additionally, the CDFW shall be contacted to review the evaluation and determine if the Project can proceed without adversely affecting nesting activities.

If work is allowed to proceed, a qualified biologist shall be on-site weekly during construction activities to monitor nesting activity. The biologist shall have the authority to stop work if it is determined that the Project is adversely affecting nesting activities.

- e. Would the project conflict with any local policies or ordinances protecting biological resources, such as a tree preservation policy or ordinance?*

LESS THAN SIGNIFICANT IMPACT. The Project will result in the removal of 17 landscape trees along West Capitol Avenue, including 16 crepe myrtle trees and 1 valley oak. The City will be responsible for replacing trees consistent with Ordinance 04-01, Tree Preservation (Municipal Code Section 2.18). The Project would not result in any other conflict with any local policies regarding biological resources. As such, impacts would be less than significant.

- f. Would the project conflict with the provisions of an adopted Habitat Conservation Plan, Natural Community Conservation Plan, or other approved local, regional, or state habitat conservation plan?*

NO IMPACT. The Project site is in Yolo County, which is under the jurisdiction of the Yolo Habitat Conservation Plan/Natural Community Conservation Plan (HCP/NCCP). However, no habitat for protected species in the Yolo HCP/NCCP is present in the Project area. Therefore, the Project would not conflict with the Yolo HCP/NCCP and there would be no impact.

3.5 CULTURAL RESOURCES

	Potentially Significant Impact	Less Than Significant with Mitigation	Less Than Significant Impact	No Impact
Would the project:				
a. Cause a substantial adverse change in the significance of a historical resource as defined in §15064.5?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
b. Cause a substantial adverse change in the significance of an archaeological resource pursuant to §15064.5?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
c. Directly or indirectly destroy a unique paleontological resource or site or unique geologic feature?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
d. Disturb any human remains, including those interred outside of formal cemeteries?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

3.5.1 Environmental Setting

LSA conducted an archaeological field survey of the Area of Potential Effects (APE) for the Project on August 3, 2018. The APE includes a 3-mile segment of West Capitol Avenue between Enterprise Boulevard and Jefferson Boulevard and a 0.5-mile segment of Jefferson Boulevard between West Capitol Avenue and Park Boulevard in West Sacramento, Yolo County, California. In accordance with the Section 106 Programmatic Agreement, Stipulation VIII.A, the APE was established in consultation with Caltrans Professionally Qualified Staff and Project engineers. The APE incorporates all areas that may contain cultural resources that could potentially be affected by the Project.

The horizontal APE encompasses 63.44 acres of mostly developed land and is confined to primarily City right-of-way, with the exception of two locations where the Project requires access to Caltrans right-of-way. Access to Caltrans right-of-way is needed at the West Capitol Avenue undercrossing of I-80 and at the Jefferson Boulevard undercrossing and associated on-/off-ramps of US-50. As stated in Chapter 1.0, Project Information, the maximum extent of the vertical APE is 7 feet in areas where new water lines are proposed and a minimum excavation depth of 2 feet for fiber-optic cable installation along West Capitol Avenue.

On June 26, 2018, LSA requested a records search from the Northwest Information Center (NWIC) of the California Historical Resources Information System at Sonoma State University in Rohnert Park. The NWIC is an affiliate of the State of California Office of Historic Preservation (OHP) and an official repository for cultural resource reports and records for Yolo County. The NWIC conducted a records search (File #17-3085) of the APE and a 0.5-mile radius on June 28, 2018. LSA reviewed the following documents and inventories as part of the records search:

- National Register of Historic Places (NRHP);
- California Register of Historical Resources (CRHR);
- California Points of Historical Interest (OHP 1992 and updates);
- California Historical Landmarks (OHP 1996);
- California Inventory of Historic Resources (OHP 1976);
- Archaeological Determinations of Eligibility (OHP 2012a); and
- Directory of Properties in the Historic Property Data File (OHP 2012b).

The records search results identified 14 investigations and 1 cultural resource within the APE. **Table 3.C: Resources within the APE** provides a summary of the cultural resource within the APE.

Table 3.C: Resources Within the APE

Primary No./ Trinomial	Age	Description	Recorded By
P-57-000196/ CA-YOL-000180H	Historic	The resource formerly known as Old State Highway 40, Lincoln Highway, and Davis Highway includes the current alignment of West Capitol Avenue. The segment of West Capitol Avenue from Harbor Boulevard to the Washington overcrossing was recorded within the APE and evaluated as a potential contributor to the larger resource. This segment of the resource was found not eligible for the NRHP or CRHR.	S.G. Lindstrom (1993); Andrea Galvin (2007)

APE = Area of Potential Effects
CRHR = California Register of Historical Resources
NRHP = National Register of Historic Places

The NWIC also identified P-57-000739 in the APE; however, this is a mis-plotting of resource location. In actuality, the cultural resource is adjacent to the APE (west of Jefferson Boulevard). Therefore, it was not included in the APE because there is no potential for this resource to be affected.

An additional 34 investigations have been conducted within 0.5 mile of the Project. These investigations have resulted in the identification and recordation of 17 additional resources. Of these resources, one is immediately adjacent to the APE. This resource is on the east side of Jefferson Boulevard, just south of the eastbound on-ramp to US-50, at 917 Jefferson Boulevard. This resource consists of a single-story concrete building occupied by AT&T with an associated telecommunications monopole situated immediately south of the building. According to the site record, the building was erected sometime in the 1950s. Based on the resource record, this resource does not appear eligible for the CRHR or NRHP. Additionally, this resource is in close proximity to the Project, but proposed improvements are not likely to affect the resource.

LSA conducted additional research to obtain archaeological, ethnographic, historical, and environmental information about the APE and its vicinity. The literature reviewed includes publications, maps, local historical directories, and websites for archaeological, ethnographic, historical, and environmental information about the APE and its vicinity.

On August 2, 2018, LSA consulted the West Sacramento Historical Society, whose representative expressed the importance of the relationship between the West Capitol Avenue alignment and the historic Lincoln Highway.

LSA also consulted with the Native American Heritage Commission (NAHC) and several Native American representatives who might have information or concerns about the APE. For more information regarding tribal consultation, please see Section 3.17.

3.5.2 Impact Analysis

- a. *Would the project cause a substantial adverse change in the significance of a historical resource as defined in §15064.5?*

LESS THAN SIGNIFICANT IMPACT. The cultural resource identified in **Table 3.C**, above, is West Capitol Avenue itself (P-57-000196). The current alignment of West Capitol Avenue was historically referred to as Lincoln Highway. Modifications have been made to most of the buildings and structures that were once associated with historic Lincoln Highway, and the roadway has been modified through widening and repair with non-original materials. The introduction and improvement of sidewalks, gutters, and bicycle lanes would not further detract from the historic usage of the roadway, nor would it modify or modernize the roadway alignment or environment in any ways that are not already present in the existing conditions. Interpretive plaques or signs for Lincoln Highway would be placed along West Capitol Avenue at the intersections of Harbor and Jefferson Boulevards.

The West Capital Raceway, which consisted of a 0.25-mile clay oval racetrack, was once adjacent to, and partially intersecting, the APE. West Capital Raceway was nationally reputed to be the country's best dirt short track west of Indiana and was an integral part of the evolution of sprint car racing in California. A monument to the West Capital Raceway was identified within the APE boundary, but the Project does not appear to impact this monument. Implementation of the Project would result in less than significant impacts.

- b. *Would the project cause a substantial adverse change in the significance of an archaeological resource pursuant to §15064.5?*

LESS THAN SIGNIFICANT WITH MITIGATION. No archaeological cultural resources were identified in the APE. Geologically, the overall APE is sensitive for encountering buried pre-contact archaeological resources. Previous development and infrastructure does not preclude the potential of encountering an intact archaeological deposit, particularly in areas where native soil may be disturbed due to new infrastructure installation or a larger construction footprint than previous installations. If previously unidentified cultural materials are unearthed during construction, it is Caltrans policy that work be halted in that area until a qualified archaeologist can assess the significance of the find. Additional archaeological surveys will be needed if Project limits are extended beyond the present survey limits. With the implementation of **Mitigation Measures CULT-1** and **CULT-2**, any impacts to unknown archaeological resources would be reduced to less than significant:

- CULT-1** Prior to construction, the City of West Sacramento (City) shall retain a professional archaeologist and invite a geographically affiliated Native American representative to provide a pre-construction briefing to supervisory personnel of any excavation contractor to alert them to the possibility of exposing significant historic or prehistoric archaeological resources within the Project area. The briefing shall discuss any resources that could be exposed, the need to stop excavation at the discovery site, and the procedures to follow regarding discovery protection and notification.

CULT-2 The City shall inform its contractor(s) of the possibility of subsurface archaeological deposits within the Project area by including the following directive in contract documents:

“If prehistoric or historical archaeological deposits are discovered during project activities, all work within 100 feet of the discovery shall be redirected and a qualified archaeologist contacted to assess the situation, consult with agencies as appropriate, and make recommendations regarding the treatment of the discovery. Project personnel shall not collect or move any archaeological materials or human remains and associated materials. Archaeological resources can include flaked-stone tools (e.g., projectile points, knives, choppers) or obsidian, chert, basalt, or quartzite toolmaking debris; bone tools; culturally darkened soil (i.e., midden soil often containing heat-affected rock, ash and charcoal, shellfish remains, faunal bones, and cultural materials); and stone-milling equipment (e.g., mortars, pestles, handstones). Prehistoric archaeological sites often contain human remains. Historical materials can include wood, stone, concrete, or adobe footings, walls, and other structural remains; debris-filled wells or privies; and deposits of wood, glass, ceramics, metal, and other refuse.”

If deposits of prehistoric or historical archaeological materials are encountered during Project construction activities, all work within 100 feet of the discovery shall be redirected and a qualified archaeologist contacted (if one is not already on-site) to assess the situation, make recommendations regarding the treatment of the discovery, and develop proper mitigation measures required for the discovery (California Code of Regulations [CCR] Title 14, § 15064.5(f)). The City shall also be notified. If the resource is prehistoric in age, a geographically affiliated Native American representative shall be notified and invited to consult. The archaeologist should prepare a report documenting the methods and results of the investigation, coordinate with the geographically affiliated Native American representative, and provide recommendations for the treatment of the archaeological materials discovered. The report should be submitted to the City and the NWIC.

c. Would the project directly or indirectly destroy a unique paleontological resource or site or unique geologic feature?

LESS THAN SIGNIFICANT WITH MITIGATION. The Project site is in a previously disturbed area, and ground disturbance is not expected to extend below a depth of 7 feet. Therefore, the Project is unlikely to impact scientifically important paleontological resources. In the unlikely event that fossil remains are encountered, paleontological mitigation will need to be developed. This mitigation would include paleontological monitoring; collection of observed resources; preservation, stabilization, and identification of collected resources; curation of resources into a museum repository; and preparation of a monitoring report of findings.

No paleontological resources or unique geologic features are known to exist within or near the Project site. The site is underlain by Holocene Alluvium, which is considered to have low paleontological sensitivity from the surface to a depth of 20 feet and high sensitivity below that mark. However, the Project site is in a previously disturbed area and will have ground disturbance that extends to a maximum depth of 7 feet. Therefore, the Project is unlikely to impact scientifically important paleontological resources. Should undiscovered paleontological resources be found during Project construction, **Mitigation Measure PALEO-1** shall be implemented to reduce potential impacts to paleontological resources.

PALEO-1: If paleontological resources are encountered during Project excavation and no monitor is present, all ground-disturbing activities within 50 feet of the find shall be redirected to other areas until a qualified paleontologist can be retained to evaluate the find and make recommendations for additional paleontological mitigation, which may include paleontological monitoring; collection of observed resources; preservation, stabilization, and identification of collected resources; curation of resources into a museum repository; and preparation of a final report documenting the monitoring methods and results to be submitted to the museum repository and the City of West Sacramento.

d. Would the project disturb any human remains, including those interred outside of formal cemeteries?

LESS THAN SIGNIFICANT WITH MITIGATION. The Project is in a previously disturbed area and ground disturbance is not expected to extend below a depth of 7 feet. Impacts to human remains are not anticipated. However, in the unlikely event that human remains are discovered or disturbed during Project implementation, **Mitigation Measure CULT-3** would reduce impacts to less than significant.

CULT-3 If human remains are encountered, these remains shall be treated in accordance with California Health and Safety Code (HSC) Section 7050.5. The City shall inform its contractor(s) of the cultural sensitivity of the Project area for human remains by including the following directive in contract documents:

“If human remains are encountered during Project activities, work within 100 feet of the discovery shall be redirected and the County Coroner notified immediately. At the same time, an archaeologist shall be contacted to assess the situation and consult with agencies as appropriate. Project personnel shall not collect or move any human remains and associated materials. If the human remains are of Native American origin, the Coroner must notify the NAHC within 24 hours of this identification. The NAHC will identify a Most Likely Descendant to inspect the site and provide recommendations for the proper treatment of the remains and associated grave goods.”

In the event that human remains are encountered during Project activities, work within 100 feet of the discovery should be redirected and the County Coroner notified immediately, consistent with the requirements outlined by CEQA

Guidelines, Section 15064.5(e)(1), and in accordance with HSC Section 7050.5 and California Public Resources Code Section 5097.98 (Chapter 1492, Statutes of 1982, Senate Bill 297), as relevant. At the same time, an archaeologist should be contacted to assess the situation and consult with agencies as appropriate. Project personnel should not collect or move any human remains or associated materials. If the human remains are of Native American origin, the coroner must notify the NAHC within 24 hours of identification. Pursuant to Section 5097.9 and 5097.993 of the California Public Resources Code, the NAHC shall identify a "Native American Most Likely Descendent" to inspect the site and provide recommendations for the proper treatment of the remains and any associated grave goods. Upon completion of the assessment, the archaeologist shall prepare a report documenting the methods and results and shall provide recommendations for the treatment of the human remains and any associated cultural materials, as appropriate and in coordination with the recommendations of the Most Likely Descendent. The report shall be submitted to the City and the NWIC.

3.6 GEOLOGY AND SOILS

	Potentially Significant Impact	Less Than Significant with Mitigation	Less Than Significant Impact	No Impact
Would the project:				
a. Expose people or structures to potential substantial adverse effects, including the risk of loss, injury, or death involving:				
i. Rupture of a known earthquake fault, as delineated on the most recent Alquist-Priolo Earthquake Fault Zoning Map issued by the State Geologist for the area or based on other substantial evidence of a known fault? Refer to Division of Mines and Geology Special Publication 42.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
ii. Strong seismic ground shaking?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
iii. Seismic-related ground failure, including liquefaction?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
iv. Landslides?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
b. Result in substantial soil erosion or the loss of topsoil?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
c. Be located on a geologic unit or soil that is unstable, or that would become unstable as a result of the project, and potentially result in on- or off-site landslide, lateral spreading, subsidence, liquefaction or collapse?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
d. Be located on expansive soil, as defined in Table 18-1-B of the Uniform Building Code (1994), creating substantial risks to life or property?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
e. Have soils incapable of adequately supporting the use of septic tanks or alternative waste water disposal systems where sewers are not available for the disposal of waste water?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

3.6.1 Environmental Setting

The Project area is in West Sacramento in Yolo County, within the Great Valley geomorphic province. The Great Valley is an elongated lowland that extends 500 miles north and south and separates the Sierra Nevada from the Coast Ranges. The valley is geologically monotonous and relatively un-deformed. It primarily consists of the alluvial, flood, and delta plains of its two major rivers—the Sacramento and San Joaquin Rivers—and their tributaries. The only outward drainage is through Carquinez Strait into San Francisco Bay. The Great Valley’s most fertile lands lie at the head of this strait, where the deltas of the two main rivers converge.

The Project area is west of the Sacramento River, and the easternmost point of the Project is approximately 1.5 miles south of the confluence of the Sacramento and American Rivers. The Project area lies on a widespread basin deposit (Qhb) made up of fine-grained sediments with horizontal stratification deposited by standing or slow-moving water in topographic lows.

The Project area’s elevation is approximately 25 feet above mean sea level. The upper soil is composed of stream channel deposits underlain by older interlayered cohesive and granular river-delta deposits. The soil types in the area include Sacramento silty clay loam, Valdez silt loam (clay substratum), Meyers clay, Lang sandy loam (deep), and Lang sandy loam. Soil characteristics are described in **Table 3.D: Project Site Soils**.

Table 3.D: Project Site Soils

Soil Type	Drainage Class	Runoff	K-Factor ¹	Linear Extensibility ²	Depth to Water Table
Sacramento silty clay loam	Poorly drained	High	0.28	Moderate (4.5)	0–35 inches
Valdez silt loam	Poorly drained	Negligible	0.49	Low (1.5)	36–79 inches
Meyers clay	Moderately well drained	Very Low	0.24	High (7.5)	> 80 inches
Lang sandy loam (deep)	Somewhat poorly drained	Very Low	0.24	Low (1.5)	36–72 inches
Lang sandy loam	Somewhat poorly drained	Very Low	0.24	Low (1.5)	36–72 inches

Sources: NRCS (2017); City of West Sacramento (2016b).

¹ Erosion factor K is a measure of the susceptibility of a soil to erosion by water. Values of K range from 0.02 to 0.69, where the higher the K value, the more susceptible the soil is to erosion by water.

² Shrink-swell potential is determined by linear extensibility. Values of linear extensibility range from 0 to 30, where 0–3 is low, 3–6 is moderate, 6–9 is high, and 9–30 is very high.

3.6.2 Impact Analysis

- a. *Would the project expose people or structures to potential substantial adverse effects, including the risk of loss, injury, or death involving:*
 - i. *Rupture of a known earthquake fault, as delineated on the most recent Alquist-Priolo Earthquake Fault Zoning Map issued by the State Geologist for the area or based on other substantial evidence of a known fault? Refer to Division of Mines and Geology Special Publication 42.*
 - ii. *Strong seismic ground shaking?*
 - iii. *Seismic-related ground failure, including liquefaction?*
 - iv. *Landslides?*

NO IMPACT. The Project is not located along a known fault, nor is it within an area delineated on the most recent Alquist-Priolo Earthquake Fault Zoning Map. The nearest significantly active faults are over 50 miles away and include the Calaveras fault, the Hayward Fault Zone, and the San Andreas Fault Zone. Potentially active faults include the Midland (20 miles away), Greenland (40 miles away), and Rodgers Creek (65 miles away) faults. Historically, West Sacramento has experienced relatively low levels of seismic activity. However, there is a possibility of neighboring seismic activity being felt in West Sacramento, and earthquakes from other regions have occasionally caused minor damage. Therefore, there is little likelihood of strong seismic ground shaking or seismic-related ground failure. The topography of the area is a flat leveed floodplain, and the Project is therefore not susceptible to landslides. There would be no impact as a result of the Project.

- b. *Would the project result in substantial soil erosion or the loss of topsoil?*

NO IMPACT. As displayed in **Table 3.D**, above, soils within the Project site have low susceptibility to substantial erosion, with the exception of Valdez silt loam. However, areas underlain by Valdez silt loam are confined to the section of West Capitol Avenue between just east of Glide Avenue and Pecan Street. No improvements to utilities would occur within this section of the Project and no soil

would be removed. In addition, the Project's actions would occur exclusively within urban, medium- to high-density residential, commercial, and retail areas. Within these areas, the work will take place in, on, and immediately adjacent to existing City streets. Very little loss of topsoil would occur, as very little topsoil would be disturbed by Project activities. There would be no impact as a result of the Project.

- c. Would the project be located on a geologic unit or soil that is unstable, or that would become unstable as a result of the project, and potentially result in on- or off-site landslide, lateral spreading, subsidence, liquefaction or collapse?*

LESS THAN SIGNIFICANT WITH MITIGATION. The Project site is in a topographically flat region and is therefore not susceptible to landslides. The risk of lateral spreading is low, as the Project site does not consist of fill material. The City's General Plan Update Environmental Impact Report (EIR) (City of West Sacramento 2016b) did not identify any areas currently experiencing subsidence within West Sacramento. As displayed in **Table 3.D**, the Project site consists of sandy or silty soils and shallow groundwater levels. These characteristics present a risk of liquefaction within the Project site. The City's General Plan includes a policy to prevent loss of life, injury, and property damage due to geologic and seismic hazards. The implementation of **Mitigation Measure GEO-1** would reduce any impacts related to potential seismic or geologic hazards to less than significant.

GEO-1 A Certified Engineering Geologist or Licensed Geotechnical Engineer shall assess geologic and seismic conditions in the Project area (including expansive soils) and should provide recommendations for Project design, thereby preventing any impacts from potential seismic or geologic hazards. The construction contractor shall review the Geotechnical Report (3396.x) prepared by Blackburn Consulting (December 2018) and shall adhere to all applicable recommendations included in the report.

- d. Would the project be located on expansive soil, as defined in Table 18-1-B of the Uniform Building Code (1994), creating substantial risks to life or property?*

LESS THAN SIGNIFICANT WITH MITIGATION. Linear extensibility is a measure of how much a soil expands and contracts with changes in moisture content. Soils with moderate to high linear extensibility (also known as expansive soils) do not provide a suitable substrate for construction without modification. Expansive soils generally have a high clay content. Values of linear extensibility range from 0 to 30, where 0–3 is low, 3–6 is moderate, 6–9 is high, and 9–30 is very high (City of West Sacramento 2016b). **Table 3.D**, above, identifies the linear extensibility of soils underlying the Project site as low to high. Most soils found within the project area have low linear extensibility and are not considered expansive. Sacramento silty clay loam has a linear extensibility value of 4.5, which is considered moderate. Meyers clay has a linear extensibility value of 7.5 and a high shrink-swell potential. Meyers clay soils are found along West Capitol Avenue between Houston Street and Glide Avenue. The City's General Plan includes a policy to prevent loss of life, injury, and property damage due to geologic and seismic hazards. **Mitigation Measure GEO-1** would be implemented to reduce project impacts to a less than significant level.

-
- e. Would the project have soils incapable of adequately supporting the use of septic tanks or alternative waste water disposal systems where sewers are not available for the disposal of waste water?*

NO IMPACT. The Project would not require septic or other alternative wastewater disposal systems. There would be no impact as a result of the Project.

3.7 GREENHOUSE GAS EMISSIONS

	Potentially Significant Impact	Less Than Significant with Mitigation	Less Than Significant Impact	No Impact
Would the project:				
a. Generate greenhouse gas emissions, either directly or indirectly, that may have a significant impact on the environment?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
b. Conflict with an applicable plan, policy or regulation adopted for the purpose of reducing the emissions of greenhouse gases?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

3.7.1 Environmental Setting

Greenhouse gases (GHG) are present in the atmosphere naturally, are released by natural sources, or are formed from secondary reactions taking place in the atmosphere. The gases that are widely seen as the principal contributors to human-induced global climate change are:

- Carbon dioxide (CO₂);
- Methane (CH₄);
- Nitrous oxide (N₂O);
- Hydrofluorocarbons (HFC);
- Perfluorocarbons (PFC); and
- Sulfur hexafluoride (SF₆).

Over the last 200 years, humans have caused substantial quantities of GHGs to be released into the atmosphere. These extra emissions are increasing GHG concentrations in the atmosphere and enhancing the natural greenhouse effect, which is believed to be causing global warming. While manmade GHGs include naturally occurring GHGs such as CO₂, CH₄, and N₂O, some gases, like HFCs, PFCs, and SF₆, are completely new to the atmosphere.

Certain gases, such as water vapor, are short-lived in the atmosphere. Others remain in the atmosphere for significant periods of time, contributing to climate change in the long term. Water vapor is excluded from the list of GHGs above because it is short-lived in the atmosphere and its atmospheric concentrations are largely determined by natural processes, such as oceanic evaporation.

These gases vary considerably in terms of Global Warming Potential (GWP), which is a concept developed to compare the ability of each GHG to trap heat in the atmosphere relative to another gas. GWP is based on several factors, including the relative effectiveness of a gas in absorbing infrared radiation and the length of time the gas remains in the atmosphere (“atmospheric lifetime”). The GWP of each gas is measured relative to CO₂, the most abundant GHG; the definition of GWP for a particular GHG is the ratio of heat trapped by one unit mass of the GHG to the ratio of heat trapped by one unit mass of CO₂ over a specified time period. GHG emissions are typically measured in terms of pounds or tons of “CO₂ equivalents”.

3.7.2 Impact Analysis

- a. *Would the project generate greenhouse gas emissions, either directly or indirectly, that may have a significant impact on the environment?*

LESS THAN SIGNIFICANT IMPACT. The YSAQMD has not established any specific thresholds of significance for GHG emissions, but it recommends that proposed projects include a qualitative discussion of GHGs in air quality analyses for sizable projects.

The Project would involve roadway improvements to enhance pedestrian, bicycle, and streetscape amenities and to install new water lines and fiber-optic cable. Emissions associated with Project implementation would occur from construction activities and would consist primarily of emissions from equipment exhaust. Given the nature of proposed improvement projects, daily emissions from equipment operation, vehicles transporting equipment and workers, and hauling materials would be minimal. These emissions would be temporary and limited to the immediate area around the Project site.

Because the Project would improve pedestrian, bicycle, and streetscape amenities and would not generate a substantial increase in vehicle trips, the Project is not expected to generate an increase in GHG emissions above current levels. Once constructed, the Project would encourage nonmotorized transportation, which could contribute to a reduction in regional GHG emissions. Therefore, impacts associated with the Project would be less than significant.

- b. *Would the project conflict with an applicable plan, policy or regulation adopted for the purpose of reducing the emissions of greenhouse gases?*

NO IMPACT. Assembly Bill (AB) 32, the “Global Warming Solutions Act,” passed by the State Legislature on August 31, 2006, aims to reduce GHG emissions to 1990 levels by 2020. This target requires emission levels to be reduced to or below 427 million metric tons (MMT) and requires the reduction of 169 MMT from the State’s projected business-as-usual 2020 emissions of 596 MMT. Strategies and measures for meeting the 2020 target are outlined in the Scoping Plan approved by CARB on December 11, 2008. The Scoping Plan includes measures to address GHG emission reduction strategies related to energy efficiency, water use, and recycling and solid waste, among other measures. However, such measures will not be binding until after they are adopted through the normal rulemaking process; therefore, they are only recommendations at this time.

The City completed a Draft Climate Action Plan in August 2010. While the plan has not been finalized, it outlines the program the community will follow to reduce GHG emissions. None of the proposed measures in the Climate Action Plan apply to the Project, as they include either actions the City will take to reduce GHG emissions communitywide, or actions to be taken by new development projects.

The Project would construct improvements to an existing roadway, including enhanced pedestrian and bicycle facilities. Such facilities would encourage nonmotorized transport, which would help in reducing GHG emissions. The Project would not conflict with any applicable plan, policy or regulation involving GHG emissions. Therefore, no impact would occur.

3.8 HAZARDS AND HAZARDOUS MATERIALS

	Potentially Significant Impact	Less Than Significant with Mitigation	Less Than Significant Impact	No Impact
Would the project:				
a. Create a significant hazard to the public or the environment through the routine transport, use, or disposal of hazardous materials?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
b. Create a significant hazard to the public or the environment through reasonably foreseeable upset and accident conditions involving the release of hazardous materials into the environment?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
c. Emit hazardous emissions or handle hazardous or acutely hazardous materials, substances, or waste within one-quarter mile of an existing or proposed school?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
d. Be located on a site which is included on a list of hazardous materials sites compiled pursuant to Government Code Section 65962.5 and, as a result, would it create a significant hazard to the public or the environment?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
e. For a project located within an airport land use plan or, where such a plan has not been adopted, within 2 miles of a public airport or public use airport, would the project result in a safety hazard for people residing or working in the project area?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
f. For a project within the vicinity of a private airstrip, would the project result in a safety hazard for people residing or working in the project area?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
g. Impair implementation of or physically interfere with an adopted emergency response plan or emergency evacuation plan?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
h. Expose people or structures to a significant risk of loss, injury or death involving wildland fires, including where wildlands are adjacent to urbanized areas or where residences are intermixed with wildlands?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

3.8.1 Environmental Setting

The EnviroStor Database was searched to determine if there are any hazardous materials cleanup sites within 1,000 feet of the Project site (California Department of Toxic Substances Control [DTSC] 2018). EnviroStor indicated one evaluation occurring at Sunshine Laundry and Cleaners, located at 820 Merkley Avenue, approximately 850 feet east of Jefferson Boulevard in the Project area. Sunshine Laundry and Cleaners ceased operations in 1981, and there are no known suspected spills or releases at this site. Multiple leaking underground storage tank cleanup sites are within 1,000 feet of the Project, adjacent to West Capitol Avenue and Jefferson Boulevard; however, EnviroStor indicates that these cases are closed. None of these sites are anticipated to impact the Project.

An Initial Site Assessment was completed for the Project (see **Appendix C: Initial Site Assessment**) to identify recognized environmental conditions (REC) and/or potential RECs within and adjacent to the Project area that could affect the design, constructability, feasibility, and/or cost of the Project (Blackburn Consulting 2018). The Initial Site Assessment identified 54 parcels with hazardous material conditions located adjacent to the Project site. Of the 54 parcels, 12 have a high risk that groundwater and/or soil impacts resulting from historical releases from the adjacent parcels have extended beneath the Project roadway improvement area. The 12 high-risk parcels are detailed in **Table 3.E: Adjacent Parcels with Known and/or Potential RECs**, below. The 12 high-risk parcels have existing documentation that hazardous material impacts have or are likely to have extended beneath the Project roadway improvement area. No evidence is in the records review to suggest that hazardous material issues from the other 42 sites would impact the planned roadway improvement. Current Project design and construction impacts would generally involve shallow disturbance of up to 7 feet below ground surface. Therefore, it is unlikely that any significant soil or groundwater impacts from adjacent sites.

The presence of aerially deposited lead (ADL) along the shoulders of pre-1987 constructed highways, freeways, and other heavily traveled roads is common due to emissions from vehicles powered by internal combustion (i.e., leaded gasoline-fueled engines). In addition, yellow traffic striping is known to contain heavy metals such as lead and chromium at concentrations in excess of the hazardous waste thresholds established by the CCR and may produce toxic fumes when heated (Blackburn Consulting 2018). Blackburn Consulting also completed an ADL Assessment (Blackburn Consulting 2019), which concluded that lead impacted soil within the project limits do not pose a significant health risk to site workers.

Asbestos is a naturally occurring fibrous silicate mineral made up of thin but strong, durable fibers. Asbestos may occur in two forms: (1) NOA, which is found in soil and ultramafic rock (e.g., serpentine rock), and (2) in man-made products called asbestos-containing materials, such as insulation, roof shingles, and cement. Asbestos is a mineral; therefore, asbestos fibers are relatively stable in the environment. "Friable asbestos," or asbestos-containing materials that has been crushed into a powder, can become suspended in the air and present the most significant risk to human health (DTSC 2010).

3.8.2 Impact Analysis

a. Would the project create a significant hazard to the public or the environment through the routine transport, use, or disposal of hazardous materials?

LESS THAN SIGNIFICANT IMPACT. Construction of the Project would include the incidental transport and use of hazardous materials, including oils, lubricants, fuels, and specific building materials such as concrete and asphalt. The transport and use of such hazardous materials would be subject to State hazardous waste regulations, including CCR Title 22 and rules and regulations set by the California Occupational Health and Safety Administration. Compliance with State regulations would result in a less than significant risk to the public and the environment. Once operational, the Project would not include routine transport, use, or disposal of hazardous materials. As such, a less than significant impact would occur.

Table 3.E: Adjacent Parcels with Known and/or Potential Recognized Environmental Conditions

APN(s)	Address	Description	Status
008-010-19 and 008-010-31	4790 and 4800 West Capitol Avenue	Formerly Epoch Truck Stop. Currently Chevron and Arco service stations. Groundwater has been impacted by both facilities and is currently regulated as a comingled plume.	The project water quality objectives have not been achieved to date.
080-030-13	3600 West Capitol Avenue	Formerly Wabash National Trailers. Currently has no identified name. Contamination from a wash rack system includes concentrations of PCE and trichloroethene above regulatory screening levels.	Active Monitoring and Reporting Program with CVRWQCB.
067-120-70	3069 West Capitol Avenue	Formerly Lowe Dollar Dry Cleaners. Currently a vacant lot. Elevated levels of PCE from the former dry-cleaning machine were found in soil and groundwater samples.	Open site assessment as of July 2018.
008-450-18	2816 West Capitol Avenue	Formerly an Exxon service station. Currently Sinclair's Shell service station. Groundwater has been impacted by TPH and is currently regulated. Remediation by natural attenuation is ongoing, and concentrations of TPH remaining in groundwater should reach their water quality goals by 2050.	The project water quality objectives have not been achieved to date.
008-441-04	2500 West Capitol Avenue	Formerly DarPetro. Currently an Exxon service station. Existing petroleum impacts to soil and shallow groundwater. Water quality objectives have been nearly achieved for all constituents except degraded TPH.	The case remains open and is eligible for closure.
067-310-13	1381 West Capitol Avenue	Formerly a Chevron service station. Currently a Walgreen's parking lot. Groundwater has been impacted. The dissolved hydrocarbon plume is stable and shrinking and shows declining concentration trends.	Degradation calculations indicate water quality objectives should be met by 2021 to 2023.
067-310-30	1351-1371 Merkley Avenue	Currently a martial arts studio and Betty's Beauty Salon. The site is listed in EDR's Hist Cleaners database.	Potential PCE and TCE plume.
067-310-29	1349 Merkley Avenue	Currently City Massage. The site is listed in EDR's Hist Cleaners database.	Potential PCE and TCE plume.
067-310-28	1331 Merkley Avenue	Currently El Rancho Cleaners. A Phase II ESA from a nearby site and on-site soil vapor studies indicate groundwater is impacted with PCE, TCE, and TPH. The plume model indicates significant impacts extend beneath Merkley Avenue.	N/A
067-310-25 and 067-310-26	1231 Merkley Avenue	Formerly H&H Cleaners. Currently Pooja Indian Grill. Investigation reports show subsurface concentrations of PCE are present in groundwater at concentrations ranging from 6,400 µg/l to 40,000 µg/l.	N/A

Source: Blackburn Consulting (2018).

µg/l = microgram/liter

APN = Assessor's Parcel Number(s)

CVRWQCB = Central Valley Regional Water Quality Control Board

EDR = Environmental Data Resources, Inc.

ESA = Environmental Site Assessment

N/A = not available

PCE = tetrachloroethene

TCE = trichloroethylene

TPH = total petroleum hydrocarbons

- b. Would the project create a significant hazard to the public or the environment through reasonably foreseeable upset and accident conditions involving the release of hazardous materials into the environment?*

LESS THAN SIGNIFICANT WITH MITIGATION. Hazardous materials (e.g., fuels, lubricants, concrete-curing materials) may be used by construction equipment and for Project improvements during construction. These materials would be used in accordance with all applicable laws and regulations and, if used properly, would not pose a hazard to people or the environment. All refueling and maintenance of construction vehicles and equipment would occur within the designated staging area for the Project. The use of hazardous materials for construction equipment would be temporary, and the Project would not include a permanent use or source of hazardous materials. The Project may include the removal of yellow traffic striping, which may result in potential exposure to high concentrations of heavy metals such as lead and chromium. ADL may also be present along the edge of the existing roadway. The Project site is not underlain by ultramafic or serpentine rock and therefore is not likely to contain NOA. The Project does not include demolition of existing buildings; however, ACMs may be found in underground asbestos cement (Transite) pipes during Project utility improvements. Implementation of **Mitigation Measures HAZ-1, HAZ-2, and HAZ-3** would reduce potential impacts to a less than significant level.

HAZ-1 The contractor shall prepare a Spill Prevention and Countermeasure Plan (SPCP) prior to the commencement of construction activities. The SPCP shall include information on the nature of all hazardous materials that would be used on-site. The SPCP shall also include information regarding proper handling of hazardous materials and cleanup procedures in the event of an accidental release. The phone number of the agency overseeing hazardous materials and toxics cleanup shall be provided in the SPCP.

HAZ-2 Any yellow traffic striping shall be removed and disposed of in accordance with Caltrans Standard Special Provisions for Hazardous Waste.

HAZ-3 For improvement work proposed within the right-of-way of West Capitol Avenue, the potential for ADL should be evaluated. An appropriate soil management plan shall be developed for soil containing significant concentrations of ADL. The contractor shall conduct all grading operations with the awareness that lead impacted soils are present on the site and conduct all operations in accordance with a specialized soil management plan and applicable Cal/OSHA requirements including a project specific worker Health & Safety Plan and Lead Compliance Plan.

c. Would the project emit hazardous emissions or handle hazardous or acutely hazardous materials, substances, or waste within one-quarter mile of an existing or proposed school?

LESS THAN SIGNIFICANT WITH MITIGATION. Schools are considered sensitive receptors for hazardous materials issues because children are more susceptible than adults to the effects of many hazardous materials. The Project is within 0.25 mile of the following existing or proposed schools:

- Yolo Education Center and the James Marshall Parent Participatory Nursery School, both located at 919 Westacre Road;
- Sacramento Valley Charter School, located at 2399 Sellers Way;
- Heritage Peak Charter School, located at 840 Jefferson Boulevard;
- Learning Ladder Preschool and Child Care Center, located in the City of Sacramento's Community Center at 1075 West Capitol Avenue; and
- City of Dharma Realm Instilling Goodness Elementary School and Developing Virtue Secondary School, located at 1029 West Capitol Avenue.

Because construction activities could potentially involve hazardous materials, the Project would have the potential to emit hazardous emissions or handle hazardous materials, substances, or waste within 0.25 mile of an existing or proposed school. However, with implementation of **Mitigation Measure HAZ-1**, described above, the potential impacts would be reduced to a less than significant level.

d. Would the project be located on a site which is included on a list of hazardous materials sites compiled pursuant to Government Code Section 65962.5 and, as a result, would it create a significant hazard to the public or the environment?

NO IMPACT. No hazardous material sites are within the Project footprint. Therefore, the Project would not create a significant hazard to the public or the environment and no impact involving hazardous material sites would occur.

e. Would the project be located within an airport land use plan or, where such a plan has not been adopted, within 2 miles of a public airport or public use airport, would the project result in a safety hazard for people residing or working in the project area?

NO IMPACT. Sacramento Executive Airport, located at 6151 Freeport Boulevard in Sacramento, is approximately 6 miles southeast of the Project site and is the closest public airport to the Project. The Project is not within an airport land use plan or within 2 miles of a public airport; therefore, no impacts would occur.

f. For a project within the vicinity of a private airstrip, would the project result in a safety hazard for people residing or working in the project area?

NO IMPACT. The Project is not within the vicinity of a private airstrip; therefore, no impacts would occur.

g. Would the project impair implementation of or physically interfere with an adopted emergency response plan or emergency evacuation plan?

LESS THAN SIGNIFICANT WITH MITIGATION. The Project would include construction along West Capitol Avenue, a designated Surface Evacuation Street in West Sacramento. Construction of the Project would likely not require roadway closure or any planned detours. However, construction may require temporary lane closure and may affect emergency access. In the event of any temporary road closures or traffic delays, the construction contractor would provide advance notice to emergency service providers regarding the timing, location, and duration of construction activities.

Implementation of **Mitigation Measure TRANS-1**, detailed in Section 3.16, would reduce any temporary impacts related to adequate emergency access to a less than significant level.

h. Would the project expose people or structures to a significant risk of loss, injury or death involving wildland fires, including where wildlands are adjacent to urbanized areas or where residences are intermixed with wildlands?

NO IMPACT. The Project site is within a highly urbanized area of West Sacramento. The California Department of Forestry and Fire Protection identifies fire hazard severity zones throughout the State and has designated the site as an unzoned local responsibility area. Moderate fire hazard severity zones are identified in the northern portions of West Sacramento and would not affect the Project site. The Project site is not in or near any wildlands; therefore, no impacts would occur.

3.9 HYDROLOGY AND WATER QUALITY

	Potentially Significant Impact	Less Than Significant with Mitigation	Less Than Significant Impact	No Impact
Would the project:				
a. Violate any water quality standards or waste discharge requirements?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
b. Substantially deplete groundwater supplies or interfere substantially with groundwater recharge such that there would be a net deficit in aquifer volume or a lowering of the local groundwater table level (e.g., the production rate of pre-existing nearby wells would drop to a level which would not support existing land uses or planned uses for which permits have been granted)?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
c. Substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river, in a manner which would result in substantial erosion or siltation on- or off-site?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
d. Substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river, or substantially increase the rate or amount of surface runoff in a manner which would result in flooding on- or off-site?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
e. Create or contribute runoff water which would exceed the capacity of existing or planned stormwater drainage systems or provide substantial additional sources of polluted runoff?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
f. Otherwise substantially degrade water quality?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
g. Place housing within a 100-year flood hazard area as mapped on a federal Flood Hazard Boundary or Flood Insurance Rate Map or other flood hazard delineation map?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
h. Place within a 100-year flood hazard area structures which would impede or redirect flood flows?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
i. Expose people or structures to a significant risk of loss, injury or death involving flooding, including flooding as a result of the failure of a levee or dam?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
j. Inundation by seiche, tsunami, or mudflow?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>

3.9.1 Environmental Setting

The Project is in West Sacramento, which is within the Sacramento Valley Groundwater Basin, Yolo Sub-basin, and is under the jurisdiction of the CVRWQCB. The Sacramento River flows along the east and northeast boundaries of the city and is the largest river in California. The river’s watershed is approximately 26,000 square miles and includes major tributaries such as the Feather River and the American River. The river’s flow is controlled by several principal reservoirs, including Lake Shasta and Trinity Lake to the north, Lake Oroville along the Feather River, and Folsom Lake along the American River. The water quality of the Sacramento River is generally good to excellent and has relatively low biochemical oxygen demand, medium to high dissolved oxygen, and low mineral and nutrient content.

The City maintains one groundwater well. The well is currently on standby status and is available for emergencies. However, surface water from the Sacramento River is used to meet water demands within West Sacramento.

Stormwater runoff is collected into gutters, storm drains, and retention basins and ultimately flows into local waterways. Pollutants in West Sacramento's urban stormwater include sediments, nonsediment soils, nutrients, pathogens, oxygen-demanding substances, total petroleum hydrocarbons, heavy metals, floatables, polycyclic aromatic hydrocarbons, trash, pesticides, and herbicides.

Given its proximity to the Sacramento River, West Sacramento is located in the river's floodplain. The city is surrounded on all sides by levees that are maintained by the State and local reclamation districts. Flood control channels and other features in the West Sacramento area are part of a much larger flood control system known as the Sacramento River Flood Control Project. The Sacramento River Flood Control Project in the Sacramento Valley consists of a series of levees and bypasses placed to protect urban and agricultural areas and take advantage of several natural overflow basins. The Federal Emergency Management Agency is currently reevaluating flood zone designation maps in West Sacramento. In addition, the City is concurrently working to complete levee improvements to increase flood protection within West Sacramento. At this time, most of the city, including the Project site, is classified as Zone X. Flood Zone X has no statutory requirement for flood insurance and allows new construction and expansion of existing structures without being subject to elevation and flood proofing requirements.

3.9.2 Impact Analysis

a. Would the project violate any water quality standards or waste discharge requirements?

LESS THAN SIGNIFICANT IMPACT. Construction of the Project would require excavation, grading, and paving. Any soil removed during construction would be stored and controlled to reduce soil erosion and sedimentation of downstream waterways. Pollutants and hazardous materials, such as gasoline, diesel fuel, oil, solvents, and trash stored and used during Project construction, would be subject to State and local regulations. Compliance with State and local regulations would reduce the potential for materials to enter drainages and degrade downstream water quality.

The State Water Resources Control Board requires dischargers whose projects disturb 1 or more acres of soil to obtain coverage under the General Permit for Discharges of Storm Water Associated with Construction Activity (Construction General Permit 99-08-DWQ). Effective July 1, 2010, all dischargers are required to obtain coverage under the Construction General Permit Order 2009-0009-DWQ adopted on September 2, 2009. Construction activity subject to this permit includes clearing, grading, and disturbances to the ground such as stockpiling or excavation. The development and implementation of a SWPPP would be required under the Construction General Permit. The SWPPP would identify best management practices (BMP) the discharger would use to reduce pollutants in stormwater runoff. Additionally, the SWPPP would contain a visual monitoring program and a chemical monitoring program for "nonvisible" pollutants to be implemented if there is a failure of the BMPs.

In addition, the Project would comply with the Water Quality Control Plan for the Sacramento and San Joaquin River Basins and would therefore not violate any water quality standards or regulations. The Project would result in less than significant impacts related to water quality standards or waste discharge requirements.

b. Would the project substantially deplete groundwater supplies or interfere substantially with groundwater recharge such that there would be a net deficit in aquifer volume or a lowering of the local groundwater table level (e.g., the production rate of pre-existing nearby wells would drop to a level which would not support existing land uses or planned uses for which permits have been granted)?

LESS THAN SIGNIFICANT IMPACT. Groundwater supplies within West Sacramento are limited to one groundwater well reserved for emergencies. The Project includes improvements to existing roadways and would not require the use of groundwater supplies. Roadway widening would result in some increases to impervious surfaces. However, such increases would be linked to drainage improvements and are not anticipated to have an adverse effect on groundwater recharge. The Project would result in less than significant impacts to groundwater supplies.

c. Would the project substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river, in a manner which would result in substantial erosion or siltation on- or off-site?

LESS THAN SIGNIFICANT IMPACT. Construction of the Project would result in minor changes to roadway drainage and gutters. However, such changes would conform to the existing drainage pattern of the site and would not result in any long-term impacts. In addition, the Project would not alter the course of a stream or river. No erosion or siltation on or off-site is anticipated to occur. The Project would result in less than significant impacts.

d. Would the project substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river, or substantially increase the rate or amount of surface runoff in a manner which would result in flooding on- or off-site?

LESS THAN SIGNIFICANT IMPACT. As described above, the Project would result in minor changes to roadway drainage and gutters but would be consistent with existing drainage patterns. The Project would result in slight increases in impervious surfaces. However, such increases would be linked to drainage improvements and are unlikely to impact surface runoff in a manner that would result in flooding on or off-site. Less than significant impacts are expected to occur.

e. Would the project create or contribute runoff water which would exceed the capacity of existing or planned stormwater drainage systems or provide substantial additional sources of polluted runoff?

LESS THAN SIGNIFICANT IMPACT. Construction activities would involve the use of heavy construction equipment that uses petroleum products (e.g., fuels, lubricants, hydraulic fluids, coolants). All of these materials could be toxic to fish and other aquatic organisms. An accidental spill or inadvertent discharge of these materials could affect the water quality of the Sacramento

River. Construction contractors would be required to prepare and implement a SWPPP and comply with the conditions of the National Pollutant Discharge Elimination System general stormwater permit for construction activity. The SWPPP would include implementation of a monitoring program and a Spill Prevention Control and Countermeasures Plan. The contractor would be required to obtain a permit from the CVRWQCB detailing a plan to control any spills that occur during construction. The plan would describe the construction activities to be performed, BMPs that would be implemented to prevent discharges of contaminated stormwater into waterways, and inspection and monitoring activities that would be conducted.

Once operational, the widened roadway and additional sidewalks would result in increases in impervious surfaces. A moderate increase in impervious surfaces would occur along the western portion of West Capitol Avenue, where sidewalks and gutters would be constructed. Such increases in impervious surfaces would be linked to drainage improvements and would not result in additional runoff water that would exceed the capacity of existing or planned stormwater drainage systems.

Compliance with State and local regulations and implementation of a SWPPP would result in less than significant impacts.

f. Would the project otherwise substantially degrade water quality?

NO IMPACT. The Project would not result in any other adverse effects on water quality. The Project would be designed to avoid any impact to the existing unnamed ditch between Enterprise Boulevard and Northport Drive and would not require any widening of the bridge over the unnamed ditch. No impacts would occur.

g. Would the project place housing within a 100-year flood hazard area as mapped on a federal Flood Hazard Boundary or Flood Insurance Rate Map or other flood hazard delineation map?

NO IMPACT. The Project would not include the construction of housing and therefore would not result in the placement of housing within a 100-year flood hazard area. No impact would occur.

h. Would the project place within a 100-year flood hazard area structures which would impede or redirect flood flows?

NO IMPACT. The Project would not place any structures that would impede or redirect flood flows within a 100-year flood hazard area. No impact would occur.

i. Would the project expose people or structures to a significant risk of loss, injury or death involving flooding, including flooding as a result of the failure of a levee or dam?

LESS THAN SIGNIFICANT IMPACT. The Project would include improvements to an existing roadway and would not expose people or structures to a significant risk involving flooding above existing conditions. The Project would result in less than significant impacts.

j. Would the project be inundated by seiche, tsunami, or mudflow?

LESS THAN SIGNIFICANT IMPACT. The Project area is topographically flat; therefore, the risk of mudflow is low. Even when distant, major earthquakes can produce oscillations or waves on the Sacramento River, Yolo and Sacramento Bypasses, as well as the Sacramento Deep Water Ship Channel. The resulting seiche may have potential to overtop existing levees and result in flooding within West Sacramento. However, such events would only occur during periods when these bodies of water are full. Such circumstances only occur for a limited time, which reduces the risk of seiche. In addition, these bodies of waters are more than 0.5 mile away from the Project site. The Project site is also not within a tsunami hazard zone. Less than significant impact related to seiche, tsunami, or mudflow would occur.

3.10 LAND USE AND PLANNING

	Potentially Significant Impact	Less Than Significant with Mitigation	Less Than Significant Impact	No Impact
Would the project:				
a. Physically divide an established community?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
b. Conflict with any applicable land use plan, policy, or regulation of an agency with jurisdiction over the project (including, but not limited to the general plan, specific plan, local coastal program, or zoning ordinance) adopted for the purpose of avoiding or mitigating an environmental effect?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
c. Conflict with any applicable habitat conservation plan or natural community conservation plan?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

3.10.1 Impact Analysis

a. Would the project physically divide an established community?

NO IMPACT. The Project would improve safety and roadway infrastructure within the established community of West Sacramento. Improvements such as bike lane and sidewalk construction would increase pedestrian and bicycle access and connectivity throughout the community. The Project would not substantially change the physical arrangement of the established community or isolate an existing land use. No impact would occur.

b. Would the project conflict with any applicable land use plan, policy, or regulation of an agency with jurisdiction over the project (including, but not limited to the general plan, specific plan, local coastal program, or zoning ordinance) adopted for the purpose of avoiding or mitigating an environmental effect?

NO IMPACT. The Project would be consistent with plans and goals adopted by the City. No impact would occur.

c. Would the project conflict with any applicable habitat conservation plan or natural community conservation plan?

NO IMPACT. The Project site is within Yolo County, which is under the jurisdiction of the Yolo HCP/NCCP. However, the Project site does not include any habitat for species protected under the Yolo HCP/NCCP. Therefore, the Project would not conflict with any HCPs or NCCPs. The Project would result in no impact.

3.11 MINERAL RESOURCES

	Potentially Significant Impact	Less Than Significant with Mitigation	Less Than Significant Impact	No Impact
Would the project:				
a. Result in the loss of availability of a known mineral resource that would be of value to the region and the residents of the state?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
b. Result in the loss of availability of a locally-important mineral resource recovery site delineated on a local general plan, specific plan or other land use plan?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

3.11.1 Impact Analysis

a. Would the project result in the loss of availability of a known mineral resource that would be of value to the region and the residents of the state?

NO IMPACT. The City does not contain any known historical or current commercial mining operations. The California Division of Mines and Geology has primarily classified West Sacramento as Mineral Resource Zone (MRZ) 1 (information indicates that no significant mineral deposits are present), with small areas bordering the Sacramento River classified as MRZ-3 (aggregate deposits of undetermined significance occur there). No known mineral resources are within the Project area; therefore, no impact would occur.

b. Would the project result in the loss of availability of a locally-important mineral resource recovery site delineated on a local general plan, specific plan or other land use plan?

NO IMPACT. The Project site does not include any locally important mineral resource recovery site delineated on a local General Plan, Specific Plan, or other land use plan. No impact would occur.

3.12 NOISE

	Potentially Significant Impact	Less Than Significant with Mitigation	Less Than Significant Impact	No Impact
Would the project result in:				
a. Exposure of persons to or generation of noise levels in excess of standards established in the local general plan or noise ordinance, or applicable standards of other agencies?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
b. Exposure of persons to or generation of excessive groundborne vibration or groundborne noise levels?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
c. A substantial permanent increase in ambient noise levels in the project vicinity above levels existing without the project?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
d. A substantial temporary or periodic increase in ambient noise levels in the project vicinity above levels existing without the project?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
e. For a project located within an airport land use plan or, where such a plan has not been adopted, within 2 miles of a public airport or public use airport, would the project expose people residing or working in the project area to excessive noise levels?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
f. For a project within the vicinity of a private airstrip, would the project expose people residing or working in the project area to excessive noise levels?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

3.12.1 Environmental Setting

The following provides an overview of sound and vibration and the regulatory framework that applies to both within the Project vicinity.

3.12.1.1 Characteristics of Sound

Noise is usually defined as unwanted sound. Noise consists of any sound that may produce physiological or psychological damage and/or interfere with communication, work, rest, recreation, or sleep. Several noise measurement scales exist that are used to describe noise in a particular location. A decibel (dB) is a unit of measurement that indicates the relative intensity of a sound. Sound levels in dB are calculated on a logarithmic basis. An increase of 10 dB represents a tenfold increase in acoustic energy, while 20 dB is 100 times more intense and 30 dB is 1,000 times more intense. Each 10 dB increase in sound level is perceived as approximately a doubling of loudness; similarly, each 10 dB decrease in sound level is perceived as half as loud. Sound intensity is normally measured through the A-weighted sound level (i.e., in A-weighted decibels, or dBA). This scale gives greater weight to the frequencies of sound to which the human ear is most sensitive. The A-weighted sound level is the basis for 24-hour sound measurements, which better represent how humans are more sensitive to sound at night.

As noise spreads from a source, it loses energy, so that the farther away the noise receiver is from the noise source, the lower the perceived noise level would be. Geometric spreading causes the sound level to attenuate or be reduced, resulting in a 6 dB reduction in the noise level for each doubling of distance from a single point source of noise to the noise-sensitive receptor of concern.

Noise can be rated in many ways for various time periods, but an appropriate rating of ambient noise affecting humans also accounts for the annoying effects of sound. The equivalent continuous sound level (L_{eq}) is the total sound energy of time-varying noise over a sample period. However, the predominant rating scales for human communities in the State of California are the L_{eq} , the community noise equivalent level (CNEL), and the day-night average level (L_{dn}) based on dBA. CNEL is the time-varying noise over a 24-hour period, with a 5 dBA weighting factor applied to the hourly L_{eq} for noises occurring from 7:00 p.m. to 10:00 p.m. (defined as relaxation hours) and a 10 dBA weighting factor applied to noises occurring from 10:00 p.m. to 7:00 a.m. (defined as sleeping hours). L_{dn} is similar to the CNEL scale but without the adjustment for events occurring during the evening relaxation hours. CNEL and L_{dn} are within 1 dBA of each other and are normally interchangeable. The noise adjustments are added to the noise events occurring during the more sensitive hours.

Typical noise levels have been determined for various types of activities occurring outdoors and indoors. The City of West Sacramento, specifically where the Project is located, is fully urbanized and is estimated to have an ambient daytime noise level of 75 dBA.²

3.12.1.2 Vibration

Vibration is a form of noise with energy carried through structures and the earth, whereas noise is simply carried through the air. Thus, vibration is generally felt rather than heard. Some vibration effects can be caused by noise (e.g., the rattling of windows from passing trucks). This phenomenon is related to the coupling of the acoustic energy at frequencies that are close to the resonant frequency of the material being vibrated. Typically, ground-borne vibration generated by manmade activities attenuates rapidly as distance from the source of the vibration increases. Vibration, which spreads through the ground rapidly, diminishes in amplitude with distance from the source.

The ground motion caused by vibration is measured as peak particle velocity (PPV) in inches per second (in/sec). PPV is the speed at which a particle of earth moves and is expressed in units of in/sec. Vibration also is measured as the root-mean-square amplitude of a motion over a 1-second period. For ease, the logarithmic dB scale is used to describe the vibration velocity level relative to a reference level of 10^6 in/sec and is expressed as vibration velocity decibels (VdB).

3.12.1.3 Regulatory Framework

The City's General Plan Safety Element (City of West Sacramento 2016a) identifies Goal S-7: "To protect city residents from the harmful effects of excessive noise and vibration." Policies S-7.1 through S-7.10 are outlined to achieve the City's goal. However, such policies are related primarily to new development. Policies applicable to the Project are discussed in detail below.

² The estimated noise level for an urban area during daytime hours is contrived from Table 2-5 Typical Noise Levels in the *California Department of Transportation Technical Noise Supplement to the Traffic Noise Analysis Protocol, September 2013, pg. 2-20.*

Noise. The City’s performance standards for noise, found in Chapter 17.32 of its Municipal Code, are the primary enforcement tool for the operation of locally regulated noise sources, such as construction activity or outdoor recreation facilities. This section of the Municipal Code sets noise level performance standards for nontransportation noise sources, which are summarized in Table 3.F: City of West Sacramento Noise Level Standards for Nontransportation Uses. Examples of nontransportation noise sources are construction equipment, industrial operations; outdoor recreation facilities; heating, ventilation, and air-conditioning units; and loading docks. The City’s performance standards do not specify an exemption for temporary daytime construction activity, so the daytime and nighttime limits specified in the City’s performance standards for noise would apply to all construction activities in West Sacramento. The City’s Municipal Code also sets noise level performance standards for transportation sources, as shown in Table 3.G: Maximum Allowable Noise Exposure for Transportation Noise Sources. Transportation noise sources are defined by the City’s Municipal Code as traffic on public roadways, railroad line operations, and aircraft in flight.

Table 3.F: City of West Sacramento Noise Level Standards for Nontransportation Uses

Land Use	Noise Level Descriptor (dBA)	Exterior Noise Levels		Interior Noise Levels	
		Daytime ¹	Nighttime ²	Daytime ¹	Nighttime ²
Residential	Hourly L_{eq}	50	45	45	35
	Maximum level	70	65	–	–
Transient lodging	Hourly L_{eq}	–	–	45	35
Hospitals, nursing homes	Hourly L_{eq}	–	–	45	35
Theaters, auditoriums, music halls	Hourly L_{eq}	–	–	35	35
Churches, meeting halls	Hourly L_{eq}	–	–	40	40
Office buildings	Hourly L_{eq}	–	–	45	45
Schools, libraries, museums	Hourly L_{eq}	–	–	45	45

Source: City of West Sacramento (2008).

Note: Each noise level specified above will be lowered by 5 dB for simple-tone noises, noises consisting primarily of speech or music, or recurring impulsive noises. These noise level standards do not apply to residential units established in conjunction with industrial or commercial uses (e.g., caretaker dwellings).

¹ Daytime is defined as 7:00 a.m. to 10:00 p.m.

² Nighttime is defined as 10:00 p.m. to 7:00 a.m.

dB = decibels

L_{eq} = equivalent continuous sound level

dBA = A-weighted decibels

Table 3.G: Maximum Allowable Noise Exposure for Transportation Noise Sources

Land Use	Outdoor Activity Areas ¹ L _{dn} /CNEL, dB	Interior Spaces	
		L _{dn} /CNEL, dB	L _{eq} /dB ²
Residential	60 ^{3,4}	45	–
Transient lodging	60 ^{3,4}	45	–
Hospitals, nursing homes	60 ^{3,4}	45	–
Theaters, auditoriums, music halls	–	–	35
Churches, meeting halls	60 ³	–	40
Office buildings	–	–	45
Schools, libraries, museums	–	–	45
Playgrounds, neighborhood parks	70	–	–

Source: City of West Sacramento (2008).

¹ Where the location of outdoor activity areas is unknown, the exterior noise level standard shall be applied to the property line of the receiving land use.

² As determined for a typical worst-case hour during period of use.

³ Where it is not possible to reduce noise in outdoor activity areas to 60 dB L_{dn}/CNEL or less using a practical application of the best-available noise reduction measures, an exterior noise level of up to 65 dB L_{dn}/CNEL may be allowed, provided that practical exterior noise level reduction measures have been implemented and that interior noise levels are in compliance with this table. An exterior noise level of 70 dB L_{dn}/CNEL shall be allowed in the Triangle Specific Plan area and the Washington Specific Plan area.

⁴ Outdoor activity areas, such as private balconies on residential buildings, may be constructed within the Bridge District Specific Plan area in areas that are predicted to exceed 70 L_{dn}, provided that an alternative common outdoor activity area for the residences is designated that meets the City’s performance criteria.

dB = decibels

City = City of West Sacramento

CNEL = community noise equivalent level

L_{eq} = equivalent continuous sound level

L_{dn} = day-night average level

Vibration. The City’s Municipal Code prohibits the installation of any operation that consistently produces noticeable construction- or operation-related vibration beyond the property line. In addition, the City’s General Plan Safety Element includes Policy S-7.6: Vibration Standards, which states: “The City shall require construction projects and new development anticipated to generate a significant amount of vibration to ensure acceptable interior vibration levels at nearby noise-sensitive uses based on Federal Transit Administration criteria.” Table 3.H: Groundborne Vibration Impact Criteria for General Assessment shows the Federal Transit Administration criteria included in General Plan Policy S-7.6 as the City’s vibration impact criteria for frequent events, occasional events, and infrequent events.

Table 3.H: Groundborne Vibration Impact Criteria for General Assessment

Land Use	Impact Levels (VdB)		
	Frequent Events ¹	Occasional Events ²	Infrequent Events ³
Category 1: Buildings where vibrations would interfere with interior operations	65 ⁴	65 ⁴	65 ⁴
Category 2: Residences and buildings where people normally sleep	72	75	80
Category 3: Institutional land uses with primarily daytime uses	75	78	83

Source: City of West Sacramento (2016a).

¹“Frequent Events” is defined as more than 70 vibration events of the same source per day.

²“Occasional Events” is defined as between 30 and 70 vibration events of the same source per day.

³“Infrequent Events” is defined as fewer than 30 vibration events of the same source per day.

⁴ This criterion limit is based on levels that are acceptable for most moderately sensitive equipment, such as optical microscopes.

Vibration-sensitive manufacturing or research will require detailed evaluation to define the acceptable vibration levels.

VdB = vibration velocity decibels

3.12.2 Impact Analysis

- a. *Would the project result in exposure of persons to or generation of noise levels in excess of standards established in the local general plan or noise ordinance, or applicable standards of other agencies?*

LESS THAN SIGNIFICANT WITH MITIGATION. Project Construction Noise Impacts. Two types of site-specific short-term noise impacts would occur during Project construction: (1) equipment delivery and construction worker commutes; and (2) Project construction activities.

The first type of short-term construction noise would result from transport of construction equipment and materials to the Project site and construction worker commutes. These transportation activities would incrementally raise noise levels on access roads leading to the site. It is expected that larger trucks used in equipment delivery will generate higher noise impacts than trucks associated with worker commutes. The single-event noise from equipment trucks passing at a distance of 50 feet from a sensitive noise receptor would reach a maximum level of 84 dBA maximum instantaneous noise level (L_{max}). However, the pieces of heavy equipment for grading and construction activities would be moved on-site just once and would then remain for the duration of each construction phase. This one-time trip, when heavy construction equipment is moved on and off-site, would be temporary and would not add to the daily traffic noise in the Project vicinity. Furthermore, the projected traffic from the construction worker commutes would be temporary and minimal when compared to existing traffic volumes on West Capitol Avenue, Jefferson Boulevard, and other affected streets, and its associated long-term noise level change would not be perceptible. Therefore, equipment transport noise and construction-related worker commute impacts would be short-term and would not be substantial.

The second type of short-term noise impact is related to noise generated during Project construction. Construction is performed in discrete steps, each having its own mix of equipment and consequently its own noise characteristics. These various sequential phases will change the character of the noise generated, as well as the noise levels in the study area, as construction

progresses. Despite the variety in the type and size of construction equipment, similarities in the dominant noise sources and patterns of operation allow construction-related noise ranges to be categorized by work phase. **Table 3.I: Typical Construction Equipment Noise Levels** lists typical construction equipment noise levels (L_{max}) recommended for noise impact assessments based on a distance of 50 feet between the equipment and a noise receptor.

Normal construction activity may generate high noise levels from an active construction area. Equipment includes backhoes, compactors, and dump trucks. Typical operating cycles for these types of construction equipment may involve 1 or 2 minutes of full-power operation followed by 3 or 4 minutes at lower power settings.

Noise associated with the use of construction equipment is estimated between 55 and 85 dBA L_{max} at a distance of 50 feet from each piece of equipment. As shown in **Table 3.I**, the maximum noise level generated by a compactor, dump truck, excavator, and paver is assumed to be approximately 80 dBA L_{max} , 84 dBA L_{max} , 85 dBA L_{max} , and 84 dBA L_{max} at 50 feet, respectively. Each piece of construction equipment operates as an individual point source. Utilizing the following equation, a composite noise level can be calculated when multiple sources of noise operate simultaneously:

$$L_{max} (composite) = 10 * \log_{10} \left(\sum_{1}^n 10^{\frac{L_n}{10}} \right)$$

The conservative composite noise level during this phase of construction would be 90 dBA L_{max} at a distance of 50 feet from an active construction area.

Table 3.I: Typical Construction Equipment Noise Levels

Equipment Description	Acoustical Usage Factor (percent)	Maximum Noise Level (L_{max}) at 50 Feet ¹
Compactor (ground)	20	80
Dump Trucks	40	84
Excavators	40	85
Flatbed Trucks	40	84
Forklift	20	85
Front-End Loaders	40	80
Graders	40	85
Jackhammers	20	85
Pickup Truck	40	55
Pavers	40	84
Pneumatic Tools	50	85
Rollers	20	85
Tractors	40	84

Source: Federal Highway Administration, Roadway Construction Noise Model (2006).

Note: Noise levels reported in this table are rounded to the nearest whole number.

¹ Maximum noise levels were developed based on Spec 721.560 from the Central Artery/Tunnel (CA/T) program to be consistent with the City of Boston’s Noise Code for the “Big Dig” project.

L_{max} = maximum instantaneous noise level

Once composite noise levels are calculated, reference noise levels can then be adjusted for distance using the following equation:

$$L_{max}(\text{at distance } X) = L_{max}(\text{at 50 feet}) - 20 * \log_{10} \left(\frac{X}{50} \right)$$

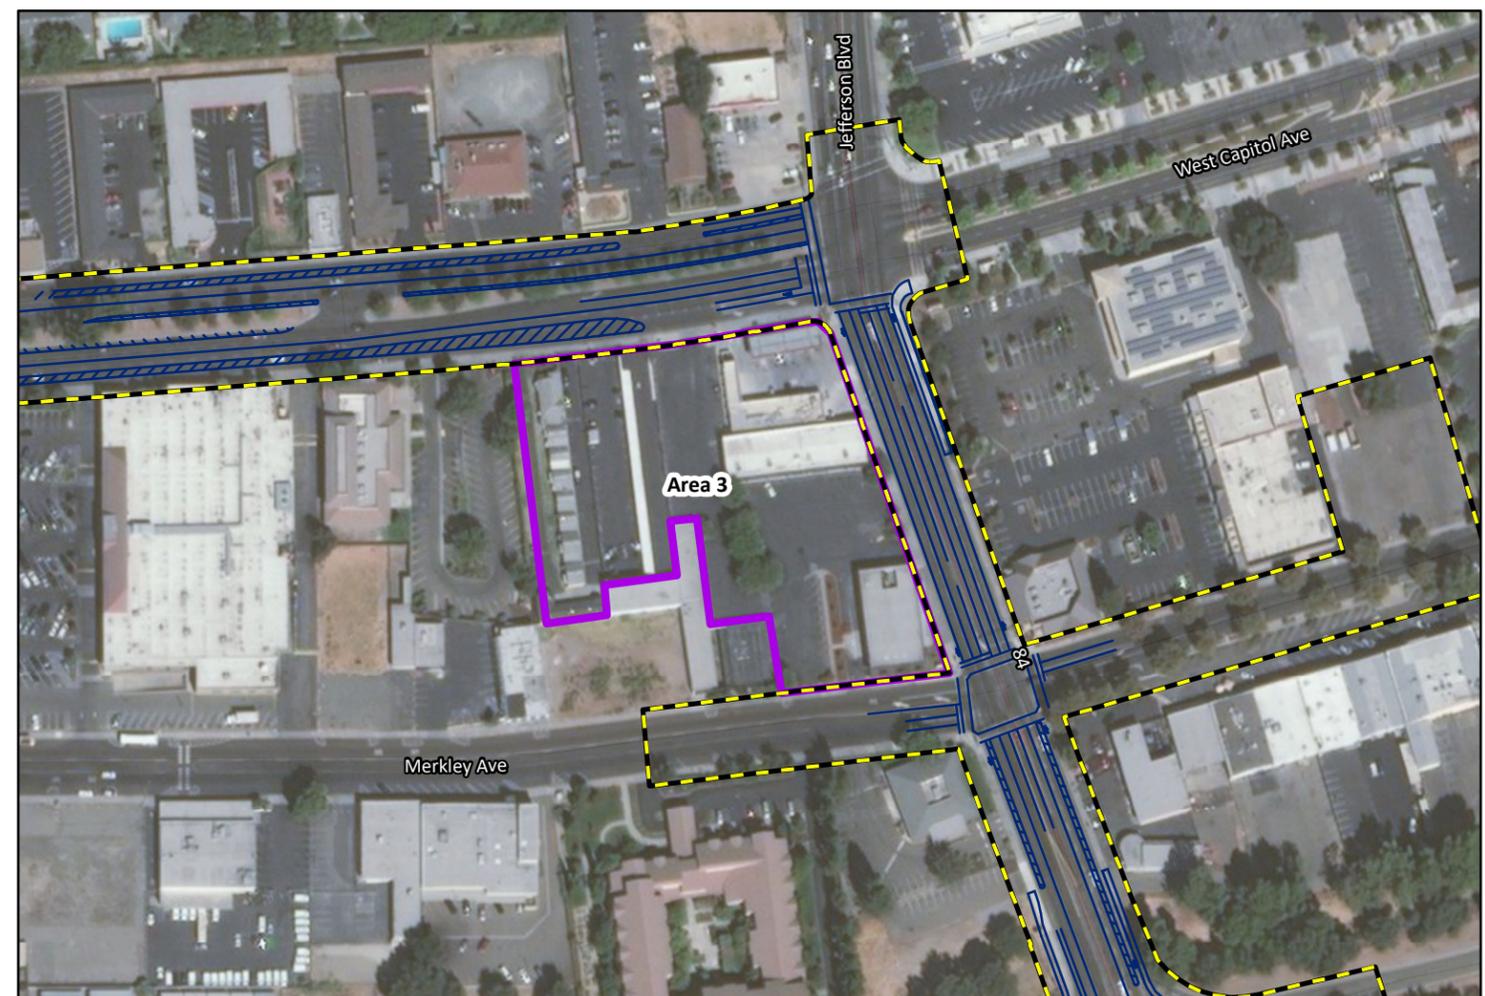

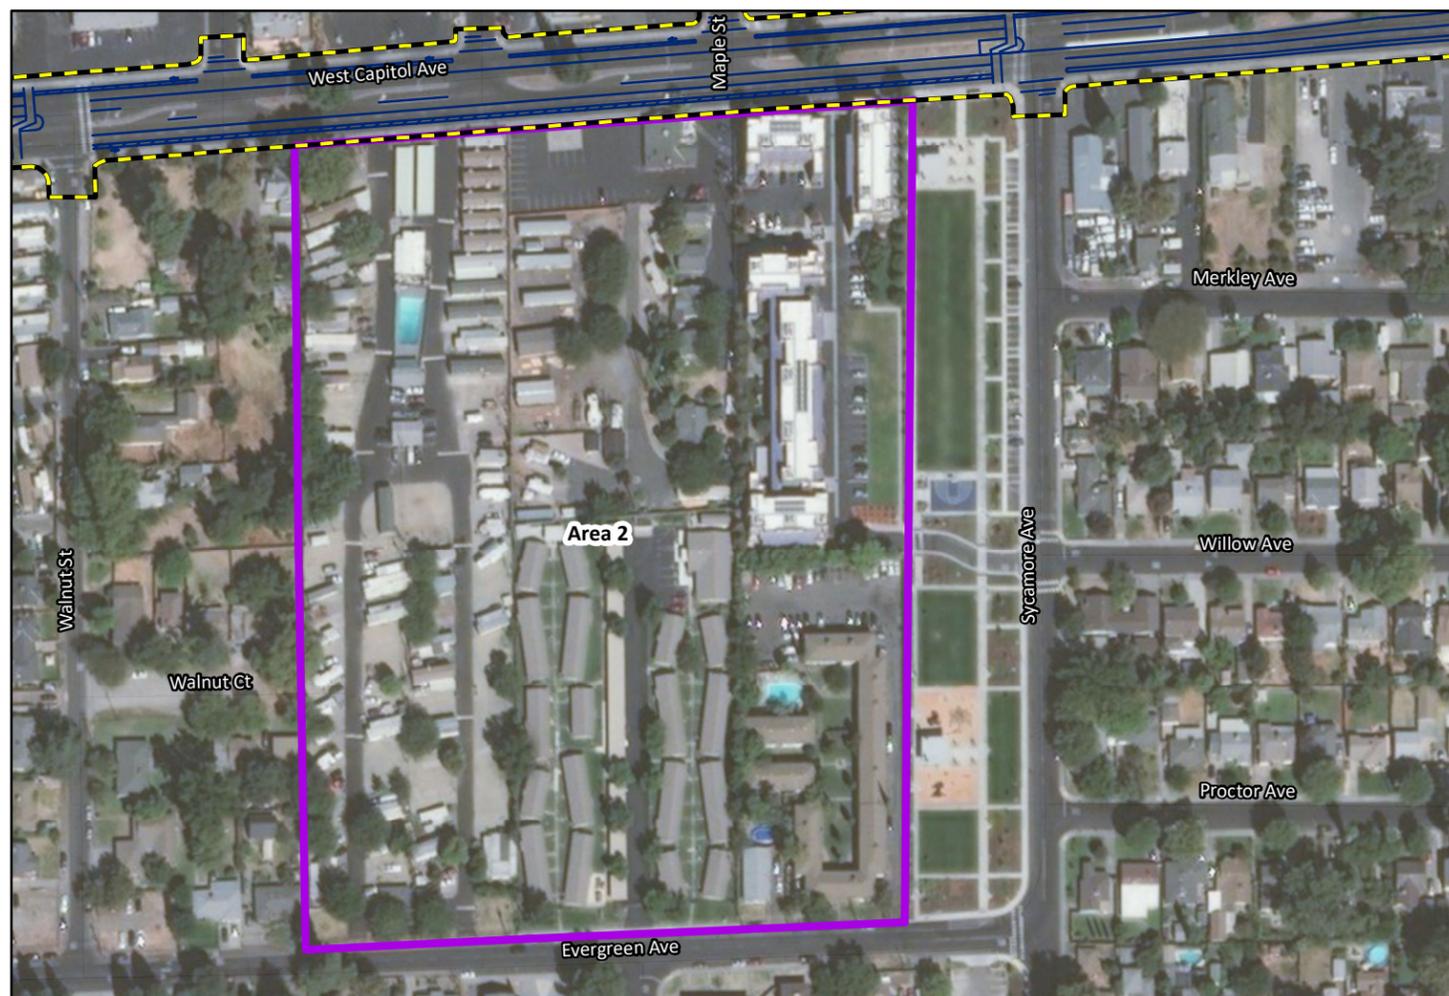

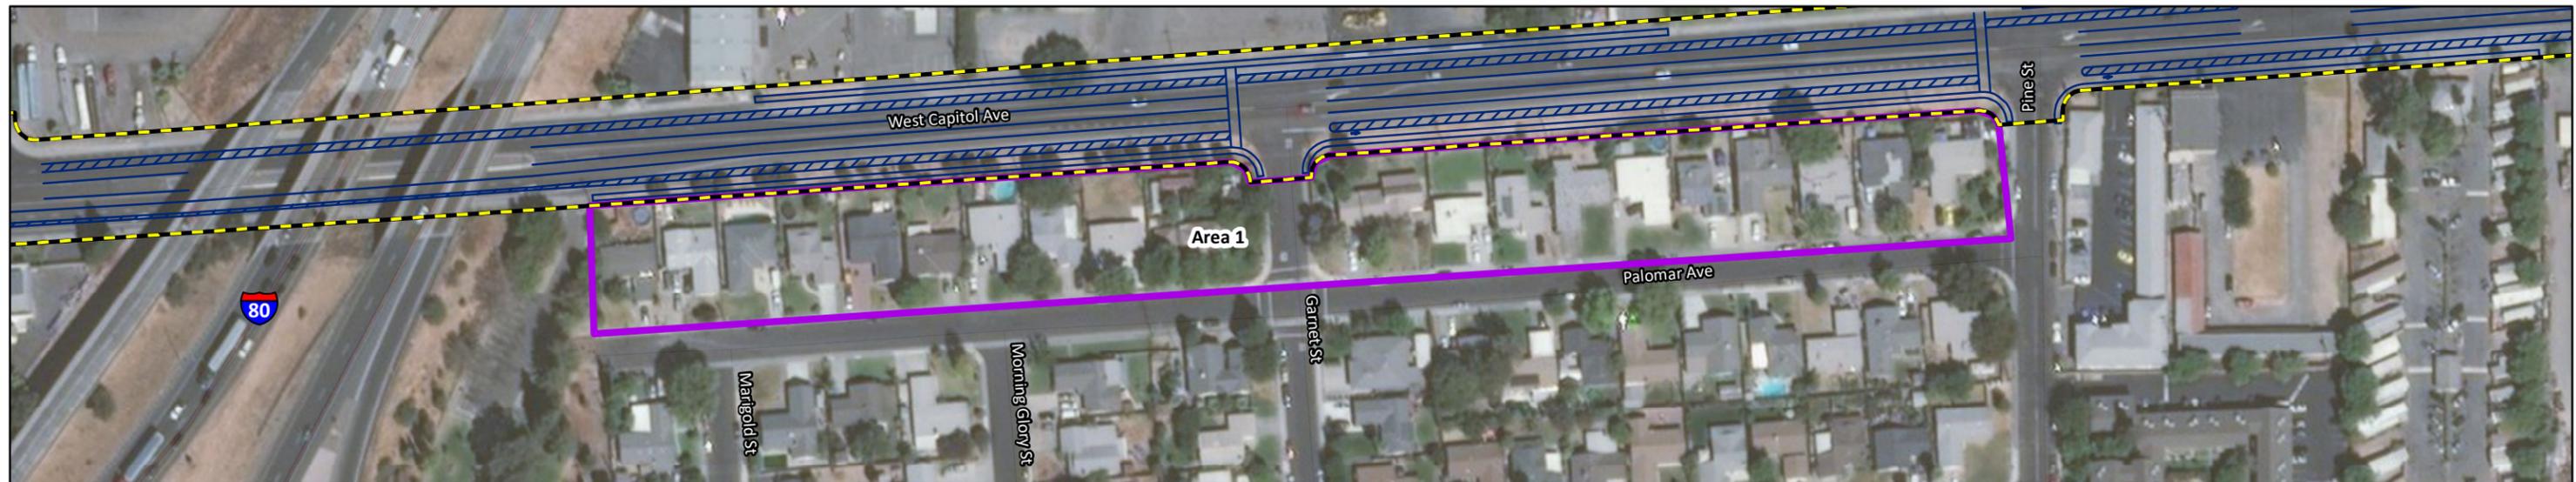

In general, this equation shows that doubling the distance would decrease noise levels by 6 dBA, while halving the distance would increase noise levels by 6 dBA.

Several sensitive noise receptors are located throughout the corridor, including hotels, motels, mobile home parks, and single-family and multifamily residential units. To evaluate noise related impacts, detailed analysis was completed for three representative areas along the corridor:

- Area 1, consisting of single-family residential units between Pine Avenue and the I-80 overcrossing;
- Area 2, consisting of a mobile home park and an apartment complex (multifamily units) between Sycamore Avenue and Walnut Street; and
- Area 3, consisting of hotels/motels and a school on the southwest corner of the West Capitol Avenue/ Jefferson Boulevard intersection.

These areas are shown in **Figure 4: Modeled Areas for Construction Noise**.

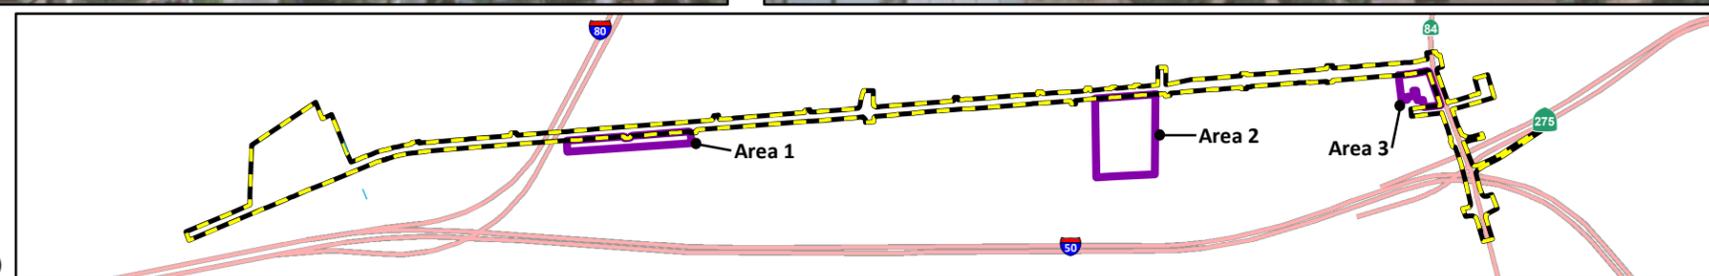

FIGURE 4

West Capitol Avenue Rehabilitation Project
 City of West Sacramento, Yolo County, California
 Federal Project No. HSIPL-5447(042)
 Modeled Areas for Construction Noise

This page intentionally left blank

The following construction equipment is anticipated to be used during Project construction at all areas:

- One dump truck;
- One paver;
- One roller;
- One milling machine;
- One cement truck (Area 1 only);
- One concrete saw (Area 1 only);
- One motor grader (Areas 1 and 2 only); and
- Various hand tools.

In order to provide realistic noise construction modeling, noise generation from the three loudest pieces of construction equipment adjacent to each representative area was analyzed based on the estimated locations of construction activity.³ In Area 1, distances were measured from the center of residential backyards. Distances in Areas 2 and 3 were measured from the building façade closest to the roadway.

The Federal Highway Administration Roadway Construction Noise Model was used to determine exterior L_{max} and L_{eq} noise levels at nearby sensitive receptors generated by simultaneous use of the selected equipment at the measured distances. In addition, residences along the corridor are equipped with air conditioning. Therefore, the USEPA's Protective Noise Levels noise level attenuation of 25 dBA exterior-to-interior with windows closed was used to determine interior noise levels (USEPA 1978).

Due to sidewalk installation along the south side of West Capitol Avenue, construction equipment would be located as close as 20 feet from the backyards of residential units within Area 1. However, this proximity would be limited to only a few residences that are closer to the Project boundary, while most construction activity would occur at a distance of 25 feet or more from the backyards of residential units. A concrete saw was modeled at a distance of 20 feet, a cement truck was modeled at 35 feet, and a paver was modeled at 55 feet. The results indicate that the residences in Area 1 would be exposed to exterior noise levels of up to 97.5 dBA L_{max} and interior noise levels as loud as 65.9 dBA L_{eq} with an exterior-to-interior attenuation of 25 dBA applied.

In Area 2, construction equipment would be located as close as 15 feet from the nearest building façade. A paver was modeled at a distance of 35 feet, a roller was modeled at 25 feet, and a grader was modeled at 15 feet. The results indicate that the residences in Area 2 would be exposed to exterior noise levels as loud as 95.5 dBA L_{max} and interior noise levels as loud as 66.9 dBA L_{eq} with an exterior-to-interior attenuation of 25 dBA applied.

³ Coordination with the Project engineer occurred to determine the type of equipment, locations and distances that would likely be used during specific activities near areas occupied by sensitive receptors. The information the engineer provided is based experience designing and building similar projects.

Along West Capitol Avenue in Area 3, construction equipment would be located as close as 25 feet from hotels/motels. A paver was modeled at a distance of 25 feet, a roller was modeled at 35 feet, and a milling machine was modeled at 45 feet. The results indicate that the hotels in Area 3 would be exposed to interior noise levels as loud as 64.8 dBA L_{eq} with an exterior-to-interior attenuation of 25 dBA applied.

Along Jefferson Avenue in Area 3, construction equipment would be located as close as 16 feet from the Heritage Peak Charter School. A paver was modeled at a distance of 16 feet, a roller was modeled at 25 feet, and a milling machine was modeled at 35 feet. The results indicate that the school in Area 3 would be exposed to interior noise levels as loud as 68.3 dBA L_{eq} with an exterior-to-interior attenuation of 25 dBA applied.

Based on the analysis completed for the representative areas located along the Project site, residential sensitive noise receptors would be exposed to exterior short-term noise impacts reaching 97.5 dBA L_{max} and interior noise levels reaching 66.9 (with an exterior-to-interior attenuation of 25 dBA applied), both of which would exceed the City's daytime exterior and interior noise level standards for residential uses as shown in **Table 3.F**. In addition, construction of the Project would result in interior noise levels of 64.8 dBA L_{eq} at hotels, which would exceed the City's interior daytime hourly noise standard for transient lodging of 45 dBA L_{eq} . Construction of the Project would result in interior noise levels of 68.3 dBA L_{eq} at a nearby school, which would exceed the City's daytime hourly noise standard for schools of 45 dBA L_{eq} . However, due to the linear nature of the Project, construction activities at any one receptor location would occur for a limited duration. At a distance of 500 feet, noise levels would be reduced to below 70 dBA L_{max} (below the City's noise thresholds for residential units). Implementation of **Mitigation Measures NOS-1** through **NOS-8** would reduce construction noise levels at the sensitive receptors to the extent feasible; however, the construction noise levels could still exceed the City's noise level thresholds even with these mitigation measures implemented. Implementation of **Mitigation Measure NOS-9** would require the City to provide lodging accommodations to affected residents during Project construction; thus, removing affected residents from the construction areas on a temporary basis and eliminating construction noise impacts for such sensitive receptors. Construction noise impacts on sensitive receptors would be less than significant with implementation of **Mitigation Measure NOS-9**.

Project Operation Noise Impacts. The Project only proposes to rehabilitate deteriorating pavement and implement safety improvements, including adding separated bike lanes, enhancing the mid-block crossings for pedestrians, and improving lighting. The Project would not result in the construction of additional travel lanes along the corridor. Therefore, the Project would not decrease the distance between sensitive receptors and the roadway or result in an increase in motorized vehicle capacity. The Project would not generate transportation noise sources, nor would it increase long-term noise levels above existing conditions. Once operational, the Project would not result in the exposure of persons to or generation of noise levels in excess of City standards.

NOS-1 Prior to any construction activity, the construction contractor (confirmed by the City or a City appointed noise liason), shall equip all construction equipment, fixed or mobile, with properly operating and maintained mufflers, consistent with manufacturers' standards

- NOS-2** During the course of any construction activity, the construction contractor (confirmed by the City or a City appointed noise liaison) shall place all stationary construction equipment so that emitted noise is directed away from sensitive receptors nearest the active Project site.
- NOS-3** Prior to and during any construction activity, the construction contractor (confirmed by the City or a City appointed noise liaison) shall locate equipment staging in areas that would create the greatest possible distance between construction-related noise sources and noise-sensitive receptors nearest the active Project.
- NOS-4** During any construction activity, the construction contractor (confirmed by the City or a City appointed noise liaison) shall ensure simultaneous operation of multiple pieces of construction equipment would not occur near noise-sensitive receptors. The construction contractor shall limit the use of construction equipment within 20 feet of noise-sensitive receptors to one piece of equipment at a time.
- NOS-5** The construction contractor, through enforcement by the City, shall ensure that all general construction-related activities be restricted to the daytime hours of 7:00 a.m. to 10:00 p.m., Monday through Friday. Construction activities shall be restricted from occurring on weekends (Saturday and Sunday) and on holidays.
- NOS-6** Prior to commencement of construction activities near sensitive receptors (residential units, hotels/motels, schools), the construction contractor shall provide notification to such sensitive receptors of construction activities, the intended length of occurrence, the potential occurrence for short term noise level increases, and noise liaison contact information. The notification can be a flyer provided to the owners of the sensitive receptors, in-person notification, or a flyer provided to the sensitive receptors via mail. Additionally, the City shall notify sensitive receptors (residences, hotels/motels, and schools) prior to specific operations, which may yield high noise levels.
- NOS-7** The City of West Sacramento (City) shall appoint a construction noise liaison who shall be responsible for responding to any local complaints about construction noise. The City shall facilitate a focus meeting with Project area residents, the construction contractor, and the noise liaison to notify residents of potential impacts and of measures to reduce such impacts. If a noise complaint related to Project construction is received, the construction noise liaison shall determine the cause of the construction noise complaint (e.g., construction activities outside of City authorized times, bad muffler) and shall determine and implement reasonable measures warranted to correct the problem. Reasonable measures may include, but are not limited to:
- Construct noise barriers, such as temporary walls or piles of excavated material, between noisy activities and noise-sensitive receptors.

- Re-route truck traffic away from residential streets. Select streets with the fewest homes if no alternatives are available.
- Site equipment on the construction-site as far away from noise-sensitive sites as possible.
- Construct walled enclosures (shields or loaded vinyl curtains) around especially noisy activities or clusters of noisy equipment.
- Combine noisy operations to occur in the same time period.

NOS-8 The City (or a City appointed noise liason) shall conduct spot-check short-term noise monitoring during construction activities within residential areas to evaluate noise impacts on sensitive receptors, specifically residences located along the corridor.

NOS-9 For days when construction activities would occur within 500 feet of an adjacent residence, such residents may request City provided lodging, to reduce construction noise impacts. Lodging accommodations shall be at the City's discretion. Affected residents shall request such accommodations through the City appointed noise liason.

b. Would the project result in exposure of persons to or generation of excessive groundborne vibration or groundborne noise levels?

LESS THAN SIGNIFICANT WITH MITIGATION. Ground vibrations from construction activities do not often reach the levels that can damage structures, but they can achieve the audible and feelable ranges in buildings very close to the site. A possible exception is the case of fragile buildings (many of which are old), where special care must be taken to avoid damage. The construction activities that typically generate the most severe vibrations are blasting and impact pile driving. The primary concern associated with such vibrations is annoyance. Various types of construction equipment have been measured under a wide variety of construction activities, with an average of source levels reported in terms of velocity. **Table 3.J: Vibration Source Levels for Construction Equipment** shows the vibration levels of various types of construction equipment measured in PPV and VdB at a distance of 25 feet from the equipment.

As such, the Project would not result in an increase in roadway capacity but would instead increase the use of nonmotorized transportation, which would help to offset noise impacts from motorized vehicle traffic. As such, no substantial long-term increase in noise levels is expected. No impact would occur, and mitigation measures would not be required.

d. Would the project result in a substantial temporary or periodic increase in ambient noise levels in the project vicinity above levels existing without the project?

LESS THAN SIGNIFICANT WITH MITIGATION. As discussed under Threshold A, construction of the Project would result in temporary increases of ambient noise levels at nearby sensitive receptors. Exterior noise levels at nearby residential units could reach 97.5 dBA L_{max} and interior noise levels could reach 66.9 dBA L_{eq} , both of which exceed City noise standards for residential units. Motels and schools could be exposed to interior noise levels from construction activities, reaching 64.8 dBA L_{eq} and 68.3 dBA L_{eq} , respectively. Both of these interior noise levels would exceed the City's maximum noise standards for motels and schools. Implementation of **Mitigation Measures NOS-1 through NOS-8** would reduce construction noise levels at the sensitive receptors to the extent feasible; however, the construction noise levels could still exceed the City's noise level thresholds even with these mitigation measures implemented. Implementation of **Mitigation Measure NOS-9** would require the City to provide lodging accommodations to affected residents during Project construction; thus, removing effected residents from the construction areas on a temporary basis and eliminating construction noise impacts for such sensitive receptors. Construction noise impacts on sensitive receptors would be less than significant with implementation of **Mitigation Measure NOS-9**.

e. For a project located within an airport land use plan or, where such a plan has not been adopted, within 2 miles of a public airport or public use airport, would the project expose people residing or working in the project area to excessive noise levels?

NO IMPACT. The Project is not within an airport land use plan or within 2 miles of a public airport; therefore, no impacts would occur.

f. For a project within the vicinity of a private airstrip, would the project expose people residing or working in the project area to excessive noise levels?

NO IMPACT. The Project is not in the vicinity of a private airstrip; therefore, no impacts would occur.

3.13 POPULATION AND HOUSING

	Potentially Significant Impact	Less Than Significant with Mitigation	Less Than Significant Impact	No Impact
Would the project:				
a. Induce substantial population growth in an area, either directly (for example, by proposing new homes and businesses) or indirectly (for example, through extension of roads or other infrastructure)?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
b. Displace substantial numbers of existing housing, necessitating the construction of replacement housing elsewhere?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
c. Displace substantial numbers of people, necessitating the construction of replacement housing elsewhere?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

3.13.1 Impact Analysis

a. *Would the project induce substantial population growth in an area, either directly (for example, by proposing new homes and businesses) or indirectly (for example, through extension of roads or other infrastructure)?*

LESS THAN SIGNIFICANT IMPACT. The Project does not propose the construction of any new homes or businesses, and it would not provide any new roads or new access to land. Therefore, the Project would have no direct or indirect effects on population growth. The Project would include improvements to existing roadways and would result in one additional through-traffic lane on West Capitol Avenue between Harbor Boulevard and Enterprise Avenue, which would increase the capacity of the roadway. This change in roadway capacity is only proposed for one section of the Project and would not have an adverse effect on population growth. The Project would result in less than significant impacts.

b. *Would the project displace substantial numbers of existing housing, necessitating the construction of replacement housing elsewhere?*

NO IMPACT. The Project includes improvements to existing roadways in West Sacramento, such as pavement rehabilitation, separated bike lanes, pedestrian crosswalks, and improved lighting. The Project would not result in any displacement of housing and would not necessitate construction of replacement housing elsewhere. No impacts would occur.

c. *Would the project displace substantial numbers of people, necessitating the construction of replacement housing elsewhere?*

NO IMPACT. The Project would include improvements to existing roadways and would not result in the displacement of people. No impact related to replacement housing would occur.

3.14 PUBLIC SERVICES

	Potentially Significant Impact	Less Than Significant with Mitigation	Less Than Significant Impact	No Impact
Would the project:				
a. Result in substantial adverse physical impacts associated with the provision of new or physically altered governmental facilities, need for new or physically altered governmental facilities, the construction of which could cause significant environmental impacts, in order to maintain acceptable service ratios, response times or other performance objectives for any of the public services:				
i. Fire protection?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
ii. Police protection?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
iii. Schools?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
iv. Parks?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
v. Other public facilities?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

3.14.1 Impact Analysis

a. *Would the project result in substantial adverse physical impacts associated with the provision of new or physically altered governmental facilities, need for new or physically altered governmental facilities, the construction of which could cause significant environmental impacts, in order to maintain acceptable service ratios, response times or other performance objectives for any of the public services:*

i. *Fire protection?*

LESS THAN SIGNIFICANT WITH MITIGATION. Fire protection services in the Project area are provided by the West Sacramento Fire Department (WSFD), which has three divisions: Fire Administration, Emergency Operations, and Fire Prevention/Hazardous Materials. Fire Administration oversees emergency scene management, daily supervision of fire suppression units, and the daily operations of the WSFD. In addition to extinguishing fires, fire investigation, emergency rescue, hazardous materials response, emergency medical response, and other public services, Emergency Operations also assists with public education and inspections of business licenses, hydrant maintenance, and fire safety/code enforcement. Fire Prevention coordinates and conducts Fire Prevention and Fire Investigation programs, including weed abatement, residential inspections, business license and fire safety inspections, public awareness education, and investigations of accidental and incendiary fires. Three of the five fire stations are within 1 mile of the Project area: Fire Station #41 at 132 15th Street, Fire Station #43 at 1561 Harbor Boulevard, and Fire Station #44 at 905 Fremont Boulevard.

Goal PFS-9.2 of the City’s General Plan Public Facilities and Services Element (City of West Sacramento 2016a) establishes a fire insurance rating of 3 or better in the developed areas of West Sacramento and estimates an average response time to emergency calls (Priority 1) of 5 minutes for 90 percent of the calls. Per the City’s General Plan Update Draft EIR, the current

average overall response time for the WSPD is 4:42 minutes from time of dispatch to arrival on scene.

Co Construction of the Project may not require detours; however, temporary lane closures will occur. To ensure adequate emergency response, the construction contractor would coordinate with emergency service providers to ensure that construction activities would not impair emergency response times. Once operational, the Project would have no impact on fire service. With implementation of **Mitigation Measure TRANS-1**, provided in Section 3.16.1, the Project would result in less than significant impacts involving fire protection.

ii. Police protection?

LESS THAN SIGNIFICANT WITH MITIGATION. The West Sacramento Police Department (WSPD) provides law enforcement, crime investigation, and police protection services to West Sacramento and the Project site. The WSPD consists of Administration, Support Services, and Field Operations and is headquartered at 550 Jefferson Boulevard, West Sacramento, California 95605. The WSPD currently staffs 74 sworn officers and 23 civilian full-time employees.

Temporary lane closures are anticipated during Project construction, but no detours would be required. In addition, the construction contractor would coordinate with emergency service providers to ensure that construction activities would not impair emergency response times. Once operational, the Project would not impact police protection facilities and response times. Implementation of **Mitigation Measure TRANS-1** would reduce Project impacts involving police protection to a less than significant level.

iii. Schools?

NO IMPACT. Education services are provided to West Sacramento by the Washington Unified School District.

The Project would not include any new residences or businesses and would not increase population. Therefore, the Project would not require new or impact existing school or education services. School buses pick up students at a couple of Yolo County Transportation District (YCTD) bus stops along West Capitol Ave. Those bus stops will need to be temporarily relocated within a block. The contractor will need to notify the district and users prior of temporary relocations.

iv. Parks?

NO IMPACT. West Sacramento Parks and Recreation currently maintains 33 parks, plazas, and playfields totaling 152.6 acres. The 2003 Parks Master Plan sets a standard of 5 acres of parks per 1,000 residents—2 acres in neighborhood parks and 3 acres in community parks (City of West Sacramento 2003). Several park facilities are within the Project vicinity.

The Project includes improvements to an existing roadway and would not result in population growth. The Project would have no impact to existing park and recreation facilities.

v. Other public facilities?

NO IMPACT. The Project would not result in population growth and therefore would not require the construction or expansion of public facilities. No impact would occur.

3.15 RECREATION

	Potentially Significant Impact	Less Than Significant with Mitigation	Less Than Significant Impact	No Impact
a. Would the project increase the use of existing neighborhood and regional parks or other recreational facilities such that substantial physical deterioration of the facility would occur or be accelerated?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
b. Does the project include recreational facilities or require the construction or expansion of recreational facilities which might have an adverse physical effect on the environment?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

3.15.1 Impact Analysis

a. Would the project increase the use of existing neighborhood and regional parks or other recreational facilities such that substantial physical deterioration of the facility would occur or be accelerated?

NO IMPACT. The Project would include improvements to existing roadways and would not involve any residential development or employment-generating land uses. Therefore, the Project would not result in increased population or an associated need for additional recreational facilities. There would be no impact to recreation associated with the Project.

b. Does the project include recreational facilities or require the construction or expansion of recreational facilities which might have an adverse physical effect on the environment?

NO IMPACT. The Project does not include any recreational facilities and does not require the construction or expansion of recreational facilities. No impact would occur.

3.16 TRANSPORTATION/TRAFFIC

	Potentially Significant Impact	Less Than Significant with Mitigation	Less Than Significant Impact	No Impact
Would the project:				
a. Conflict with an applicable plan, ordinance or policy establishing measures of effectiveness for the performance of the circulation system, taking into account all modes of transportation including mass transit and non-motorized travel and relevant components of the circulation system, including but not limited to intersections, streets, highways and freeways, pedestrian and bicycle paths, and mass transit?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
b. Conflict with an applicable congestion management program, including, but not limited to level of service standards and travel demand measures, or other standards established by the county congestion management agency for designated roads or highways?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
c. Result in a change in air traffic patterns, including either an increase in traffic levels or a change in location which results in substantial safety risks?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
d. Substantially increase hazards due to a design feature (e.g., sharp curves or dangerous intersections) or incompatible uses (e.g., farm equipment)?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
e. Result in inadequate emergency access?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
f. Conflict with adopted policies, plans or programs regarding public transit, bicycle, or pedestrian facilities, or otherwise decrease the performance or safety of such facilities?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>

3.16.1 Environmental Setting

In order to assess the impacts of the Project on transportation and traffic, a Transportation Analysis Report was completed by Fehr & Peers in October 2018 (Fehr & Peers, 2018). The findings of the report are summarized below.

3.16.1.1 Existing Roadway Conditions

Existing roadways within the Project area include West Capitol Avenue, Jefferson Boulevard, Harbor Boulevard, I-80, and US-50. Each roadway is described in detail below.

West Capitol Avenue is a major arterial that runs from I-80 at Enterprise Boulevard on the west to 5th Street on the east. At the I-80 interchange, the street has a four-lane divided roadway. Between I-80 and Harbor Boulevard, West Capitol Avenue has a variable cross-section from two to five lanes. The section from Harbor Boulevard to east of Poplar Avenue is four lanes with a raised median, and the remaining section to Jefferson Boulevard widens to six lanes. The posted speed limit is 40 miles per hour (mph) west of Harbor Boulevard and 35 mph to the east. West Capitol Avenue connects downtown West Sacramento with the western part of the city and provides access to I-80.

Jefferson Boulevard is a major arterial that runs from Sacramento Avenue to the north through West Sacramento into southern Yolo County. In the study area, the roadway has four lanes with a center turn lane between West Capitol Avenue and Merkley Avenue and a raised median between Merkley Avenue and Park Boulevard. The posted speed limit is 35 mph.

Harbor Boulevard is a major arterial that runs from Riverbank Road at the Sacramento River to Industrial Boulevard at the Port of West Sacramento. At West Capitol Avenue, Harbor Boulevard is a four-lane street with a center two-way left-turn lane.

I-80 is an east-west freeway that provides connections to Davis and the San Francisco Bay Area to the west and Sacramento and the Sierra Nevada mountains to the east. In West Sacramento, I-80 has interchanges at Enterprise Boulevard/West Capitol Avenue, US-50, and Reed Avenue. East of the Enterprise Boulevard/West Capitol Avenue interchange, I-80 turns north and crosses over West Capitol Avenue between Northport Drive and Garnet Street.

US-50 is an east-west freeway that starts at I-80 in West Sacramento and connects to Sacramento and the Sierra Nevada to the east. In West Sacramento, US-50 has interchanges at Harbor Boulevard, Jefferson Boulevard/Tower Bridge Gateway, and South River Road/5th Street. In addition, Westacre Road has an undercrossing at US-50.

3.16.1.2 Existing Bicycle Facilities

Bicycle facilities within the Project area include the Yolo Bypass bicycle trail, a Class I bike path that terminates at West Capitol Avenue just east of the I-80 interchange. Class II bike lanes are found along West Capitol Avenue from I-80 to Poplar Avenue and east of Jefferson Boulevard, along Jefferson Boulevard north of West Capitol Avenue and south of Park Boulevard, and along Harbor Boulevard north of West Capitol Avenue. Class III bike routes are found along West Capitol Avenue between Poplar Avenue and Jefferson Boulevard. No bicycle facilities are provided along Jefferson Boulevard between West Capitol Avenue and Park Boulevard.

The traffic counts show moderate bicycle activity along West Capitol Avenue during the a.m. and p.m. peak hours. West Capitol Avenue serves as the direct connection between the Yolo Bypass bicycle trail from Davis and downtown Sacramento.

3.16.1.3 Existing Pedestrian Facilities

Existing pedestrian facilities along West Capitol Avenue include complete sidewalk coverage east of Harbor Boulevard/West Capitol Avenue. However, notable gaps occur between Enterprise Boulevard and Houston Street. Controlled crosswalks are currently provided at signalized intersections within the Project site. In addition, West Capitol Avenue has uncontrolled north-south marked crosswalks at the bike trail, Glide Avenue, Pecan Street, Walnut Street, and Sycamore Avenue.

3.16.1.4 Existing Transit Service

The YCTD provides transit services in the study area, including local and regional express bus service (both referred to as Yolobus). On-street bus stops are provided along West Capitol Avenue. Some stops provide benches and others also have a shelter.

3.16.1.5 Existing Intersection Levels of Service

Existing intersection lane configurations, traffic control, and peak-hour turning movement volumes were used to calculate the levels of service (LOS) for the study intersections during each peak hour. The results of the LOS analysis using the SimTraffic software program for existing conditions are presented in **Table 3.K: Existing Intersection Levels of Service and Delay** and **Table 3.L: Existing Roadway Segment Operations**.

Under existing conditions, all study intersections operate at LOS D or better, with most operating at LOS A or B during both peak hours. The highest delays occur at Harbor Boulevard/West Capitol Avenue (LOS C) and Jefferson Boulevard/West Capitol Avenue (LOS D).

Table 3.K: Existing Intersection Levels of Service and Delay

Intersection	Traffic Control	Peak Hour	LOS	Average Delay (Seconds)
1. Enterprise Boulevard/I-80 EB Ramps	Signalized	AM	B	13
		PM	B	14
2. I-80 WB Ramps/West Capitol Avenue	Signalized	AM	B	13
		PM	B	11
3. Pine Avenue/West Capitol Avenue	Side-Street Stop	AM	B	11 (WB LT)
		PM	B	10 (WB LT)
4. Harbor Boulevard/West Capitol Avenue	Signalized	AM	C	22
		PM	C	31
5. Sycamore Avenue/West Capitol Avenue	Side-Street Stop	AM	A	9 (NB LT)
		PM	B	13 (NB LT)
6. Poplar Avenue/West Capitol Avenue	Signalized	AM	A	9
		PM	A	7
7. Westacre Road/West Capitol Avenue	Signalized	AM	B	18
		PM	B	19
8. Jefferson Boulevard/West Capitol Avenue	Signalized	AM	D	48
		PM	D	39
9. Jefferson Boulevard/Merkley Avenue	Signalized	AM	A	10
		PM	B	11

Source: Fehr & Peers (2018).

Note: For signalized intersections, the overall average intersection delay is reported in seconds per vehicle. For side-street stop-controlled intersections, the highest movement average delay is reported with the movement listed in parentheses.

I-80 = Interstate 80

NB = northbound

LOS = level of service

WB = westbound

LT = left turn

Table 3.L: Existing Roadway Segment Operations

Roadway	Segment	Lanes	Daily Volume	Volume-to-Capacity Ratio	LOS
W. Capitol Ave.	I-80 to Pine Ave.	2	8,000	0.53	A
W. Capitol Ave.	Pine Ave. to Harbor Blvd.	2	10,500	0.70	C
W. Capitol Ave.	Sycamore Ave. to Westacre Rd.	4	12,400	0.41	A
W. Capitol Ave.	Westacre Rd. to Jefferson Blvd.	6	12,000	0.27	A
Jefferson Blvd.	W. Capitol Ave. to Merkley Ave.	4	20,400	0.68	B

Source: Fehr & Peers (2018).

Note: This volume-to-capacity ratio is based on roadway segment daily volume thresholds from the City of West Sacramento’s Traffic Impact Analysis Guidelines for arterials with low access control.

I-80 = Interstate 80

LOS = level of service

3.16.2 Impact Analysis

a. Would the project conflict with an applicable plan, ordinance or policy establishing measures of effectiveness for the performance of the circulation system, taking into account all modes of transportation including mass transit and non-motorized travel and relevant components of the circulation system, including but not limited to intersections, streets, highways and freeways, pedestrian and bicycle paths, and mass transit?

LESS THAN SIGNIFICANT IMPACT. The Project would rehabilitate the deteriorating pavement along West Capitol Avenue and Jefferson Boulevard, as well as implement safety improvements, including adding separated bike lanes, enhancing the mid-block crossings for pedestrians, and improving lighting. The Project would provide pedestrian and bicycle access (through implementation of a Class 4 Separated Bikeway) while also allowing vehicles to travel unimpeded along West Capitol Avenue. The Project would not conflict with any applicable plan, ordinance, or policy establishing measures of effectiveness for the performance of the circulation system.

b. Would the project conflict with an applicable congestion management program, including, but not limited to level of service standards and travel demand measures, or other standards established by the county congestion management agency for designated roads or highways?

LESS THAN SIGNIFICANT IMPACT. During construction, the Project would not require any planned detours, and existing driveways to businesses would be maintained. Construction is expected to have a duration of 18 months and would occur in a linear pattern, such that construction activities at one specific location would occur for a limited duration. Construction activities would generate only a small increase in vehicular traffic associated with construction equipment/trucks and personnel traveling to and from the Project site. This increase in traffic would be temporary and minimal.

Once operational, all intersections would operate acceptably at LOS E or better, as shown in **Table 3.M: Existing Plus Project Intersection Levels of Service and Delay.**

Table 3.M: Existing Plus Project Intersection Levels of Service and Delay

Intersection	Traffic Control	Peak Hour	LOS	Average Delay (Seconds)
1. Enterprise Boulevard/I-80 EB Ramps	Signalized	AM	B	13
		PM	B	19
2. I-80 WB Ramps/West Capitol Avenue	Signalized	AM	B	15
		PM	B	16
3. Pine Avenue/West Capitol Avenue	Side-Street Stop	AM	B	11 (WB LT)
		PM	B	11 (WB LT)
4. Harbor Boulevard/West Capitol Avenue	Signalized	AM	C	23
		PM	C	32
5. Sycamore Avenue/West Capitol Avenue	Side-Street Stop	AM	B	13 (NB LT)
		PM	B	13 (NB LT)
6. Poplar Avenue/West Capitol Avenue	Signalized	AM	B	12
		PM	A	8
7. Westacre Road/West Capitol Avenue	Signalized	AM	C	22
		PM	C	22
8. Jefferson Boulevard/West Capitol Avenue	Signalized	AM	D	47
		PM	D	44
9. Jefferson Boulevard/Merkley Avenue	Signalized	AM	B	12
		PM	B	15

Source: Fehr & Peers (2018).

Note: For signalized intersections, the overall average intersection delay is reported in seconds per vehicle. For side-street stop-controlled intersections, the highest movement average delay is reported with the movement listed in parentheses.

EB = eastbound

LOS = level of service

NB = northbound

I = Interstate

LT = left turn

WB = westbound

Under Existing Plus Project conditions, the shift in traffic volumes due to the lane reductions on West Capitol Avenue would cause only small changes in overall intersection delay. One of the largest changes would occur at the Jefferson Boulevard/West Capitol Avenue intersection under p.m. peak-hour conditions, where the average delay would increase from 39 to 44 seconds per vehicle.

Table 3.N: Off-Ramp Queue Length—Existing Plus Project Conditions shows the average maximum queue length for the I-80 off-ramps at the Enterprise Boulevard/West Capitol Avenue interchange. The queue length would be less than the storage length under Existing Plus Project conditions; therefore, no impact would occur.

Table 3.N: Off-Ramp Queue Length—Existing Plus Project Conditions

Off-Ramp	Storage Length	Queue Length	
		AM	PM
I-80 Eastbound at Enterprise Boulevard	1,270	125	200
I-80 Westbound at West Capitol Avenue	910	250	225

Source: Fehr & Peers (2018).

Note: Storage and queue lengths are reported in feet.

I-80 = Interstate 80

Table 3.O: Daily Roadway Segment Operations—Existing Plus Project Conditions shows the roadway segment operations analysis results under Existing Plus Project conditions. With the Project, volumes would decrease due to the lane reductions on West Capitol Avenue. As a result, all study roadways would operate at LOS B or better on a daily volume basis.

Table 3.O: Daily Roadway Segment Operations—Existing Plus Project Conditions

Roadway	Segment	Lanes	Daily Volume	Volume-to-Capacity Ratio	LOS
W. Capitol Ave.	I-80 to Pine Ave.	2	7,900	0.53	A
W. Capitol Ave.	Pine Ave. to Harbor Blvd.	2	10,300	0.69	B
W. Capitol Ave.	Sycamore Ave. to Westacre Rd.	4	12,300	0.41	A
W. Capitol Ave.	Westacre Rd. to Jefferson Blvd.	4	11,800	0.39	A
Jefferson Blvd.	W. Capitol Ave. to Merkley Ave.	4	20,300	0.68	B

Source: Fehr & Peers (2018).

Note: This volume-to-capacity ratio is based on roadway segment daily volume thresholds from the City of West Sacramento’s Traffic Impact Analysis Guidelines for arterials with low access control.

I-80 = Interstate 80

LOS = level of service

Therefore, the Project would not result in any traffic congestion conflicts and would operate at acceptable standards. In addition, the Project would increase pedestrian and bicycle safety and promote multimodal transport. The Project would not conflict with an applicable congestion management program. As such, impacts would be less than significant.

c. Would the project result in a change in air traffic patterns, including either an increase in traffic levels or a change in location which results in substantial safety risks?

NO IMPACT. The Project does not include the development of a tall structure that would interfere with Federal Aviation Administration airspace or private airplane use airspace. Project implementation therefore would not result in a change of air traffic patterns that would result in substantial aviation risks. No impact would occur.

d. Would the project substantially increase hazards due to a design feature (e.g., sharp curves or dangerous intersections) or incompatible uses (e.g., farm equipment)?

NO IMPACT. The main objective of the Project is to improve road safety throughout the Project area. Construction of bicycle lanes, sidewalks, and crosswalks would increase bicycle and pedestrian access while ensuring visibility and safety. Improvements would also allow vehicles to travel unimpeded by pedestrians and bicycles sharing the travel lane. The Project would increase safety for both motorized and nonmotorized transport along the corridor. The Project would not result in any hazardous design features or incompatible uses. No impact would occur.

e. Would the project result in inadequate emergency access?

LESS THAN SIGNIFICANT WITH MITIGATION. The City of West Sacramento emergency evacuation map, published in 2009, designates West Capitol Avenue as a Surface Evacuation Street.

Construction of the Project would not require roadway closure or any planned detours. However, construction may require temporary lane closure and may affect emergency access. In the event of any temporary road closures or traffic delays, the construction contractor would provide advance notice to emergency service providers regarding the timing, location, and duration of construction activities.

Implementation of **Mitigation Measure TRANS-1** would reduce any temporary impacts related to adequate emergency access to a less than significant level.

TRANS-1: A Traffic Management Plan/Emergency Services Plan will be developed following Yolo County Multi-Hazard Functional Plan recommendations. The provisions of and compliance with this plan, and with County of Yolo recommendations, will relegate any impacts to less than significant.

f. Would the project conflict with adopted policies, plans or programs regarding public transit, bicycle, or pedestrian facilities, or otherwise decrease the performance or safety of such facilities?

LESS THAN SIGNIFICANT IMPACT. The 2018 West Sacramento Bicycle, Pedestrian, and Trails Master Plan (City of West Sacramento 2018) identifies existing bicycle facilities along West Capitol Avenue and proposes future bicycle facilities along the corridor. The Master Plan proposes an extension of Class II bike lanes along Jefferson Boulevard between West Capitol Avenue and Webster Street (south of Park Boulevard) and the conversion of existing Class II bike lanes along West Capitol Avenue between Poplar Avenue and Glide Avenue to Class 4 Separated Bikeway. No other changes to existing bicycle facilities within the Project area are proposed in the Master Plan.

The Project would create Class II on-street bike lanes on both sides of West Capitol Avenue from Enterprise Boulevard to Jefferson Boulevard. Including, the existing Class III bike route from Poplar Avenue to Jefferson Boulevard would be converted to Class II on-street bike lanes. Both of these changes would be inconsistent with the Bicycle, Pedestrian, and Trails Master Plan, which does not identify improvements at these locations. However, the proposed changes would provide improved bicyclist comfort and safety compared to the existing conditions. In addition, such changes would increase transit access. As a result, these changes are not considered to be Project impacts.

In addition, the increase of bicycle facilities throughout the Project area would support the following goals and policies outlined in the City of West Sacramento General Plan Mobility Element:

Goal M-1: To develop and maintain a multi-modal integrated transportation system that provides for the safe and efficient movement of people and goods, supports vibrant neighborhoods and districts, and reduces air pollution and GHG emissions.

Goal M-2: To provide complete streets that accommodate driving, walking, bicycling, and public transit and are designed to enable safe, attractive, and comfortable access and travel for all users.

Goal M-5: To develop and maintain a safe, comprehensive, and integrated bicycle system and bicycle support facilities throughout the city.

The proposed Class II on-street bicycle lanes on Jefferson Boulevard to be built by the Project are consistent with planned improvements in the bicycle master plan. Maintaining the Class II on-street bike lanes on West Capitol Avenue from Northport Drive to Glide Avenue is also consistent with the bicycle master plan.

The bicycle master plan calls for a Class III bike route to be provided on West Capitol Avenue between Glide Avenue and Poplar Avenue. However, this change depends on the construction of frontage roads, which is not included in the Project. As a result, the Class II on-street bike lanes are proposed to remain. The Project does not preclude the future construction of frontage roads, so maintaining the Class II bike lanes is not considered to be a Project impact. Therefore, the Project would generate no significant impacts to bicycle facilities.

The Project would not conflict with any applicable plan, ordinance, or policy regarding mass transit, pedestrian, or vehicle transportation. As such, Project impacts would be less than significant.

3.17 TRIBAL CULTURAL RESOURCES

	Potentially Significant Impact	Less Than Significant with Mitigation	Less Than Significant Impact	No Impact
Would the project:				
a. Cause a substantial adverse change in the significance of a tribal cultural resource, defined in Public Resources Code Section 21074 as either a site, feature, place, cultural landscape that is geographically defined in terms of the size and scope of the landscape, sacred place, or object with cultural value to a California Native American tribe, and that is:				
i. Listed or eligible for listing in the California Register of Historical Resources, or in a local register of historical resources as defined in Public Resources Code Section 5020.1(k)? Or	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
ii. A resource determined by the lead agency, in its discretion and supported by substantial evidence, to be significant pursuant to criteria set forth in subdivision (c) of Public Resources Code Section 5024.1? In applying the criteria set forth in subdivision (c) of Public Resource Code Section 5024.1, the lead agency shall consider the significance of the resource to a California Native American tribe.	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

3.17.1 Impact Analysis

- a. *Would the project cause a substantial adverse change in the significance of a tribal cultural resource, defined in Public Resources Code Section 21074 as either a site, feature, place, cultural landscape that is geographically defined in terms of the size and scope of the landscape, sacred place, or object with cultural value to a California Native American tribe, and that is:*
 - i. *Listed or eligible for listing in the California Register of Historical Resources, or in a local register of historical resources as defined in Public Resources Code Section 5020.1(k)? Or*
 - ii. *A resource determined by the lead agency, in its discretion and supported by substantial evidence, to be significant pursuant to criteria set forth in subdivision (c) of Public Resources Code Section 5024.1? In applying the criteria set forth in subdivision (c) of Public Resource Code Section 5024.1, the lead agency shall consider the significance of the resource to a California Native American tribe.*

LESS THAN SIGNIFICANT WITH MITIGATION. On July 31, 2018, the City sent combination Section 106/AB 52 notification letters describing the Project with maps depicting the APE to the following Native American contacts on the City’s AB 52 notification list: the Yocha Dehe Wintun Nation and the United Auburn Indian Community of the Auburn Rancheria (UAIC). The NAHC’s notification list included the Yocha Dehe Wintun Nation, UAIC, and the Cortina Indian Rancheria of Wintun Indians. The City’s Section 106/AB 52 outreach letters to the Yocha Dehe Wintun Nation and UAIC requested information or concerns regarding archaeological cultural resources

that may be present within the APE. LSA sent a Section 106 consultation letter on August 2, 2018, to the third tribe listed by the NAHC—the Cortina Indian Rancheria of Wintun Indians—asking for any information or concerns regarding archaeological cultural resources that may be within the APE. LSA made follow-up telephone calls on August 20, 2018. The correspondence with each tribal group is summarized below:

- **UAIC:** A representative of the tribe responded on August 15, 2018, stating that a formal AB 52 letter would be sent shortly and requesting inclusion of their mitigation measures: (1) a Native American monitor 1 day per week for the duration of the Project; (2) CEQA discoveries guidance; (3) post-construction-site inspection; and (4) worker awareness training. Additionally, the representative offered to provide staff for site monitoring and inspection. LSA made a follow-up telephone call on August 20, 2018, and left a voicemail for the tribe representative to contact LSA with any input, comments, or concerns regarding Section 106 consultation for the Project. Another representative of the tribe called LSA on August 22, 2018, to state that UAIC has no further comments for AB 52 or Section 106 purposes, and that LSA may consider their comments closed for this Project. The City received a letter dated August 14, 2018 (postmarked August 29, 2018, and received August 30, 2018) stating that UAIC does not wish to initiate AB 52 consultation at this time but wishes the letter to be included in the Project record. UAIC also requested copies of cultural reports resulting from the Project.
- **Yocha Dehe Wintun Nation:** A representative of the tribe responded to the City on August 8, 2018, with an email saying he would verify receipt of the original letter. LSA made a follow-up telephone call on August 20, 2018, and left a voicemail for the representative referring to the original mailing, inviting him to call the City or LSA with any input, comments, or concerns regarding the Project. On August 21, 2018, the City received additional communication from another representative of the tribe to coordinate a consultation meeting. On September 17, 2018, a meeting was held among the representatives of the tribe, the City, and LSA. The tribe requested and received clarification regarding the proposed subsurface Project work and expressed concern regarding the utilities proposed for the western region of the APE. The tribe requested that pre-construction cultural resources training be given to contractors and said he would mail the City materials from the tribe. After the meeting, LSA followed up with the representative of the tribe in an email stating that his request would be included in the Archaeological Survey Report and asking that he send LSA the materials to be included with the Archaeological Survey Report. The tribe representative emailed the materials on October 11, 2018.
- **Cortina Indian Rancheria of Wintun Indians:** LSA made a follow-up telephone call on August 20, 2018, to discuss the original consultation letter and maps. After discussing the Project, the tribe Chairman stated that he had no concerns at that time.

UAIC, the Yocha Dehe Wintun Nation, and the Cortina Indian Rancheria of Wintun Indians did not identify specific tribal cultural resources within the APE. However, mitigation measures were recommended by both UAIC and the Yocha Dehe Wintun Nation in the event resources are discovered during construction.

Implementation of **Mitigation Measures CULT-1, CULT-2, and CULT-3**, provided in Section 3.5, Cultural Resources, would reduce any potentially significant impacts to tribal cultural resources to a less than significant level.

3.18 UTILITIES AND SERVICE SYSTEMS

	Potentially Significant Impact	Less Than Significant with Mitigation	Less Than Significant Impact	No Impact
Would the project:				
a. Exceed wastewater treatment requirements of the applicable Regional Water Quality Control Board?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
b. Require or result in the construction of new water or wastewater treatment facilities or expansion of existing facilities, the construction of which could cause significant environmental effects?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
c. Require or result in the construction of new storm water drainage facilities or expansion of existing facilities, the construction of which could cause significant environmental effects?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
d. Have sufficient water supplies available to serve the project from existing entitlements and resources, or are new or expanded entitlements needed?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
e. Result in a determination by the wastewater treatment provider which serves or may serve the project that it has adequate capacity to serve the project's projected demand in addition to the provider's existing commitments?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
f. Be served by a landfill with sufficient permitted capacity to accommodate the project's solid waste disposal needs?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
g. Comply with federal, state, and local statutes and regulations related to solid waste?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

3.18.1 Impact Analysis

a. Would the project exceed wastewater treatment requirements of the applicable Regional Water Quality Control Board?

NO IMPACT. The City runs and maintains a sewer collection system consisting of eight sewer pump stations, five lift stations, and underlying sewer pipes across the city. The collected sewage is then delivered to the Sacramento County Regional Sanitation District via the 19-mile pipeline Lower Northwest Interceptor for treatment (City of West Sacramento 2016b). Wastewater treatment within West Sacramento is regulated by the CVRWQCB.

The Project would not result in any new residences or businesses and would not generate wastewater or increase demand for wastewater treatment. Therefore, the Project would not exceed the wastewater treatment requirements of the CVRWQCB. No Impacts to wastewater treatment requirements would occur.

b. Would the project require or result in the construction of new water or wastewater treatment facilities or expansion of existing facilities, the construction of which could cause significant environmental effects?

LESS THAN SIGNIFICANT IMPACT. During construction, the Project would require water for dust control and would generate minimal wastewater. The amount of water required and wastewater

anticipated to be generated during construction would be minimal and would occur on a temporary basis for the duration of construction activities. Any amount of wastewater generated by construction workers would be hauled and treated off-site.

The Project includes the installation of new water lines and replacement of existing water lines along West Capitol Avenue. The construction of such facilities would be consistent with the City's 2015 Water System Master Plan Update and would be subject to local and State regulations. Compliance with applicable State and local regulations would reduce any environmental effects. All new sewer lines, storm drain pipelines, and water mains would be constructed alongside existing lines and would be constructed while old lines remain in service. Short-term service disruptions of up to a few hours are unavoidable while connecting each property to the new service. However, each property would be notified in advance, and efforts would be coordinated with residents and business owners. Connections would be made during the middle of the day to minimize inconvenience. Therefore, impacts related to the construction or expansion of water or wastewater treatment facilities would be less than significant.

c. Would the project require or result in the construction of new storm water drainage facilities or expansion of existing facilities, the construction of which could cause significant environmental effects?

LESS THAN SIGNIFICANT IMPACT. The Project would result in the construction of sidewalks along the western portion of West Capitol Avenue. Sidewalk construction and improvements would result in an increase in impervious surfaces. However, the Project would include the installation of stormwater drainage improvements such as sidewalk gutters along West Capitol Avenue. Construction of such facilities would improve stormwater drainage throughout the Project area and would not result in adverse effects to stormwater drainage that would require further expansion of facilities. Less than significant impacts would occur.

d. Would the project have sufficient water supplies available to serve the project from existing entitlements and resources, or are new or expanded entitlements needed?

LESS THAN SIGNIFICANT IMPACT. The Project includes improvements to an existing roadway, such as pavement rehabilitation, bicycle lanes, and sidewalks. During construction of the Project, water would be required for dust control operations. The water needed during construction would be minimal, would be brought in from off-site, and would not deplete existing City supplies. Once operational, the Project would not require water service. As such, no impact related to water service would occur.

e. Would the project result in a determination by the wastewater treatment provider which serves or may serve the project that it has adequate capacity to serve the project's projected demand in addition to the provider's existing commitments?

NO IMPACT. Any wastewater generated during Project construction would be hauled and treated off-site. Once operational, the Project would not generate any wastewater and would not require the construction of new wastewater facilities or sewage systems. No impact related to wastewater treatment services would occur.

f. Would the project be served by a landfill with sufficient permitted capacity to accommodate the project's solid waste disposal needs?

LESS THAN SIGNIFICANT IMPACT. Solid waste disposal is provided and governed by the City's General Plan in close consultation with Yolo County Department of Public Works. Solid waste generated within West Sacramento is currently disposed of at the Yolo County Central Landfill in Davis. According to the Solid Waste Facility Permit issued for the landfill on July 31, 2018, the estimated closure year for the Yolo County Central Landfill is 2124; there is ample capacity to handle any solid waste generated by the Project during construction.

Replacement and installation of water lines and fiber-optic cabling would generate some quantities of earth and concrete material that would require disposal. Solid waste materials such as asphalt, concrete, pipes, and gravel would be removed from the Project area and disposed of at the Yolo County Central Landfill. Solid waste generated during construction of the Project would not exceed current landfill capacity. In addition, the Project would not generate solid waste once operational. As such, impacts would be less than significant.

g. Would the project comply with federal, state, and local statutes and regulations related to solid waste?

NO IMPACT. The Project would comply with all applicable federal, State, and local statutes and regulations related to solid waste. Therefore, no impact would occur.

3.19 MANDATORY FINDINGS OF SIGNIFICANCE

	Potentially Significant Impact	Less Than Significant with Mitigation	Less Than Significant Impact	No Impact
a. Does the project have the potential to degrade the quality of the environment, substantially reduce the habitat of a fish or wildlife species, cause a fish or wildlife population to drop below self-sustaining levels, threaten to eliminate a plant or animal community, substantially reduce the number or restrict the range of a rare or endangered plant or animal or eliminate important examples of the major periods of California history or prehistory?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
b. Does the project have impacts that are individually limited, but cumulatively considerable? ("Cumulatively considerable" means that the incremental effects of a project are considerable when viewed in connection with the effects of past projects, the effects of other current projects, and the effects of probable future projects.)	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
c. Does the project have environmental effects which will cause substantial adverse effects on human beings, either directly or indirectly?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>

3.19.1 Impact Analysis

a. Does the project have the potential to degrade the quality of the environment, substantially reduce the habitat of a fish or wildlife species, cause a fish or wildlife population to drop below self-sustaining levels, threaten to eliminate a plant or animal community, substantially reduce the number or restrict the range of a rare or endangered plant or animal or eliminate important examples of the major periods of California history or prehistory?

LESS THAN SIGNIFICANT IMPACT. Implementation of the Project is not anticipated to adversely impact sensitive natural communities or special-status animals, but the Project would have the potential to impact nesting birds and previously undiscovered cultural resources and/or human remains. With implementation of the mitigation measures identified in this Initial Study, compliance with City General Plan policies, and application of standard BMPs during construction, development of the Project would not:

1. Degrade the quality of the environment;
2. Substantially reduce or impact the habitat of fish or wildlife species;
3. Cause fish or wildlife populations to drop below self-sustaining levels;
4. Threaten to eliminate a plant or animal community;
5. Reduce the number or restrict the range of a rare or endangered plant or animal; or
6. Eliminate important examples of the major periods of California history or prehistory.

Therefore, the Project’s impact would be less than significant and no additional significant environmental effects would occur with implementation of the Project.

- b. Does the project have impacts that are individually limited, but cumulatively considerable? ("Cumulatively considerable" means that the incremental effects of a project are considerable when viewed in connection with the effects of past projects, the effects of other current projects, and the effects of probable future projects)?*

LESS THAN SIGNIFICANT IMPACT. The impacts of the Project would be individually limited and not cumulatively considerable. The Project would include the rehabilitation of West Capitol Avenue and Jefferson Boulevard, as well as improvements to pedestrian and bicycle facilities, street lighting, and utility improvements. All environmental impacts that could occur as a result of the Project would be reduced to a less than significant level with implementation of the mitigation measures recommended throughout this Initial Study. When viewed in conjunction with other closely related past, present, or reasonably foreseeable future projects, development of this Project would not cumulatively contribute to impacts.

- c. Does the project have environmental effects which will cause substantial adverse effects on human beings, either directly or indirectly?*

LESS THAN SIGNIFICANT IMPACT. The purpose of the Project is to rehabilitate existing roadways, to construct and expand pedestrian and bicycle facilities, and to complete utility improvements along the roadway. As described in this Initial Study, implementation of the Project could result in temporary air quality, biology, cultural, hazards and hazardous materials, noise, public services, transportation, and tribal cultural resource impacts during the construction period. Implementation of the mitigation measures recommended in this Initial Study, compliance with City regulations, and application of standard construction practices would ensure that the Project would not result in environmental impacts that would cause substantial direct or indirect adverse impacts on human beings.

APPENDIX A AIR QUALITY EMISSIONS MODEL

This page intentionally left blank

Road Construction Emissions Model, Version 9.0.0

Daily Emission Estimates for -> West Capitol														
Project Phases (Pounds)	ROG (lbs/day)	CO (lbs/day)	NOx (lbs/day)	Total PM10 (lbs/day)	Exhaust PM10 (lbs/day)	Fugitive Dust PM10 (lbs/day)	Total PM2.5 (lbs/day)	Exhaust PM2.5 (lbs/day)	Fugitive Dust PM2.5 (lbs/day)	SOx (lbs/day)	CO2 (lbs/day)	CH4 (lbs/day)	N2O (lbs/day)	CO2e (lbs/day)
Grubbing/Land Clearing	1.44	11.56	15.20	20.66	0.66	20.00	4.75	0.59	4.16	0.03	2,445.27	0.60	0.05	2,475.69
Grading/Excavation	6.73	51.48	76.73	23.41	3.41	20.00	7.23	3.07	4.16	0.11	10,717.04	2.89	0.22	10,856.17
Drainage/Utilities/Sub-Grade	3.90	32.32	38.73	21.92	1.92	20.00	5.93	1.77	4.16	0.06	5,955.38	1.23	0.09	6,011.99
Paving	1.85	19.00	17.33	1.03	1.03	0.00	0.92	0.92	0.00	0.03	3,054.24	0.76	0.06	3,091.28
Maximum (pounds/day)	6.73	51.48	76.73	23.41	3.41	20.00	7.23	3.07	4.16	0.11	10,717.04	2.89	0.22	10,856.17
Total (tons/construction project)	0.91	7.30	9.95	3.83	0.46	3.37	1.12	0.42	0.70	0.01	1,447.76	0.37	0.03	1,465.23

Notes: Project Start Year -> 2019
 Project Length (months) -> 18
 Total Project Area (acres) -> 30
 Maximum Area Disturbed/Day (acres) -> 2
 Water Truck Used? -> Yes

Phase	Total Material Imported/Exported Volume (yd ³ /day)		Daily VMT (miles/day)			
	Soil	Asphalt	Soil Hauling	Asphalt Hauling	Worker Commute	Water Truck
Grubbing/Land Clearing	0	0	0	0	360	40
Grading/Excavation	100	0	150	0	960	40
Drainage/Utilities/Sub-Grade	0	0	0	0	720	40
Paving	0	0	0	0	560	40

PM10 and PM2.5 estimates assume 50% control of fugitive dust from watering and associated dust control measures if a minimum number of water trucks are specified.

Total PM10 emissions shown in column F are the sum of exhaust and fugitive dust emissions shown in columns G and H. Total PM2.5 emissions shown in Column I are the sum of exhaust and fugitive dust emissions shown in columns J and K.

CO2e emissions are estimated by multiplying mass emissions for each GHG by its global warming potential (GWP), 1, 25 and 298 for CO2, CH4 and N2O, respectively. Total CO2e is then estimated by summing CO2e estimates over all GHGs.

Total Emission Estimates by Phase for -> West Capitol														
Project Phases (Tons for all except CO2e, Metric tonnes for CO2e)	ROG (tons/phase)	CO (tons/phase)	NOx (tons/phase)	Total PM10 (tons/phase)	Exhaust PM10 (tons/phase)	Fugitive Dust PM10 (tons/phase)	Total PM2.5 (tons/phase)	Exhaust PM2.5 (tons/phase)	Fugitive Dust PM2.5 (tons/phase)	SOx (tons/phase)	CO2 (tons/phase)	CH4 (tons/phase)	N2O (tons/phase)	CO2e (MT/phase)
Grubbing/Land Clearing	0.03	0.23	0.30	0.41	0.01	0.40	0.09	0.01	0.08	0.00	48.42	0.01	0.00	44.47
Grading/Excavation	0.60	4.59	6.84	2.09	0.30	1.78	0.64	0.27	0.37	0.01	954.89	0.26	0.02	877.51
Drainage/Utilities/Sub-Grade	0.23	1.92	2.30	1.30	0.11	1.19	0.35	0.11	0.25	0.00	353.75	0.07	0.01	323.97
Paving	0.06	0.56	0.51	0.03	0.03	0.00	0.03	0.03	0.00	0.00	90.71	0.02	0.00	83.29
Maximum (tons/phase)	0.60	4.59	6.84	2.09	0.30	1.78	0.64	0.27	0.37	0.01	954.89	0.26	0.02	877.51
Total (tons/construction project)	0.91	7.30	9.95	3.83	0.46	3.37	1.12	0.42	0.70	0.01	1,447.76	0.37	0.03	1,329.24

PM10 and PM2.5 estimates assume 50% control of fugitive dust from watering and associated dust control measures if a minimum number of water trucks are specified.

Total PM10 emissions shown in column F are the sum of exhaust and fugitive dust emissions shown in columns G and H. Total PM2.5 emissions shown in Column I are the sum of exhaust and fugitive dust emissions shown in columns J and K.

CO2e emissions are estimated by multiplying mass emissions for each GHG by its global warming potential (GWP), 1, 25 and 298 for CO2, CH4 and N2O, respectively. Total CO2e is then estimated by summing CO2e estimates over all GHGs.

The CO2e emissions are reported as metric tons per phase.

Data from the Road Construction Model

	start date	end date	months	Fraction in Each Year	
				2019	2020
Grubbing/Land Clearing	1/1/2019	2/24/2019	1.8	1.0	0
Grading/Excavation	2/25/2019	10/29/2019	8.1	1.0	0
Drainage/Utilities/Sub-Grade	10/30/2019	4/11/2020	5.4	0.38	0.62
Paving	4/12/2020	7/3/2020	2.7	0	1.0

	ROG (tons/phase)	CO (tons/phase)	NOx (tons/phase)	PM10 (tons/phase)
Grubbing/Land Clearing	0.03	0.23	0.30	0.41
Grading/Excavation	0.60	4.59	6.84	2.09
Drainage/Utilities/Sub-Grade	0.23	1.92	2.30	1.30
Paving	0.06	0.56	0.51	0.03

Calculated Emissions per Calendar Year, tons per year

2019	0.72	5.54	8.01	2.99
2020	0.1993	1.760	1.947	0.8411

**Road Construction Emissions Model
Data Entry Worksheet**

Version 9.0.0

Note: Required data input sections have a yellow background.
 Optional data input sections have a blue background. Only areas with a yellow or blue background can be modified. Program defaults have a white background.
 The user is required to enter information in cells D10 through D24, E28 through G35, and D38 through D41 for all project types.
 Please use "Clear Data Input & User Overrides" button first before changing the Project Type or begin a new project.

Input Type

To begin a new project, click this button to clear data previously entered. This button will only work if you opted not to disable macros when loading this spreadsheet.

Project Name	West Capitol	
Construction Start Year	2019	Enter a Year between 2014 and 2040 (inclusive)
Project Type	2	1) New Road Construction : Project to build a roadway from bare ground, which generally requires more site preparation than widening an existing roadway 2) Road Widening : Project to add a new lane to an existing roadway 3) Bridge/Overpass Construction : Project to build an elevated roadway, which generally requires some different equipment than a new roadway, such as a crane 4) Other Linear Project Type: Non-roadway project such as a pipeline, transmission line, or levee construction
Project Construction Time	18.00	months
Working Days per Month	22.00	days (assume 22 if unknown)
Predominant Soil/Site Type: Enter 1, 2, or 3 (for project within "Sacramento County", follow soil type selection instructions in cells E18 to E20 otherwise see instructions provided in cells J18 to J22)	2	1) Sand Gravel : Use for quaternary deposits (Delta/West County) 2) Weathered Rock-Earth : Use for Laguna formation (Jackson Highway area) or the lone formation (Scott Road, Rancho Murieta) 3) Blasted Rock : Use for Salt Springs Slate or Copper Hill Volcanics (Folsom South of Highway 50, Rancho Murieta)
Project Length	2.00	miles
Total Project Area	30.00	acres
Maximum Area Disturbed/Day	2.00	acres
Water Trucks Used?	1	1. Yes 2. No

Please note that the soil type instructions provided in cells E18 to E20 are specific to Sacramento County. Maps available from the California Geologic Survey (see weblink below) can be used to determine soil type outside Sacramento County.

http://www.conservation.ca.gov/cgs/information/geologic_mapping/Pages/googlemaps.aspx#regionalseries

Material Hauling Quantity Input

Material Type	Phase	Haul Truck Capacity (yd ³) (assume 20 if unknown)	Import Volume (yd ³ /day)	Export Volume (yd ³ /day)
Soil	Grubbing/Land Clearing			
	Grading/Excavation	20.00	100.00	
	Drainage/Utilities/Sub-Grade			
	Paving			
Asphalt	Grubbing/Land Clearing			
	Grading/Excavation			
	Drainage/Utilities/Sub-Grade			
	Paving			

Mitigation Options

On-road Fleet Emissions Mitigation		Select "2010 and Newer On-road Vehicles Fleet" option when the on-road heavy-duty truck fleet for the project will be limited to vehicles of model year 2010 or newer Select "20% NOx and 45% Exhaust PM reduction" option if the project will be required to use a lower emitting off-road construction fleet. The SMAQMD Construction Mitigation Calculator can be used to confirm compliance with this mitigation measure (http://www.airquality.org/Businesses/CEQA-Land-Use-Planning/Mitigation). Select "Tier 4 Equipment" option if some or all off-road equipment used for the project meets CARB Tier 4 Standard
Off-road Equipment Emissions Mitigation		

The remaining sections of this sheet contain areas that can be modified by the user, although those modifications are optional.

Note: The program's estimates of construction period phase length can be overridden in cells D50 through D53, and F50 through F53.

Construction Periods	User Override of Construction Months	Program Calculated Months	User Override of Phase Starting Date	Program Default Phase Starting Date
Grubbing/Land Clearing		1.80		1/1/2019
Grading/Excavation		8.10		2/25/2019
Drainage/Utilities/Sub-Grade		5.40		10/30/2019
Paving		2.70		4/12/2020
Totals (Months)		18		

Note: Soil Hauling emission default values can be overridden in cells D61 through D64, and F61 through F64.

Summary

The City of West Sacramento (City), in conjunction with the California Department of Transportation (Caltrans), is proposing to rehabilitate deteriorating pavement and implement safety improvements along portions of West Capitol Avenue and Jefferson Avenue, located north of Interstate 80 (I-80) and Capitol City Freeway (Highway 50), and adjacent to the Yolo Causeway and the Yolo Bypass Wildlife Area.

The West Capitol Avenue Rehabilitation Project (Project) safety improvements include adding separated bike lanes, enhancing the mid-block crossings for pedestrians, and improved lighting. Work would be conducted within City and Caltrans right-of-way and existing fill.

The Biological Study Area (BSA), totaling 63.44 acres (ac), includes portions of West Capitol Avenue and Jefferson Boulevard to the edge of the road right-of-way. The BSA consists almost exclusively of urban developed areas, with small amounts of ruderal/disturbed and landscaped vegetation. No natural communities occur in the BSA. Aquatic features in the BSA include an unnamed canal and several roadside ditches. Topography is flat with an elevation that ranges from approximately 10 to 24 feet above mean sea level. Land uses in the immediate vicinity consist of agriculture and open space to the west, and dense urban residential, light industrial, and industrial uses in all other directions.

The BSA does not contain suitable habitat for any special status plant or wildlife species or critical habitat.

The Project would result in minor permanent impacts to 0.03 ac of potential non-wetland waters of the United States (U.S.). The project will not impact potential seasonal wetlands. Therefore, the Project is likely to require a United States Army Corps of Engineers (ACOE) Nationwide Permit and a Water Quality Certification from the Regional Water Quality Control Board (RWQCB). There are no California Department of Fish and Wildlife (CDFW) waters present in the BSA. Therefore, it is not expected that a Lake or Streambed Alteration Agreement from CDFW will be required.

1 – Introduction

The City, in conjunction with Caltrans, is proposing to rehabilitate deteriorating pavement and implement safety improvements along portions of West Capitol Avenue and Jefferson Avenue, located on the eastern edge of Yolo County. The Project is located north of I-80 and Highway 50 adjacent to the Yolo Causeway and the Yolo Bypass Wildlife Area (Figures 1–3).

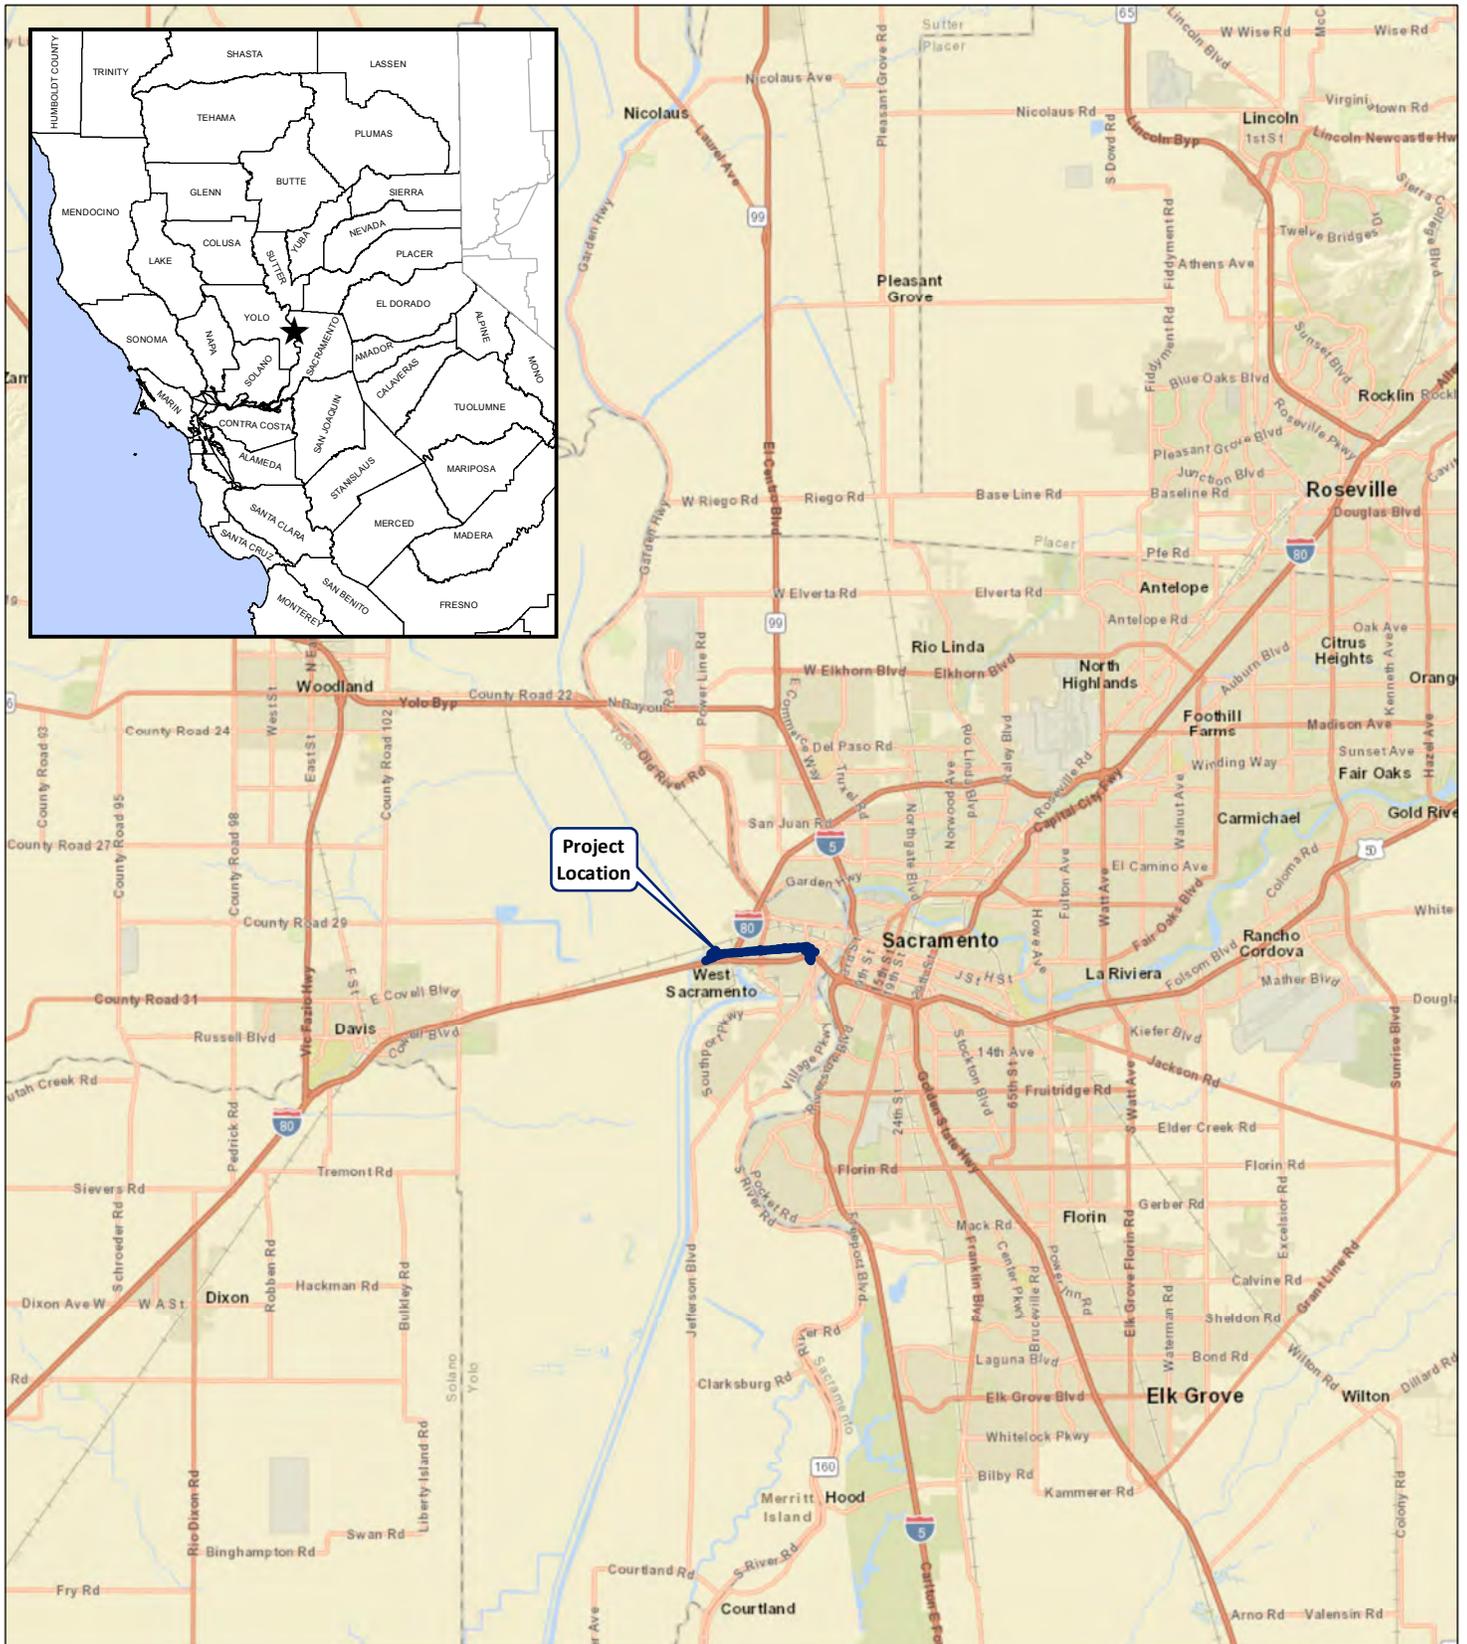

1.1 Project Description

The limits of the proposed Project include West Capitol Avenue between Enterprise Boulevard and Jefferson Boulevard and along Jefferson Boulevard between West Capitol Avenue and Park Boulevard. The City is proposing to rehabilitate the deteriorating pavement along this section of roadway as well as implement safety improvements, including adding separated bike lanes, enhancing the mid-block crossings for pedestrians, and improved lighting. This work would be conducted within existing City and Caltrans right-of-way and existing fill.

Other infrastructure improvements that would be part of the Project include a new water line installation (excavation depth up to 7 feet) at the intersections of West Capitol Avenue and Sutter Street, Houston Street, and Slide Avenue; replacement of an existing 12-inch water line from Jefferson Boulevard to Westacre Road (excavation depth up to 5 feet); installation of a new 12-inch water transmission line from Enterprise Boulevard to Northport Drive (excavation depth up to 7 feet); and fiber optic cabling for traffic signal interconnect along West Capitol Avenue (excavation depth up to 2 feet).

The Project design is shown in Figure 4; design plans are provided in Appendix A.

2 – Study Methods

2.1 Regulatory Requirements

2.1.1 SPECIAL STATUS SPECIES

Special status species include plants and animals that are: 1) listed as rare, threatened, or endangered by United States Fish and Wildlife Service (USFWS) or California Department of Fish and Wildlife (CDFW) under State or federal endangered species acts; 2) are on formal lists as candidates for listing as threatened or endangered; 3) are on formal lists as species of concern; or 4) are otherwise recognized at the State, federal, or local level as sensitive.

2.1.1.1 Federal and California Endangered Species Acts

Under the Federal Endangered Species Act (FESA), it is unlawful to “take any species listed as threatened or endangered”. “Take” is defined as to “harass, harm, pursue, hunt, shoot, wound, kill, trap, capture, or collect, or attempt to engage in any such conduct.” An activity is defined as “take” even if it is unintentional or accidental. Take provisions under FESA apply only to listed fish and wildlife species under the jurisdiction of the USFWS and/or the National Oceanic & Atmospheric Administration, National Marine Fisheries Service (NMFS). Consultation with USFWS or NMFS is required if a project “may affect” a listed species.

When a species is listed, USFWS and/or NMFS, in most cases, must officially designate specific areas as critical habitat for the species. Consultation with USFWS and/or NMFS is required for projects that include a federal action or federal funding if the project may affect designated critical habitat.

Under the California Endangered Species Act (CESA), it is unlawful to “take” any species listed as rare, threatened, or endangered. Under CESA, “take” means to “hunt, pursue, catch, capture, or kill, or attempt to hunt, pursue, catch, capture, or kill”. CESA take provisions apply to fish, wildlife, and plant species. Take may result whenever activities occur in areas that support a listed species. Consultation with CDFW is required if a project will result in “take” of a listed species.

2.1.1.2 Magnuson-Stevens Fishery Conservation and Management Act

Under the Magnuson-Stevens Fishery Conservation and Management Act (MSA), essential fish habitat (EFH) must be designated in every fishery management plan.

EFH includes “...those waters and substrate necessary to fish for spawning, breeding, feeding, or growth to maturity.” The MSA requires consultation with NMFS for projects that include a federal action or federal funding and may adversely modify EFH.

2.1.2 WATERS OF THE UNITED STATES AND OTHER JURISDICTIONAL WATERS

2.1.2.1 Army Corps of Engineers

Under Section 404 of the Clean Water Act (CWA), the ACOE regulates the discharge of dredged or fill material into waters of the U.S. Waters of the U.S. are those waters that have a connection to interstate commerce, either direct via a tributary system or indirect through a nexus identified in the ACOE regulations. In non-tidal waters, the lateral limit of jurisdiction under Section 404 extends to the ordinary high water mark (OHWM) of a waterbody or, where adjacent wetlands are present, beyond the OHWM to the limit of the wetlands. The OHWM is defined as “that line on the shore established by the fluctuations of water and indicated by physical characteristics such as a clear natural line impressed on the bank, shelving, changes in the character of the soil, destruction of terrestrial vegetation, the presence of litter and debris, or other appropriate means that consider the characteristics of the surrounding area” (33 Code of Federal Regulations 328.3). In tidal waters, the lateral limit of jurisdiction extends to the high tide line or, where adjacent wetlands are present, to the limit of the wetlands.

Wetlands

Wetlands are defined as “those areas that are inundated or saturated by surface or ground water at a frequency and duration sufficient to support, and that under normal circumstances do support, a prevalence of vegetation typically adapted for a life in saturated soil conditions”.

Non-wetland Waters

Non-wetland waters essentially include any body of water, not otherwise exempted, that displays an OHWM.

2.1.2.2 Regional Water Quality Control Board

Under Section 401 of the CWA, the State Water Resources Control Board must certify all activities requiring a 404 permit. The Regional Water Quality Control Board (RWQCB) regulates these activities and issues water quality certifications for those activities requiring a 404 permit. In addition, the RWQCB has authority to regulate the discharge of “waste” into waters of the State pursuant to the Porter-Cologne Water Quality Control Act.

2.1.2.3 California Department of Fish and Wildlife

CDFW, through provisions of Section 1602 of the California Fish and Game Code (CFGC), is empowered to issue agreements for any alteration of a river, stream, or lake

where fish or wildlife resources may be substantially adversely affected. Streams (and rivers) are defined by the presence of a channel bed and banks, and at least an ephemeral or intermittent flow of water. CDFW regulates wetland areas only to the extent that those wetlands are part of a river, stream, or lake as defined by CDFW.

CDFW generally includes, within the jurisdictional limits of streams and lakes, any riparian habitat present. Riparian habitat includes willows, cottonwoods, and other vegetation typically associated with the banks of a stream or lake shoreline. In most situations, wetlands associated with a stream or lake would fall within the limits of riparian habitat. Thus, defining the limits of CDFW jurisdiction based on riparian habitat will automatically include any wetland areas. Riparian communities may not fall under ACOE jurisdiction unless they are below the OHWM or classified as wetlands.

2.1.2.4 Executive Order 11990: Protection of Wetlands

Executive Order (EO) 11990 mandates leadership on the part of federal agencies to reduce loss and degradation of wetlands and to preserve and enhance the beneficial values and functions of wetlands. Each federal agency “shall avoid undertaking or providing assistance for new construction located in wetlands unless the head of the agency finds that: (1) there is no practicable alternative to such construction, and (2) that the proposed action includes all practicable measures to minimize harm to wetlands which may result from such use”.

2.1.3 MIGRATORY BIRD TREATY ACT

The Migratory Bird Treaty Act (MBTA) prohibits actions that will result in “take” of migratory birds, their eggs, feathers, or nests. “Take” is defined in the MBTA as any means or any manner to hunt, pursue, wound, kill, possess, or transport, any migratory bird, nest, egg, or part thereof.

Migratory birds are also protected, as defined in the MBTA, under Section 3513 of the CFGC.

2.1.4 CALIFORNIA FISH AND GAME CODE (BREEDING BIRDS)

Section 3503 of the CFGC prohibits the take, possession, or needless destruction of the nest or eggs of any bird, except as otherwise provided by the CFGC or other regulation.

2.1.5 EXECUTIVE ORDER 13112: INVASIVE SPECIES

Under EO 13112, an invasive species is defined as “an alien species (a species not native to a particular ecosystem) whose introduction does or is likely to cause economic and environmental harm or harm to human health”. Invasive species are determined by the Invasive Species Council.

In addition to other mandates, EO 13112 mandates federal agencies whose actions may affect the status of invasive species to “not authorize, fund, or carry out actions that it believes are likely to cause or promote the introduction or spread of invasive species”.

2.1.6 EXECUTIVE ORDER 11988: FLOODPLAIN MANAGEMENT

EO 11989 mandates leadership on the part of federal agencies to minimize the adverse impacts associated with the occupancy and modification of floodplains and to avoid direct and indirect support of floodplain development wherever there is a practicable alternative.

Each agency shall provide leadership and shall take action to reduce the risk of flood loss, to minimize the impact of floods on human safety, health and welfare, and to restore and preserve the natural and beneficial values served by floodplains in carrying out its responsibilities for (1) acquiring, managing, and disposing of federal lands, and facilities; (2) providing federally undertaken, financed, or assisted construction and improvements; and (3) conducting federal activities and programs affecting land use, including, but not limited to, water and related land resources planning, regulating, and licensing activities.

2.1.7 CITY OF WEST SACRAMENTO ORDINANCE 04-01, TREE PRESERVATION (MUNICIPAL CODE SECTION 2.18)

The City of West Sacramento Ordinance 04-01 related to Tree Preservation (Code of Ordinances Section 2.18) states:

- Any person seeking to perform any activity on a Landmark, Heritage or Street Tree shall contact the Tree Administrator to discuss the proposed activity, and, if deemed necessary, the Tree Administrator will inspect the site of the proposed activity. After initial consultation between the applicant and the Tree Administrator, the Tree Administrator shall confirm whether or not a permit is required. If it is determined that a permit is required, the applicant shall apply for a permit. The application shall be signed by the property owner or his/her authorized agent. (8.24.080)
- If a permit is granted to remove the tree(s), a copy of the tree permit shall be posted in a conspicuous location on the property near the tree during the removal of the tree. The tree contractor removing the tree(s) shall provide the Tree Administrator proof of current liability insurance prior to final issuance of the tree permit. (8.24.080)
- Heritage or Landmark Trees. When the Tree Administrator has granted a Tree Permit to remove a Heritage or Landmark Tree, said permit shall require the applicant to replace the tree with a living tree on the property or within the City of West Sacramento in a location approved by the Tree Administrator. Said location will

be specified in the tree permit. The property owner will replace the tree and continue to replace the replacement tree if the tree dies any time within three years of the initial planting. Replacement shall not be required if a tree is in need of removal solely because it poses a risk to persons or property or if the tree acts as a host for a plant that is parasitic.

Replacement trees will be planted at the rate of one (1) inch diameter of replacement plant for every one (1) inch diameter of tree removed. Replacement trees may be a combination of fifteen (15) gallon size trees, which are the equivalent of a 1 inch diameter tree or 24 inch box trees which are the equivalent of a 3 inch diameter tree.

If the property owner is unable to replace the tree on his/her property or within an area approved by the Tree Administrator, the Tree Administrator shall require the property owner to pay an in lieu fee to the City. An in lieu fee payment shall not be required if the tree is in need of removal solely because it poses a risk to persons or property or if the tree acts as a host for a plant that is parasitic. Such fees shall be set by City Council resolution and be used for the purpose of purchasing and planting trees elsewhere in the City of West Sacramento. (8.24.084)

- Street Trees. When the Tree Administrator has granted a Tree Permit to remove a Street Tree, said permit shall require the permittee to replace the tree. The permittee shall provide the replacement tree of a size and species pursuant to the City of West Sacramento Landscape Development Guidelines and plant said tree in the location specified by the Tree Administrator in the tree permit. The minimum replacement tree size should be at least 15 gallons and shall be planted in accordance with the guidelines set forth in the West Sacramento Landscape Development Guidelines. In the event a Street Tree also meets the definition of a Heritage or Landmark Tree then the replacement guidelines shall be those specified for Heritage and Landmark Trees.

2.2 Studies Required

Prior to conducting any field studies, the limits of the BSA were established, totaling approximately 63.44 ac, including portions of West Capitol Avenue and Jefferson Boulevard to the edge of the road right-of-way. The BSA consists of the Project footprint and temporary access and staging areas (Figure 4).

The studies required to fully document the environmental conditions of the BSA included a general biological survey, habitat mapping, preliminary jurisdictional delineation, and tree inventory.

2.2.1 LITERATURE REVIEW

A list of sensitive wildlife and plant species potentially occurring within the BSA and vicinity was compiled to evaluate potential impacts resulting from Project construction. Sources used to compile the list include the California Natural Diversity Data Base (CNDDDB) (CDFW 2018), the USFWS Information for Planning and Conservation Trust Resources (USFWS 2018), the California Native Plant Society Online Inventory (CNPS 2018), and the NMFS Google Earth Species list (NMFS 2018). Records were reviewed for the Sacramento West United States Geological Survey 7.5-minute quadrangle. All species lists are included in Appendix B.

The special status species lists obtained from the CNDDDB, USFWS, CNPS, and NMFS were reviewed to determine which species could potentially occur within the vicinity of the BSA. The determination of whether a species could potentially occur within the BSA was based on the availability of suitable habitat within and adjacent to the BSA, as well as known occurrences of the species in or adjacent to the BSA according to the CNDDDB.

Those species that could potentially occur in the BSA based on habitat suitability or on known occurrences in or within the vicinity of the BSA are discussed in Sections 4.2 and 4.3, as applicable. The cumulative list (shown in Table 2, Section 3.2) includes numerous species representing a variety of habitat types. The list includes each species' protection status, habitat information, status in the BSA, and supporting comments as necessary.

2.2.2 FIELD SURVEYS

2.2.2.1 General Biological Survey/ Vegetation Mapping

A general biological survey of the BSA was conducted by LSA biologist Anna Van Zuuk on June 26, 2018. Ms. Van Zuuk surveyed the BSA on foot and via windshield surveys from existing roadways. Vegetation in the BSA was classified according to A Manual of California Vegetation, Second Edition (Sawyer, Keeler-Wolf, and Evans 2008), as appropriate. Managed, disturbed, or developed areas were classified according to their dominant plant species. The names of the plant species are consistent with The Jepson Manual: Vascular Plants of California, Second Edition (Baldwin, B. G., et. al., editors 2012).

2.2.2.2 Potential Jurisdictional Waters Determination

A delineation of waters of the U.S. potentially subject to regulation by the ACOE was conducted June 26, 2018, by Ms. Van Zuuk.

All potential waters of the U.S. in the BSA were delineated in accordance with the 1987 ACOE Wetlands Delineation Manual, the September 2008 Regional Supplement – Arid

West Region, and the ACOE Regulatory Guidance Letter 08-02 regarding Preliminary Jurisdictional Delineations (June 2008). Three formal observation points were described in the field. At each point, a pit was dug and soils and hydrology examined; vegetation was also characterized at each data point.

Potential waters of the U.S. were located in the field using a GPS unit with submeter accuracy. All data was entered into a GIS database to calculate the extent of potential waters of the U.S. in the BSA. Wetland data forms are provided in Appendix C.

2.2.2.3 Tree Inventory

An inventory of trees that may be impacted by Project implementation was conducted by Ms. Van Zuuk on June 26, 2018. Data was collected on species, diameter at breast height, and any notable characteristics. The results of the tree survey are included in Appendix D.

2.3 Agency Coordination and Professional Contacts

No agency coordination has occurred for this Project.

2.4 Limitations That May Influence Results

No problems or limitations were encountered during the research, fieldwork, or document preparation that influenced the results presented herein.

This page intentionally left blank

3 – Results: Environmental Setting

3.1 Description of the Existing Biological and Physical Conditions

3.1.1 BIOLOGICAL STUDY AREA

The Biological Study Area (BSA), totaling approximately 63.44 ac, extends along West Capitol Avenue between Enterprise Boulevard and Jefferson Boulevard and along Jefferson Boulevard between West Capitol Avenue and Park Boulevard in the City of West Sacramento. The BSA includes the existing road, infrastructure, and additional lands up to the edge of the right-of-way. The BSA is located north of the Sacramento River Deep Water Ship Channel and east of the Yolo Bypass Wildlife Area.

3.1.2 PHYSICAL CONDITIONS

The BSA is centered on West Capitol Avenue and consists almost exclusively of urban developed areas, with small amounts of ruderal/disturbed and landscaped vegetation. No natural communities occur in the BSA. Aquatic features in the BSA include an unnamed canal and several ephemeral drainage ditches. Topography is flat with an elevation that ranges from approximately 10 to 24 feet above mean sea level.

Land uses in the immediate vicinity consist of agriculture and open space to the west, and dense urban residential, light industrial, and industrial uses in all other directions.

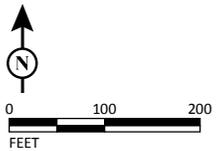

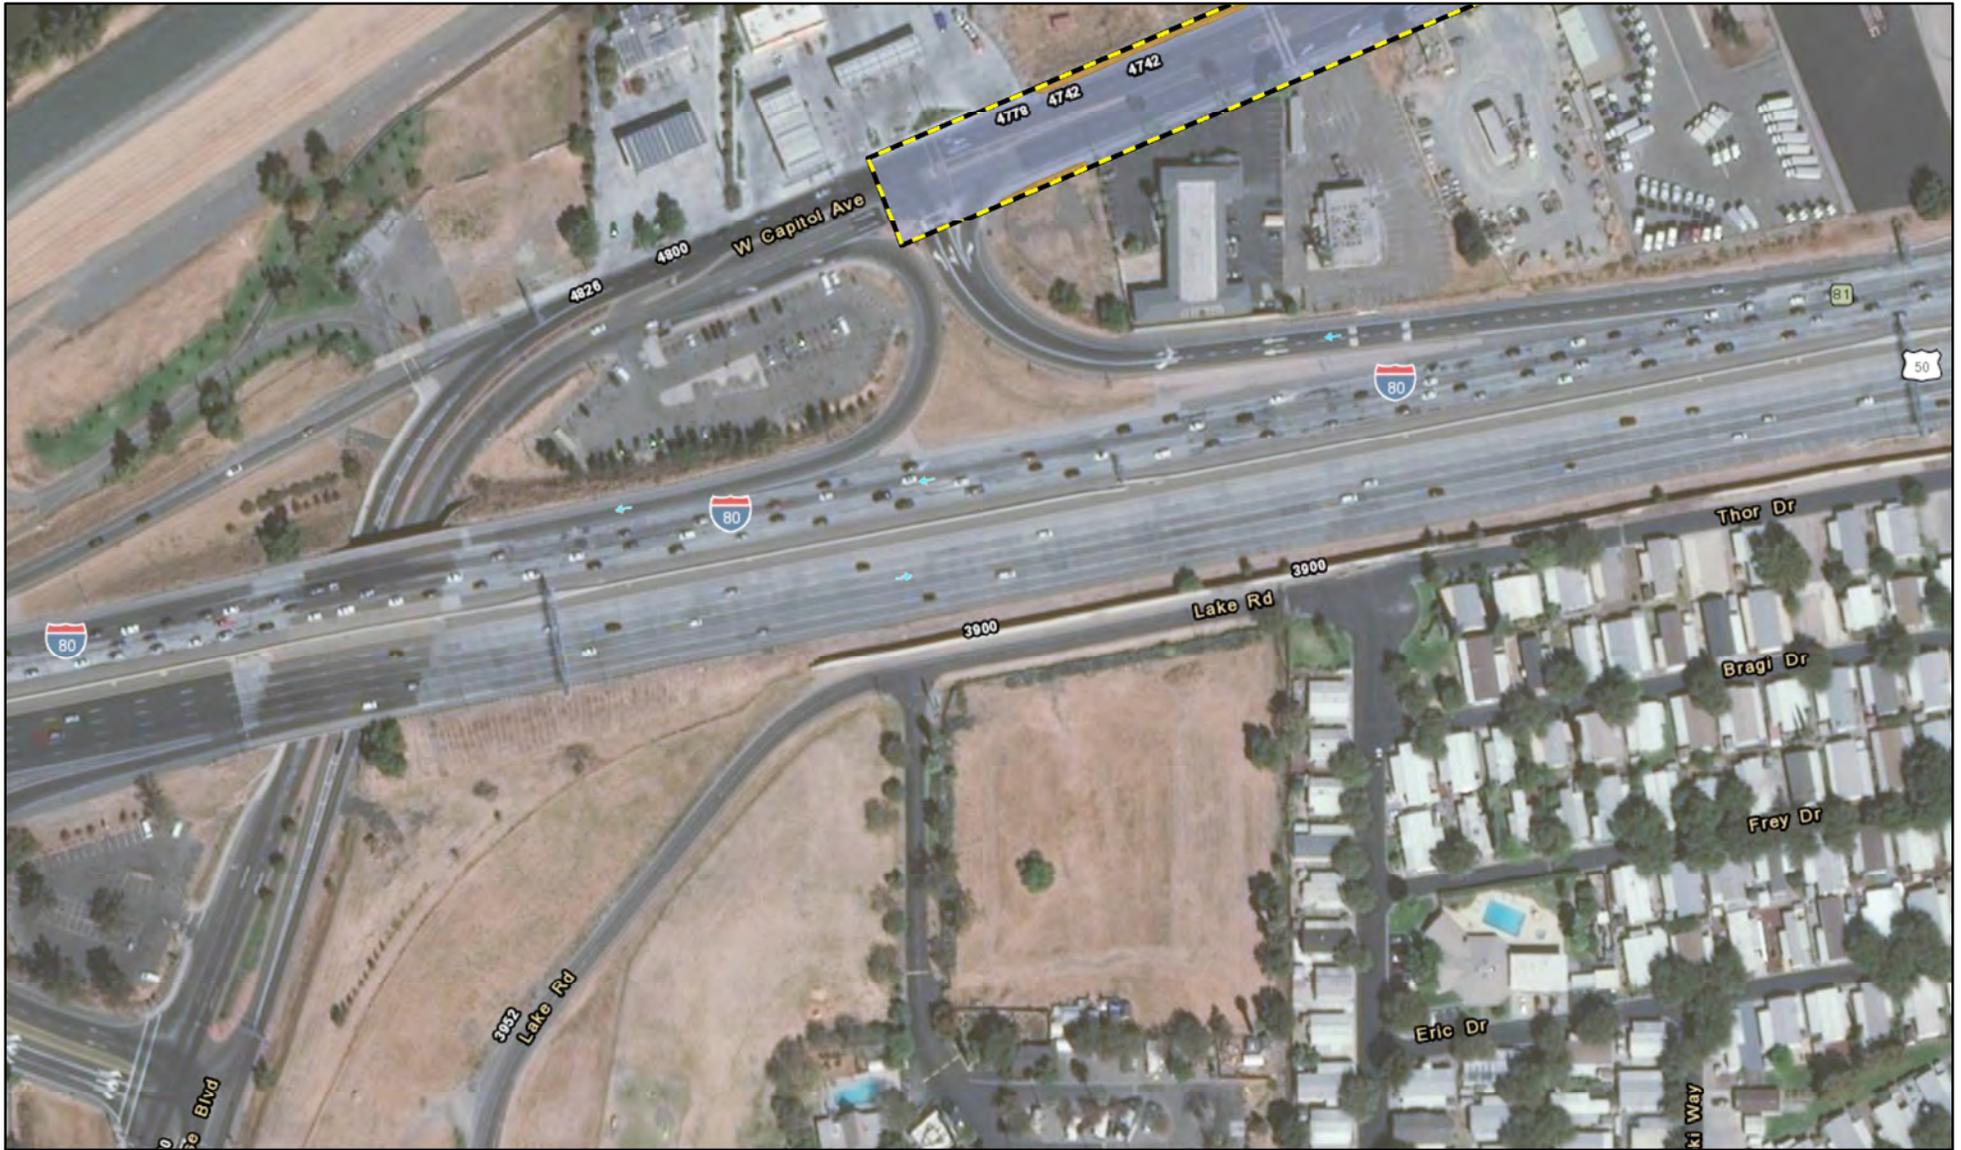

Representative photos of the BSA are shown in Appendix E.

3.1.3 BIOLOGICAL CONDITIONS IN THE BIOLOGICAL STUDY AREA

3.1.3.1 Vegetation Communities and Land Uses

As noted above, vegetation communities were classified based on the descriptions in Sawyer, Keeler-Wolf, and Evans (2008), as applicable. No natural communities occur within the BSA; other habitat types in the BSA include ruderal/disturbed, landscaped, and developed. Habitat types in the BSA are shown in Figure 5 and summarized in Table 1.

Table 1: Habitat Types in the BSA

Habitat Types	Acres
Ruderal/Disturbed	1.64
Landscaped	0.60
Developed	61.20
Total	63.44

Ruderal/Disturbed

The ruderal/disturbed community, because it has been subject to regular disturbance, includes a large component of ruderal species. The vegetation that grows in these areas typically consists of species that are able to quickly colonize following disturbance and can grow in poor soil conditions. In the BSA, ruderal/disturbed areas total 1.64 ac and occur adjacent to portions of West Capitol Avenue and Jefferson Boulevard. Dominant plant species include: wild oat (*Avena fatua*), ripgut brome (*Bromus diandrus*), black mustard (*Brassica nigra*), Italian thistle (*Carduus pycnocephalus*), and yellow star thistle (*Centaurea solstitialis*); spotted spurge (*Euphorbia maculata*), prostrate knotweed (*Polygonum aviculare*), prickly lettuce (*Lactuca serriola*), Italian ryegrass (*Festuca perennis*), foxtail barley (*Hordeum murinum*), and perennial pepperweed (*Lepidium latifolium*) are also present.

Landscaped

Landscaping, totaling approximately 0.60 ac, is located adjacent to portions of West Capitol Avenue and Jefferson Boulevard. Plants associated with this community are introduced and intensely managed by the City and adjacent land owners. Species present include: lily of the Nile (*Agapanthus africanus*), white birch (*Betula papyrifera*), beach she-oak (*Casuarina equisetifolia*), Chinese hackberry (*Celtis sinensis*), common fig (*Ficus carica*), English ivy (*Hedera helix*), jasmine (*Jasminum* sp.), goldenrain tree (*Koelreuteria paniculata*), crepe myrtle (*Lagerstroemia indica*), privet (*Ligustrum* sp.), sweet gum (*Liquidambar styraciflua*), heavenly bamboo (*Nandina domestica*), oleander (*Nerium oleander*), olive (*Olea europaea*), Chinese pistache (*Pistacia chinensis*), London plane tree (*Plantanus x acerifolia*), peach (*Prunus persica*), pomegranate (*Punica granatum*), Indian hawthorn (*Rhaphiolepis indica*), rose (*Rosa* sp.), chaparral sage (*Salvia clevelandii*), coast redwood (*Sequoia sempervirens*), Chinese tallow tree (*Triadica sebifera*), and Mexican fan palm (*Washingtonia robusta*).

Developed

The developed areas in the BSA, totaling approximately 61.20 ac, consist of the existing roadways and adjacent parking lots and buildings.

3.1.3.2 Description of Common Animal Species

The sections below discuss animal species observed and/or likely to occur within the BSA.

Mammals

Mammals observed during the June 2018 survey include California myotis (*Myotis californicus*). Other common species which may occur in the BSA include raccoon (*Procyon lotor*), striped skunk (*Mephitis mephitis*), and opossum (*Didelphis virginiana*).

Birds

Bird species observed during the June 2018 survey include: western scrub jay (*Aphelocoma californica*), American crow (*Corvus brachyrhynchos*), Brewer's blackbird (*Euphagus cyanocephalus*), chicken (*Gallus domesticus*), house finch (*Haemorhous mexicanus*), and northern mockingbird (*Mimus polyglottos*). These species were either observed overhead or within trees located directly in or adjacent to the BSA. Other common bird species expected to occur in the BSA include: band-tailed pigeon (*Columba fasciata*), rock pigeon (*Columba livia*), western bluebird (*Sialia mexicana*), European starling (*Sturnus vulgaris*), and mourning dove (*Zenaida macroura*).

Amphibians and Reptiles

Amphibians observed during the June 2018 survey include the American bullfrog (*Lithobates catesbeianus*). Other amphibian species which may occur in the BSA include Sierran tree frog (*Pseudacris sierra*) and Western toad (*Anaxyrus boreas*).

No reptile species were observed during the June 2018 survey. Reptile species which may occur in the BSA include western fence lizard (*Sceloporus occidentalis*), western terrestrial garter snake (*Thamnophis elegans elegans*), and common gopher snake (*Pituophis catenifer*).

3.1.3.3 Migration Corridors

Wildlife movement corridors are linear habitats that function to connect two or more areas of significant wildlife habitat. These corridors may function on a local level as links between small habitat patches (e.g., streams in urban settings) or may provide critical connections between regionally significant habitats (e.g., deer movement corridors). Wildlife corridors typically include vegetation and topography that facilitate the movements of wild animals from one area of suitable habitat to another in order to fulfill foraging, breeding, and territorial needs. These corridors often provide cover and protection from predators that may be lacking in surrounding habitats. Wildlife corridors generally include riparian zones and similar linear expanses of contiguous habitat.

The BSA is almost completely surrounded by highly developed urban areas, which likely impede significant wildlife movement. No significant migration corridors exist within the BSA. The Sacramento River corridor, located approximately 0.5 mile to the east, and the Yolo Bypass Wildlife Area with connectivity to surrounding agricultural lands, located approximately 0.5 mile to the west, are the best examples of migrations corridors in the vicinity of the BSA.

3.1.3.4 Aquatic Resources

Aquatic resources within the BSA consist of interconnected roadside ditches located both east and west of I-80 adjacent to West Capitol Avenue, totaling 0.11 ac. Runoff from West Capitol Avenue is collected in these roadside ditches which parallel the roadway on both shoulders in areas without existing sidewalks, and convey ephemeral flows during storm events. These areas are partially culverted to pass underneath existing business entrances. Vegetation within the ditches is maintained by mowing and herbicide applications. Ditches located east of I-80 appear to flow east, and likely have connectivity to the West Sacramento storm water collection system. Ditches located west of I-80 generally flow east into another unnamed canal. This unnamed canal is entirely culverted underneath West Capitol Avenue within the BSA. The unnamed canal conveys water year-round, which is pumped from Toe Drain/Prospect Slough and flows generally south through the BSA into a residential lake associated with the Valhalla Mobile Home Club and the Sacramento West RV Parks and Campground. Water from this unnamed lake then flows back into Toe Drain/Prospect Slough. Aquatic resources in the BSA are shown in Figure 6.

Potential wetlands in the BSA are limited to a 60-foot stretch of ditch between the driveways of the Clean Energy fueling depot, totaling 0.01 ac. Vegetation within this area is dominated by broad-leaved cattail (*Typha latifolia*), a hydrophytic species. Soils within the ditch are problematic and highly disturbed, as the ditch has been lined with medium rock cobble. As a result this criterion was not used in making the wetland determination. Hydrology indicators identified included water marks, drift deposits (non-riverine), and water-stained leaves, which are primary indicators for hydrology and thus meet the minimum ACOE hydrology criterion for wetlands.

Indicators used to determine the limits of the OHWM of each feature included water marks, vegetative drift deposits, general topography of the area, and review of aerial imagery. Areas within the OHWM that were determined not to be wetlands were classified as non-wetland waters, totaling 0.10 ac.

Aquatic resources within the BSA are expected to be under the jurisdiction of the RWQCB and ACOE. There are no CDFW waters present in the BSA.

3.1.3.5 Invasive Species

Many non-native species have been part of the California landscape for the past 150 years. The BSA supports a number of noxious weed species including: wild oat, black mustard, ripgut brome, Italian thistle, Bermuda grass (*Cynodon dactylon*), whitetop (*Lepidium draba*), orchard grass (*Dactylis glomerata*), Russian thistle (*Salsola tragus*), milk thistle (*Silybum marianum*), and puncture vine (*Tribulus terrestris*). While most of these species are classified as moderately invasive by the California Invasive Plant Council, five seriously invasive species—foxtail brome (*Bromus madritensis*), yellow star thistle, English ivy, perennial pepperweed, and Himalayan blackberry (*Rubus armeniacus*)—were observed in the BSA.

3.2 Regional Species and Habitats of Concern

Table 2 provides a list of special status species that could potentially occur in the region, and therefore in the BSA. This list was compiled as described in Section 2.2.1. A review was conducted of the specific habitats required by each species listed in Table 2, and the specific habitats and habitat conditions present in the BSA. Based on this evaluation, it was determined whether the species listed in Table 2 had potential to occur in the BSA. Special status species that were observed, or determined to potentially occur in the BSA based on availability of suitable habitat or other factors such as plucking posts, scat, nests, dens, etc., are discussed more fully in Sections 4.2 and 4.3 of this report, as applicable. Species determined unlikely to occur in the BSA based on these same factors are documented accordingly in the table and not discussed further in this report.

Additional species which appear in the CNDDDB records searches, but are not included in Table 2, include the Antioch multilid wasp (*Myrmosula pacifica*). No information regarding occurrences and habitat requirements are available for this species, and it is therefore not discussed further in this report.

This page intentionally left blank

Table 2: Special Status Species and Natural Communities of Special Concern Potentially Occurring in the BSA

Scientific Name	Common Name	Status	Habitat Requirements	Habitat Present/ Absent	Rationale
Mammals					
<i>Antrozous pallidus</i>	Pallid bat	SSC	Found in variety of habitats, including grassland, chaparral, woodland, and forest. Most common in open, dry habitats with rocky areas for roosting. Roosts in caves, crevices, mines, hollow trees, buildings. Very sensitive to disturbance of roosting sites.	A	Suitable habitat is not present in the BSA; there are no rocky areas for roosting and the area is frequently disturbed by humans. This species may occasionally fly over the BSA.
<i>Lasionycteris noctivagans</i>	Silver-haired bat	CA SA	Found in coastal and montane forests from the Oregon border south to San Francisco Bay and along the Sierra Nevada and Great Basin region to Inyo county. Roosts in hollow trees, snags, buildings, rock crevices, caves, and under bark. Primarily a forest dweller, feeding over streams, ponds, and open brushy areas.	A	Suitable habitat is not present in the BSA; the BSA does not contain forested areas or suitable roosting areas.
<i>Lasiurus cinereus</i>	Hoary bat	CA SA	Found in open habitats or habitat mosaics, with access to trees for cover and open areas or habitat edges for feeding. Roosts in dense foliage of medium to large trees. Requires water.	A	Suitable habitat is not present in the BSA; tree canopy is not dense enough to support roosting and no open areas present within the BSA.
<i>Taxidea taxus</i>	American badger	SSC	Requires dry, friable soils in a variety of herbaceous, shrub, and open habitats for creating burrows. Feeds on fossorial rodents.	A	The BSA does not contain friable soils or a suitable prey base.
Birds					
<i>Accipiter cooperii</i>	Cooper's hawk	SWL	Nests and forages in patchy wooded areas woodlands. Nests in dense stands of trees with moderate crown-depths, usually near streams.	A	Suitable patchy woodland habitats are not present in the BSA.

Scientific Name	Common Name	Status	Habitat Requirements	Habitat Present/ Absent	Rationale
<i>Agelaius tricolor</i>	Tricolored blackbird	ST	Nests in freshwater marshes with tules or cattails, or in other dense thorny vegetation such as thistle, blackberry thickets, etc. in close proximity to open water.	A	No suitable habitat is present in the BSA for this species. Marginally suitable habitat is present adjacent to the BSA in an unnamed canal. However, this habitat is located in a heavily developed commercial/industrial area with no adjacent foraging habitat. Additionally, Brewer's blackbirds were observed nesting in this area, which is a deterrent for tricolored blackbirds nesting. Therefore, this species is not expected to occur in or adjacent to the BSA.
<i>Ammodramus savannarum</i>	Grasshopper sparrow	SSC	Found in open grasslands and prairies with patches of bare ground. Tends to be found in areas with shrub cover and more vegetation.	A	Suitable open grasslands and prairies are not present in the BSA.
<i>Ardea alba</i>	Great egret	CA SA (rookery only)	Found in both fresh and saltwater habitats, this species wades in shallow water to hunt fish, frogs and other small aquatic animals.	A	No rookeries or suitable aquatic habitats are present within the BSA.
<i>Ardea herodias</i>	Great blue heron	CA SA (rookery only)	Usually nests in trees, but also on large bushes, poles, reedbeds, and even on the ground. Frequents a wide range of wetland habitats at other times of year.	A	No rookeries or suitable aquatic habitats are present within the BSA.
<i>Athene cunicularia</i>	Western burrowing owl	SSC	Burrow sites in open, dry annual or perennial grasslands, deserts, and scrublands characterized by low-growing vegetation. Subterranean nester, dependent upon burrowing mammals, most notably, California ground squirrel.	A	Suitable habitat is not present in the BSA; the BSA does not contain grasslands, deserts, or scrublands. Additionally, no burrows or burrowing mammals were observed during field surveys.

Scientific Name	Common Name	Status	Habitat Requirements	Habitat Present/ Absent	Rationale
<i>Buteo regalis</i>	Ferruginous hawk	SWL	Winters in open grasslands, sagebrush flats, desert scrub, low foothills, and fringes of pinyon-juniper habitats. Mostly eats lagomorphs, ground squirrels, and mice. Population trends may follow lagomorph population cycles.	A	Suitable habitat is not present in the BSA; the BSA does not contain open grasslands, sagebrush flats, desert scrub, or low foothills. Additionally, no prey items or sign were observed during field surveys.
<i>Buteo swainsoni</i>	Swainson's hawk	ST	Breeds in stands with few trees in juniper-sage flats, riparian areas, and oak savannahs. Requires adjacent suitable foraging areas such as grasslands, or alfalfa or grain fields supporting rodent populations.	A	Suitable habitat is not present in the BSA; the BSA does not contain open or riparian areas suitable for foraging, or sufficiently large trees for nesting. No individuals or nests were observed during field surveys.
<i>Charadrius alexandrinus nivosus</i>	Western snowy plover	FT; SSC	Federal listing applies only to the Pacific coastal population. Found on sandy beaches, salt pond levees, and shores of alkali lakes. Require sandy, gravelly, or friable soils for nesting.	A	Suitable habitat is not present in the BSA; there are no beaches, salt ponds, or alkali lakes in the BSA.
<i>Charadrius montanus</i>	Mountain plover	SSC	Winter resident from September through March in the Central Valley from Sutter and Yuba counties south. Found in short grasslands and plowed fields with little vegetation. Does not nest in California.	A	Suitable wintering foraging habitat is not present in the BSA; the BSA does not contain grasslands or plowed fields.
<i>Coccyzus americanus occidentalis</i>	Western yellow-billed cuckoo	FT; SE	Mature cottonwood riparian forests with dense understory of willows, blackberry brambles, and grapevines.	A	No suitable habitat present. The BSA does not contain mature cottonwood riparian forests.
<i>Egretta thula</i>	Snowy egret	CA SA (rookery only)	Found along the shores of coastal estuaries, fresh and saline emergent wetlands, ponds, slow-moving rivers, irrigation ditches, and wet fields. Feeds in shallow waters and nests in dense marshes or low trees on stick nests.	A	No rookeries or suitable aquatic habitats are present within the BSA.

Scientific Name	Common Name	Status	Habitat Requirements	Habitat Present/ Absent	Rationale
<i>Elanus leucurus</i>	White-tailed kite	SFP	Nests in foothill and valley oak savannas, river bottomlands, and deciduous woodlands adjacent to marshes. Forages in open grasslands, meadows, marshes, and some grassy roadsides.	A	Suitable habitat is not present in the BSA; the BSA does not contain foothill or valley oak savanna, river bottomlands, or deciduous woodlands.
<i>Falco columbarius</i>	Merlin	SWL	Nests in Alaska, Canada, the northern Rockies and the far northern tier of the Lower 48 states. During migration and on wintering grounds prefers open woodlands, savannas, edges of grasslands, farms and ranches. Clumps of trees or windbreaks are required for roosting in open country.	A	Suitable habitat is not present in the BSA; no woodlands, savannas, grasslands, or agricultural areas are present within the BSA.
<i>Laterallus jamaicensis coturniculus</i>	California black rail	ST; FP	Requires shallow water in salt marshes, freshwater marshes, wet meadows, or flooded grassy vegetation. Prefers areas of moist soil vegetated by fine-stemmed emergent plants, rushes, grasses, or sedges, with scattered small pools. Known from coastal California, northwestern Baja California, the lower Imperial Valley, and the lower Colorado River of Arizona and California. Now extirpated from virtually all of coastal Southern California.	A	Suitable habitat is not present in the BSA due to the lack of marshes, wet meadows, and flooded grassy vegetation.
<i>Melospiza melodia</i>	Song sparrow ("Modesto population")	SSC	Nest in freshwater marshes with emergent vegetation, willow stands, and riparian oak woodlands with understory of dense thorny vegetation such as blackberry brambles.	A	Suitable habitat is not present in the BSA; the BSA does not contain freshwater marshes, riparian oak woodlands, or stands of dense thorny vegetation.

Scientific Name	Common Name	Status	Habitat Requirements	Habitat Present/ Absent	Rationale
<i>Nycticorax</i>	Black-crowned night heron	CA SA	Feeds along the margins of lacustrine, large riverine, and fresh and saline emergent habitats throughout California. Nests in dense-foliaged trees, usually near aquatic or emergent feeding areas.	A	Suitable habitat is not present in the BSA; no lacustrine, large riverine, or fresh or saline emergent habitats occur within the BSA. Additionally, the BSA does not contain dense-foliaged trees near aquatic areas.
<i>Phalacrocorax auritus</i>	Double-crested cormorant	SWL	Yearlong resident of the California coast and on inland lakes in fresh, salt, or estuarine marshes. Feeds primarily on fish by diving from the water surface up to 30 feet deep. Require undisturbed nest sites adjacent to water, utilizing rock ledges on cliffs, rugged slopes, and tall trees.	A	Suitable habitat is not present in the BSA; the BSA does not contain waters of sufficient depth to support feeding habits or suitable nesting substrates.
<i>Plegadis chihi</i>	White-faced ibis	SWL	Uncommon migrant in the Central Valley. Forages in fresh emergent wetland, shallow lacustrine waters, muddy ground of wet meadows, and irrigated or flooded pastures and croplands. Roosts and nests in extensive marshes amidst dense freshwater emergent vegetation.	A	Suitable habitat is not present in the BSA; the BSA does not contain shallow waters preferred by this species.
<i>Progne subis</i>	Purple martin	SSC	Frequents old-growth, multi-layered, open forest and woodland habitats with snags during the breeding season. Typically nests in old woodpecker cavities, occasionally in human-made structures. Forages near water in riparian areas, forests, and woodlands.	A	Suitable habitat is not present in the BSA; the BSA does not contain snags suitable for nesting or open forest or woodland habitats.
<i>Riparia</i>	Bank swallow	ST	Lives in low areas along river, streams, and coasts. Habitat includes vertical cliffs or banks. This species exclusively eats flying or jumping insects.	A	Suitable habitat is not present in the BSA; the BSA does not contain vertical cliffs or banks.

Scientific Name	Common Name	Status	Habitat Requirements	Habitat Present/ Absent	Rationale
<i>Vireo bellii pusillus</i>	Least Bell's vireo	FE; SE	Riparian woodland and dry river bottoms with willow or mesquite component.	A	Suitable habitat is not present in the BSA; the BSA does not contain riparian woodlands or dry river bottom habitat.
<i>Xanthocephalus</i>	Yellow-headed blackbird	SSC	Nests in fresh marshes with dense emergent vegetation (cattails, bulrushes, and reeds).	A	Suitable habitat is not present in the BSA; the unnamed ditch within the BSA does not support suitably dense stands of freshwater emergent vegetation. Additionally, no individuals of this species were observed during field surveys.
Reptiles					
<i>Emys marmorata</i>	Western pond turtle	CSC	Occurs in permanent or nearly permanent water sources, ponds, marshes, rivers, streams and irrigation ditches with emergent vegetation and basking sites. Lay eggs in upland habitat consisting of sandy banks or grassy, open fields.	A	Suitable habitat is not present in the BSA; the unnamed canal is culverted within the BSA and no suitable upland habitat occurs within the BSA. Additionally, no individuals were observed during field surveys.
<i>Thamnophis gigas</i>	Giant garter snake	FT, ST	Streams and sloughs, usually with mud bottom. One of the most aquatic of garter snakes; usually in areas of freshwater marsh and low-gradient streams with emergent vegetation, also drainage canals, irrigation ditches, ponds, and small lakes. Higher elevation uplands are required for cover and refuge.	A	Suitable habitat is not present in the BSA; the unnamed ditch is culverted within the BSA and no adjacent uplands are present.

Scientific Name	Common Name	Status	Habitat Requirements	Habitat Present/ Absent	Rationale
Fish					
<i>Archoplites interruptus</i>	Sacramento perch	SSC	Natural populations occur in Clear lake and Alameda Creek/Calaveras Reservoir, but other populations have been introduced in the upper Klamath basin, upper Pit River, Walker River, Mono Lake, and Owens River. Most often found in warm reservoirs and ponds with summer temperatures between 18 – 28 degrees C. Spawn from March through early August in shallow areas with abundant filamentous algae and macrophytes.	A	Suitable spawning habitat is not present in the BSA; the unnamed ditch present in the BSA does not provide appropriate aquatic conditions required for this species.
<i>Oncorhynchus mykiss irideus pop. 11</i>	Steelhead - Central Valley DPS	FT	Population occurs and spawns in the Sacramento and San Joaquin rivers and their tributaries. This distinct population segment is known to occur in the Butte Sink Wildlife Management Area, North Central Valley Wildlife Management Area, Sacramento River National Wildlife Refuge, and Sutter National Wildlife Refuge.	A	Suitable habitat is not present in the BSA; water in the unnamed ditch originates from Toe Drain/ Prospect Slough through a pump house and presents an impassable barrier to fish. Additionally, the unnamed ditch is culverted through the entirety of the BSA.
<i>Oncorhynchus tshawytscha pop. 6</i>	Chinook Salmon – Central Valley spring-run ESU	FT; ST	Occurs in the Feather River and the Sacramento River and its tributaries, including Butte, Mill, Deer, Antelope, and Beegum Creeks. Adults enter the Sacramento River from late March through September. Adults migrate upstream to spawn in cool, clear, well-oxygenated streams from mid-August through early October. Juveniles migrate soon after emergence as young-of-the-year, or remain in freshwater and migrate as yearlings.	A	Suitable habitat is not present in the BSA; water in the unnamed ditch originates from Toe Drain/ Prospect Slough through a pump house and presents an impassable barrier to fish. Additionally, the unnamed ditch is culverted through the entirety of the BSA.

Scientific Name	Common Name	Status	Habitat Requirements	Habitat Present/ Absent	Rationale
<i>Oncorhynchus tshawytscha</i> pop.7	Chinook Salmon – Sacramento River winter-run ESU	FE; SE	Occurs in the Sacramento River below Keswick Dam. Spawns in the Sacramento River but not in tributary streams. Requires clean, cold water over gravel beds with water temperatures between 6 and 14 degrees C for spawning. Adults migrate upstream to spawn in cool, clear, well-oxygenated streams. Juveniles typically migrate to the ocean soon after emergence from the gravel.	A	Suitable habitat is not present in the BSA; water in the unnamed ditch originates from Toe Drain/ Prospect Slough through a pump house and presents an impassable barrier to fish. Additionally, the unnamed ditch is culverted through the entirety of the BSA.
<i>Pogonichthys macrolepidotus</i>	Sacramento splittail	SSC	Found in estuarine environments with water salinity between 10 – 18 ppt and water temperatures between 5 – 24 degrees C. Adapted to slow moving rivers, sloughs, and alkaline lakes with low to moderate currents. Spawning occurs in flooded vegetation in water temperatures between 14 – 19 degrees C, typically from late February to early July. Juveniles move into estuaries in April – August where they occupy waters less than 2 m deep.	A	Suitable habitat is not present in the BSA; there are no estuarine aquatic areas in the BSA.
<i>Spirinchus thaleichthys</i>	Longfin smelt	FT; ST; CSC	Euryhaline, nektonic, and anadromous. Found in open waters and estuaries, mostly in the middle or bottom water column. Prefer salinities of 15 to 30 ppt, but can be found in completely freshwater to almost pure seawater.	A	Suitable habitat is not present in the BSA; there are no estuarine aquatic areas in the BSA.

Scientific Name	Common Name	Status	Habitat Requirements	Habitat Present/ Absent	Rationale
Invertebrates					
<i>Bombus crotchii</i>	Crotch bumble bee	CA SA	Open grassland and scrub habitats. Nests underground. Forage on plants from the genera <i>Asclepias</i> , <i>Chaenactis</i> , <i>Lupinus</i> , <i>Medicago</i> , <i>Phacelia</i> , and <i>Salvia</i> .	A	Suitable habitat is not present in the BSA; no open grassland or scrub habitats occur in the BSA.
<i>Bombus occidentalis</i>	Western bumble bee	CA SA	Open grassy areas, urban parks and gardens, chaparral, shrub areas, and mountain meadows (0 – 6,500 feet). Typically nests underground in abandoned rodent burrows or other cavities. Flight period for queens typically extends from early February to late November; flight period for workers and males occurs from April to early November, peaking from early August to early September.	A	Suitable foraging habitat for this species occurs in landscaped areas within the BSA; however the BSA does not include suitable nest sites and is highly disturbed by human activities. Additionally, no species of the genus <i>Bombus</i> were observed during surveys conducted within the typical flight period for this species. Therefore, this species is considered absent from the BSA.
<i>Branchinecta conservatio</i>	Conservancy fairy shrimp	FE	Endemic to the grasslands of the northern two-thirds of the Central Valley; found in large, turbid pools. Astatic pools located in swales formed by old, braided alluvium; filled by winter/spring rains, last until June.	A	Suitable vernal pool habitat is not present in the BSA.
<i>Branchinecta lynchi</i>	Vernal pool fairy shrimp	FT, CH	Endemic to the grasslands of the Central Valley, Central Coast Mountains and South Coast Mountains. Typically associated with small, shallow vernal pools with relatively short periods of inundation. Found in larger pools in southern extent of range.	A	Suitable vernal pool habitat is not present in the BSA.

Scientific Name	Common Name	Status	Habitat Requirements	Habitat Present/Absent	Rationale
<i>Branchinecta mesovallensis</i>	Midvalley fairy shrimp		Often found in small, short-lived vernal pools and grass-bottomed swales ranging from 4 to 663 square feet. Found in Sacramento, San Joaquin, Yolo, Alameda, Merced, Madera, and Fresno counties.	A	Suitable vernal pool habitat is not present in the BSA.
<i>Cicindela hirticollis abrupta</i>	Sacramento Valley tiger beetle		Requires fine sand and terraced floodplain habitat with low sandy water edge bars. Disturbance sensitive. Limited to a few sites along the Sacramento and Feather Rivers, most commonly near Nicolaus in Sutter County.	A	Suitable sandy substrates are not present in the BSA. Additionally, this species is considered extinct in California.
<i>Desmocerus californicus dimorphus</i>	Valley elderberry longhorn beetle	FT, CH	Occurs only in the Central Valley of California, in association with blue elderberry (<i>Sambucus nigra ssp. caerulea</i>). Prefers branches greater than 1 in (2.5 centimeters [cm]) in diameter.	A	No elderberry shrubs are present in the BSA
<i>Lepidurus packardi</i>	Vernal pool tadpole shrimp	FE	Vernal pools and swales in the Central Valley containing clear to highly turbid water.	A	Suitable vernal pool habitat is not present in the BSA.
<i>Linderiella occidentalis</i>	California linderiella	CA SA	Occurs in seasonal pools (e.g., vernal pools) in unplowed grasslands with old alluvial soils underlain by hardpan or heavy clay or in sandstone depressions. Tolerant of wide temperature range and pool size.	A	Suitable vernal pool habitat is not present in the BSA.
Plants					
<i>Astragalus pauperculus</i>	Depauperate milk-vetch	List 4.3	Occurs in open, vernal moist volcanic clay soils typically in valley grasslands (131 – 3,937 feet). Blooms March – June.	A	Suitable habitat is not present in the BSA; the BSA does not contain grasslands or volcanic soils.

Scientific Name	Common Name	Status	Habitat Requirements	Habitat Present/ Absent	Rationale
<i>Astragalus tener</i> var. <i>ferrisiae</i>	Ferris' milk-vetch	List 1B.1	Found in alkaline flat and vernal moist meadows in valley grasslands (0 – 196 feet). Blooms April – May.	A	Suitable habitat is not present in the BSA; no grasslands or meadows are present in the BSA.
<i>Astragalus tener</i> var. <i>tener</i>	Alkalai milk-vetch	List 1B.2	Found in playas and vernal pools; valley and foothill grassland on alkaline soils, coastal bluff scrub, coastal dunes (0 – 196 feet). Blooms March – June.	A	Suitable habitat is not present in the BSA; no playas or vernal pools occur in the BSA.
<i>Atriplex cordulata</i> var. <i>cordulata</i>	Heartscale	List 1B.2	Occurs in saline or alkaline soils in shadscale scrub and valley grasslands (0 - 230 feet). Blooms April – October.	A	Suitable habitat is not present in the BSA; the BSA does not contain shadscale scrub or valley grasslands.
<i>Atriplex depressa</i>	Brittlescale	List 1B.2	Found in alkaline or clay soils in shadscale scrub, valley grassland, and alkali sink habitats (0 – 1,049 feet). Blooms April – October.	A	Suitable habitat is not present in the BSA; the BSA does not contain shadscale scrub, valley grassland, or alkali sink habitats.
<i>Carex comosa</i>	Bristly sedge	List 2B.1	Lake margins and edges of freshwater wetlands (0 – 1,312 feet). Blooms May – September.	A	Suitable habitat is not present in the BSA; the BSA does not contain freshwater wetland habitat.
<i>Centromadia parryi</i> ssp. <i>rudis</i>	Parry's rough tarplant	List 4.2	Grassland, edge of marshes and vernal pools (0 – 1,600 feet). Blooms June – October.	A	Suitable habitat is not present in the BSA; the BSA does not contain marshes or vernal pools.
<i>Chloropyron palmatum</i>	Palmate-bracted bird's-beak	FE, SE, List 1B.1	Alkaline flats in shadscale scrub and valley grasslands (36 – 885 feet). Blooms May – October.	A	Suitable habitat is not present in the BSA; the BSA does not contain shadscale scrub or valley grassland habitats.
<i>Cuscuta obtusiflora</i> var. <i>glandulosa</i>	Peruvian dodder	List 2B.2	Grows on herbaceous species from the genera <i>Alternanthera</i> , <i>Dalea</i> , <i>Lythrum</i> , <i>Polygonum</i> , and <i>Xanathium</i> (0 – 1,640 feet). Blooms July – October.	A	Species from the genus <i>Polygonum</i> occur in the BSA; however no individuals from the genus <i>Cuscuta</i> were observed during field surveys. Therefore this species is considered absent from the BSA.

Scientific Name	Common Name	Status	Habitat Requirements	Habitat Present/ Absent	Rationale
<i>Downingia pusilla</i>	Dwarf downingia	List 2B.2	Vernal lake and pool margins and other mesic areas in valley and foothill grasslands (0 – 1,400 feet). Blooms March – May.	A	Suitable habitat is not present in the BSA; no vernal pools or other stillwater mesic areas occur in the BSA.
<i>Eryngium jepsonii</i>	Jepson's coyote thistle	List 1B.2	Found in moist clay soils (0 – 1,640 feet). Blooms April – August.	HP	Suitable moist clay soils occur in the BSA; however surveys were conducted during the normal blooming period for this species with negative results. Therefore this species is considered absent from the BSA and no further discussion is required.
<i>Extriplex joaquinana</i>	San Joaquin spearscale	List 1B.2	Occurs in shadscale scrub and valley grasslands (0 – 2,740 feet). Blooms April – September.	A	Suitable habitat is not present in the BSA; no shadscale scrub or valley grassland habitats occur in the BSA.
<i>Fritillaria agrestis</i>	Stinkbells	List 4.2	Clay, often vertic, occasionally serpentine soils in chaparral, valley grassland, and foothill woodland habitats (0 – 1,640 feet). Blooms March – June.	A	Suitable habitat is not present in the BSA; the BSA does not contain serpentine soils, chaparral, valley grasslands, or foothill woodlands.
<i>Gratiola heterosepala</i>	Boggs lake hedge-hyssop	List 1B.2	Found in shallow water along the margins of vernal pools (0 – 5,249 feet). Blooms April – August.	A	Suitable habitat is not present in the BSA; no vernal pools or shallow standing water are present in the BSA.
<i>Hesperevax caulescens</i>	Hogwallow starfish	List 4.2	Occurs in the drying shrink-swell clay of vernal pools, flats, and steep slopes, occasionally on serpentine (0 – 984 feet). Blooms March – June.	A	Suitable habitat is not present in the BSA; no vernal pools occur in the BSA.
<i>Hibiscus lasiocarpus</i> var. <i>occidentalis</i>	Woolly rose-mallow	List 1B.2	Occurs in riprap on sides of levees, as well as, freshwater marshes and swamps (0 – 2,690 feet). Blooms June – September.	HP	Suitable habitat for this species may occur adjacent to the unnamed ditch culvert within the BSA; however surveys were conducted during the normal blooming period for this species with negative results. Therefore this species is considered absent from the BSA and no further discussion is required.

Scientific Name	Common Name	Status	Habitat Requirements	Habitat Present/ Absent	Rationale
<i>Juglans hindsii</i>	Northern California black walnut	List 1B.1	Found along streams on disturbed slopes (0 – 984 feet). Blooms April – May.	HP	Suitable habitat for this species may occur adjacent to the unnamed ditch culvert within the BSA; however no species of the genus <i>Juglans</i> were identified during field surveys. Therefore this species is considered absent from the BSA and no further discussion is required.
<i>Legenere limosa</i>	Legenere	List 1B.2	Found in wet areas, vernal pools, and ponds (0 – 2,880 feet). Blooms May – June.	A	Suitable habitat is not present in the BSA; no vernal pools or ponds occur in the BSA.
<i>Lepidium latipes var. heckardii</i>	Heckard's peppergrass	List 1B.2	Occurs in alkaline soils on vernal pool margins, salt marsh edges, and in pastures (0 – 2,296 feet). Blooms March – May.	A	Suitable habitat is not present in the BSA; the BSA does not contain vernal pools, salt marshes, or pastures.
<i>Lilaeopsis masonii</i>	Mason's lilaeopsis	List 1B.1	Occurs in intertidal marshes and streambanks, primarily in freshwater and brackish water marshes and freshwater wetlands (0 – 118 feet) Blooms April – November.	A	Suitable habitat is not present in the BSA; no intertidal, freshwater, or brackish water marshes, streambanks, or freshwater wetlands occur in the BSA.
<i>Myosurus minimus ssp. apus</i>	Little mousetail	List 3.1	Occurs in vernal pools in valley grasslands, coastal sage scrub, and freshwater wetlands (0 – 6,890 feet). Blooms March – June.	A	Suitable habitat is not present in the BSA; no vernal pools are present in the BSA.
<i>Navarretia leucocephala ssp. bakeri</i>	Baker's navarretia	List 1B.1	Found in cismontane woodland, lower montane coniferous forest, meadows and seeps, valley and foothill grasslands, and vernal pools in mesic conditions (20 to 5,710 feet). Blooms April – July.	A	Suitable habitat is not present in the BSA; the BSA does not contain any cismontane woodland, coniferous forest, meadows, grasslands, or vernal pools.
<i>Neostaphia colusana</i>	Colusa grass	List 1B.1	Occurs in vernal pools in wetlands and valley grasslands (0 – 410 feet). Blooms May – August.	A	Suitable habitat is not present in the BSA; no vernal pools are present in the BSA.

Scientific Name	Common Name	Status	Habitat Requirements	Habitat Present/ Absent	Rationale
<i>Plagiobothrys hystriculus</i>	Bearded popcornflower	List 1B.1	Found in wet grasslands and vernal pool margins (0 – 164 feet). Blooms April – May.	A	Suitable habitat is not present in the BSA; no vernal pools or wet grasslands occur in the BSA.
<i>Puccinellia simplex</i>	California alkali grass	List 1B.2	Occurs in saline flats and mineral springs (0 – 2,953 feet). Blooms March – May.	A	Suitable habitat is not present in the BSA; the BSA does not contain saline flats or mineral springs.
<i>Sagittaria sanfordii</i>	Sanford's arrowhead	List 1B.2	Ponds, ditches, marshes and swamps (0 – 2,130 feet). Blooms May – October.	A	Suitable habitat is not present in the BSA; the BSA does not contain ponds, ditches, marshes, or swamps which support wetlands.
<i>Symphyotrichum lentum</i>	Suisun marsh aster	List 1B.2	Occurs almost always in freshwater and brackish water marshes (0 – 1,010 feet). Blooms May – November.	A	Suitable habitat is not present in the BSA; no marshes are present in the BSA.
<i>Trifolium hydrophilum</i>	Saline clover	List 1B.2	Occurs in wetlands, primarily salt marshes and vernal pools (0 – 720 feet). Blooms April – June.	A	Suitable habitat is not present in the BSA; no salt marshes or vernal pools are present in the BSA.
<i>Tuctoria mucronata</i>	Crampton's tuctoria or Solano grass	List 1B.1	Occurs in wetlands and grasslands, primarily vernal pools (0 – 33 feet). Blooms April – August.	A	Suitable habitat is not present in the BSA; no vernal pools are present in the BSA.
Natural Communities of Concern					
Elderberry Savanna			An open, grassy, woodland area dominated by elderberry shrubs.	A	Habitat is not present; no elderberry plants are present in the BSA.
Great Valley Cottonwood Riparian Forest			Riparian woodland dominated by Fremont cottonwood (<i>Populus fremontii</i>).	A	Habitat is not present; the BSA does not contain riparian woodland dominated by Fremont cottonwood.
Northern Claypan Vernal Pool			Seasonal wetlands that pond water for short periods during the winter and early spring due to an impermeable, subsurface layer that retards percolation.	A	Habitat is not present; no vernal pools are present in the BSA.
Northern Hardpan Vernal Pool			Seasonal wetlands that pond water for short periods during the winter and early spring due to an impermeable, subsurface layer that retards percolation.	A	Habitat is not present; no vernal pools are present in the BSA.

Status Codes

Federal California Native Plant Society designations:

FE: Federally listed; Endangered

FT: Federally listed; Threatened

FPE: Federally Proposed for Listing as Endangered

FPT: Federally Proposed for Listing as Threatened

FPD: Federally Proposed for Delisting

FC: Federal Candidate

FD: Federal Delisted

NMFS SC: National Marine Fisheries Service Species of Concern

0.3: Plants not very threatened in California

List 1A: Plants presumed extirpated in California, either rare or extinct elsewhere

List 1B: Plants rare, threatened, or endangered in California and elsewhere

List 2A: Plants presumed extirpated in California but common elsewhere

List 2B: Plants rare, threatened or endangered in California but common elsewhere

List 3: Plants about which we need more information; a review list.

List 4: Plants of limited distribution; a watch list

0.1: Plants seriously threatened in California

0.2: Plants fairly threatened in California

State

ST: State listed; Threatened

SE: State listed; Endangered

SFP: State Fully Protected

SCT: State Candidate; Threatened

SWL: State Watch List

SR: State Rare

CSC: California Species of Special Concern

CA SA: Special Animal: General term that refers to taxa that the CNDDDB is interested in tracking regardless of legal or protection status: Includes the following categories in addition to those listed above:

- Taxa which meet the criteria for listing, even if not currently included on any list, as described in Section 15380 of the California Environmental Quality Act Guidelines.
- Taxa that are biologically rare, very restricted in distribution, declining throughout their range, or have a critical, vulnerable stage in their life cycle that warrants monitoring.
- Populations in California that may be on the periphery of a taxon's range, but are threatened with extirpation in California.
- Taxa closely associated with a habitat that is declining in California at an alarming rate (e.g., wetlands, riparian, old growth forests, desert aquatic systems, native grasslands, vernal pools, etc.)
- Taxa designated as a special status, sensitive, or declining species by other state or federal agencies, or non-governmental organization.

Habitat Presence:

HP: Habitat is, or may be present

SP: Species is present

A: No habitat present and no further work needed

CH: Project footprint is located within a designated critical habitat unit.

EFH: Essential Fish Habitat

This page intentionally left blank

4 – Results: Biological Resources, Discussion of Impacts and Mitigation

4.1 Habitats and Natural Communities of Special Concern

No habitats or natural communities of special concern occur in the BSA; therefore, the Project is not expected to have impacts on habitats or natural communities of special concern.

4.2 Special Status Plant Species

No special status plant species were observed in the BSA during the survey. Potential habitat for five special status plant species (wooly rose-mallow, Jepson's coyote thistle, Northern California black walnut, Mason's lilaeopsis, and Sanford's arrowhead) is present in the BSA (as discussed in Table 2). However, these species were not observed during the field survey during their normal blooming periods. Therefore, special status plant species are considered absent from the BSA.

4.3 Special Status Animal Species Occurrences

After evaluation of the special status wildlife species potentially occurring in the BSA, as shown in Table 2, no special status wildlife species were determined to have a significant likelihood of occurring in the BSA.

This page intentionally left blank

5 – Conclusions and Regulatory Determinations

5.1 Federal Endangered Species Act Consultation Summary

The proposed Project will have no effect on any federally listed or candidate species under FESA. Therefore, consultation within the USFWS and/or NMFS pursuant to Section 7 of the FESA will not be required.

5.2 Essential Fish Habitat Consultation Summary

EFH was identified within all nine quadrangles of the NMFS Species list search. The unnamed canal within the BSA has connectivity to Toe Drain/Prospect Slough; however, the pump station which supplies water from Toe Drain/Prospect Slough to the unnamed canal presents an impassable barrier to fish. Additionally, no Project related impacts are anticipated, as all work will be confined to the existing road right-of-way. Therefore, EFH consultation with NMFS will not be required.

5.3 California Endangered Species Act Consultation Summary

The Project will have no effect on any state listed or candidate species under CESA. Therefore, no Incidental Take Permit pursuant to Section 2081 of the CFGC will be required for this project.

5.4 Wetlands and Other Waters Coordination Summary

5.4.1. UNITED STATES ARMY CORPS OF ENGINEERS

A total of 0.11 ac of potential waters of the U.S. were mapped in the BSA, consisting of approximately 0.01 ac of potential seasonal wetlands and 0.10 ac of non-wetland waters. The Project will result in 0.03 ac of permanent impacts to non-wetland waters as a result of roadway improvements and sidewalk installation. The project will not impact potential seasonal wetlands. Potential waters of the U.S. affected by the project are regulated by the ACOE under Section 404 of the CWA. It is expected that impacts to waters of the U.S. during Project construction can be authorized by the ACOE using Nationwide Permit (NWP) 14 – Linear Transportation Projects. In accordance with the conditions of NWP 14, a Preconstruction Notification must be submitted to the ACOE for verification that the Project complies with the conditions of the subject NWPs.

5.4.2. REGIONAL WATER QUALITY CONTROL BOARD

Impacts to waters of the State under Section 404 of the CWA also require a Water Quality Certification from the RWQCB, pursuant to Section 401 of the CWA. Waters of the State, and Project impacts to waters of the State, will be the same as for waters of the U.S., as discussed in Section 5.4.1. The RWQCB may opt to waive the water quality

certification and instead issue waste discharge requirements for waters of the State pursuant to their authority under the Porter-Cologne Water Quality Control Act.

5.4.3. CALIFORNIA DEPARTMENT OF FISH AND WILDLIFE

The aquatic features within the BSA do not fall under the definition of CDFW waters (i.e., CDFW regulates wetland areas only to the extent that those wetlands are part of a river, stream, or lake as defined by CDFW). Therefore, a Lake or Streambed Alteration Agreement, pursuant to Sections 1600-1616 of the CFGC, is not required.

5.5 Executive Order 11990 – Protection of Wetlands

The project has been designed to avoid wetlands. As such, the project will not result in impacts to wetlands.

The project will adhere to the following avoidance and minimization measures for the protection of wetlands:

1. All work in aquatic resources shall be minimized to the extent possible.
2. Environmentally Sensitive Area fencing shall be placed along the limits of work to protect the adjacent wetland area and shall be maintained in good condition for the duration of construction activities.
3. Staging areas, access routes, and construction areas shall be located outside of the wetland area.
4. Measures consistent with the current Caltrans' Construction Site Best BMP Manual (including the SWPPP and WPCP Manuals) shall be implemented to minimize effects to the adjacent wetland area resulting from erosion, siltation, etc. during construction.
5. A WPCP will be prepared by the contractor in accordance with typical provisions associated with a Regional General Permit for Construction Activities (on file with the Central Valley RWQCB). The WPCP will contain a Spill Response Plan with instructions and procedures for reporting spills, the use and location of spill containment equipment, and the use and location of spill collection materials.

5.6 Migratory Bird Treaty Act and California Fish and Game Code (Breeding Birds)

Disturbance of migratory birds during their nesting season (February 1 to August 31) could result in "take" which is prohibited under the MBTA and Section 3513 of the CFGC. CFGC Section 3503 also prohibits take or destruction of bird nests or eggs.

The following seasonal work restrictions will be implemented during construction to minimize the potential for take of nesting birds:

1. If work must begin during the nesting season (February 1 to August 31), a qualified biologist shall survey all suitable nesting habitat in the BSA for presence of nesting birds. This survey shall occur no more than 10 days prior to the start of construction. If no nesting activity is observed, work may proceed as planned. If an active nest is discovered, a qualified biologist shall evaluate the potential for the proposed Project to disturb nesting activities. The evaluation criteria shall include, but are not limited to, the location/orientation of the nest in the nest tree, the distance of the nest from the BSA, the line of sight between the nest and the BSA, and the feasibility of establishing no-disturbance buffers.
2. Additionally, CDFW shall be contacted to review the evaluation and determine if the Project can proceed without adversely affecting nesting activities.
3. If work is allowed to proceed, a qualified biologist shall be on-site weekly during construction activities to monitor nesting activity. The biologist shall have the authority to stop work if it is determined the Project is adversely affecting nesting activities.

5.7 Executive Order 13112: Invasive Species

To avoid the introduction of invasive species to other areas from the BSA during Project construction, contract specifications shall include, at a minimum, the following measures.

1. All earthmoving equipment to be used during Project construction shall be cleaned thoroughly before arrival on the Project site.
2. All seeding equipment (i.e. hydroseed trucks) shall be thoroughly rinsed at least three times prior to beginning seeding work.
3. To avoid spreading any non-native invasive species already existing on-site, to off-site areas, all equipment shall be thoroughly cleaned before leaving the site.

5.8. Executive Order 11988: Floodplain Management

The proposed Project would not have significant adverse impacts to the existing floodplain or significantly alter the hydraulics in the area. Therefore, the Project would not increase the risk of flooding.

5.9. City of West Sacramento Ordinance 04-01, Tree Preservation (Municipal Code Section 2.18)

The Project will result in the removal of 17 landscaping trees located along West Capitol Avenue, including 16 crepe myrtle trees and 1 valley oak. Trees to be removed are listed in the Tree Inventory provided in Appendix D, and shown in Figure 7. The Project will also result in impacts to landscaped areas, totaling 0.24 ac, and ruderal / disturbed areas, totaling 0.31 ac (Table 3). The City of West Sacramento will be responsible for replacing trees consistent with Ordinance 04-01, Tree Preservation (Municipal Code Section 2.18).

Table 3: Summary of Impacts to Habitats

Other Habitat Types	Impacts (acres)
Landscaped	0.24
Ruderal / Disturbed	0.31
<i>Total</i>	<i>0.55</i>

Event Code: 08FBDT00-2018-E-00528

Project Name: West Capital Road Rehab

Subject: List of threatened and endangered species that may occur in your proposed project location, and/or may be affected by your proposed project

To Whom It May Concern:

The enclosed species list identifies threatened, endangered, proposed and candidate species, as well as proposed and final designated critical habitat, that may occur within the boundary of your proposed project and/or may be affected by your proposed project. The species list fulfills the requirements of the U.S. Fish and Wildlife Service (Service) under section 7(c) of the Endangered Species Act (Act) of 1973, as amended (16 U.S.C. 1531 *et seq.*).

New information based on updated surveys, changes in the abundance and distribution of species, changed habitat conditions, or other factors could change this list. Please feel free to contact us if you need more current information or assistance regarding the potential impacts to federally proposed, listed, and candidate species and federally designated and proposed critical habitat. Please note that under 50 CFR 402.12(e) of the regulations implementing section 7 of the Act, the accuracy of this species list should be verified after 90 days. This verification can be completed formally or informally as desired. The Service recommends that verification be completed by visiting the ECOS-IPaC website at regular intervals during project planning and implementation for updates to species lists and information. An updated list may be requested through the ECOS-IPaC system by completing the same process used to receive the enclosed list.

The purpose of the Act is to provide a means whereby threatened and endangered species and the ecosystems upon which they depend may be conserved. Under sections 7(a)(1) and 7(a)(2) of the Act and its implementing regulations (50 CFR 402 *et seq.*), Federal agencies are required to utilize their authorities to carry out programs for the conservation of threatened and endangered species and to determine whether projects may affect threatened and endangered species and/or designated critical habitat.

A Biological Assessment is required for construction projects (or other undertakings having similar physical impacts) that are major Federal actions significantly affecting the quality of the human environment as defined in the National Environmental Policy Act (42 U.S.C. 4332(2)(c)). For projects other than major construction activities, the Service suggests that a biological evaluation similar to a Biological Assessment be prepared to determine whether the project may affect listed or proposed species and/or designated or proposed critical habitat. Recommended contents of a Biological Assessment are described at 50 CFR 402.12.

If a Federal agency determines, based on the Biological Assessment or biological evaluation, that listed species and/or designated critical habitat may be affected by the proposed project, the agency is required to consult with the Service pursuant to 50 CFR 402. In addition, the Service recommends that candidate species, proposed species and proposed critical habitat be addressed within the consultation. More information on the regulations and procedures for section 7 consultation, including the role of permit or license applicants, can be found in the "Endangered Species Consultation Handbook" at:

<http://www.fws.gov/endangered/esa-library/pdf/TOC-GLOS.PDF>

Please be aware that bald and golden eagles are protected under the Bald and Golden Eagle Protection Act (16 U.S.C. 668 *et seq.*), and projects affecting these species may require development of an eagle conservation plan (http://www.fws.gov/windenergy/eagle_guidance.html). Additionally, wind energy projects should follow the wind energy guidelines (<http://www.fws.gov/windenergy/>) for minimizing impacts to migratory birds and bats.

Guidance for minimizing impacts to migratory birds for projects including communications towers (e.g., cellular, digital television, radio, and emergency broadcast) can be found at: <http://www.fws.gov/migratorybirds/CurrentBirdIssues/Hazards/towers/towers.htm>; <http://www.towerkill.com>; and <http://www.fws.gov/migratorybirds/CurrentBirdIssues/Hazards/towers/comtow.html>.

We appreciate your concern for threatened and endangered species. The Service encourages Federal agencies to include conservation of threatened and endangered species into their project planning to further the purposes of the Act. Please include the Consultation Tracking Number in the header of this letter with any request for consultation or correspondence about your project that you submit to our office.

Official Species List

This list is provided pursuant to Section 7 of the Endangered Species Act, and fulfills the requirement for Federal agencies to "request of the Secretary of the Interior information whether any species which is listed or proposed to be listed may be present in the area of a proposed action".

This species list is provided by:

San Francisco Bay-Delta Fish And Wildlife

Project Summary

Consultation Code: 08FBDT00-2018-SLI-0294

Event Code: 08FBDT00-2018-E-00528

Project Name: West Capital Road Rehab

Project Type: TRANSPORTATION

Project Description: LSA Project No. MKT1801

Project Location:

Approximate location of the project can be viewed in Google Maps: <https://www.google.com/maps/place/38.577542911358265N121.56943875178118W>

Counties: Yolo, CA

Endangered Species Act Species

There is a total of 8 threatened, endangered, or candidate species on this species list.

Species on this list should be considered in an effects analysis for your project and could include species that exist in another geographic area. For example, certain fish may appear on the species list because a project could affect downstream species.

IPaC does not display listed species or critical habitats under the sole jurisdiction of NOAA Fisheries¹, as USFWS does not have the authority to speak on behalf of NOAA and the Department of Commerce.

See the "Critical habitats" section below for those critical habitats that lie wholly or partially within your project area under this office's jurisdiction. Please contact the designated FWS office if you have questions.

-
1. [NOAA Fisheries](#), also known as the National Marine Fisheries Service (NMFS), is an office of the National Oceanic and Atmospheric Administration within the Department of Commerce.

Birds

NAME	STATUS
Least Bell's Vireo <i>Vireo bellii pusillus</i> There is final critical habitat for this species. Your location is outside the critical habitat. Species profile: https://ecos.fws.gov/ecp/species/5945	Endangered

Reptiles

NAME	STATUS
Giant Garter Snake <i>Thamnophis gigas</i> No critical habitat has been designated for this species. Species profile: https://ecos.fws.gov/ecp/species/4482	Threatened

Amphibians

NAME	STATUS
California Red-legged Frog <i>Rana draytonii</i> There is final critical habitat for this species. Your location is outside the critical habitat. Species profile: https://ecos.fws.gov/ecp/species/2891	Threatened
California Tiger Salamander <i>Ambystoma californiense</i> Population: U.S.A. (Central CA DPS) There is final critical habitat for this species. Your location is outside the critical habitat. Species profile: https://ecos.fws.gov/ecp/species/2076	Threatened

Fishes

NAME	STATUS
Delta Smelt <i>Hypomesus transpacificus</i> There is final critical habitat for this species. Your location overlaps the critical habitat. Species profile: https://ecos.fws.gov/ecp/species/321	Threatened

Insects

NAME	STATUS
Valley Elderberry Longhorn Beetle <i>Desmocerus californicus dimorphus</i> There is final critical habitat for this species. Your location is outside the critical habitat. Species profile: https://ecos.fws.gov/ecp/species/7850	Threatened

Crustaceans

NAME	STATUS
Vernal Pool Fairy Shrimp <i>Branchinecta lynchi</i> There is final critical habitat for this species. Your location is outside the critical habitat. Species profile: https://ecos.fws.gov/ecp/species/498	Threatened
Vernal Pool Tadpole Shrimp <i>Lepidurus packardii</i> There is final critical habitat for this species. Your location is outside the critical habitat. Species profile: https://ecos.fws.gov/ecp/species/2246	Endangered

Critical habitats

There is 1 critical habitat wholly or partially within your project area under this office's jurisdiction.

NAME	STATUS
Delta Smelt <i>Hypomesus transpacificus</i> https://ecos.fws.gov/ecp/species/321#crithab	Final

Atriplex depressa	brittlescale	Chenopodiaceae	annual herb	Apr-Oct	1B.2	S2	G2
Carex comosa	bristly sedge	Cyperaceae	perennial rhizomatous herb	May-Sep	2B.1	S2	G5
Centromadia parryi ssp. rudis	Parry's rough tarplant	Asteraceae	annual herb	May-Oct	4.2	S3	G3T3
Chloropyron palmatum	palmate-bracted bird's-beak	Orobanchaceae	annual herb (hemiparasitic)	May-Oct	1B.1	S1	G1
Cuscuta obtusiflora var. glandulosa	Peruvian dodder	Convolvulaceae	annual vine (parasitic)	Jul-Oct	2B.2	SH	G5T4T5
Downingia pusilla	dwarf downingia	Campanulaceae	annual herb	Mar-May	2B.2	S2	GU
Eryngium jepsonii	Jepson's coyote thistle	Apiaceae	perennial herb	Apr-Aug	1B.2	S2?	G2?
Extriplex joaquinana	San Joaquin spearscale	Chenopodiaceae	annual herb	Apr-Oct	1B.2	S2	G2
Fritillaria agrestis	stinkbells	Liliaceae	perennial bulbiferous herb	Mar-Jun	4.2	S3	G3
Gratiola heterosepala	Boggs Lake hedge-hyssop	Plantaginaceae	annual herb	Apr-Aug	1B.2	S2	G2
Hesperervax caulescens	hogwallow starfish	Asteraceae	annual herb	Mar-Jun	4.2	S3	G3
Hibiscus lasiocarpus var. occidentalis	woolly rose-mallow	Malvaceae	perennial rhizomatous herb (emergent)	Jun-Sep	1B.2	S3	G5T3
Juglans hindsii	Northern California black walnut	Juglandaceae	perennial deciduous tree	Apr-May	1B.1	S1	G1
Legenere limosa	legenere	Campanulaceae	annual herb	Apr-Jun	1B.1	S2	G2
Lepidium latipes var. heckardii	Heckard's pepper-grass	Brassicaceae	annual herb	Mar-May	1B.2	S1	G4T1
Lilaeopsis masonii	Mason's lilaeopsis	Apiaceae	perennial rhizomatous herb	Apr-Nov	1B.1	S2	G2

<u>Myosurus minimus ssp. apus</u>	little mousetail	Ranunculaceae	annual herb	Mar-Jun	3.1	S2	G5T2Q
<u>Navarretia leucocephala ssp. bakeri</u>	Baker's navarretia	Polemoniaceae	annual herb	Apr-Jul	1B.1	S2	G4T2
<u>Neostapfia colusana</u>	Colusa grass	Poaceae	annual herb	May-Aug	1B.1	S1	G1
<u>Plagiobothrys hystriculus</u>	bearded popcornflower	Boraginaceae	annual herb	Apr-May	1B.1	S2	G2
<u>Puccinellia simplex</u>	California alkali grass	Poaceae	annual herb	Mar-May	1B.2	S2	G3
<u>Sagittaria sanfordii</u>	Sanford's arrowhead	Alismataceae	perennial rhizomatous herb (emergent)	May-Oct(Nov)	1B.2	S3	G3
<u>Symphotrichum lentum</u>	Suisun Marsh aster	Asteraceae	perennial rhizomatous herb	(Apr)May-Nov	1B.2	S2	G2
<u>Trifolium hydrophilum</u>	saline clover	Fabaceae	annual herb	Apr-Jun	1B.2	S2	G2
<u>Tuctoria mucronata</u>	Crampton's tuctoria or Solano grass	Poaceae	annual herb	Apr-Aug	1B.1	S1	G1

Appendix C – Wetland Data Forms

This page intentionally left blank

WETLAND DETERMINATION DATA FORM – Arid West Region

Project/Site: WEST CAPITAL ROAD REHAB City/County: SACRAMENTO Sampling Date: 06/26/2018
 Applicant/Owner: CITY OF WEST SACRAMENTO State: CA Sampling Point: 1
 Investigator(s): A. VAN ZUUK Section, Township, Range: _____
 Landform (hillslope, terrace, etc.): _____ Local relief (concave, convex, none): _____ Slope (%): _____
 Subregion (LRR): _____ Lat: _____ Long: _____ Datum: _____
 Soil Map Unit Name: _____ NWI classification: _____
 Are climatic / hydrologic conditions on the site typical for this time of year? Yes No _____ (If no, explain in Remarks.)
 Are Vegetation _____, Soil _____, or Hydrology _____ significantly disturbed? Are "Normal Circumstances" present? Yes No _____
 Are Vegetation _____, Soil _____, or Hydrology _____ naturally problematic? (If needed, explain any answers in Remarks.)

SUMMARY OF FINDINGS – Attach site map showing sampling point locations, transects, important features, etc.

Hydrophytic Vegetation Present? Yes <input checked="" type="checkbox"/> No <input checked="" type="checkbox"/> Hydric Soil Present? Yes _____ No <input checked="" type="checkbox"/> Wetland Hydrology Present? Yes <input checked="" type="checkbox"/> No _____	Is the Sampled Area within a Wetland? Yes _____ No <input checked="" type="checkbox"/>
Remarks: <u>ROADSIDE DITCH. LIKELY RECEIVES WATER INPUTS FROM LANDSCAPE IRRIGATION.</u>	

VEGETATION – Use scientific names of plants.

Tree Stratum (Plot size: _____)	Absolute % Cover	Dominant Species?	Indicator Status	Dominance Test worksheet:
1. _____	_____	_____	_____	Number of Dominant Species That Are OBL, FACW, or FAC: <u>2</u> (A)

% Bare Ground in Herb Stratum <u>24</u> % Cover of Biotic Crust _____				

Dominance Test worksheet:
 Number of Dominant Species That Are OBL, FACW, or FAC: 1 (A)
 Total Number of Dominant Species Across All Strata: 1 (B)
 Percent of Dominant Species That Are OBL, FACW, or FAC: 100 (A/B)

Prevalence Index worksheet:
 Total % Cover of: _____ Multiply by: _____
 OBL species _____ x 1 = _____
 FACW species _____ x 2 = _____
 FAC species _____ x 3 = _____
 FACU species _____ x 4 = _____
 UPL species _____ x 5 = _____
 Column Totals: _____ (A) _____ (B)
 Prevalence Index = B/A = _____

Hydrophytic Vegetation Indicators:
 Dominance Test is >50%
 Prevalence Index is ≤3.0¹
 Morphological Adaptations¹ (Provide supporting data in Remarks or on a separate sheet)
 Problematic Hydrophytic Vegetation¹ (Explain)

¹Indicators of hydric soil and wetland hydrology must be present, unless disturbed or problematic.

Hydrophytic Vegetation Present? Yes No _____

Remarks:

SOIL

Sampling Point: 2

Profile Description: (Describe to the depth needed to document the indicator or confirm the absence of indicators.)

Depth (inches)	Matrix		Redox Features				Texture	Remarks
	Color (moist)	%	Color (moist)	%	Type ¹	Loc ²		
0-4"	10YR 2/1	100	—	—	—	—	CLAY LOAM	DEPOSIT?

¹Type: C=Concentration, D=Depletion, RM=Reduced Matrix, CS=Covered or Coated Sand Grains. ²Location: PL=Pore Lining, M=Matrix.

Hydric Soil Indicators: (Applicable to all LRRs, unless otherwise noted.)

<input type="checkbox"/> Histosol (A1)	<input type="checkbox"/> Sandy Redox (S5)	<input type="checkbox"/> 1 cm Muck (A9) (LRR C)
<input type="checkbox"/> Histic Epipedon (A2)	<input type="checkbox"/> Stripped Matrix (S6)	<input type="checkbox"/> 2 cm Muck (A10) (LRR B)
<input type="checkbox"/> Black Histic (A3)	<input type="checkbox"/> Loamy Mucky Mineral (F1)	<input type="checkbox"/> Reduced Vertic (F18)
<input type="checkbox"/> Hydrogen Sulfide (A4)	<input type="checkbox"/> Loamy Gleyed Matrix (F2)	<input type="checkbox"/> Red Parent Material (TF2)
<input type="checkbox"/> Stratified Layers (A5) (LRR C)	<input type="checkbox"/> Depleted Matrix (F3)	<input type="checkbox"/> Other (Explain in Remarks)
<input type="checkbox"/> 1 cm Muck (A9) (LRR D)	<input type="checkbox"/> Redox Dark Surface (F6)	
<input type="checkbox"/> Depleted Below Dark Surface (A11)	<input type="checkbox"/> Depleted Dark Surface (F7)	
<input type="checkbox"/> Thick Dark Surface (A12)	<input type="checkbox"/> Redox Depressions (F8)	
<input type="checkbox"/> Sandy Mucky Mineral (S1)	<input type="checkbox"/> Vernal Pools (F9)	
<input type="checkbox"/> Sandy Gleyed Matrix (S4)		

³Indicators of hydrophytic vegetation and wetland hydrology must be present, unless disturbed or problematic.

Restrictive Layer (if present):

Type: _____

Depth (inches): _____

Hydric Soil Present? Yes _____ No

Remarks: VERY DIFFICULT TO DIG SOIL PIT. DITCH IS LINED WITH MEDIUM ROCK COBBLES. SOIL PRESENT MAY BE DEPOSITED BY RUNOFF DURING STORM EVENTS?

HYDROLOGY

Wetland Hydrology Indicators:

<u>Primary Indicators (minimum of one required; check all that apply)</u>		<u>Secondary Indicators (2 or more required)</u>
<input type="checkbox"/> Surface Water (A1)	<input type="checkbox"/> Salt Crust (B11)	<input type="checkbox"/> Water Marks (B1) (Riverine)
<input type="checkbox"/> High Water Table (A2)	<input type="checkbox"/> Biotic Crust (B12)	<input type="checkbox"/> Sediment Deposits (B2) (Riverine)
<input type="checkbox"/> Saturation (A3)	<input type="checkbox"/> Aquatic Invertebrates (B13)	<input type="checkbox"/> Drift Deposits (B3) (Riverine)
<input checked="" type="checkbox"/> Water Marks (B1) (Nonriverine)	<input type="checkbox"/> Hydrogen Sulfide Odor (C1)	<input type="checkbox"/> Drainage Patterns (B10)
<input type="checkbox"/> Sediment Deposits (B2) (Nonriverine)	<input type="checkbox"/> Oxidized Rhizospheres along Living Roots (C3)	<input type="checkbox"/> Dry-Season Water Table (C2)
<input checked="" type="checkbox"/> Drift Deposits (B3) (Nonriverine)	<input type="checkbox"/> Presence of Reduced Iron (C4)	<input type="checkbox"/> Crayfish Burrows (C8)
<input type="checkbox"/> Surface Soil Cracks (B6)	<input type="checkbox"/> Recent Iron Reduction in Tilled Soils (C6)	<input type="checkbox"/> Saturation Visible on Aerial Imagery (C9)
<input type="checkbox"/> Inundation Visible on Aerial Imagery (B7)	<input type="checkbox"/> Thin Muck Surface (C7)	<input type="checkbox"/> Shallow Aquitard (D3)
<input checked="" type="checkbox"/> Water-Stained Leaves (B9)	<input type="checkbox"/> Other (Explain in Remarks)	<input type="checkbox"/> FAC-Neutral Test (D5)

Field Observations:

Surface Water Present?	Yes _____ No <input checked="" type="checkbox"/>	Depth (inches):	<u>>4"</u>	Wetland Hydrology Present? Yes <input checked="" type="checkbox"/> No _____
Water Table Present?	Yes _____ No <input checked="" type="checkbox"/>	Depth (inches):	<u>>4"</u>	
Saturation Present? (includes capillary fringe)	Yes _____ No <input checked="" type="checkbox"/>	Depth (inches):	<u>>4"</u>	

Describe Recorded Data (stream gauge, monitoring well, aerial photos, previous inspections), if available:

Remarks:

Subject: INITIAL SITE ASSESSMENT
West Capitol Avenue Roadway Rehabilitation Project
West Sacramento, California

Dear Mr. Silva,

Blackburn Consulting (BCI) prepared this Initial Site Assessment (ISA) for the West Capitol Avenue Roadway Rehabilitation Project, located in West Sacramento, California. We completed this work in accordance with our agreement dated April 11, 2018. The purpose of this report is to identify hazardous and potentially hazardous materials issues that may significantly impact the proposed project.

Thank you for selecting BCI to assist you on this important project. Please call if you have questions or require additional information.

Sincerely,

BLACKBURN CONSULTING

Luke Morrell
Project Engineer

Laura Long
Project Manager

EXECUTIVE SUMMARY

Blackburn Consulting (BCI) completed this Initial Site Assessment (ISA) for the proposed West Capitol Avenue Roadway Rehabilitation Project (Project), located in West Sacramento, California. The purpose of this assessment is to identify recognized environmental conditions (RECs) ¹ and/or potential RECs within and adjacent to the proposed improvement area which could affect the design, constructability, feasibility, and/or the cost of the proposed project. We prepared this report in general conformance with ASTM E1527-13 “Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process.”

The purpose of the Project is to repair deteriorating pavement, complete scalloped street section, install drainage improvements, sidewalks, access ramps, signal modifications, separated/buffered bike lanes, street lighting, high visibility cross walks for safer pedestrian crossings and reduce unnecessary vehicular travel lanes for the segment of West Capitol Avenue from Highway I-80 to Enterprise Boulevard and Jefferson Boulevard from West Capitol to Park Boulevard. Project staging is proposed at APN 008-020-27 (partially vacant lot) north of West Capitol Avenue near the west side of the project limits. Additional right-of-way (ROW) acquisition is not anticipated.

BCI identified the following potential hazardous materials issues.

ADJACENT PARCELS WITH KNOWN AND/OR POTENTIAL RECS

Findings: Fifty-four parcels located immediately adjacent to the project improvements were identified with hazardous material conditions. These sites are discussed in Section 3.2.2 and are identified on Figures 2a-2k. Of the fifty-four parcels, twelve have a high risk that groundwater and/or soil impacts resultant of historical releases from the adjacent parcels have extended beneath the project roadway improvement area. The twelve high-risk parcels include:

APNs 008-010-19 and 008-010-31, 4790 and 4800 West Capitol Avenue, Figure 2b. Former Epoch Truck Stop. Current Chevron and Arco service stations. Groundwater has been impacted by both facilities and is currently regulated as a comingled plume. The project water quality objectives have not been achieved to date.

APN 080-030-13, 3600 West Capitol Avenue, Figure 2e. Former Wabash National Trailers. Currently no identified name. Contamination from a wash rack system includes concentrations of tetrachloroethene (PCE) and trichloroethene (TCE) above regulatory screening levels. The site is currently in an active Monitoring and Reporting Program with CVRWQCB.

¹ BCI uses the term Recognized Environmental Condition (REC) in general but not strict compliance with ASTM E1527-13, which defines the meaning as “the presence or likely presence of any hazardous substances or petroleum products on a property under conditions that indicate an existing release, a past release, or a material threat of a release of any hazardous substances or petroleum products on the property or into the ground, ground water, or surface water of the property. The term includes hazardous substances or petroleum products even under conditions in compliance with laws. The term is not intended to include de minimus conditions that generally do not present a threat to human health or the environment and generally would not be the subject of an enforcement action if brought to the attention of the appropriate regulatory agencies. Conditions determined to be de minimus are not recognized environmental conditions.” BCI includes this definition to clarify conditions addressed in this ISA.

APN 067-120-70, 3069 West Capitol Avenue, Figure 2f. Former Lowe Dollar Dry Cleaners. Currently a vacant lot. Elevated levels of PCE from the former dry-cleaning machine were found in soil and groundwater samples. The case is an open site assessment as of July 2018.

APN 008-450-18, 2816 West Capitol Avenue, Figure 2g. Former Exxon. Current Sinclair's Shell service station. Groundwater has been impacted by petroleum hydrocarbons (TPH) and is currently regulated. Remediation by natural attenuation is ongoing and concentrations of TPH remaining in groundwater should reach their water quality goals by 2050. The project water quality objectives have not been achieved to date.

APN 008-441-04, 2500 West Capitol Avenue, Figure 2g. Former DarPetro. Currently Exxon service station. Existing petroleum impacts to soil and shallow groundwater. Water quality objectives have been nearly achieved for all constituents except degraded petroleum hydrocarbons. The case remains open and is eligible for closure.

APN 067-310-13, 1381 West Capitol Avenue, Figure 2j. Former Chevron Service Station. Current Walgreen parking lot. Groundwater has been impacted. The dissolved hydrocarbon plume is stable and shrinking and shows declining concentration trends. Degradation calculations indicate water quality objectives should be met by 2021 to 2023.

APN 067-310-30, 1351-1371 Merkley Avenue, Figure 2j. Currently Martial Arts, Betty's Beauty Salon. The site is listed in EDR Hist Cleaners database. Potential PCE and TCE plume.

APN 067-310-29, 1349 Merkley Avenue, Figure 2j. Currently City Massage. The site is listed in the EDR Hist Cleaners database. Potential PCE and TCE plume.

APN 067-310-28, 1331 Merkley Avenue, Figure 2j. Currently El Rancho Cleaners. A Phase II from a nearby site and on-site soil vapor studies indicate groundwater is impacted with PCE, TCE, and hydrocarbons. The plume model indicates significant impacts extend beneath Merkley Avenue.

APNs 067-310-25 and 067-310-26, 1231 Merkley Avenue, Figure 2j. Formerly H&H Cleaners. Currently Pooja Indian Grill. Investigation reports show subsurface concentrations of PCE are present in groundwater at concentrations ranging from 6,400 ug/l to 40,000ug/l.

Documented impacts to soil and/or groundwater are present on or have been remediated at the adjacent parcels. The twelve high-risk parcels have existing documentation that hazardous material impacts have or are likely to have extended beneath the project roadway improvement area. There is no evidence in the records review to suggest hazardous material issues from the other forty-two sites will impact the planned roadway improvement. Current project design and construction impacts will generally involve shallow disturbance of up to 5-feet below ground surface (bgs), therefore it is unlikely that any significant soil or groundwater impacts from adjacent sites, if present, will require Phase II assessment or mitigation, or will affect worker health and safety. Due to the age and complex development history of the project area, attempting to identify and quantify residual contamination from the forty-two parcels in advance of development would be of questionable value and difficult to accomplish.

Recommendations:

1. For the twelve high-risk parcels: If project improvements involve soil disturbance greater than 5-foot bgs or impact groundwater adjacent to these parcels, BCI recommends a Phase II assessment of soil and/or groundwater to the depth of construction within the project improvement area. Dependent on the results of assessment(s), mitigation of impacted soil and/or groundwater may be necessary and is discussed below.
2. For all parcels: If contaminated soil is generated in isolated situations it should be dealt with as a soil disposal issue during construction. Site excavations may also encounter contaminated groundwater that will need to be contained and disposed. During the Final Design phase, special provisions should be developed that address residual soil and groundwater contamination and how the soil and groundwater shall be handled during construction activities. The special provisions and requirement to prepare a soil and groundwater management plan should be included in the contractor's bid package. In addition, as impacts to the site from these adjacent properties have not been assessed, we recommend the Health and Safety Plan (HSAP) includes monitoring the work zone for appropriate chemicals adjacent to these parcels.

If plans for ROW or acquisition change to include one or more of the fifty-four parcels, further review and investigation of potential hazardous materials impacts will be necessary.

GENERAL CONTAMINATION/HAZARDOUS MATERIALS ISSUE

Our assessment identified the following general environmental conditions that should be considered for present and future planning for the proposed project.

Yellow Traffic Stripes

Yellow traffic stripes are known to contain heavy metals such as lead and chromium at concentrations in excess of the hazardous waste thresholds established by the California Code of Regulations and may produce toxic fumes when heated. Consequently, if removal of any yellow traffic striping is included in the project scope, it shall be removed and disposed of in accordance with Caltrans Standard Special Provisions for Hazardous Waste.

Aerially Deposited Lead (ADL)

The presence of ADL along the shoulders of pre-1987 constructed highways, freeways and other heavily traveled roads, is common due to emissions from vehicles powered by internal-combustion, leaded-gasoline fueled engines. For improvement work proposed within the ROW of West Capitol Avenue, the potential for ADL should be evaluated. An appropriate soil management plan will need to be developed for soil containing significant concentrations of ADL. If soils contain hazardous levels of ADL, removal and disposal at a Class 1 disposal facility may be necessary.

Transformers

The scope of this assessment did not include an inventory of past and present transformers. However, pole-mounted transformers and power lines were observed within the existing right-of-way. If the relocation of power facilities or high voltage power lines is required, existing transformers should be checked for the presence of PCBs or other hazardous materials by the utility owner, and if present, properly remediated and disposed. Identification and remediation of old transformers is the responsibility of the utility owner.

1 INTRODUCTION

Blackburn Consulting (BCI) completed this Initial Site Assessment (ISA) for the proposed West Capitol Avenue Roadway Rehabilitation Project (Project), located in West Sacramento, California. The purpose of this assessment is to identify recognized environmental conditions (RECs) ² and/or potential RECs within and adjacent to the proposed improvement area which could affect the design, constructability, feasibility, and/or the cost of the proposed project. We prepared this report in general conformance with ASTM E1527-13 *“Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process.”*

The purpose of the Project is to repair deteriorating pavement, complete scalloped street section, install drainage improvements, sidewalks, access ramps, signal modifications, separated/buffered bike lanes, street lighting, high visibility cross walks for safer pedestrian crossings and reduce unnecessary vehicular travel lanes for the segment of West Capitol Avenue from Highway I-80 to Enterprise Boulevard and Jefferson Boulevard from West Capitol to Park Boulevard. Project staging is proposed at APN 008-020-27 (partially vacant lot) north of West Capitol Avenue near the west side of the project limits. Additional right-of-way (ROW) acquisition is not anticipated.

To conduct this ISA, BCI:

- Conducted a site visit to observe current land use and indications of potential contamination, as well as hazardous and potentially hazardous waste issues for the project area and immediately adjacent parcels.
- Reviewed historical aerial photographic imagery, Sanborn® Map, and topographic map coverage of the site and surrounding properties to identify past and present land use for indications of potential sources of contamination.
- Performed federal, state, and county records review for indications of the use, misuse, or storage of hazardous and/or potentially hazardous materials on or near the project corridor. The federal, state, and county database search was provided by Environmental Data Resources, Inc. (EDR) of Shelton, Connecticut.
- Performed state records review of the on-line regulatory databases GeoTracker and EnviroStor, to determine if known site impacts and/or previous environmental work exist for the project area.
- Reviewed the general site geology, groundwater, and soil conditions through published maps and literature.

² BCI uses the term Recognized Environmental Condition (REC) in general but not strict compliance with ASTM E1527-13, which defines the meaning as *“the presence or likely presence of any hazardous substances or petroleum products on a property under conditions that indicate an existing release, a past release, or a material threat of a release of any hazardous substances or petroleum products on the property or into the ground, ground water, or surface water of the property. The term includes hazardous substances or petroleum products even under conditions in compliance with laws. The term is not intended to include de minimus conditions that generally do not present a threat to human health or the environment and generally would not be the subject of an enforcement action if brought to the attention of the appropriate regulatory agencies. Conditions determined to be de minimus are not recognized environmental conditions.”* BCI includes this definition to clarify conditions addressed in this ISA.

2 PROJECT DESCRIPTION AND LOCATION

The Project proposes to repair deteriorating pavement, complete scalloped street section, install drainage improvements, sidewalks, access ramps, signal modifications, separated/buffered bike lanes, street lighting, high visibility cross walks for safer pedestrian crossings and reduce unnecessary vehicular travel lanes for the segment of West Capitol Avenue from Highway I-80 to Enterprise Boulevard and Jefferson Boulevard from West Capitol to Park Boulevard. No ROW acquisition is anticipated.

Figure 1 presents the Vicinity Map and Figures 2a-k present the Site Plan.

2.1 Current Land Use

The project area consists of existing roadway and ROW associated with West Capitol Avenue, Jefferson Boulevard, Park Boulevard, Merkley Road, and the cross streets along West Capitol Avenue. Development on the north and south sides of the project area includes light industrial, industrial, service stations, commercial, retail and residential areas.

Existing roadway, curb, gutter and sidewalk areas are present along West Capitol Avenue and Jefferson Boulevard. Portions of West Capitol Avenue are not developed with curbs, gutters or sidewalks.

2.2 Topography and Drainage

The topography within and surrounding the project is generally flat with some gentle slopes and an average site elevation of 12 to 17 feet above mean sea level (msl) from west to east (Google Earth 2018 Maps, Imagery Date of 2018, West Sacramento, California). Natural surface water flow directions have been altered by existing roadway construction and structures, and is generally to surface gutter and drain systems adjacent to the existing roadway.

2.3 General Geologic Conditions

The site lies within the Great Valley Geomorphic Province of California, which is a large, elongated, northwest-trending structural trough. The Province is subdivided into two major divisions designated as the Sacramento and San Joaquin Valleys. These valleys have been filled to their present elevation with thick sequences of sediment, ranging in age from Jurassic to present day, creating a nearly flat-lying alluvial plain that extends from the Tehachapi Mountains in the south to the Klamath Mountains in the north. The western and eastern boundaries of this province are formed by the California Coast Ranges and the Sierra Nevada, respectively. The site is situated near the southern end of the northern-half (Sacramento Valley) of the Province.

Sediments in the area consist of unconsolidated continental deposits of silts and clays overlaying sand, silt and gravel alluvial fan deposits mapped by Wagner³ et al. (1981) as early Quaternary Turlock Lake Formation. These sediments overlay the Mehrten Formation, which consist of Miocene/Pliocene fragmented volcanic rocks. The study area is located on an alluvial plain bordered to the east by the Sacramento River.

³ Wagner, D.L. et al, "Geologic Map of the Sacramento Quadrangle, California", California Geological Survey, Map No. 1A, 1981, revised 1987.

2.4 Surface Water, Groundwater and Wells

The site is in the Sacramento Valley Groundwater Basin North American Subbasin. Depth to groundwater ranges from approximately 5 to 22 feet bgs and flows predominantly northwest. The nearest surface waters are the Turning Basin of the Deep-Water Ship Channel/Washington Lake to the south, Sacramento River to the east, and the toe drain of the Yolo Bypass to the west. The project limits extend for 3.5 miles from approximately 0.52 miles to 3.2 miles west of the Sacramento River.

Groundwater beneath the eastern portion of the project limits is hydraulically connected to the Sacramento River. Groundwater levels are presumed to fluctuate semiannually according to the river stage. BCI reviewed general groundwater level data made available at the DWR website www.water.ca.gov/waterdatalibrary. Depth to groundwater beneath the site fluctuates from approximately 5 to 22 feet below ground surface.

2.5 Historic Land Use

2.5.1 Aerial Photograph Review

BCI reviewed historical aerial photography to identify conditions that may indicate potential hazardous materials issues within or adjacent to the project limits. Copies of the Aerial photographs are in Appendix A. BCI reviewed the following aerial photos:

2016	1"=1000'	Flight Year: 2016	NAIP
2012	1"=1000'	Flight Year: 2012	NAIP
2009	1"=1000'	Flight Year: 2009	NAIP
2005	1"=1000'	Flight Year: 2005	NAIP
1998	1"=1000'	Acquisition: January 1, 1998	DOQQ
1984	1"=1000'	Flight Date: January 1, 1984	USDA
1972	1"=1000'	Flight Date: January 1, 1972	USDA
1966	1"=1000'	Flight Date: January 1, 1966	USGS
1957	1"=1000'	Flight Date: January 1, 1957	USDA
1947	1"=1000'	Flight Date: January 1, 1947	USDA
1937	1"=1000'	Flight Date: January 1, 1937	USDA

The following summary highlights our findings.

1937:

West Capitol Avenue is visible in its current alignment. Lake Washington is visible and extends under West Capitol Avenue. The surrounding area is agricultural land developed with row and hay crops. A large orchard is visible north of the Union Pacific railroad and a small orchard adjacent to the south side of West Capitol Avenue. Several rural farms are present adjacent to the north and south sides of West Capitol. The area to the southeast of the project area is undeveloped. Unimproved farm roads are visible surrounding agricultural fields.

1947:

A racetrack is visible north of West Capitol Avenue adjacent to Lake Washington. Additional improved roads intersect with West Capitol Avenue. The area southeast of the project has been partially developed with residential and rural farm developments.

1957:

Industrial development and a service station are visible west of the racetrack. One agricultural parcel and additional industrial sites north of West Capitol Avenue are located east of the racetrack. The area south of West Capitol Avenue is primarily residential. Jefferson Boulevard and I-50 exist in their current alignment. Multiple buildings are visible at Merkley Avenue.

1966:

Additional industrial sites and a trucking company are visible south of West Capitol Avenue. A large residential area is visible east of the trucking company. Washington Lake is drained. The east third of the project area is developed with industrial, commercial and residential structures. A service station is visible at the southeast corner of West Capitol Avenue and Jefferson Boulevard.

1972:

The trucking company is replaced by the addition of I-80 alignment. I-50 is widened to accommodate I-80 on and off ramps. A service station is visible at the west edge of the project limits.

1984:

The racetrack is removed. The parcel is undeveloped. A majority of the project alignment is developed with industrial, residential and commercial structures. Lake Washington is present and has been filled with water.

1998:

The racetrack parcel is developed with a large industrial building. Additional infill of residential, industrial and commercial structures along West Capitol Avenue and I-80 is visible.

2005:

The project alignment and surrounding parcels appear to be in their present-day development.

2009, 2012, 2016:

No significant changes to the project alignment or surrounding parcels.

2.5.2 Topographic Map Review

BCI reviewed topographic maps to identify conditions that may indicate potential hazardous materials issues within or adjacent to the project limits. Copies of the topographic maps are in Appendix B. Our review included 7.5-minute quad maps from 1916, 1948, 1949, 1967, 1975, 1980, 1992, and 2012 (West Sacramento), and 15-minute quad maps from 1907 and 1954 (West Sacramento). The following summary includes the changes we noted within and adjacent to the project limits as recorded on the maps:

1907 and 1916:

- West Capitol Avenue exists in its current alignment. The area surrounding the project is generally undeveloped land except for a *Pumping Plant* south of West Capitol Avenue.
- The Ogden and Eastern Line railroads exist in their current alignment.
- Washington Lake is unconstrained.

1948 and 1949:

- West Capitol Avenue exists in its current alignment and is identified as Highway 99/Highway 40. It is shown as a three-lane road from the west edge of the project limits, changing to a four-lane road east of Harbor Boulevard.
- A levee defines the Sacramento by-pass.
- The Ogden railroad is now the Pacific railroad.
- A racetrack exists between the railroad tracks and West Capitol Avenue south of Brytes Bend.
- Intersecting roadways and multiple structures are interspersed along the north and south sides of West Capitol Avenue.

1954:

- West Capitol Avenue is identified by name.
- Additional structures are present on the south side of West Capitol Avenue west of Lake Washington.
- A levee is identified north of Lake Washington.
- Interstate 80 (I-80) exists as a four-lane highway in its current alignment.
- Jefferson Boulevard exists in its current alignment.
- Sacramento Deep Water Channel is under construction

1967:

- Interstate 880 is identified as a proposed roadway.
- Jefferson Boulevard is identified as a roadway.
- Sacramento Deep Water Channel is completed and connects to the former Lake Washington. Lake Washington has been bisected, the north portion identified as a *Turning Basin* for the Channel and the south portion exists as Lake Washington.
- The Port of Sacramento is identified.
- Residential structures are identified south of West Capitol Avenue north of I-80.

1975 and 1980:

- Interstate 880 is identified as a roadway.

1992:

- Interstate 880 is renamed as Interstate 80 and Business 80.

2012:

- No additional features are identified.

2.5.3 Sanborn® Map Review

EDR provided Sanborn® Maps from 1960, 1968, and 1970 for available portions of the project and surrounding area. Appendix C contains copies of the Sanborn® Maps. The Sanborn Maps were

reviewed to look for evidence of hazardous materials conditions at or near the project corridor. The review summary below includes the noted significant development and changes within and adjacent to the project area as recorded on the maps:

1960:

- *Jefferson Boulevard, Merkley Avenue and West Capitol Avenue* are identified.
- *Oil and Gas* is identified at the northwest (APN 800-221-29) and southeast corner (APN 067-310-13) of the intersection of West Capitol Avenue and Jefferson Boulevard.
- *Oil and Gas* identified at the northeast corner (APN 008-221-38, -39) of West Capitol Avenue and Westacre Road.

1968:

- *Gas and Oil* is identified at the northeast corner (APN 067-310-19) of Jefferson Boulevard and Merkley Avenue.

1970: No significant changes.

3 RECORDS REVIEW

3.1 County, State and Federal Records Review

Environmental Data Resources, Inc. (EDR) provided a “Area/Corridor” report on August 3, 2018 for the project area. The report is included in Appendix D. The search includes a review of county, state, and federal databases for sites located within a 1-mile radius from the approximate outline of the project area. The EDR report includes a complete listing of the databases searched. Sites with adequate address information are plotted on EDR’s site plan “EDR Area/Corridor Focus Map”. EDR lists sites with inadequate address information as “orphan sites” and does not provide mapped locations. BCI reviewed the complete list of “orphan sites” identified by EDR and determined that the sites are not located within or adjacent to the project corridor. BCI also reviewed the web-based Geotracker and EnviroStor databases. Geotracker is the California State Water Resources Control Board (SWRCB) data management system for managing sites that impact groundwater, especially those that require treatment, such as underground storage tanks. EnviroStor is the California Department of Toxic Substance Control (DTSC) online database for identifying sites that have known contamination or sites for which there may be reason to investigate further.

3.2 Summary of Records Search

To generate this summary, BCI reviewed the databases for all sites listed within the searched area. The records review identified the following sites with potential hazardous material conditions at or adjacent to the project area.

3.2.1 Adjacent Parcels with Known and/or Potential RECs

APN 008-010-27, -23, 4900 West Capitol Avenue, Figure 2b. Former Shell Service Station. Currently a vacant lot. The site is identified on GeoTracker and is listed in the UST, LUST and HIST CORTESE databases.

Records indicate an unauthorized release of petroleum hydrocarbons at the site. Gasoline hydrocarbons were detected in soil and groundwater in 2004 during removal of the underground storage tank (UST) system. Investigations indicated low concentrations of TPH and MTBE remain beneath the site. It was determined that after natural attenuation these concentrations do not adversely impact groundwater quality. A finding of no further action (NFA) was issued in 2011.

APN 067-010-38, (APN 067-010-04 obsolete), 4891 (4825 obsolete) West Capitol Avenue, Figure 2b. Former Amerigas and UnoCal service station site. Currently Caltrans Park and Ride and I-80 off-ramp. The site is identified on GeoTracker and is listed in the UST, LUST, HIST UST, CERS, EDR Hist Auto, and HIST CORTESE databases.

A portion of the site (APN 067-010-04) was developed as the I-80 off-ramp. Prior to 1995, two gasoline USTs and one waste oil UST were removed from the site. Gasoline fuel impacted soil was removed at the time of tank removal. From 1997 to 2010 soil and groundwater investigations were conducted to assess the extent of gasoline hydrocarbons detected in soil and groundwater. Groundwater monitoring ultimately indicated the gasoline previously detected had naturally attenuated and was not present in groundwater at or above reporting limits. A finding of NFA was issued in 2012.

APN 008-010-19, -31, 4790 and 4800 West Capitol Avenue, Figure 2b. Former Epoch Truck Stop. Current Chevron and Arco service stations. The site is identified on GeoTracker and is listed in the UST, LUST, HAZNET, HIST UST, CERS, HIST CORTESE, and EDR Hist Auto databases.

Records indicate an unauthorized release of petroleum hydrocarbons at the site was discovered in 1993 during replacement of three gasoline USTs and three diesel USTs at Epoch. Soil and groundwater from the tank excavation were removed and twenty monitoring wells were installed. Various pilot tests were conducted before 2006 to evaluate remediation alternatives. An unauthorized release was also reported at the Chevron station in 1988 following removal of a waste oil tank. In 1998, Chevron removed and replaced three gasoline USTs. Approximately 2,800 cubic yards of contaminated soil were excavated and removed from the site. Approximately 390,000 gallons of contaminated groundwater were pumped from the UST pit. Eleven groundwater monitoring wells were installed. In June 2009, both sites agreed to be placed into commingled plume status. Beginning in 2009 a Dual-Phase Extraction system was installed and has operated. The system is connected to extraction wells on both sites. The water quality objectives have not been achieved to date. The LUST case is currently open.

APN 067-060-01, -02, -03, 4521 (4551, 4601) West Capitol Avenue, Figure 2b. Former Continental Heller Site. Currently Ryder Vehicle Sales and Porter Group USA. The site is identified on GeoTracker and is listed in the UST, HIST UST, RGA LUST, HAZNET, LUST, FINDS, BROWNFIELDS, CERS, and HIST CORTESE databases.

Records indicate a UST was located on site. A leak was reported in October 1988 and the site was entered into the leaking underground storage tank (LUST) database. The site was assessed, and the case was closed in March 2000. A finding of NFA was issued in 2000.

Site reconnaissance (BCI, August 2018) identified one above ground storage tank (AST) and one 55-gallon drum on the Porter Group USA property.

APN 067-060-05, 4235- 4275 West Capitol Avenue, Figure 2d. Currently Mayer Equipment. No Former site listed. The site is listed in the RCRA ENVIROSTOR, FINDS, ECHO, and HAZNET databases.

Records indicate the property was developed between 1951 and 1961. Two of the three original buildings were demolished between 1995 and 2005. A previous ESA indicated on-site fill is contaminated with Lead and TPH-mo.

APN 067-060-06, 4203-4225 West Capitol Avenue, Figure 2d. Currently B&B Tires and Ortega's West Night Club. No Former site listed. The site is listed in the HIST UST, BROWNSFIELDS, and FINDS databases. No information is provided in the database listings.

Site reconnaissance (BCI, August 2018) identified one 55-gallon drum on the B&B Tires property.

APN 008-020-22, 4200-4230 West Capitol Avenue, Figure 2d. Former Roadway Express. Currently Estes Trucking. The site is identified on GeoTracker and is listed in the UST, LUST, EMI, RCRA, CERS, and CHMIRS databases.

In 2004, one waste oil and three diesel USTs and associated piping and fueling islands were removed. During tank removal, impacted soil was over-excavated and removed from site. Following installation of two new USTs in 2008, monitoring wells were installed in the vicinity of the former USTs. Based on soil and groundwater monitoring data a finding of NFA was issued in 2009.

APN 067-060-08, 4101 West Capitol Avenue, Figure 2d. Former Hayshida/Buffalo Machinery site. Currently Dan Dewald Truck & Repair, Ideal Tractor, and Nichelini Engineering/Contractor. The site is identified on GeoTracker and is listed in the UST, LUST, RGA LUST, HAZNET, FINDS, BROWNFIELDS, CERS, and HIST CORTESE databases.

Records indicate one UST was located on site. A leak was reported in July 1990 and the site was entered into the LUST database. The site was assessed, and the case was closed in February 1997. Site inspection identified two 55-gallon drums on the Ideal Tractor property.

APN 080-030-17, 3610 West Capitol Avenue, Figure 2e. Former Lend-Lease Truck Company. Currently Epiroc and Capitol Tire. The site is identified on GeoTracker and is listed in the UST, LUST, HIST UST, HIST CORTESE, FINDS and CERS databases.

In 1987, overfill of a diesel UST was reported. The site was assessed, and no remedial actions noted in the records. The case was closed in 1997. No additional information was provided in the records search.

Site reconnaissance (BCI, August 2018) inspection identified one 55-gallon drum on the Epiroc property.

APN 080-030-13, 3600 West Capitol Avenue, Figure 2e. Former Wabash National Trailers. Currently no identified name, adjacent/east of Capitol Tire. The site is identified on GeoTracker.

During the 1960-1980's wastewater from a wash rack system used to service trailers was discharged to a currently unused on-site septic system in the northwestern corner of the site. Drains at the two on-site wash areas reportedly discharged to the leach field for 20 years until the property was connected to the City sewer system in the late 1960's. In the early 1990's contaminants were detected in soil and groundwater beneath the site and included gasoline, diesel, and VOCs (PCE, TCE, and DCE). Ten groundwater monitoring wells were installed over six years. In 2008, remedial soil excavation and limited soil gas sampling revealed high concentrations of PCE and TCE above regulatory screening levels.

The site is currently in an active Monitoring and Reporting Program with the California Regional (Central Valley) Water Quality Control Board (CVRWQCB).

APN 008-030-9, 3512 West Capitol Avenue, Figure 2e. Currently JS Cole. No Former site name is listed. The site is listed in the Hist UST, AST and HAZNET databases. No information is provided in the database listings.

Site reconnaissance (BCI, August 2018) identified one 55-gallon drum.

APN 008-061-07, 3300 West Capitol Avenue, Figure 2f. Currently Wantz Equipment. No Former site name listed. The site is listed in the Hist UST, UST, RCRA, and CERS databases. No information is provided in the database listings.

Site reconnaissance (BCI, August 2018) identified two above ground storage tanks (ASTs) and two 55-gallon drums.

APN 067-120-20, 3217-3225 West Capitol Avenue, Figure 2f. Currently Apostolic Faith Tabernacle. No Former site name listed. The site is listed in the EDR HIST Cleaner database. No information is provided in the database listing.

APN 008-401-12, 3208 West Capitol Avenue, Figure 2f. Currently a brick building with no identification. No Former site name listed. The site is listed in the HIST UST, UST, HWT, HAULERS, FINDS, RCRA, and CERS databases. No information is provided in the database listings.

APN 067-120-17, 3201 West Capitol Avenue, Figure 2f. Currently DeSilva Gates Construction. No Former site name is listed. The site is listed in the AST, HAZNET, NPDES, FINDS, CERS, CIWQS, and CERS TANKS databases. No information is provided in the database listings.

Site reconnaissance (BCI, August 2018) identified three 55-gallon drums inside the open garage.

APN 008-382-01, 3100 West Capitol Avenue, Figure 2f. Currently Dansmission Towing. No Former site name is listed. The site is listed in the HIST UST database. No information is provided in the database listing.

APN 067-120-14, 3085 West Capitol Avenue, Figure 2f. Currently Good Year. No Former site name listed. The site is listed in the UST, HIST UST, HAZNET, FINDS, CERS, and CERS HAZWASTE databases. No information is provided in the database listings.

APN 067-120-47, 3075 West Capitol Avenue, Figure 2f. Currently a vacant building with no identification. Former Wing Lee Meats. The site is identified on GeoTracker and is listed in the UST, LUST, RGA LUST, HAZNET, HIST CORTESE, FINDS, and CERS databases.

A UST leak was reported in 1991 and the site was entered into the LUST database. The site was assessed, and the case was closed in 1996.

APN 067-120-70, 3069 West Capitol Avenue, Figure 2f. Currently a vacant building. Former Lowe Dollar Dry Cleaners. The site is identified on GeoTracker and is listed in the EDR Hist Cleaner, FINDS and EMI databases. A Phase II Environmental Site Assessment was completed in 2007. The investigation

included three borings around the former dry-cleaning machine and one boring at the rear parking for upgradient analysis. The borings were drilled to 15 feet below ground surface (bgs). Groundwater was encountered at 13 feet bgs. Elevated levels of PCE were found in all soil and groundwater samples. The case is an open site assessment as of July 2018. No additional assessment has been completed due to the Phase II recommendation that the PCE results were due to regional groundwater contamination.

APN 008-382-02, 3050 West Capitol Avenue, Figure 2f. Currently Sacramento Lumber Company. No Former site name listed. The site is listed in the ENVIROSTOR database. No information is provided in the database listing.

APN 008-383-08, 724 Harbor Boulevard, Figure 2g. Former Haring Property. Currently Lodi Truck and Equipment. The site is identified on GeoTracker and is listed in the UST, LUST, HIST CORTESE, and CERS databases.

Records indicate a UST was located on site. A UST leak was reported in January 1992 and the site was entered into the LUST database. The site was assessed, and the case was closed in January 1996. No additional information was provided in the database search.

APN 008-450-18, 2816 West Capitol Avenue, Figure 2g. Former Exxon. Current Sinclair's Shell service station. The site is identified on GeoTracker and is listed in the UST, LUST, HIST CORTESE, BROWNFIELDS, CERS, RCRA, FINDS and EDR Hist Auto databases.

The site is an active service station with multiple dispenser islands and four double-wall USTs. In 1986 three gasoline USTs, and one diesel UST, were replaced with a new UST system. No records of the UST removal activity exist. In 1999, the fueling area runoff collection system was replaced. Diesel and gasoline hydrocarbons were detected in soil and groundwater and investigations began in 1989. Free product was reported on groundwater beneath the site from 1990 through 2005. Groundwater investigations indicated the plume extended to offsite locations. Multiple phases of assessment have been conducted at the site starting in 1986 through present including the installation of 27 wells and a soil vapor survey. A combination of technologies including soil vapor extraction, air sparging, groundwater extraction, and dual phase extraction have operated intermittently since 1992. A small plume with relatively low concentrations of TPHd, TPHg, and MTBE remain beneath the site. According to regulatory data, natural attenuation processes are occurring and concentrations of TPH remaining in groundwater should reach their water quality goals by 2050. The project water quality objectives have not been achieved to date. Based on soil and groundwater monitoring data a finding of NFA was issued in 2012.

APN 008-450-17, 2620-2630 West Capitol Avenue, Figure 2g. Current Toyota Vlands Toys Inc. The site is identified on GeoTracker and is listed in the LUST, BROWNFIELDS, CERS, and FINDS databases. In 2005, a UST filled with inert material was discovered during a site investigation. Petroleum hydrocarbons as diesel and motor oil were detected in grab groundwater samples. Subsequent investigations indicated trace concentrations of MTBE in groundwater; other gasoline constituents were not detected. Because the remaining concentration levels do not adversely impact groundwater quality at the subject and adjacent properties, a finding of NFA was issued in 2012.

APN 008-462-02, 2500 West Capitol Avenue, Figure 2g. Former Redwood Motel and Vientane Restaurant. Currently the site is vacant. The site is identified on GeoTracker and is listed in the UST, LUST, and CERS databases.

During site demolition in 2007, two undocumented USTs were encountered near the southern site boundary. Responding Fire Department personnel informed the owner that the site was occupied by a service station prior to being a motel and restaurant. The two USTs were removed in 2007. TPHg and TPHd were detected in soil collected beneath the UST excavation. A third UST was encountered in the southeast corner of the excavation. Following removal of the third tank, over excavation was completed and more impacted soil (TPHs and several petroleum related VOCs) was encountered. Additional excavation and subsurface investigation was conducted. Groundwater plume maps indicated the center of the plume was east of the site. It was determined that the facility (Darpetro USA Gas Facility) located at 2434 West Capitol Avenue was the primary source of a majority of the contamination. Based on soil and groundwater monitoring data, a finding of NFA was issued in 2010.

APN 008-441-04, 2434 West Capitol Avenue, Figure 2g. Former DarPetro. Currently Exxon service station. The site is identified on GeoTracker and is listed in the UST, LUST, HIST UST, BROWNFIELDS, HIST CORTESE, CORTESE, CERS, and EMI databases.

An unauthorized release was reported in 1993 following the removal of three gasoline USTs. Since 1995, twenty-six groundwater monitoring wells have been installed. Hydrogen peroxide sparging was conducted between April and July 2014. According to groundwater data, water quality objectives have been nearly achieved for all constituents except degraded petroleum hydrocarbons. The petroleum release is limited to the soil and shallow groundwater. The remaining hydrocarbon constituents are limited and stable and concentrations decreasing. Based on soil and groundwater monitoring data through June 2016, a finding of NFA was recommended. The case remains open and is eligible for closure.

APN 067-210-51, 2415 West Capitol Avenue, Figure 2g. Former Terminal Muffler Garage. Currently Muffler Express. The site is identified on GeoTracker and is listed in the RGA LUST, LUST, HIST UST, BROWNFIELDS, HIST CORTESE, CERS, and FINDS databases.

Two gasoline USTs were removed from the site in 1987. Details of the tank removal are not available. Upon removal of the tanks, it was determined that soil in the bottom of the tank excavation was impacted with gasoline. From 1989 to 1992, a series of assessments and groundwater monitoring events were conducted. In 1993 a pilot study of Air Sparging – Vapor Extraction was conducted to assess remediation effectiveness. The Vapor Extraction was not successful and additional site assessment was conducted. By 1997, the extent of gasoline impact to the soil and groundwater had been relatively well defined. It was determined that the extent of gasoline impacted soil remains above and within a confining aquitard. The aquitard appears to have limited the migration of gasoline downward to the confined aquifer at approximately 17 feet bgs. The site was recommended for low risk site closure. A finding of NFA was issued in August 1997.

Site reconnaissance (BCI, August 2018) identified one 55-gallon drum inside the open garage.

APN 008-192-09, -10, 2200 West Capitol Avenue, Figure 2h. Current 1 Stop Smoke Shop and Affordable Mobility/Medical. The site is listed in the EDR Hist Cleaners, BROWNFIELDS, and FINDS databases. No additional information was identified in the record search.

APN 008-473-23, 1840 West Capitol Avenue, Figure 2i. Former Food and Liquor Store #119. Current Poplar Gas, Food and Liquor. The site is identified on GeoTracker and is listed in the EDR Hist Auto, FINDS, and BROWNFIELDS databases.

In 1985 the pipeline integrity test for the UST system failed a leak test at the former Kayo Oil Company/Conoco Jet Gas Station. In 1986 gasoline hydrocarbons were detected after the UST system was removed from the adjacent Food and Liquor Store #119. Soil and groundwater investigations began in 1986 and identified gasoline hydrocarbons in shallow groundwater but not in soil above the groundwater. In 1990 the old UST system was removed from the Kayo station and a new one installed. The gasoline hydrocarbon plume beneath the site and MTBE plume that migrated offsite have been defined and are now stable. After contaminated groundwater was removed from the two former UST cavities, natural attenuation has reduced concentrations in groundwater, and based on regulatory information, the decreasing concentration trend indicates project water quality goals will be achieved within 10 years. A finding of NFA was issued in August 2011.

APN 008-473-25, 1750 West Capitol Avenue, Figure 2i. Former U-Haul. Current U-Haul. The site is identified on GeoTracker and is listed in the LUST, HIST UST, UST, BROWNFIELDS, EDR Hist Auto, CERS, and HIST CORTESE databases.

Records indicate a UST was located on site. A UST leak was reported in December 1993 and the site was entered into the LUST database. No additional information was provided in the database search.

APN 067-270-06, 1725 West Capitol Avenue, Figure 2i. Former Sacramento Generator Site. The site is currently a vacant lot. The site is identified on GeoTracker and is listed in the LUST, RGA LUST, UST, BROWNFIELDS, HAZNET, and FINDS databases.

The site was previously used for light industrial purposes any may have been a service station. In December 1988 three gasoline and/or diesel USTs were removed. Petroleum hydrocarbons were detected in soil samples collected beneath the former USTs. From 1989 through 1991 a preliminary investigation to characterize the site was requested by the lead regulatory agency, but the owner did not comply. In 1991, the City as part of redevelopment work along West Capitol Avenue had a sub-surface assessment completed. Soil Samples indicated TPHg and benzene at elevated levels. The site was placed in the State Water Resources Control Board's Emergency, Abandoned, and Recalcitrant (EAR) program because the owner was deceased. In 2005, the City obtained the deed to the property. From 2006 to 2013 additional investigations were conducted and remediation consisted of Dual Phase Extraction, groundwater extraction, air sparging and bioventing, injection of chemical oxidants and natural attenuation processes. Natural attenuation processes continue, and evaluation of concentration trend indicate that gasoline hydrocarbons in groundwater will reach their respective project water quality objectives by 2019. It was determined that site conditions meet closure criteria under low threat closure and a finding of NFA was issued in October 2014. Contamination extended beneath West Capitol Avenue.

APN 067-270-07, -47, 1705 West Capitol Avenue, Figure 2i. Former BP Service Station. Current Pacific Gas and Sinclair Dinosaur Gas. The site is identified on GeoTracker and is listed in the BROWNFIELDS, UST, LUST, CERS, EDR Hist Auto, RCRA, and FINDS databases.

Three gasoline USTs were removed, and one waste oil UST was abandoned in place in 1990. From 1990 to 1993 a series of site investigations were conducted by various consultants. Although there was no

effort to thoroughly define the extent of the petroleum impacts, the records state there was enough data to indicate that the occurrence of subsurface contamination was spotty and minor in nature. The potential source (USTs) were removed and identified contamination did not pose a significant threat to health or water resources. It was determined that site conditions met closure criteria and a finding of NFA was issued in October 1997.

Site reconnaissance (BCI, August 2018) identified construction for expansion on the property.

APN 008-221-38, -39, 1648 West Capitol Avenue, Figure 2i. Former Quik Stop Market. Current Kwik Mart. The site is identified on GeoTracker and is listed in the LUST, HIST UST, UST, BROWNFIELDS, EDR Hist Auto and FINDS databases.

In 1996, three USTs and piping were removed from the site. As a result of soil and groundwater sampling conducted during the UST removal, it was determined that an unauthorized release from one or more of the USTs had occurred. Investigation activities were initiated in early 2000. From 2000 to 2004 several investigations were conducted including installation of nine soil borings and sixteen monitoring and extraction wells. Two of the monitoring wells were converted to extraction wells. In 2007 a Dual Phase Extraction test was conducted and based on results a soil vapor extraction system was to be implemented. However, the next round of groundwater sampling indicated that the impacts were naturally degrading over time. As a result, it was determined that natural attenuation was appropriate for the site and water quality objectives are estimated to be met by 2014. However, further evaluation indicated site conditions meet closure criteria under low threat closure and a finding of NFA was issued in April 2011.

Site reconnaissance (BCI, August 2018) identified gas lines and either tree sap or oil stains in the parking lot.

APN 067-310-77, 1401 West Capitol Avenue, Figure 2j. Former Exxon Service Station. Current Capital Gas Mart. The site is identified on GeoTracker and is listed in the LUST, HIST UST, UST, BROWNFIELDS, EDR Hist Auto, CERS, and FINDS databases.

Three groundwater monitoring wells were installed in 1998 to assess subsurface site conditions prior to a property transfer. The analytical results of soil and groundwater samples indicated no elevated levels of tested constituents in soil samples and only benzene and MTBE were detected in groundwater. A second investigation of two used oil USTs that had been abandoned in place was conducted. No indications of a release were identified. During product distribution line and dispenser upgrade in 1998, additional soil samples were collected. In 2000 additional groundwater sampling was completed prior to approval for well destruction. Results of the sampling indicated conditions met project water quality objectives and a finding of NFA was issued in November 2001.

Site reconnaissance (BCI, August 2018) identified USTs. No unauthorized releases were reported in the regulatory data base.

APN 008-221-29, -44, 1400 West Capitol Avenue, Figure 2j. Former Redwood Oil Service Station. Current AutoZone. The site is identified on GeoTracker and is listed in the LUST, HIST CORTESE, BROWNFIELDS, and CERS databases.

In 1985 three USTs were removed from the site. Two were documented to be pitted and leaking. Contaminated soil was not removed. Soil and groundwater were sampled for hydrocarbons. A range of

hydrocarbon contaminants were identified in soils and free-floating product was identified in groundwater. In 1986, the former tank area was re-excavated to fourteen feet deep. Excavated soil was remediated by aeration on-site and reused. In May 1986 a groundwater extraction and treatment system was installed with treated effluent being discharged to the city sewer. A new groundwater extraction and treatment system was installed in 1987 and operated until 1989. Hydrocarbons were not detected from 1993 to 1995. Based on the levels of contaminants remaining in soil after over-excavation and the non-detect levels of contaminants in groundwater samples, a request for site closure was made. Results of the sampling indicated conditions met water quality objectives and a finding of NFA was issued in July 1997.

APN 067-310-13, 1381 West Capitol Avenue, Figure 2j. Former Chevron Service Station. Current Walgreen parking lot. The site is identified on GeoTracker and is listed in the LUST, HIST UST, UST, BROWNFIELDS, EDR Hist Auto, CERS, HIST CORTESE, and FINDS databases.

The former station included three gasoline USTs and one waste oil UST. Records indicate the USTs and all associated piping were removed in 1984 when the station was demolished. No information regarding the UST removal was located. Several investigations have been conducted at the site since 1986. Groundwater monitoring and remediation wells, and soil vapor wells, were installed. Impacted soil was excavated from the site during UST removal. Over a 24-year period twenty-five wells were installed to monitor groundwater conditions on and off site. Groundwater beneath the site flows south to southeast. The dissolved hydrocarbon plume is stable and shrinking and show declining concentration trends. Degradation calculations show water quality objectives should be met by 2021 to 2023. It was determined that site conditions meet closure criteria under low threat closure and a finding of NFA was issued in April 2012.

APN 067-310-19, 849 Jefferson Boulevard, Figure 2j. Former Oil and Gas. Current Café La Bou and H&R Block. The site is identified on Sanborn Maps in 1968 and 1970. Do additional information was identified in the records search.

APN 067-290-07, 1420 Merkley Avenue, Figure 2j. Currently a vacant lot and River Point Insurance. The site is listed in the EDR Hist Cleaners database. No additional information was identified in the records search.

APN 067-310-30, 1351-1371 Merkley Avenue, Figure 2j. Currently Martial Arts and Betty's Beauty Salon. The site is listed in ENVIROSTOR, BROWNFIELDS, FINDS, and EDR Hist Cleaners databases. No additional information was identified in the records search.

APN 067-310-29, 1349 Merkley Avenue, Figure 2j. Currently City Massage. The site is listed in the EDR Hist Cleaners database. No additional information was identified in the records search.

APN 067-310-28, 1331 Merkley Avenue, Figure 2j. Currently El Rancho Cleaners. The site is identified on GeoTracker and is listed in the EDR Hist Cleaners, DRYCLEANERS, CPS-SLIC, CERS, EMI, and HAZNET databases.

In 2001, an inspection by Yolo-Solano Air Quality Management District (AQMD) was conducted at the property. Subsurface contamination levels were detected by the AQMD inspector using a PID monitor. A Phase II from a nearby site indicated that groundwater is impacted with tetrachloroethene (PCE),

trichlorethene (TCE), and hydrocarbons. A soil vapor study was conducted in 2002. Based on analytical results for soil vapor samples, PCE has impacted groundwater beneath the site. The extent of the plume has not been defined. The sewer line associated with the site is the suspected conduit of travel. The plume model indicates significant impacts extend beneath Merkley Avenue.

APN 067-310-25, -26, 1231 Merkley Avenue, Figure 2j. Formerly H&H Cleaners. Currently Pooja Indian Grill. The site is identified on GeoTracker and is listed in the EDR Hist Cleaners, DRYCLEANERS, SLIC, EMI, and HAZNET, ENVIROSTOR, CERS, RCRA, and FINDS databases.

As of June 2016, assessment of lateral and vertical extent of a release of the dry-cleaning solvents PCE and TCE from the site was on-going. Investigation reports show the subsurface concentrations of PCE are greatest in the southern portion of the building and that PCE is present in groundwater at concentrations ranging from 6,400 ug/l to 40,000ug/l. Additional subsurface delineation and interim remediation has been described in a new work plan and proposes a soil vapor extraction pilot study to evaluate the potential for soil vapor treatment at the site. An unconnected investigation of a nearby site north of Merkley Avenue also indicated soil vapor containing PCE was present.

APN 067-310-31, 831 Jefferson Boulevard, Figure 2j. Currently Midas Auto. The site is identified on GeoTracker and is listed in the LUST, HIST CORTESE, EDR Hist Auto and CERS databases. No additional information was identified in the records search.

Site reconnaissance (BCI, August 2018) identified seven 55-gallon drums, an overpacked drum, hydraulic lift, and a five-bay auto shop.

APN 067-310-20, 827 Jefferson Boulevard, Figure 2j. Currently Boost Mobile. The site is listed in the ENVIROSTOR and EDR Hist Cleaner databases. No additional information was identified in the records search.

APN 058-014-09, 917 Jefferson Boulevard, Figure 2k. Currently AT&T. The site is identified on GeoTracker and is listed in the HIST UST, AST, UST, CERS, RCRA, and FINDS databases. No additional information was identified in the records search; however, GeoTracker identified a permitted UST.

APN 058-011-11, 900 Jefferson Boulevard (900 West Park), Figure 2k. Former Exxon Service Station. Currently Cali-Smoke Shop, Taqueria, and Cash Advance. The site is identified on GeoTracker and is listed in the HIST UST, CERS, LUST, HIST CORTESE, SWEEPS, UST and CA FID UST databases.

In 1986 three gasoline USTs and one waste oil UST were removed from the site. Water was encountered at the bottom of the gasoline UST pit. No water was encountered beneath the waste oil UST excavation. Soil samples from beneath the waste oil tank were non-detect for total petroleum hydrocarbons as TPHg, TPHd, and BTEX constituents. Groundwater was impacted with all tested constituents. In 1989 the owner stated he believed hydrocarbons were spilled into the former pit during tank removal. Subsequent sampling indicated non-detect and low levels of groundwater impacts. Site closure was recommended in 1989, however all of the monitoring wells could not be located. Additional sampling was completed in 2004 and confirmed small amounts of gasoline hydrocarbons remain in groundwater. All concentrations of hydrocarbons are below their environmental screening levels. An NFA determination was recommended and issued in August 2005.

3.3 Title Documents Review

BCI was not provided title documents for this assessment.

4 RECONNAISSANCE INFORMATION

4.1 Subject Property Reconnaissance

BCI completed a site reconnaissance on August 28-29, 2018. Observations were made from within and adjacent to the study area. Photos from the site visit are in Appendix E. Our observations generally support the land use descriptions and background data. Additional observations are presented in Section 3.2.1 and are described according to parcel.

5 FINDINGS, CONCLUSIONS AND RECOMMENDATIONS

The scope of this ISA was directed at a determination of whether there may be hazardous materials at or near the project area at concentrations likely to warrant mitigation pursuant to regulations, and to identify sites with RECs and/or potential RECs within and adjacent to the proposed improvement area which could affect the design, constructability, feasibility, and/or the cost of the proposed project. BCI identified the following potential hazardous materials issues within and adjacent to the proposed improvement area.

5.1 Acquisition Parcels with Known and/or Potential RECs

Findings: Fifty-four parcels located immediately adjacent to the project improvements were identified with hazardous material conditions. These sites are discussed in Section 3.2.2 and are identified on Figures 2a-2k. Of the fifty-four parcels, twelve have a high risk that groundwater and/or soil impacts resultant of historical releases from the adjacent parcels have extended beneath the project roadway improvement area. The twelve high-risk parcels include:

APNs 008-010-19 and 008-010-31, 4790 and 4800 West Capitol Avenue, Figure 2b. Former Epoch Truck Stop. Current Chevron and Arco service stations. Groundwater has been impacted by both facilities and is currently regulated as a comingled plume. The project water quality objectives have not been achieved to date.

APN 080-030-13, 3600 West Capitol Avenue, Figure 2e. Former Wabash National Trailers. Currently no identified name. Contamination from a wash rack system includes concentrations of PCE and TCE above regulatory screening levels. The site is currently in an active Monitoring and Reporting Program with CVRWQCB.

APN 067-120-70, 3069 West Capitol Avenue, Figure 2f. Former Lowe Dollar Dry Cleaners. Currently a vacant lot. Elevated levels of PCE from the former dry-cleaning machine were found in soil and groundwater samples. The case is an open site assessment as of July 2018.

APN 008-450-18, 2816 West Capitol Avenue, Figure 2g. Former Exxon. Current Sinclair's Shell service station. Groundwater has been impacted by TPH and is currently regulated. Remediation by natural attenuation is ongoing and concentrations of TPH remaining in groundwater should reach their water quality goals by 2050. The project water quality objectives have not been achieved to date.

APN 008-441-04, 2500 West Capitol Avenue, Figure 2g. Former DarPetro. Currently Exxon service station. Existing petroleum impacts to soil and shallow groundwater. Water quality objectives have been nearly achieved for all constituents except degraded petroleum hydrocarbons. The case remains open and is eligible for closure.

APN 067-310-13, 1381 West Capitol Avenue, Figure 2j. Former Chevron Service Station. Current Walgreen parking lot. Groundwater has been impacted. The dissolved hydrocarbon plume is stable and shrinking and shows declining concentration trends. Degradation calculations indicate water quality objectives should be met by 2021 to 2023.

APN 067-310-30, 1351-1371 Merkley Avenue, Figure 2j. Currently Martial Arts, Betty's Beauty Salon. The site is listed in EDR Hist Cleaners database. Potential PCE and TCE plume.

APN 067-310-29, 1349 Merkley Avenue, Figure 2j. Currently City Massage. The site is listed in the EDR Hist Cleaners database. Potential PCE and TCE plume.

APN 067-310-28, 1331 Merkley Avenue, Figure 2j. Currently El Rancho Cleaners. A Phase II from a nearby site and on-site soil vapor studies indicate groundwater is impacted with PCE, TCE, and hydrocarbons. The plume model indicates significant impacts extend beneath Merkley Avenue.

APNs 067-310-25 and 067-310-26, 1231 Merkley Avenue, Figure 2j. Formerly H&H Cleaners. Currently Pooja Indian Grill. Investigation reports show subsurface concentrations of PCE are present in groundwater at concentrations ranging from 6,400 ug/l to 40,000ug/l.

Documented impacts to soil and/or groundwater are present on or have been remediated at the adjacent parcels. The twelve high-risk parcels have existing documentation that hazardous material impacts have or are likely to have extended beneath the project roadway improvement area. There is no evidence in the records review to suggest hazardous material issues from the other forty-two sites will impact the planned roadway improvement. Current project design and construction impacts will generally involve shallow disturbance of up to 5-foot bgs, therefore it is unlikely that any significant soil or groundwater impacts from adjacent sites, if present, will require Phase II assessment or mitigation, or will affect worker health and safety. Due to the age and complex development history of the project area, attempting to identify and quantify residual contamination from the forty-two parcels in advance of development would be of questionable value and difficult to accomplish.

Recommendations:

1. For the twelve high-risk parcels: If project improvements involve soil disturbance greater than 5-foot bgs or impact groundwater adjacent to these parcels, BCI recommends a Phase II assessment of soil and/or groundwater to the depth of construction within the project improvement area. Dependent on the results of assessment(s), mitigation of impacted soil and/or groundwater may be necessary and is discussed below.
2. For all parcels: If contaminated soil is generated in isolated situations it should be dealt with as a soil disposal issue during construction. Site excavations may also encounter contaminated groundwater that will need to be contained and disposed. During the Final Design phase, special provisions should be developed that address residual soil and groundwater contamination and how the soil and groundwater shall be handled during construction

activities. The special provisions and requirement to prepare a soil and groundwater management plan should be included in the contractor's bid package. In addition, as impacts to the site from these adjacent properties have not been assessed, we recommend the Health and Safety Plan (HSAP) include monitoring the work zone for appropriate chemicals adjacent to these parcels.

If plans for ROW or acquisition change to include one or more of the fifty-four parcels, further review and investigation of potential hazardous materials impacts will be necessary.

GENERAL CONTAMINATION/HAZARDOUS MATERIALS ISSUE

Our assessment identified the following general environmental conditions that should be considered for present and future planning for the proposed project.

Yellow Traffic Stripes

Yellow traffic stripes are known to contain heavy metals such as lead and chromium at concentrations in excess of the hazardous waste thresholds established by the California Code of Regulations and may produce toxic fumes when heated. Consequently, if removal of any yellow traffic striping is included in the project scope, it shall be removed and disposed of in accordance with Caltrans Standard Special Provisions for Hazardous Waste.

Aerially Deposited Lead (ADL)

The presence of ADL along the shoulders of pre-1987 constructed highways, freeways and other heavily traveled roads, is common due to emissions from vehicles powered by internal-combustion, leaded-gasoline fueled engines. For improvement work proposed within the ROW of West Capitol Avenue, the potential for ADL should be evaluated. An appropriate soil management plan will need to be developed for soil containing significant concentrations of ADL. If soils contain hazardous levels of ADL, removal and disposal at a Class 1 disposal facility may be necessary.

Transformers

The scope of this assessment did not include an inventory of past and present transformers. However, pole-mounted transformers and power lines were observed within the existing right-of-way. If the relocation of power facilities or high voltage power lines is required, existing transformers should be checked for the presence of PCBs or other hazardous materials by the utility owner, and if present, properly remediated and disposed. Identification and remediation of old transformers is the responsibility of the utility owner.

6 QUALIFICATIONS

This ISA was prepared by Laura Long. I declare that, to the best of my professional knowledge and belief, I meet the definition of an environmental professional as defined in Section 312.10 of 40 Code of Federal Regulations (CFR) 312 and have the specific qualifications based on education, training, and experience to assess a property of its nature, history, and setting of the subject property. I have

performed all-appropriate inquiries in general conformance with the standards and practice set forth in 40 CFR 312.

7 DATA GAPS

BCI identifies the following data failure/data gaps encountered during the course of this assessment: Per ASTM, past owners, operators, and occupants of the subject property who are likely to have material information regarding the potential for contamination at the subject property shall be contacted to the extent that they can be identified and that the information likely to be obtained is not duplicative of information already obtained from other sources. BCI was unable to interview past or present owners and/or operators due to unavailability of owner/operator contacts. BCI considers this data gap as a limit to the assessment but it is unlikely to represent a data failure.

8 LIMITATIONS

The accompanying report summarizes the findings and opinions of BCI, with regard to the potential for hazardous materials to be present on the properties within and adjacent to the proposed improvement area at concentrations likely to warrant mitigation under current statutes and guidelines.

Our findings and opinions are based on information obtained on given dates or provided by specified individuals, through records review, site review, and related activities. This report is only intended to identify RECs and potential RECs in, or adjacent to, the project corridor. It does not assess the impact to the project or any areas with respect to source, type, and magnitude of contamination. Conditions can change after we have made our observations. We cannot warrant or guarantee that hazardous materials do not exist at the described site. To further reduce your risk, an extensive invasive exploration may be necessary.

This report was prepared for the specific use of our client and applies only to the subject area. We are not responsible for interpretations by others of data presented in this report. This report does not represent a legal opinion. No warranty is expressed or implied. We base our conclusions in this report on judgment and experience. We performed this work in accordance with generally accepted standards of practice existing in northern California at the time of the assessment.

The scope of our investigation did not include determining the presence of radon, lead-based paint, or asbestos-containing materials, except as described herein. Identifying endangered species, geologic hazards, archeological sites, or ecologically sensitive areas are also beyond the scope of this report.

The governmental records portion of this report is derived from public records and is updated on a continual basis. Also, conditions at the site may change over time. For these reasons, we do not advise you to use this information to base a decision after 180 days of the issue date of this report. Please contact BCI to revise this report to reflect new information should you intend to rely on the findings of this report past 180 days from issuance.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

EDR Topographic Map Library has been searched by EDR and maps covering the target property location as provided by Blackburn Consulting were identified for the years listed below. EDR's Historical Topo Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDR's Historical Topo Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the late 1800s.

West Sacramento, CA 95691
EDR Inquiry # 5384522.1

Client Name:

Blackburn Consulting
11521 Blocker Drive
Auburn, CA 95603
Contact: Laura Long

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Blackburn Consulting were identified for the years listed below (selected maps only*). The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Certified Sanborn Results:

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Page Numbers and Map Identifications refer to the EDR Area/Corridor Report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

Lead Agency: CENTRAL VALLEY RWQCB (REGION 5S)
Case Type: LUST Cleanup Site
Geo Track: http://geotracker.waterboards.ca.gov/profile_report.asp?global_id=T0611300056
Global Id: T0611300056
Latitude: 38.580051348
Longitude: -121.5315868
Status: Completed - Case Closed
Status Date: 10/22/2014
Case Worker: DFS
RB Case Number: 570083
Local Agency: YOLO COUNTY
File Location: Not reported
Local Case Number: Not reported
Potential Media Affect: Aquifer used for drinking water supply
Potential Contaminants of Concern: Gasoline
Site History: The case was opened following an unauthorized release from an underground storage tank system at the subject site. Corrective action is underway as directed by the CVRWQCB. Corrective action may consist of preliminary site investigation, planning and implementation of remedial action, verification monitoring, or a combination thereof. A summary of the site history is available by clicking on either the "Cleanup Status History", "Regulatory Activities" or the "Site Maps/Documents" tab. For a complete site history the case file at the CVRWQCB should be consulted.

CERS HAZ WASTE **S121736863**
CERS **N/A**

Site 5 of 13 in cluster E

Actual: CERS HAZ WASTE:
18 ft. Site ID: 100139
Focus Map: CERS ID: 10214611
3 CERS Description: Hazardous Waste Generator

Violations:
 Site ID: 100139
 Site Name: BROADWAY AUTO SERVICE
 Violation Date: 01-07-2015
 Citation: 40 CFR 1 265.201(c)(3) - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.201(c)(3)
 Violation Description: Failure to conduct daily tank inspection of the discharge systems, monitoring equipment, and tank levels.
 Violation Notes: Returned to compliance on 02/10/2015. Facility operator stated that they inspect HazWaste containers / storage area on a monthly basis. Tanks must be inspected on a daily basis. OBSERVATION: The Generator failed to conduct daily tank inspection of the discharge systems, monitoring equipment, and tank levels. [enter specific observations]CORRECTIVE ACTION: Immediately begin to conduct daily inspections of the discharge systems, monitoring equipment, and tank levels for all tanks containing hazardous waste. Submit verification of these inspections to the CUPA within 30 days.
 Violation Division: Yolo County Environmental Health

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Site ID: 110632
Site Name: DE SOUSA'S FURNITURE RESTORING INC
Violation Date: 05-26-2015
Citation: 40 CFR 1 262.34(d)(5)(iii) - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 262.34(d)(5)(iii)
Violation Description: Failure to ensure employees are familiar with the handling and compliance of hazardous waste regulations and emergency response.
Violation Notes: Returned to compliance on 05/26/2015. Facility failed to provide training for employees who were in charge of managing / handling hazardous materials / waste. During the inspection one employee was cleaning furniture and other items using solvent with no gloves or a breathing mask. Furthermore, the employee was not aware of proper handling / managing hazardous waste. Facility operator stated that they have all the required equipment but their employee forgot to use / wear them today. Today during the inspection the facility owner/ operator provided the required training for the employees (three employees).

Status Date: 11/26/2002
Global Id: SL0611344984
Lead Agency: CENTRAL VALLEY RWQCB (REGION 5S)
Lead Agency Case Number: Not reported
Latitude: 38.5793869635948
Longitude: -121.524856859139
Case Type: Cleanup Program Site
Case Worker: KAS
Local Agency: Not reported
RB Case Number: SL0611344984
File Location: Regional Board
Potential Media Affected: Other Groundwater (uses other than drinking water), Soil
Potential Contaminants of Concern: Tetrachloroethylene (PCE), Trichloroethylene (TCE)
Site History: Owners purchased site in 1964 and handled PCE. The business was sold in about 1999. PCE was replaced with a hydrocarbon solvent in about 2002. In 2002, a soil vapor survey found PCE in soil vapor beneath the floor. In 2016, the operator bought the property from the owner.

CERS HAZ WASTE:

Site ID: 27873
CERS ID: 10213795
CERS Description: Hazardous Waste Generator

Violations:

Site ID: 27873
Site Name: EL RANCHO CLEANERS
Violation Date: 03-09-2017
Citation: HSC 6.5 Multiple Sections - California Health and Safety Code, Chapter 6.5, Section(s) Multiple Sections
Violation Description: Hazardous Waste Generator Program - Operations/Maintenance - General
Violation Notes: Returned to compliance on 03/31/2017. This violation was updated because Violation Type ID "1010006" is not a valid entry For CME Program Element "Hazardous Waste Generator". 19 CCR 4 2729.4(d); HSC 6.95 25505(b) OBSERVATION: The business failed to annually submit their hazardous materials inventory and hazardous materials business plan to the California Environmental Reporting System (CERS) database since 2014. The Generator failed to update hazardous material inventory within 30 days when one of the following occurs: A 100 percent or more increase in the quantity of a previously disclosed material; Any handling of a previously undisclosed hazardous materials; A change of business address, business ownership, or business name. CORRECTIVE ACTION: The Generator shall review, revise, and certify the business plan electronically in the California Environmental Reporting System (CERS) within 30 [Truncated]

3 CERS Description: Hazardous Waste Generator

Violations:

Site ID: 134092
Site Name: Meineke Car Care Center
Violation Date: 07-18-2017
Citation: 22 CCR 12 66262.34(d) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(d)
Violation Description: Failure to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month if all of the following conditions are met: (1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount greater than one kilogram for more than 90 days.

Violation Notes: Returned to compliance on 10/30/2017. 22 CCR 12 66262.34(d) OBSERVATION: Observed a drum of waste antifreeze which had not been disposed since November 2015. Since your facility generates more than 100kg of waste per month on average, the accumulation time limit for any waste is 180 days (6 months). The Generator, who generates less than 1000 kilogram but more than 100 kilograms per month failed to dispose of hazardous waste within 180 days (or 270 if waste is transported over 200 miles). Facilities who generate less than 1000 kg of hazardous waste per month and do not exceed 6000 kg of waste stored on site at any time may store waste on site up to 180 days. CORRECTIVE ACTION: The Generator shall immediately contact a licensed hazardous waste hauler to dispose of this waste under manifest and submit a copy of the manifest to the CUPA within 30 days.

Violation Description: Hazardous Waste Generator Program - Operations/Maintenance - General
Violation Notes: Returned to compliance on 10/30/2017. 22 CCR 11 66261.7(f) OBSERVATION: Approximately 10 to 15, 55 gallon drums were observed and found to be empty without being labeled as empty and/or being disposed within 1 year. The Generator failed to manage empty "portable" containers, larger than five gallons capacity, which previously contained hazardous materials by emptying the container, marking it with the date emptied and managing the container as set forth in CCR 22 11 66261.7. CORRECTIVE ACTION: The generator shall immediately ensure proper management of containers which previously contained hazardous materials by emptying, labeling with the date emptied and managing containers as set forth in CCR 22 11 66261.7. Submit verification of compliance to the CUPA within 30 days. [Truncated]

Violation Date: 07-18-2017
Citation: 40 CFR 1 265.173 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.173

Violation Description: Failure to meet the following container management requirements: (a) A container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste. (b) A container holding hazardous waste must not be opened, handled, or stored in a manner which may rupture the container or cause it to leak.

Violation Notes: Returned to compliance on 10/30/2017. 22 CCR 12 66262.34(d)(2); 40 CFR 1 265.173 OBSERVATION: The Generator failed to properly close hazardous waste containers when not in active use. A drum of waste antifreeze was found inside of a 55-gallon drum overpack container. A quantity of antifreeze was found in the uncovered gap space between the outside of the antifreeze drum and the inside of the overpack container. All hazardous waste containers shall be closed at all times

Violation Date: 07-18-2017
Citation: HSC 6.5 25250.22 - California Health and Safety Code, Chapter 6.5, Section(s) 25250.22

Violation Description: Failure to properly manage used oil and/or fuel filters in accordance with the requirements.

Violation Notes: Returned to compliance on 10/30/2017. 22 CCR 16 66266.130 OBSERVATION: The Generator failed to properly handle, manage, label, and/or recycle used oil and fuel filters. Three 55 gallon drums containing used oil filters were found to be uncovered, and two of the drums contained filters piled up above the top lip of the drum. Additionally, streams of used oil were found on the concrete floor below the used oil filter drums. CORRECTIVE ACTION: The Generator shall immediately comply with the Title 22 regulations with regards to the proper handling, management, labeling and recycling of used oil and fuel filters. Promptly manage the used oil storage area so that used oil does not leak beyond the drum or secondary containment, and keep containers closed except when transferring used oil filters into or out of their containers. Submit verification of compliance to the CUPA within 30 days.

Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: Inspection report emailed to Owen Alafua, shop.2354@meineke.net. Monica Pope demonstrated that the facility personnel receive at least annual training regarding the management of hazardous materials and hazardous waste, but was not able to provide documentation during the inspection. Please provide proof of annual refresher training within 30 days.

3 CERS Description: Chemical Storage Facilities

Violations:
Site ID: 423150
Site Name: McDonald's #25600
Violation Date: 09-12-2017
Citation: HSC 6.95 25507 - California Health and Safety Code, Chapter 6.95, Section(s) 25507
Violation Description: Failure to adequately establish and implement a business plan when storing/handling a hazardous material at or above reportable quantities.
Violation Notes: Returned to compliance on 10/27/2017. OBSERVATION: The facility was found to be handling reportable quantities of liquefied carbon dioxide. The owner/operator failed to establish and implement a Hazardous Materials Business Plan (HMBP) when storing hazardous materials at or above the thresholds quantities of 55 gallons/500 pounds/200 cubic feet in accordance with H&SC 25507(a)(1)(A). Correction required. CORRECTIVE ACTION: Establish an account and complete an HMBP submittal in the California Environmental Reporting System (CERS) within 30 days.

DOLLAR TREE #01215 (Continued)

S118234454

Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: Christopher Shirley store manager at this location for approx. 5 weeks and manager with Dollar Tree for approx. 3 years reported that all garbage bags are inspected by the store manager prior to placement inside the trash bin located outside the back door. The trash bin is located within a large fenced area locked at night. The trash bin is picked up weekly (unknown day) by Waste Management. Store managers and Assistant store managers are responsible for hazardous waste determinations, segregation and placement within the hazardous waste storage area. Other employees are trained to clean-up spills but are not allowed to make a waste determination or allowed to place inside the hazardous waste storage area. Normally damaged, broken, leaky consumer products are cleaned up and then staged near the front of the store to await proper placement into the hazwaste storage area. Christopher Shirley - store manager reported that 90% of damaged, broken, leaky products are assessed if [Truncated]

Site 21 of 22 in cluster AB

Actual: CERS HAZ WASTE:
19 ft. Site ID: 86375
Focus Map: CERS ID: 10212877
2 CERS Description: Hazardous Waste Generator

Violations:

Site ID: 86375
 Site Name: The Goodyear Tire & Rubber Company
 Violation Date: 05-10-2016
 Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
 Violation Description: Failure to properly label hazardous waste accumulation containers with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
 Violation Notes: Returned to compliance on 05/10/2016. One 25 gallon steel drum containing sludge and Armakleen solution (part washer liquid and sludge - waste) was noted with no hazardous waste label on the container. Facility operator stated that they dispose of their waste through Safety Kleen Co. once every three months or so. Facility operator corrected the violation on site by placing a hazardous waste label on the container.
 Violation Division: Yolo County Environmental Health
 Violation Program: HW
 Violation Source: CERS

Site ID: 86375
 Site Name: The Goodyear Tire & Rubber Company
 Violation Date: 05-10-2016
 Citation: 40 CFR 1 265.31 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.31
 Violation Description: Failure to maintain and operate the facility to minimize the possibility of a fire, explosion, or any unplanned sudden or non-sudden release of hazardous waste or hazardous waste constituents to the air, soil, or surface water which could threaten human health or the environment.
 Violation Notes: Returned to compliance on 05/10/2016. During the inspection some "Flatproofing Materials (Epoxy Part A& B) were noted spilled under containers and on the ground. Facility operator corrected the violation on site by cleaning the affected area.
 Violation Division: Yolo County Environmental Health
 Violation Program: HW
 Violation Source: CERS

Site ID: 86375

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Violation Division: Yolo County Environmental Health
Violation Program: APSA
Violation Source: CERS

Site ID: 111184
Site Name: DESILVA GATES CONSTRUCTION LP
Violation Date: 08-04-2017
Citation: 22 CCR 12 66262.34(d) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(d)

Violation Description: Failure to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month if all of the following conditions are met: (1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount greater than one kilogram for more than 90 days.

Violation Notes: Returned to compliance on 08/30/2017. 22 CCR 12 66262.34(d) OBSERVATION: On 8-4-2017, The Generator, who generates less than 1000 kilogram but more than 100 kilograms per month failed to dispose of hazardous waste within 180 days (or 270 if waste is transported over 200 miles). Facilities who generate less than 1000 kg of hazardous waste per month and do not exceed 6000 kg of waste stored on site at any time may store waste on site up to 180 days. The Generator had Antifreeze waste stored in a poly tank dated 2014. Also Generator had 5 drums of unknown waste with no labels stored longer than 180 days. CORRECTIVE ACTION: The Generator shall immediately contact a licensed hazardous waste hauler to dispose of this waste under manifest and submit a copy of the manifest to the CUPA within 30 days.

Citation: HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)

Violation Description: Failure to address in the SPCC Plan discharge prevention measures, including procedures for routine handling of products such as loading/unloading and facility transfers.

Violation Notes: Returned to compliance on 08/30/2017. HSC 6.67 25270.4.5(a); 40 CFR 112.7(a)(3), 112.7(a)(3)(i). OBSERVATION: The owner/operator failed to adequately discuss the type of oil in each fixed container and its storage capacity within the SPCC plan. Or for mobile or portable containers, failure to provide either the type of oil and storage capacity for each container or an estimate of the potential number of mobile or portable containers, the types of oil, and anticipated storage capacities within the SPCC plan. CORRECTIVE ACTION: Adequately discuss the type of oil in each fixed container and its storage capacity. Provide either the type of oil and storage capacity for each mobile or portable container or an estimate of the potential number of mobile or portable containers, the types of oil, and anticipated storage capacities. Submit verification of compliance to the CUPA within 30 days. [Truncated]

Violation Date: 08-04-2017
Citation: 40 CFR 1 265.201(c)(3) - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.201(c)(3)

Violation Description: Failure to inspect hazardous waste tanks at least once each operating day for the following, when present: (1) Discharge control equipment (e.g., waste feed cutoff systems, by-pass systems, and drainage systems) to ensure that it is in good working order; (2) Data gathered from monitoring equipment (e.g., pressure and temperature gauges) to ensure that the tank is being operated according to its design; (3) The level of waste in the tank.

Violation Notes: Returned to compliance on 08/30/2017. 22 CCR 12 66262.34(d)(2); 40 CFR 1 265.201(c)(1), 265.201(c)(2), 265.201(c)(3) OBSERVATION: The Generator failed to conduct daily tank inspection of the discharge systems, monitoring equipment, and tank levels. The Generator Failed to conduct hazardous Waste Storage Tank inspection. CORRECTIVE ACTION: The Generator shall immediately begin to conduct daily inspections of the discharge systems, monitoring equipment, and tank levels for all tanks containing hazardous waste. Submit verification of these inspections to the CUPA within 30 days.

Site ID: 111184
Site Name: DESILVA GATES CONSTRUCTION LP
Violation Date: 08-04-2017
Citation: 22 CCR 12 66262.34(d) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(d)

Violation Description: Failure to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month if all of the following conditions are met: (1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount greater than one kilogram for more than 90 days.

Violation Notes: Returned to compliance on 08/30/2017. 22 CCR 12 66262.34(d) OBSERVATION: On 8-4-2017, The Generator, who generates less than 1000 kilogram but more than 100 kilograms per month failed to dispose of hazardous waste within 180 days (or 270 if waste is transported over 200 miles). Facilities who generate less than 1000 kg of hazardous waste per month and do not exceed 6000 kg of waste stored on site at any time may store waste on site up to 180 days. The Generator had Antifreeze waste stored in a poly tank dated 2014. Also Generator had 5 drums of unknown waste with no labels stored longer than 180 days. CORRECTIVE ACTION: The Generator shall immediately contact a licensed hazardous waste hauler to dispose of this waste under manifest and submit a copy of the manifest to the CUPA within 30 days.

Citation: HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)

Violation Description: Failure to address in the SPCC Plan discharge prevention measures, including procedures for routine handling of products such as loading/unloading and facility transfers.

Violation Notes: Returned to compliance on 08/30/2017. HSC 6.67 25270.4.5(a); 40 CFR 112.7(a)(3), 112.7(a)(3)(i). OBSERVATION: The owner/operator failed to adequately discuss the type of oil in each fixed container and its storage capacity within the SPCC plan. Or for mobile or portable containers, failure to provide either the type of oil and storage capacity for each container or an estimate of the potential number of mobile or portable containers, the types of oil, and anticipated storage capacities within the SPCC plan. CORRECTIVE ACTION: Adequately discuss the type of oil in each fixed container and its storage capacity. Provide either the type of oil and storage capacity for each mobile or portable container or an estimate of the potential number of mobile or portable containers, the types of oil, and anticipated storage capacities. Submit verification of compliance to the CUPA within 30 days. [Truncated]

1 262.34(d)(5)(iii) OBSERVATION: On 8-4-2017, The Generator failed to ensure employees are familiar with the handling and compliance of hazardous waste regulations and emergency response. At the time of inspection, it could not be demonstrated (not necessarily documented) that employees who handle hazardous waste were properly trained. The generator failed to do waste determinations on containers stored on-site, Generator failed to label containers properly, waste filter drums were open, and Facility manager said she has not been trained.. The generator must ensure that all employees who handle hazardous waste are thoroughly familiar with proper waste handling and emergency procedures. CORRECTIVE ACTION: Immediately provide training to all employees who handle hazardous waste and submit a copy of the training records to the CUPA within 30 [Truncated]

Violation Division: Yolo County Environmental Health
Violation Program: HW
Violation Source: CERS

Site ID: 111184
Site Name: DESILVA GATES CONSTRUCTION LP
Violation Date: 08-04-2017
Citation: 40 CFR 1 265.201(c)(3) - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.201(c)(3)

Violation Description: Failure to inspect hazardous waste tanks at least once each operating day for the following, when present: (1) Discharge control equipment (e.g., waste feed cutoff systems, by-pass systems, and drainage systems) to ensure that it is in good working order; (2) Data gathered from monitoring equipment (e.g., pressure and temperature gauges) to ensure that the tank is being operated according to its design; (3) The level of waste in the tank.

Violation Notes: Returned to compliance on 08/30/2017. 22 CCR 12 66262.34(d)(2); 40 CFR 1 265.201(c)(1), 265.201(c)(2), 265.201(c)(3) OBSERVATION: The Generator failed to conduct daily tank inspection of the discharge systems, monitoring equipment, and tank levels. The Generator Failed to conduct hazardous Waste Storage Tank inspection. CORRECTIVE ACTION: The Generator shall immediately begin to conduct daily inspections of the discharge systems, monitoring equipment, and tank levels for all tanks containing hazardous waste. Submit verification of these inspections to the CUPA within 30 days.

Violation Source: CERS

Site ID: 111184
Site Name: DESILVA GATES CONSTRUCTION LP
Violation Date: 08-04-2017
Citation: 22 CCR 12 66262.34(d) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(d)

Violation Description: Failure to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month if all of the following conditions are met: (1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount greater than one kilogram for more than 90 days.

Violation Notes: Returned to compliance on 08/30/2017. 22 CCR 12 66262.34(d) OBSERVATION: On 8-4-2017, The Generator, who generates less than 1000 kilogram but more than 100 kilograms per month failed to dispose of hazardous waste within 180 days (or 270 if waste is transported over 200 miles). Facilities who generate less than 1000 kg of hazardous waste per month and do not exceed 6000 kg of waste stored on site at any time may store waste on site up to 180 days. The Generator had Antifreeze waste stored in a poly tank dated 2014. Also Generator had 5 drums of unknown waste with no labels stored longer than 180 days. CORRECTIVE ACTION: The Generator shall immediately contact a licensed hazardous waste hauler to dispose of this waste under manifest and submit a copy of the manifest to the CUPA within 30 days.

Violation Date: 08-04-2017
Citation: HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)

Violation Description: Failure to address in the SPCC Plan discharge prevention measures, including procedures for routine handling of products such as loading/unloading and facility transfers.

Violation Notes: Returned to compliance on 08/30/2017. HSC 6.67 25270.4.5(a); 40 CFR 112.7(a)(3), 112.7(a)(3)(i). OBSERVATION: The owner/operator failed to adequately discuss the type of oil in each fixed container and its storage capacity within the SPCC plan. Or for mobile or portable containers, failure to provide either the type of oil and storage capacity for each container or an estimate of the potential number of mobile or portable containers, the types of oil, and anticipated storage capacities within the SPCC plan. CORRECTIVE ACTION: Adequately discuss the type of oil in each fixed container and its storage capacity. Provide either the type of oil and storage capacity for each mobile or portable container or an estimate of the potential number of mobile or portable containers, the types of oil, and anticipated storage capacities. Submit verification of compliance to the CUPA within 30 days. [Truncated]

Environmental Interest/Information System

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the

CERS HAZ WASTE S121769472
CERS N/A

Site 4 of 5 in cluster AO

Actual: CERS HAZ WASTE:
19 ft. Site ID: 373364
Focus Map: CERS ID: 10481740
3 CERS Description: Hazardous Waste Generator

Violations:

Site ID: 373364
Site Name: Kelly-Moore Paints
Violation Date: 04-13-2016
Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description: Failure to properly label hazardous waste accumulation containers with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.

Violation Notes: Returned to compliance on 05/06/2016. OBSERVATION: [Describe containers and what information was missing]. All hazardous waste containers shall be marked with the following information: 1) the words Hazardous Waste ; 2) name and address of generator; 3) hazardous properties; 4) physical state; 5) composition (contents); 6) accumulation start date. CORRECTIVE ACTION: Immediately label these containers and ensure that all hazardous waste containers are marked with all the required information. On or about 4-12-2016, facility failed to label one (1) drum of waste colorant. Waste colorant containers are half gallon plastic containers. They are stored in the one (1) 55 gallon drum before store manager looks at them to make sure they are california empty before disposing them in the trash. Empty colorant containers are double bagged and placed in the trash for disposal . Correction Required: Please place a hazardous waste label on the hazardous waste colorant drum. It must be california approved label. [Truncated]

Violation Date: 04-13-2016
Citation: 40 CFR 1 265.173 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.173
Violation Description: Failure to properly close hazardous waste containers when not in active use.
Violation Notes: Returned to compliance on 05/06/2016. OBSERVATION: [Describe the containers that were found open and note locations]. All hazardous waste containers shall be closed at all times except when adding or removing waste. CORRECTIVE ACTION: Immediately close these containers and ensure all hazardous waste containers are closed when not adding or removing waste. On or about 4-13-2016 facility failed to close one (1) hazardous waste paint colorant drum with a locking lid. Correction Required: Please place drum on drum and lock the lid with locking ring unless adding or removing the hazardous waste colorant.
Violation Division: Yolo County Environmental Health
Violation Program: HW
Violation Source: CERS

Site ID: 373364
Site Name: Kelly-Moore Paints
Violation Date: 04-13-2016
Citation: 22 CCR 23 66273.34 - California Code of Regulations, Title 22, Chapter 23, Section(s) 66273.34
Violation Description: Failure to properly label the following categories of universal waste as: 1) Each batteries or the container in which the batteries are contained as "Universal Waste-Battery(ies)". 2) Each mercury-containing equipment or the container in which the mercury-containing equipment is contained as "Universal Waste -Mercury-Containing Equipment". 3) Each Florescent lamp or the container or package in which the lamps are contained as "Universal Waste-Lamp(s)". 4) Each electronic devices or the container or pallet in or on which the electronic devices are contained as "Universal Waste-Electronic Device(s)". 5) Each CRTs or the container or pallet in or on which the CRTs are contained as "Universal Waste-CRT(s)". 6) A container of CRT glass shall be labeled or marked clearly with the following phrase: "Universal Waste-CRT glass". 7) In lieu of labeling individual electronic devices, CRTs, and/or containers of CRT glass pursuant to subsections d) through f) of this section, a universal waste handler may combine, package, and accumulate those universal wastes in appropriate containers or within a designated area demarcated by boundaries that are clearly labeled with the applicable portion(s) of the following phrase: "Universal Waste-Electronic Device(s)/Universal Waste - CRT(s)/Universal Waste-CRT Glass".
Violation Notes: Returned to compliance on 05/06/2016. OBSERVATION: [Note what UW was found and how it was stored.] A generator shall label or mark universal waste with the words 'Universal Waste' and the type of waste (batteries, mercury containing equipment, lamps/bulbs, electronic devices, CRTs, aerosol cans). CORRECTIVE ACTION: Immediately label these wastes and ensure that all universal wastes are labeled with the required information. On or about 4-13-2016, facility failed to label one (1) medium card board box of universal electronic waste. Correction Required: Please place universal waste label on the one (1) medium card board box of universal electronic waste. Or you can just write in the required labeling as required per regulation. Kelly Moore corrected this violation on site. No correction is required at this time.

CERS TANKS:
Site ID: 373364
CERS ID: 10481740
CERS Description: Chemical Storage Facilities

Violations:
Site ID: 373364
Site Name: Kelly-Moore Paints
Violation Date: 04-13-2016
Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description: Failure to properly label hazardous waste accumulation containers with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes: Returned to compliance on 05/06/2016. OBSERVATION: [Describe containers and what information was missing]. All hazardous waste containers shall be marked with the following information: 1) the words Hazardous Waste ; 2) name and address of generator; 3) hazardous properties; 4) physical state; 5) composition (contents); 6) accumulation start date. CORRECTIVE ACTION: Immediately label these containers and ensure that all hazardous waste containers are marked with all the required information. On or about 4-12-2016, facility failed to label one (1) drum of waste colorant. Waste colorant containers are half gallon plastic containers. They are stored in the one (1) 55 gallon drum before store manager looks at them to make sure they are california empty before disposing them in the trash. Empty colorant containers are double bagged and placed in the trash for disposal . Correction Required: Please place a hazardous waste label on the hazardous waste colorant drum. It must be california approved label. [Truncated]

Violation Description: Failure to properly close hazardous waste containers when not in active use.

Violation Notes: Returned to compliance on 05/06/2016. OBSERVATION: [Describe the containers that were found open and note locations]. All hazardous waste containers shall be closed at all times except when adding or removing waste. CORRECTIVE ACTION: Immediately close these containers and ensure all hazardous waste containers are closed when not adding or removing waste. On or about 4-13-2016 facility failed to close one (1) hazardous waste paint colorant drum with a locking lid. Correction Required: Please place drum on drum and lock the lid with locking ring unless adding or removing the hazardous waste colorant.

Violation Division: Yolo County Environmental Health
Violation Program: HW
Violation Source: CERS

Site ID: 373364
Site Name: Kelly-Moore Paints
Violation Date: 04-13-2016
Citation: 22 CCR 23 66273.34 - California Code of Regulations, Title 22, Chapter 23, Section(s) 66273.34

Violation Description: Failure to properly label the following categories of universal waste as: 1) Each batteries or the container in which the batteries are contained as "Universal Waste-Battery(ies)". 2) Each mercury-containing equipment or the container in which the mercury-containing equipment is contained as "Universal Waste -Mercury-Containing Equipment". 3) Each Florescent lamp or the container or package in which the lamps are contained as "Universal Waste-Lamp(s)". 4) Each electronic devices or the container or pallet in or on which the electronic devices are contained as "Universal Waste-Electronic Device(s)". 5) Each CRTs or the container or pallet in or on which the CRTs are contained as "Universal Waste-CRT(s)". 6) A container of CRT glass shall be labeled or marked clearly with the following phrase: "Universal Waste-CRT glass". 7) In lieu of labeling individual electronic devices, CRTs, and/or containers of CRT glass pursuant to subsections d) through f) of this section, a universal waste handler may combine, package, and accumulate those universal wastes in appropriate containers or within a designated area demarcated by boundaries that are clearly labeled with the applicable portion(s) of the following phrase: "Universal Waste-Electronic Device(s)/Universal Waste - CRT(s)/Universal Waste-CRT Glass".

Violation Notes: Returned to compliance on 05/06/2016. OBSERVATION: [Note what UW was found and how it was stored.] A generator shall label or mark universal waste with the words 'Universal Waste' and the type of waste (batteries, mercury containing equipment, lamps/bulbs, electronic devices, CRTs, aerosol cans). CORRECTIVE ACTION: Immediately label these wastes and ensure that all universal wastes are labeled with the required information. On or about 4-13-2016, facility failed to label one (1) medium card board box of universal electronic waste. Correction Required: Please place universal waste label on the one (1) medium card board box of universal electronic waste. Or you can just write in the required labeling as required per regulation. Kelly Moore corrected this violation on site. No correction is required at this time.

Property Description:	The property was developed in the 1940s and has been in use for industrial purposes since that time. The primary historical uses of the property were trucking and repair facilities and storage of related materials. Currently, the property is used for, among other purposes, storage including old vehicles, waste oil containers, metal and wood scrap piles, and vehicle batteries. Surface soil stains were noted during this assessment as a potential hazardous materials threat. The property formerly contained underground storage tanks which were removed in 1990. In 2004, soil sampling conducted on the owner's behalf revealed elevated levels of lead and nickel in the

Citation: 22 CCR 23 66273.31(a) - California Code of Regulations, Title 22, Chapter 23, Section(s) 66273.31(a)
Violation Description: Failure of the universal waste handler to transfer universal waste to the appropriate designation facility.
Violation Notes: Returned to compliance on 12/02/2013.
Violation Division: Yolo County Environmental Health
Violation Program: HW
Violation Source: CERS

Site ID: 407494
Site Name: WEST COAST FRAME & COLLISION REPAIR
Violation Date: 12-14-2016
Citation: HSC 6.5 25250.22 - California Health and Safety Code, Chapter 6.5, Section(s) 25250.22
Violation Description: Failure to properly manage used oil and/or fuel filters in accordance with the requirements.
Violation Notes: Returned to compliance on 12/22/2016. OBSERVATION: There was one 55-gallon drum containing used oil and/or fuel filters with an accumulation start date of 10-08-15, which is beyond the allowable accumulation time limit of one years. The Generator failed to properly handle, manage, label, and/or recycle used oil and fuel filters in accordance with 22 CCR 16 66266.130. CORRECTIVE ACTION: The Generator shall immediately comply with the Title 22 regulations with regards to the proper handling, management, labeling and recycling of used oil and fuel filters. Submit verification of compliance to the CUPA within 30 days.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also

Property Description:	The property was developed in the late 1940s to early 1950s and has been in use for industrial purposes since at least the mid-1960s. Underground storage tanks were removed from the property in 1989. Also, records indicate that hazardous materials have been and still are being stored on the property such as heavy equipment, waste oil containers, scrap piles, and vehicle batteries. Areas of stained surface soil were observed in the Phase I ESA. The property is currently owned by Art and Diane Hayashida, although they were unable to be contacted in the completion of the Phase I. Also, no past owners of the property have been identified.

Property Description:	The property was developed in the late 1950s and has been in use for industrial purposes since at least the 1960s. The property once contained a septic system, and there is no record of abandonment for this system. Although evidence on the property does not suggest the presence of underground storage tanks, the property s history of use by van lines and trucking firms would suggest potential for USTs. The property is generally unpaved, which also may suggest surface soil contamination.
