LIVERMORE, CA 94550

GEOCON PROJECT NO. E9027-02-02

JUNE 2018

Project No. E9027-02-02
June 4, 2018

Mr. Gordon Sweet
BKF Engineers
4670 Willow Road
Pleasanton, California 94588

Subject: PHASE I ENVIRONMENTAL SITE ASSESSMENT
DUBLIN BOULEVARD EXTENSION
DUBLIN TO LIVERMORE, ALAMEDA COUNTY, CALIFORNIA

Dear Mr. Sweet:

In accordance with your request and our proposal LE-16-078 dated June 30, 2016, we have performed a Phase I Environmental Site Assessment (ESA) of portions of seven parcels located between Fallon Road in Dublin, and Doolan Road in Livermore, California along the proposed alignment of an extension and Dublin Boulevard in Dublin in Alameda County, California. We performed the Phase I ESA for BKF Engineers (the Client) as requested by the City of Dublin (the City) to assess the potential for existing hazardous substances and/or petroleum product impacts along the proposed alignment prior to right-of-way acquisition and construction of the extension by the City.

This report summarizes the findings of the Phase I ESA including the potential presence of recognized environmental conditions as defined by the American Society for Testing and Materials *Designation E 1527-13, Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process*.

We appreciate the opportunity to have performed this Phase I ESA for BKF Engineers. Please contact us if you have any questions concerning this report or if we may be of further service.

Sincerely,

GEOCON CONSULTANTS, INC.

Luann Beadle
Project Scientist

John Juhrend, PE, CEG
Senior Engineer

PHASE I ENVIRONMENTAL SITE ASSESSMENT REPORT

1.0 INTRODUCTION

This report summarizes the methodology and presents the findings of a Phase I Environmental Site Assessment (ESA) of portions of seven parcels located between Fallon Road in Dublin and Doolan Road in Livermore in the proposed alignment of an extension to Dublin Boulevard (the Site), in Alameda County, California. We performed the Phase I ESA for BKF Engineers (the Client) to assess the potential for existing hazardous substances and/or petroleum product impacts within the proposed alignment prior to right-of-way (ROW) acquisition and construction of the roadway by the City of Dublin.

1.1 Purpose and Objectives

The purpose of the Phase I ESA was to identify evidence or indications of ‘recognized environmental conditions’ (REC) as defined by the American Society for Testing and Materials (ASTM) *Designation E 1527-13 Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process*. Section 1.1.1 of ASTM *Designation E 1527-13* defines an REC as “the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. De minimis conditions are not recognized environmental conditions.” De minimis conditions are those that generally do not present a threat to human health or the environment and that generally would not be the subject of the enforcement action if brought to the attention of appropriate governmental agencies.

ASTM *Designation E1527-13* also defines ‘Historical’ and ‘Controlled’ RECs (HREC and CREC, respectively). An ‘Historical REC’ is defined as “a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to “the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls).” A ‘Controlled REC’ is defined as “a recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls).” An HREC is not an REC if the property meets current standards for unrestricted residential use. A CREC remains an REC by definition when the property does not meet the unrestricted residential use requirement unconditionally.

We also conducted the Phase I ESA in general accordance with the requirements of 40 Code of Federal Regulations (CFR) Part 312 titled *Standards and Practices for All Appropriate Inquiries*, as required under Sections 101(35)(B)(ii) and (iii) of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). The purpose of conducting an all appropriate inquiries investigation into the previous ownership and uses of a property is to meet the provisions necessary for the landowner, contiguous property owner, and/or bona fide prospective purchaser to qualify for certain landowner liability protections under CERCLA.

The following principles are an integral part of ASTM *Designation E1527-13*:

“Uncertainty Not Eliminated - No environmental site assessment can wholly eliminate uncertainty regarding the potential for recognized environmental conditions in connection with a property. Performance of this practice is intended to reduce, but not eliminate, uncertainty regarding the potential for recognized environmental conditions in connection with a property, and this practice recognizes reasonable limits of time and cost.”

“Not Exhaustive - All Appropriate Inquiries does not mean an exhaustive assessment of a property. There is a point at which the cost of information obtained or the time required to gather it outweighs the usefulness of the information and, in fact, may be a material detriment to the orderly completion of transactions. One of the purposes of this practice is to identify a balance between the competing goals of limiting the costs and time demands inherent in performing an environmental site assessment and the reduction of uncertainty about unknown conditions resulting from additional information.”

“Level of Inquiry is Variable – Not every property will warrant the same level of assessment. Consistent with good commercial and customary practice, the appropriate level of environmental site assessment will be guided by the type of property subject to assessment, the expertise and risk tolerance of the user, and the information developed in the course of the inquiry.”

1.2 Scope of Services

Our Proposal No. LE-16-078 dated June 30, 2016, outlines and describes the scope of services we have performed for this Phase I ESA.

The main components of the Phase I ESA and their objectives, as specified by the referenced standards, include the following:

- **Physical Setting:** We reviewed physical setting references to obtain information concerning the topographic, geologic, and hydrogeologic characteristics of the Site and vicinity. Such information may be indicative of the direction and/or extent that a contaminant could migrate in the event of a spill or release.

- **Records Review:** We reviewed publicly available Federal, State, and local regulatory agency records to obtain information that could potentially help identify RECs at or potentially affecting the Site.
- **Site History:** We reviewed historical references to assess the history of previous uses of the Site and surrounding area to identify those that could have led to RECs on or near the Site. Historical sources reviewed included aerial photographs, topographic maps, city directories, and previous site assessment reports. In addition, we conducted interviews with persons who were expected to be reasonably knowledgeable about historical and/or current conditions at and uses of the Site.
- **Site Reconnaissance:** We performed a site reconnaissance to observe site conditions and activities for indications of evidence of RECs. The site reconnaissance was for the Site only. Offsite properties and features were viewed solely from the vantage of the Site and public thoroughfares.

1.3 Report Limitations

We prepared this Phase I ESA report exclusively for the Client on behalf of the City of Dublin. The information obtained is only relevant for the dates of the records reviewed or as of the date of the latest site visit. Therefore, the information contained herein is only valid as of the date of the report and will require an update to reflect recent records/site visits.

The Client should recognize that a Phase I ESA is not a comprehensive site characterization and should not be construed as such. The findings and conclusions presented in this report are predicated on the site reconnaissance, a review of the specified regulatory records, and a review of the historical usage of the Site, as presented in this report. The Client should also understand that wetlands, asbestos-containing building materials (ACM), lead-containing paint (LCP), lead in drinking water, radon, mercury related to mining activities, methane, and mold surveys were not included in the scope of services for this Phase I ESA. Assessment for potential naturally occurring hazards such as asbestos and arsenic also was not included.

Therefore, the report should only be deemed conclusive with respect to the information obtained. No guarantee or warranty of the results of the Phase I ESA is implied within the intent of this report or any subsequent reports, correspondence or consultation, either express or implied. We strived to conduct the services summarized herein in accordance with the local standard of care in the geographic region at the time the services were rendered.

1.4 Data Gaps

A data gap is defined by ASTM *Designation E 1527-13* as “a lack of or inability to obtain information required by this practice despite good faith efforts by the environmental professional to gather such information.” Data gaps could include such things as insufficient historical information, the inability to interview persons with direct site knowledge (e.g., the owner(s), past owner(s), tenants, workers, etc.) or the lack of access to all parts of a site during the site reconnaissance. We visited the portions of the properties within the proposed alignment and performed site observations with the assistance of Mr. Jay Greenwood, Vice President of GH PacVest, LLC, owner representative for APNs 985-27-2 and 905-1-6-3, and Mr. Randy Branaugh, owner of APN 905-1-4-4. Three parcels, APNs 905-1-4-3 (owned by Town and County H Fund, LLC), 905-1-3-2, and 905-1-1-2 (both owned by Crosby), were accessed without the accompaniment of the owners but with permission. One parcel, APN 905-1-5-2 (owned by Righetti), was viewed from the vantage point of adjoining parcels as access was not granted by the current owner in time for this report. This is not considered a significant data gap. With the exception of Mr. Branaugh, we were not provided with contacts with direct knowledge of past operations of the properties. This is considered a data gap.

2.0 SITE DESCRIPTION

This section describes the location and physical characteristics of the proposed alignment area parcels including size, topography, geologic, soil, and hydrogeologic conditions.

2.1 Location and Legal Description

The area of the proposed alignment is located in the City of Dublin and in unincorporated Alameda County, California (Figure 1). The property is largely undeveloped land zoned for agricultural, commercial, and industrial use. Seven parcels located between Fallon Road in Dublin and Doolan Road in Livermore (totaling approximately 470 acres) consisting largely of undeveloped land are proposed for temporary and permanent partial ROW acquisition, including construction activities such as temporary construction easements and laydown areas, in order to construct an approximate 1.5 mile extension of existing Dublin Boulevard at Fallon Road in Dublin to Doolan Road in Livermore. The parcels are identified as Alameda County Assessor’s Parcel Numbers (APN) as detailed below:

APN	Owner	Location	Existing Area (Acres)	Impact/Take
985-27-2	GH PacVest, LLC	City of Dublin	135.49	Partial
905-1-6-3	GH PacVest, LLC	City of Dublin	48.90	Partial
905-1-5-2	Righetti	City of Dublin	48.78	Partial
905-1-4-4	Branough	City of Dublin	39.80	Partial
905-1-4-3	Town and County H Fund, LLC	City of Dublin	8.81	Partial
905-1-3-2	Crosby	Alameda County	76.43	Partial
905-1-1-2	Crosby	Alameda County	109.92	Partial

Parcel maps depicting the properties included in the proposed project area are in Appendix A. Site Maps, illustrating the seven parcels with an overlay of the proposed extension, is included as Figures 2a and 2b.

The greater area beyond the parcels affected by the proposed ROW acquisition include the Interstate 580 (I-580) corridor to the south, vacant ranchland and residential development to the north, commercial development to the west, and vacant ranchland and commercial development to the east.

The area of the proposed alignment is depicted on the United States Geological Survey’s (USGS) Livermore, California, 7.5-minute topographic map (USGS, 2012). According to the website <http://www.earthpoint.us/TownshipsSearchByLatLon.aspx> the project area has been in private hands since before California joined the United States and is therefore not part of the Township and Range system which was a survey of federal lands. The California Department of Pesticide Regulation defines the area as Section 3, Township 3 South, Range 1 East as an extrapolation of the federal system.

2.2 Site and Vicinity General Characteristics

The proposed corridor extension is largely undeveloped. Asphalt-paved driveways and parking areas associated with a landscaping business are located on APN 905-1-4-4 (1181 Collier Canyon Road). A gated concrete pad area used by a landscaping business for storage of equipment and supplies is located on APN 905-1-4-3. The proposed alignment is in area of primarily vacant or agricultural land with occasional associated ranch houses. The greater surrounding area is developed with a mix of residential and commercial development with the east-west oriented I-580 corridor bordering the parcel boundaries along Collier Canyon and Croak Roads.

2.2.1 Topography

The USGS Livermore topographic map (USGS, 2012) shows the topography of the proposed alignment as sloping slightly towards the south, at an elevation of approximately 400 feet above mean sea level.

2.2.2 Geologic Conditions

The proposed alignment is located in the Livermore Valley in eastern Alameda County along the margins of the cities of Dublin and Livermore and includes a portion of unincorporated Alameda County. The area is bounded by the foothills of the Diablo Range. According to the *Geologic Map of San Francisco – San Jose Quadrangle* (California Geological Survey [CGS] 1991, the proposed alignment is underlain by Quaternary alluvium with northern hillsides part of the Tassajara Formation.

2.2.3 Soil Conditions

We obtained information concerning soil conditions in proximity to the proposed alignment from the United States Department of Agriculture – Natural Resources Conservation Service Web Soil Survey Web Soil Survey (<http://websoilsurvey.nrcs.usda.gov/app/HomePage.htm>). Web Soil Survey information indicates that surficial onsite soil is predominately classified as Linne clay loam and Diablo clay which is generally well-drained with 3 to 15 percent slopes.

2.2.4 Hydrologic and Hydrogeologic Conditions

Specific information regarding groundwater flow direction within the proposed alignment is not available. Therefore, to assess local groundwater conditions for the vicinity we reviewed reports available on the California State Water Resources Control Board GeoTracker website (<http://geotracker.waterboards.ca.gov>) for groundwater information at the nearest facility with a groundwater monitoring array such as leaking underground storage tank (LUST) facilities or other agency-regulated cleanup properties. The nearest such facility with available data is the former Jordan Ranch at Central Parkway and Fallon Road in Dublin. According to the report *Second Quarter 2014 Groundwater Monitoring Report – Jordan Ranch Parcel H, Dublin, California*, by Engeo, Incorporated, July 2014 available on GeoTracker, depth to water in the closest monitoring well, MW-4 located approximately 1/3 mile north of the western end of the proposed alignment, ranged from 10.42 feet to 18.58 feet between December 2005 and June 2014. According to the report, groundwater flow beneath this facility is to the south with a gradient of approximately 0.30 feet per foot.

EDR searched federal, state, and local environmental databases for the proposed alignment area and properties/facilities within one mile. According to the Physical Setting Source Map from the EDR report, groundwater wells were not identified within the proposed alignment. Twenty-three water supply wells are located within a one mile radius of the proposed alignment, primarily to the south

beyond I-580, with flow direction identified as being to the southwest. Recent groundwater elevation data was not provided. A copy of the report: *The EDR Radius Map Report with GeoCheck*, dated January 31, 2018, is in Appendix C.

2.3 Current and Planned Uses of the Site

The proposed alignment is predominately vacant ranchland used for cattle grazing. Gated fencing, asphalt-paved driveways, parking areas, an open metal shed, and storage areas associated with APNs 905-1-4-3 and 905-1-4-4 are located in the center of the proposed alignment. The fenced parking areas are primarily utilized for landscaping supply storage, however, spaces on APN 905-1-4-4 are also utilized by a pool contractor and other small businesses for vehicle and heavy equipment storage.

The City of Dublin proposes to construct an extension of Dublin Boulevard from the intersection of Fallon Road and Dublin Boulevard in Dublin to Doolan Road in Livermore to support future mixed-use development as described in the *Eastern Dublin Specific Plan, City of Dublin, California*, dated January 7, 1994 and updated October 7, 2014 prepared by Wallace Roberts & Todd.

2.4 Descriptions of Structures, Roads, Other Improvements on the Site

The proposed extension to Dublin Boulevard crosses seven parcels proposed for partial ROW acquisition. Barbed wire fencing is present along the individual parcel boundaries. Overhead utilities aligned west-to-east transverse the properties and are partially contained within the proposed alignment boundaries. Features within the portion each of parcel that are included in the proposed alignment are as follows:

APN 985-27-2 – Remnants of a livestock loading area (Photo 1) and vacant land used for cattle grazing.

APN 905-1-6-3 – Vacant land used for cattle grazing. Demolition debris and miscellaneous trash apparently associated with a former rural residence were observed (Photos 2 and 3).

APN 905-1-5-2 – Vacant land used for grazing (Photo 4).

APN 905-1-4-3 – Vacant land and a fenced, paved area used for storage of equipment related to a landscaping business (Photo 5). Occasional de minimis debris was observed.

APN 905-1-4-4 – Fencing, drainage, an asphalt-paved roadway, a portion of a fenced equipment yard used primarily for commercial landscaping material and vehicle storage, and a metal shed currently used for heavy equipment storage (Photos 6 and 7).

APN 905-1-3-2 – Vacant land used for cattle grazing (Photo 8).

APN 905-1-1-2 – Vacant land used for grazing. North-south oriented Cottonwood Creek crosses the proposed alignment (Photo 9).

3.0 USER-PROVIDED INFORMATION

This section summarizes user (Client)-provided information regarding the parcels affected by the proposed ROW acquisition provided by client representative Mr. Gordon Sweet. Mr. Sweet forwarded User Questionnaires to the City of Dublin and to Alameda County to determine if they had knowledge of legal or administrative proceedings involving the affected parcels. The Alameda County User Questionnaire was completed by Ruben Izon, Associate Engineer, for APNs 905-1-3-2 and 905-1-1-2. A User Questionnaire for APNs 905-1-4-4, 905-1-5-2, 985-27-2, and 905-1-6-3 was completed by Alameda County Fire Deputy Fire Marshall Darrell Jones. Copies of the completed User Questionnaires are included in Appendix B. A User Questionnaire was not returned by the City of Dublin for APN 905-1-4-3.

3.1 Title, Appraisal and Sale Agreement Records

Client representative Gordon Sweet provided preliminary title reports for the seven parcels. No items were noted indicating an environmental concern.

3.2 Environmental Liens or Activity and Use Limitations

Mr. Izon indicated that he is not aware of any environmental liens for the parcels, however, the parcels fall under East County Area Plan Measure D regulations which limit development due to the parcels' proximity to Livermore Municipal Airport located south of I-580. According to Mr. Obaid Khan with the City of Dublin, the properties within the study area are subject to the Dublin General Plan (including land use designations, development capacity, and restrictions based on the Airport Land Use Compatibility Plan), Eastern Dublin Specific Plan, Planned Development Zoning Stage 1 Development Plan (Ordinance 32-05), and the Livermore Airport Land Use Compatibility Plan.

3.3 Specialized Knowledge

Mr. Izon and Mr. Jones have no specialized knowledge regarding past or current uses of the parcels that could potentially impair or could have impaired the environmental conditions of the proposed alignment. We asked Mr. Izon and Mr. Jones if they knew of previous environmental reports or documents that may exist and, if so, whether copies could be provided. Mr. Izon and Mr. Jones stated that they were unaware of environmental reports or documents related to the parcels that would be beneficial for the purposes of the Phase I ESA.

3.4 Commonly Known or Reasonably Ascertainable Information

Mr. Izon and Mr. Jones indicated that according to their knowledge, there haven't been any instances of environmental concern related to the parcels.

3.5 Valuation Reduction for Environmental Issues

Mr. Izon and Mr. Jones are not aware of any environmental conditions on the parcels which could lead to a potential valuation reduction for parcels.

3.6 Owner, Property Manager, and Occupant Information

The preliminary title reports for the seven parcels included within the proposed alignment were provided by Mr. Sweet and are detailed below:

APN 985-27-2 – Title dated December 12, 2016. Title is vested in Robert Chen (86.5% interest), Caroline M. Chen (10% interest), and the remaining 3.5% interest divided by multiple parties.

APN 905-1-6-3 – Title dated December 12, 2016. Title is vested in FAB 5 Management, LLC, a Utah Domestic LLC.

APN 905-1-5-2 – Title dated December 12, 2016. Title is vested in Righetti Partners, LP, a California Limited Partnership. Easements for utilities including a strip of land 10 feet in width for transmission of electrical energy.

APN 905-1-4-3 – Title dated December 8, 2016. Title is vested in Town and County H Fund, LLC, Forfeited A Delaware limited liability company.

APN 905-1-4-4 – Title dated December 8, 2016. Title is vested in Robert D. Branaugh, Trustee of the Robert D. Branaugh's Survivor's Trust under the Branaugh 1991 Trust dated July 25, 1991, as to an undivided fifty percent (50%) interest and to Robert D. Branaugh, Trustee of the Shirley M. Branaugh Exemption Trust under the Branaugh 1991 Trust dated July 25, 1991, as to an undivided fifty percent (50%) interest. An option to purchase said Land with certain terms, covenants, conditions and provisions is noted with Dublin Corporate Center, a California LLC as Optionee and Robert D. and Shirley M. Branaugh, Trustees of the Branaugh 1991 Trust as Optionor.

APN 905-1-3-2 – Title dated December 8, 2016. Title is vested in LIVBOR-Manning LLC, a California limited liability company.

APN 905-1-1-2 – Title dated December 8, 2016. Title is vested in LIVBOR-Manning LLC, a California limited liability company.

Multiple easements were listed for utilities including overhead electrical transmission lines, telecommunications equipment and State of California, County of Alameda, or City of Dublin for erosion, infrastructure or road-related activities for the parcels. An instrument entitled Notice of Establishment of Dublin Ranch East Side Drain Benefit District by the City of Dublin is listed for APNs 905-1-5-2, 905-1-4-3, and 905-1-4-4 with charges required upon issuance of a building permit in the amount of \$200,865.92 plus other costs for parcels 905-1-4-3, and 905-1-4-4. Property tax liens were noted for APN 905-1-6-3. Environmental liens or other environmental issues were not observed in the title documents provided.

We provided Mr. Sweet with site owner questionnaires regarding the use, storage, or disposal of hazardous substances and/or petroleum products on the parcels. Mr. Sweet forwarded the owner questionnaires to the current property owners. According to Mr. Sweet, APNs 985-27-2, and 905-1-6-3 are currently owned by GH PacVest, LLC.

Mr. Jay Greenwood, Vice President of Real Estate Development with GH PacVest, completed the owner questionnaires for APNs 985-27-2 and 905-1-6-3. Mr. Greenwood stated that he was unaware of any environmental concerns for the properties.

Mr. Randy Branaugh completed the owner questionnaire for APN 905-1-4-4. Mr. Branaugh stated that auto repair work was performed on the property and that aboveground storage tanks (ASTs) had been located on the property at one point. Mr. Branaugh provided additional details regarding his responses during our April 11, 2018 site walk, discussed in Section 7.0.

Owner questionnaires were not returned for the remaining parcels. Copies of the completed site owner questionnaires are in Appendix B.

3.7 Reason for Performing Phase I ESA

The Client requested the Phase I ESA on behalf of the City of Dublin to obtain information regarding the potential for existing hazardous substances and/or petroleum product impacts in the area proposed for ROW acquisition prior to the City of Dublin acquiring the property for roadway construction.

3.8 Additional Information

Client representative Gordon Sweet supplied us with two previous Phase I Environmental Site Assessment reports prepared by Engeo Incorporated for the two parcels owned by GH PacVest, LLC (APNs 985-27-2 and 905-1-6-23) as part of previous due diligence activities. The reports are discussed in Section 4.3.5. The reports concluded that no RECs were found for either property.

4.0 RECORDS REVIEW

This section summarizes information we obtained from readily available agency records pertaining to the proposed alignment and properties and facilities in the vicinity.

4.1 Standard Environmental Record Sources

EDR searched federal, state, and local environmental databases for the proposed alignment area and properties/facilities within one mile. The following table lists the databases that were searched which list properties/facilities and the number of properties/facilities listed. Other databases searched that do not list any properties/facilities are not included in the table. A copy of the report: *The EDR Radius Map Report with GeoCheck*, dated January 31, 2018, is in Appendix C.

Database Name	Search Radius (Miles)	Number of Listings
FEDERAL DATABASES		
Resource Conservation and Recovery Act – Large Quantity Generator (RCRA-LQG)	0.25	1
Resource Conservation and Recovery Act – Conditionally Exempt Small Quantity Generator (RCRA-CESQG)	0.25	1
STATE, LOCAL, AND TRIBAL DATABASES		
(Department of Toxic Substances Control [DTSC] equivalent CERCLIS Database (EnviroStor)	1.0	6
State and Tribal Leaking Underground Storage Tank (LUST)	0.5	4
Spills, Leaks, Investigations, and Cleanups sites (SLIC)	0.5	2
Alameda County Contaminated Sites	0.5	5
ADDITIONAL ENVIRONMENTAL RECORDS		
Local Lists of Hazardous Waste/Contaminated Sites SCH (DTSC School Property Evaluation Program)	0.25	1
HIST CORTESE (Historical ("Cortese" Hazardous Waste & Substance Site List)	0.5	2
Proposition 65 Records (Notify 65)	1.0	1

4.1.1 Site

The seven parcels (including the proposed alignment area) are not listed in the EDR database search results.

4.1.2 Offsite Properties

No properties are listed within $\frac{1}{8}$ mile of the proposed alignment in the EDR databases. It is therefore unlikely that a neighboring property could have caused an REC at the area proposed for ROW acquisition.

4.2 Orphan Summary

The Orphan Summary identifies facilities that have incomplete address information and could not be specifically plotted. The Orphan Summary contained one listing for a Spills, Leaks, Investigations, and Cleanups (SLIC) facility located near the intersection of Dublin Boulevard and Hacienda Drive. This location is approximately 2 miles west of the proposed alignment and therefore unlikely to have caused an REC at the proposed alignment.

4.3 Other Environmental Record Sources

4.3.1 GeoTracker and EnviroStor

We reviewed information available on GeoTracker and the EnviroStor (<http://www.envirostor.dtsc.ca.gov/public/>) database for information regarding environmental assessment and cleanup at the properties proposed for partial ROW acquisition and/or properties/facilities within ¼ mile. No information for the seven parcels (including the proposed alignment area) was available on GeoTracker or EnviroStor.

No cases are listed on GeoTracker within ¼ mile of the proposed alignment area. One case, E-5 Alternative School Site, is listed on the EnviroStor website within ¼ mile. The property was undeveloped land identified as APN 985-98-2, approximately 1/5 mile north of the proposed alignment. No address was assigned. In 2015, the property was being considered by the City of Dublin for construction of a new school site and contained degraded asphalt. The case is listed as No Further Action status and unlikely to create an REC at the area proposed for ROW acquisition.

4.3.2 Alameda County Environmental Health Services Department

The Alameda County Environmental Health Services (ACEHS) serves as the host for the Certified Unified Program Agency (CUPA) for the area of the proposed alignment. We accessed the ACEHS online system (<http://www.acgov.org/aceh/index.htm>) for information regarding the location and status of any leaking underground storage tanks (USTs) or hazardous materials spills in the area. The online system did not contain records for addresses within the alignment boundaries.

We requested a file search for information regarding hazardous materials storage and use, ASTs and USTs, and releases at the addresses associated with parcels proposed for parcel ROW acquisition. The County responded that no records were found for the listed addresses.

4.3.3 City of Dublin Building Department

We reviewed available records from the City of Dublin through their electronic database at their office.

3457 Croak Road, Dublin (APN 985-1-6-3) - Permits for the construction of a covered riding arena, riding arena and public riding stable were approved in 1971, 1972 and 1973 with continued boarding for up to 50 horses in 1974. A temporary power pole associated with mobile homes for employee housing was issued in 1975. The mobile homes were later identified as “vacation-type” trailers and did not fall under building department regulations. Demolition of a Pole Barn on the side of a building was approved in 1993, but no particular building was specified. Surface Mining Permit SMP-10 approved by the Department of Mining and Reclamation was noted for an approximately 30-acre area to provide clean fill material. A compost-mixing business was noted as operating on the property and was issued a Conditional Land Use Permit for the storage of sand, soil, and mushroom compost. The compost business was operated by a single person and a truck used for transporting compost was kept on the property. Several documents related to litigation associated with the riding facility were included, as well as report concerning vehicle abatement. The structures appeared to be located adjacent to the southern project boundary, south of the area proposed for ROW acquisition.

1881 Collier Canyon Road (APN 905-1-4-4) - Multiple tenant improvements and files related to Arizona Stone which operated on the parcel south of the proposed alignment. Files pertaining to the portion of the parcel proposed for ROW acquisition were not observed.

4.3.4 DOGGR

We reviewed the State of California Department of Conservation, Division of Oil, Gas, and Geothermal Resources (DOGGR) online mapping system for information regarding the location and status of any oil or natural gas exploration or production at or in the vicinity of the proposed alignment. The DOGGR online mapping system shows no wells within a mile of the proposed alignment (DOGGR, 2018).

4.3.5 Previous Phase I Reports

APN 985-27-2 (Fallon Road)

We reviewed the report, *Phase I Environmental Site Assessment, Chen Property, Fallon Road – APN 985-27-2, Dublin, California* prepared by Engeo Incorporated, dated November 8, 2016. The report indicated that the property was undeveloped pastureland used for grazing at the time of the site inspection. Improvements consisted of barbed wire fences, wooden telephone poles and remnants of wooden corrals. Historic information cited noted that seven structures were formerly located in the northwestern portion of the property from 1939 to 1968, and a residential compound was located adjacent to the southeast property corner in 1958. No RECs were identified for the property.

APN 905-1-6-3 (3457 Croak Road)

We reviewed the report, *Phase I Environmental Site Assessment, Andersen Property, 3457 Croak Road, Dublin, California* prepared by Engeo Incorporated, dated November 8, 2016. The report indicated that the property was developed with a rural residential compound with pastureland used for grazing at the time of the site inspection. Improvements consisted of a residence, uninhabitable at the time of the site inspection, barns and a stable in an advanced state of disrepair, barbed wire fences, wooden utility poles, water troughs, cisterns, and sheds. Historic information cited noted that two structures were formerly located in the west-central portion of the property from at least 1940, and additional structures and riding areas were added nearby or replaced original structures between 1949 and 1982. The southern portion of property appeared to be used for dry farming from 1940 to 1968. No RECs were identified for the property.

4.3.6 Additional Reports

Additional Phase I or Phase II environmental investigation reports were not provided, however, we were provided the *Eastern Dublin Specific Plan* (Wallace Roberts & Todd) and the *Fallon Village Project Draft Supplemental Environmental Impact Report*, dated August 2005, prepared by Jerry Haag, Urban Planner, subsequent to the completion of the draft version of this Phase I environmental Site Assessment report.

The reports were prepared as part of a larger regional planning effort and included portions of the Site. We reviewed the reports for evidence of environmental conditions that would indicate the presence of an REC at the Site. According to and the *Fallon Village Project Draft Supplemental Environmental Impact Report*, a number of ESA's have been conducted in the project area. It was noted that the area had largely been used for agricultural use and had little potential for hazardous material contamination. Multiple properties in the area both within and without the Site boundary were identified as a group and noted uses included horse ranch, trucking facility, landscape materials/storage facilities, residence/office, and a former quarry. Specific locations for the listed activities were not identified. The former existence of above-ground diesel storage tanks on the Branaugh property (APN 905-1-4-4) was noted, and the presence of potential ACM/LCP materials in buildings (since removed) was mentioned for the Anderson property (APN 905-1-6-3). Evidence of spills, leaks or release of hazardous materials on the Site was not identified.

5.0 HISTORICAL USE

We evaluated the historical use of the proposed alignment and adjacent properties through review of Sanborn Fire Insurance Maps (Sanborn maps), historical aerial photographs, historical topographic maps, and city directories provided by EDR. This section summarizes the information obtained from these sources.

5.1 Sanborn Fire Insurance Maps

The area of the proposed alignment does not appear in a search of Sanborn maps (Appendix D).

5.2 Aerial Photographs

We reviewed historical aerial photographs for the years 1940, 1949, 1950, 1968, 1979, 1982, 1993, 1998, 2006, 2010, and 2014 (Appendix E) for indications of past land uses that had the potential to have impacted the area proposed for ROW acquisition through the use, storage or disposal of hazardous substances and/or petroleum. The following table summarizes our observations of the proposed alignment and adjacent properties on the aerial photographs.

Year	Observations	
	Site	Adjacent Properties
1940 (1" = 1,125')	What appeared to be unpaved trails or narrow roads, possibly associated with dry land farming, were present throughout the proposed alignment. The trails connected objects, possibly grass or hay piles. What appeared to be a ranch compound with six or seven structures was present along the western end of the proposed alignment along Fallon Road in the current approximate location of a decayed livestock loading area. A road crossed the west-central portion of the area proposed for the alignment at the approximate current location of Croak Road. Two minor, likely seasonal, north-south oriented creeks were visible crossing the central and western areas of the proposed alignment. A third, larger creek crossed the eastern (current Cottonwood Creek) areas of the proposed alignment.	The aerial image does not include the western end of the proposed alignment or the area beyond. A road in the current alignment of Doolan Road was present adjacent to the east, beyond which was rangeland. Croak Road extends north-south through the proposed alignment. The surrounding area contained numerous paths or narrow roads as described within the proposed alignment boundaries. A road in the current alignment of I-580 was visible further south of the proposed alignment.
1949 (1" = 1,125')	The western and central portion of the proposed alignment was open space, possibly rangeland, with faint patterns of previous trails visible at regular intervals. An area of what appeared to be a hay field was present in the eastern area of the proposed alignment. What appeared to be a ranching compound with fenced pasture areas and a riding arena were present on APN 905-1-6-3 (likely former residence 3457 Croak Road), however, the structures appeared to be south of the proposed alignment.	A road in the current alignment of Fallon Road was present at the western terminus of the proposed alignment. What appeared to be a fenced area, trees, and a possible structure was located adjacent to the southwestern end of the proposed alignment, however the details are difficult to discern due to the photographic scale. The surrounding areas appeared to be rangeland or field crops with faint lines remaining from the 1940 paths. Additional structures, apparent ranch houses, were present south of the proposed alignment and north of I-580.
1950 (1" = 1,125')	The proposed alignment appeared to be predominately rangeland with possible field crops.	The aerial image does not include the western end of the proposed alignment or the area beyond. Conditions in other directions were similar to the 1949 photograph, with the faint

Year	Observations	
	Site	Adjacent Properties
		pathways no longer visible.
1968 (1" = 1,125')	Conditions were similar to the 1950 photograph.	Conditions in other directions were similar to the 1950 photograph.
1979 (1" = 1,125')	Conditions were similar to the 1968 photograph, with an increase in what appeared to be hay, field, or row crops visible.	Conditions in other directions were similar to the 1968 photograph. An interchange was constructed along I-580 and Fallon Road, and I-580 appeared widened. Structures were located south of the central portion of the proposed alignment, possibly ranch homes and barns or sheds.
1982 (1" = 1,125')	The ranch along Fallon Road was no longer visible. Multiple structures were present on APN 905-1-4-3, within or just south of the approximate proposed project alignment. What appeared to be a canal crossed the proposed alignment at APN 905-1-6-3 and led a short distance northeast. Conditions in remaining areas were similar to those observed on the 1979.	Conditions were similar to those observed in the 1979 photograph. Additional structures, possibly a barn and shed or ranch home, were visible south of the proposed alignment near I-580.
1993 (1" = 1,125')	Conditions were similar to the 1982 photograph.	Conditions were similar to those observed in the 1982 photograph. The possible structure formerly located at the southwestern terminus of the project area was not visible. A disturbed area was visible north of the central area of the proposed alignment. The property adjacent to the southwest appeared vacant of structures and trees.
1998 (1" = 1,125')	Conditions were similar to those observed on the 1993 photograph. What appeared to be a driveway connecting the expanded ranch compound between Croak Road and Doolan Road to a pond was visible.	Conditions were similar to those observed on the 1993 photograph.
2006 (1" = 1,125')	Conditions were similar to those observed on the 1998 photograph.	Conditions in remaining areas appeared similar to those observed on the 1998 photograph. The area across Fallon Road at the western terminus of the proposed alignment appeared disturbed for construction.
2010 and 2014 (1" = 1,125')	Conditions were similar to those observed on the 2006 photograph. The structures that were present on APN 905-1-4-3 were not visible in the 2014 image. What appeared to be a paved area was present in the approximate location of the current alignment.	Conditions were similar to those observed on the 2006 photograph. A road in the current alignment of Dublin Boulevard was present across Fallon Road west of the proposed alignment in the 2010 photograph.

Paths or narrow roads, possibly related to dry land farming, were present within the area proposed for ROW acquisition since before 1940. The purpose of the pathways is not known. An apparent ranch compound was located along the western terminus of the proposed alignment near Fallon Road (APN 985-27-2) from before 1940 to before 1982. The building structures appeared to be located adjacent south of the proposed alignment. A decayed livestock loading corral likely formerly associated with the structures is currently located in the alignment area. Possible ranch structures were present on APN 905-1-4-3 from before 1982 to before 2014 in the approximate alignment of the proposed roadway extension. Septic and heating oil tanks may have been associated with the structures formerly located on APNs 985-27-2, and 905-1-4-3. The proposed alignment area has been used primarily for rangeland with partial field or row crops since at least 1949. It is possible pesticides were in use in field or row crop areas (APN 905-1-3-2). This is a potential REC for the proposed alignment.

5.3 Topographic Maps

We reviewed historical topographic maps for the years 1906, 1941, 1947, 1953, 1961, 1968, 1973, 1980, and 2012 (Appendix F). The following table summarizes our observations of the proposed alignment area and adjacent properties on the historical topographic maps.

Year	Observations	
	Site	Adjacent Properties
1906 (1: 62,500)	The proposed alignment is depicted as undeveloped. A creek crosses the proposed alignment in the approximate current location of Cottonwood Creek.	The surrounding area is depicted largely undeveloped with occasional rural dwellings. A single structure is depicted adjacent to the northwest terminus of the proposed alignment. An unimproved road is depicted in the approximate current alignment of Fallon Road adjacent west of the proposed alignment. A light duty road is depicted in the approximate location of current Doolan Road adjacent east of the proposed alignment. A paved roadway is depicted south of the proposed alignment in the current alignment of I-580. A structure labeled as a church is depicted at the intersection of Doolan Road and I-580 to the southeast of the proposed alignment.

Year	Observations	
	Site	Adjacent Properties
1941 (1: 62,500)	Similar to conditions depicted on the 1906 map with the exception of an unimproved road is depicted in the current alignment of Croak Road.	The dwelling depicted at the northwest terminus of the proposed alignment is no longer depicted. I-580 is depicted as a highway or road with a median strip and labeled Highway 50. An unimproved road and associated dwelling are depicted south of the proposed alignment. The structure previously depicted as a church at the intersection of Doolan Road and I-580 is labeled as a school.
1947 (1: 50,000)	Similar to conditions depicted on the 1941 map.	Fallon Road and Croak Road are depicted as light duty roads. Doolan Road is depicted as a primary highway.
1953 (1:24,000)	Similar to conditions depicted on the 1947 map.	Similar to conditions depicted on the 1947 map. Structures are depicted south of the proposed alignment on Croak Road and north of I-580. I-580 is depicted as a 2 lane divided highway.
1961 (1:24,000)	Similar to conditions depicted on the 1953 map.	Similar to conditions depicted on the 1953 map.
1968 (1:24,000)	Similar to conditions depicted on the 1961 map.	Similar to conditions depicted on the 1961 map. A single structure is depicted adjacent to the southwestern terminus of the proposed alignment.
1973 (1:24,000)	Similar to conditions depicted on the 1968 map.	Similar to conditions depicted on the 1968 map. A second structure is depicted at the southwestern terminus of the proposed alignment. A commercial building is depicted south of the central area of the proposed alignment.
1980 (1:24,000)	Similar to conditions depicted on the 1973 map.	Similar to conditions depicted on the 1973 map. The second structure at the property located adjacent to the southwestern terminus of the proposed alignment is no longer depicted. The commercial structure that was depicted south of the central portion of the proposed alignment is depicted as larger.
2012 (1:24,000)	No structures or land uses depicted on the proposed alignment.	No structures or land uses depicted on the adjacent properties.

The topographic maps do not depict features or land uses that directly suggest the presence of RECs on the proposed alignment. Structures were depicted north and south of the western proposed alignment terminus as early as 1906. Although the structures are no longer depicted, dwellings of this time period have been associated with septic systems and possibly underground tanks used for the storage of heating oil. The purpose of the commercial building south of the central portion of the proposed alignment corresponds to the former location of a covered riding arena described during a personal interview with Mr. Randy Branaugh, owner of APN 905-1-4-4 on April 11, 2018.

5.4 City Directories

EDR prepared an abstract of city directories including city, cross reference and telephone directory listings (Appendix G) with information provided for approximate 5-year intervals, if available, from 1975 to 2014.

5.4.1 Onsite Addresses

3457 Croak Road, Dublin

Pleasanton Trucking is listed from 2000 to 2014, and A M Backhoe is listed for 1992. The address corresponds to a former residence located on APN 905-1-6-3. The business name listings suggest the relationship to a trucking and equipment enterprise which may have included the storage and use of petroleum products or other hazardous materials. The listings do not appear in the EDR report, on GeoTracker, or on agency websites, and are not reported as being associated with a release. The listings therefore pose a low potential to have caused an REC at the proposed alignment.

5.4.2 Offsite Addresses

The adjacent properties listed in the EDR report consist of landscaping and residential listings and businesses operating in the shopping center along Fallon Road and the Doolan Road area. The business listing names do not, in and of themselves, suggest the use, storage, release, or disposal of hazardous substances or petroleum products.

5.4.3 Nearby /Additional Information

A former mine listing identified in the Engeo Incorporated, *Phase I Environmental Site Assessment, Chen Property, Fallon Road, APN 985-27-2, Dublin, California*, dated November 2016 report for APN 905-1-6-3 was identified as “Bezely Pit” reported by EDR on the MINES database search. Documentation in the City of Dublin Building Permit department indicated that a Surface Mining Permit (SMP-10) was issued to a Mr. Bezely for mining of clean fill material. The listing therefore poses a low potential to have caused an REC at the proposed alignment.

6.0 SITE RECONNAISSANCE

This section summarizes our observations of the proposed alignment and surrounding properties made during the site reconnaissance.

6.1 Methodology and Limiting Conditions

Luann Beadle, Project Scientist with Geocon, performed a site reconnaissance on March 26, 2018 and April 11, 2018. Ms. Beadle was accompanied by Mr. Greenwood from PacVest, LLC as an owner representative for APNs 985-27-2 and 905-1-6-3 on March 26, 2018 and Mr. Randy Branaugh, the

owner of APN 905-1-4-4 on April 11, 2018. The owners of APNs 905-1-1-2, 905-1-3-2, and 905-1-4-3 allowed Ms. Beadle to walk the properties unaccompanied. APN 905-1-5-2 was observed from the surrounding properties. Ms. Beadle performed the site reconnaissance by walking throughout the proposed alignment and along the proposed alignment perimeter to observe proposed alignment features and conditions. The offsite survey was performed by making observations of adjacent properties from the proposed alignment and public roads.

Weather on the days of the site reconnaissance was mild with temperatures in the 60s°F. Photographs of various features within the proposed alignment and offsite properties are attached. Site Maps are included as Figures 2a and 2b.

6.2 Site Setting

The proposed alignment is situated in an area of primarily agricultural land uses. A landscaping business is located south of the proposed alignment within APN 905-14-4 (1881 Collier Canyon Road, Photo 10).

6.3 Onsite Survey

As described in Section 2.4, the proposed alignment is largely undeveloped and used for grazing. Barbed wire fencing and metal access gates are located along the various parcel boundaries. Wooden overhead utility poles and livestock watering sources are located within the proposed alignment (Photo 11). The portion of the proposed alignment that passes through APN 905-14-4 (1881 Collier Canyon Road), is improved with drainage, lighting, gates, fencing, an asphalt-paved parking/storage area and driveway connecting the front entrance to the property on Collier Canyon Road (Photo 12). An open metal shed and shipping container are also included in this area. APN 905-1-4-4 contained a paved fenced and gated area used for storage of landscaping supplies (Photo 13). The portion of the alignment passing through APN 905-1-6-3 (3457 Croak Road) was observed to contain degraded driveways associated with a former residence, wood waste, possibly demolition debris, pieces of rusted metal equipment, and miscellaneous de minimis refuse (Photos 2 and 3). Two soil berms/stockpiles covered with vegetation were present and appeared to be arranged in a position behind the former building locations. The remnants of a livestock loading corral was observed on APN 985-27-2 at the western proposed alignment boundary adjacent to Fallon Road (Photo 1). Cottonwood Creek traverses the eastern portion of the proposed alignment in a roughly north-south direction (Photo 9).

No evidence of RECs or a release of hazardous substances was observed on proposed alignment.

6.4 Offsite Survey

Adjacent properties consist of the following:

- North – Croak Road and undeveloped pastureland (Photo 14);

- East – Doolan Road is adjacent to the east, beyond which is North Canyon Parkway, a sanitary supply company, and a casino (Photos 15 and 16);
- South – Croak Road, undeveloped pasture land with the exception of APN 905-1-4-4 (1881 Collier Canyon Road, Allied Landscape Services and others) and APN 905-1-4-3 (landscaping supply storage) (Photos 17 and 10);
- West – Fallon Road beyond which is a shopping center featuring restaurants and commercial businesses along Dublin Boulevard (Photo 18).

Two heavily rusted and apparently empty (holes were visible) storage tanks (or possibly one storage tank and a 55 gallon drum) were observed lying in a debris area near the apparent location of the former residences south of the proposed alignment on APN 985-27-2. Two tanks were noted as being present during Engeo Incorporated in their 2016 report for the property at this location. It is unknown whether the tanks were ASTs or USTs. The tanks pose a low potential to be an environmental concern for the proposed alignment.

No evidence of RECs or a release of hazardous substances was observed in the areas surrounding the proposed alignment.

7.0 INTERVIEWS

We interviewed Mr. Jay Greenwood, Vice President of GH PacVest, LLC, for information regarding past and present use of the proposed alignment and the potential for impacts related to the use, storage, or disposal of hazardous substances or petroleum on the parcels APN 985-27-2 and 905-1-6-3. Mr. Greenwood also completed a site owner questionnaire regarding the use, storage, or disposal of hazardous substances or petroleum on the GH PacVest, LLC-owned parcels. We interviewed Mr. Randy Branaugh, owner of APN 905-1-4-4, for information regarding past and present use of APN 905-1-4-4 and the potential for impacts related to the use, storage, or disposal of hazardous substances or petroleum on the portion of the parcel within the proposed alignment. Owner questionnaires were not returned for APNs 905-1-5-2, 905-1-4-3, 905-1-3-2, and 905-1-1-2. Copies of the completed site owner questionnaires are in Appendix B.

Mr. Greenwood stated that rural residential structures had been removed from APN 905-1-4-3 (3457 Croak Road) and that no environmental issues, ASTs, or USTs were encountered to his knowledge, nor was he aware of any environmental issues related to the remaining area of the portion of the parcels proposed for ROW acquisition or the parcels as a whole.

We interviewed Mr. Randy Branaugh, owner of APN 905-1-4-4 (1181 Collier Canyon Road) during our April 11, 2018. Mr. Branaugh explained that auto repair work noted in his questionnaire response was associated with maintenance of vehicles parked onsite by the current tenants at locations likely not within the proposed alignment and amounted to typical oil changes or other incidental maintenance associated with vehicles. The repair work was not done on a commercial basis and is considered a de

minimis condition. Two ASTs were located in the current paved and gated area (eastern portion of the property) and were in the approximate location of the proposed alignment. The tanks were located on a paved area with containment berms and each stored approximately 5,000 gallons of diesel fuel associated with a former paving business that leased the property. The tanks were removed sometime between 1985 and 1990 without incident. According to Mr. Branaugh, there were no spills or leaks that he was aware of, and the soil below the tanks was tested for contamination subsequent to the tanks being removed. Evidence of contamination was not found. We contacted Alameda County Department of Environmental Health, the Alameda County Fire Department, and the City of Dublin Fire Prevention Bureau for information regarding the former diesel tanks. The agencies reported that they did not have records related to the property address. No information for the tanks appears on the GeoTracker database or in the EDR report. The former presence of the diesel ASTs is a potential environmental concern for the proposed alignment.

Mr. Branaugh also stated that the general surrounding area had been used in the past for horse riding stables with covered arenas, barns, and riding areas.

8.0 CONCLUSIONS AND RECOMMENDATIONS

We have performed a Phase I ESA, in general conformance with the scope and limitations of ASTM *Designation E 1527-13* of the portions of the properties proposed for ROW acquisition from Fallon Road in Dublin, to Doolan Road in Livermore, California along the proposed alignment of an extension to Dublin Boulevard in Dublin and in Alameda County, California. Exceptions to, or deletions from, this practice are described in Section 1.4 of this report.

The Phase I ESA did not reveal any RECs associated with the proposed alignment. The following are environmental concerns in connection with the proposed alignment and adjacent properties:

- The former existence of rural residential structures or commercial riding facilities in or near the proposed alignment path could have been associated with water/dry wells, septic systems and fuel or heating oil tanks. If undocumented USTs, onsite septic systems, water wells and/or dry wells are encountered during construction activities, they should be abandoned and/or removed in accordance with ACEHS requirements.
- Former diesel ASTs were reportedly located on APN 905-1-4-4 which poses a potential environmental concern for the proposed alignment. If petroleum-impacted soil is encountered during any construction activities, the area should be isolated and mitigated in accordance with ACEHS requirements.
- The Phase I ESA has revealed previous agricultural land use at the proposed alignment (possibly dry farming and row crops). The potential presence of residual pesticides associated with agricultural activities is a potential environmental concern.

As part of the ROW acquisition process, a limited soil investigation is recommended within the proposed alignment area to identify potential impacts from past petroleum hydrocarbon and agricultural use.

10.0 QUALIFICATIONS

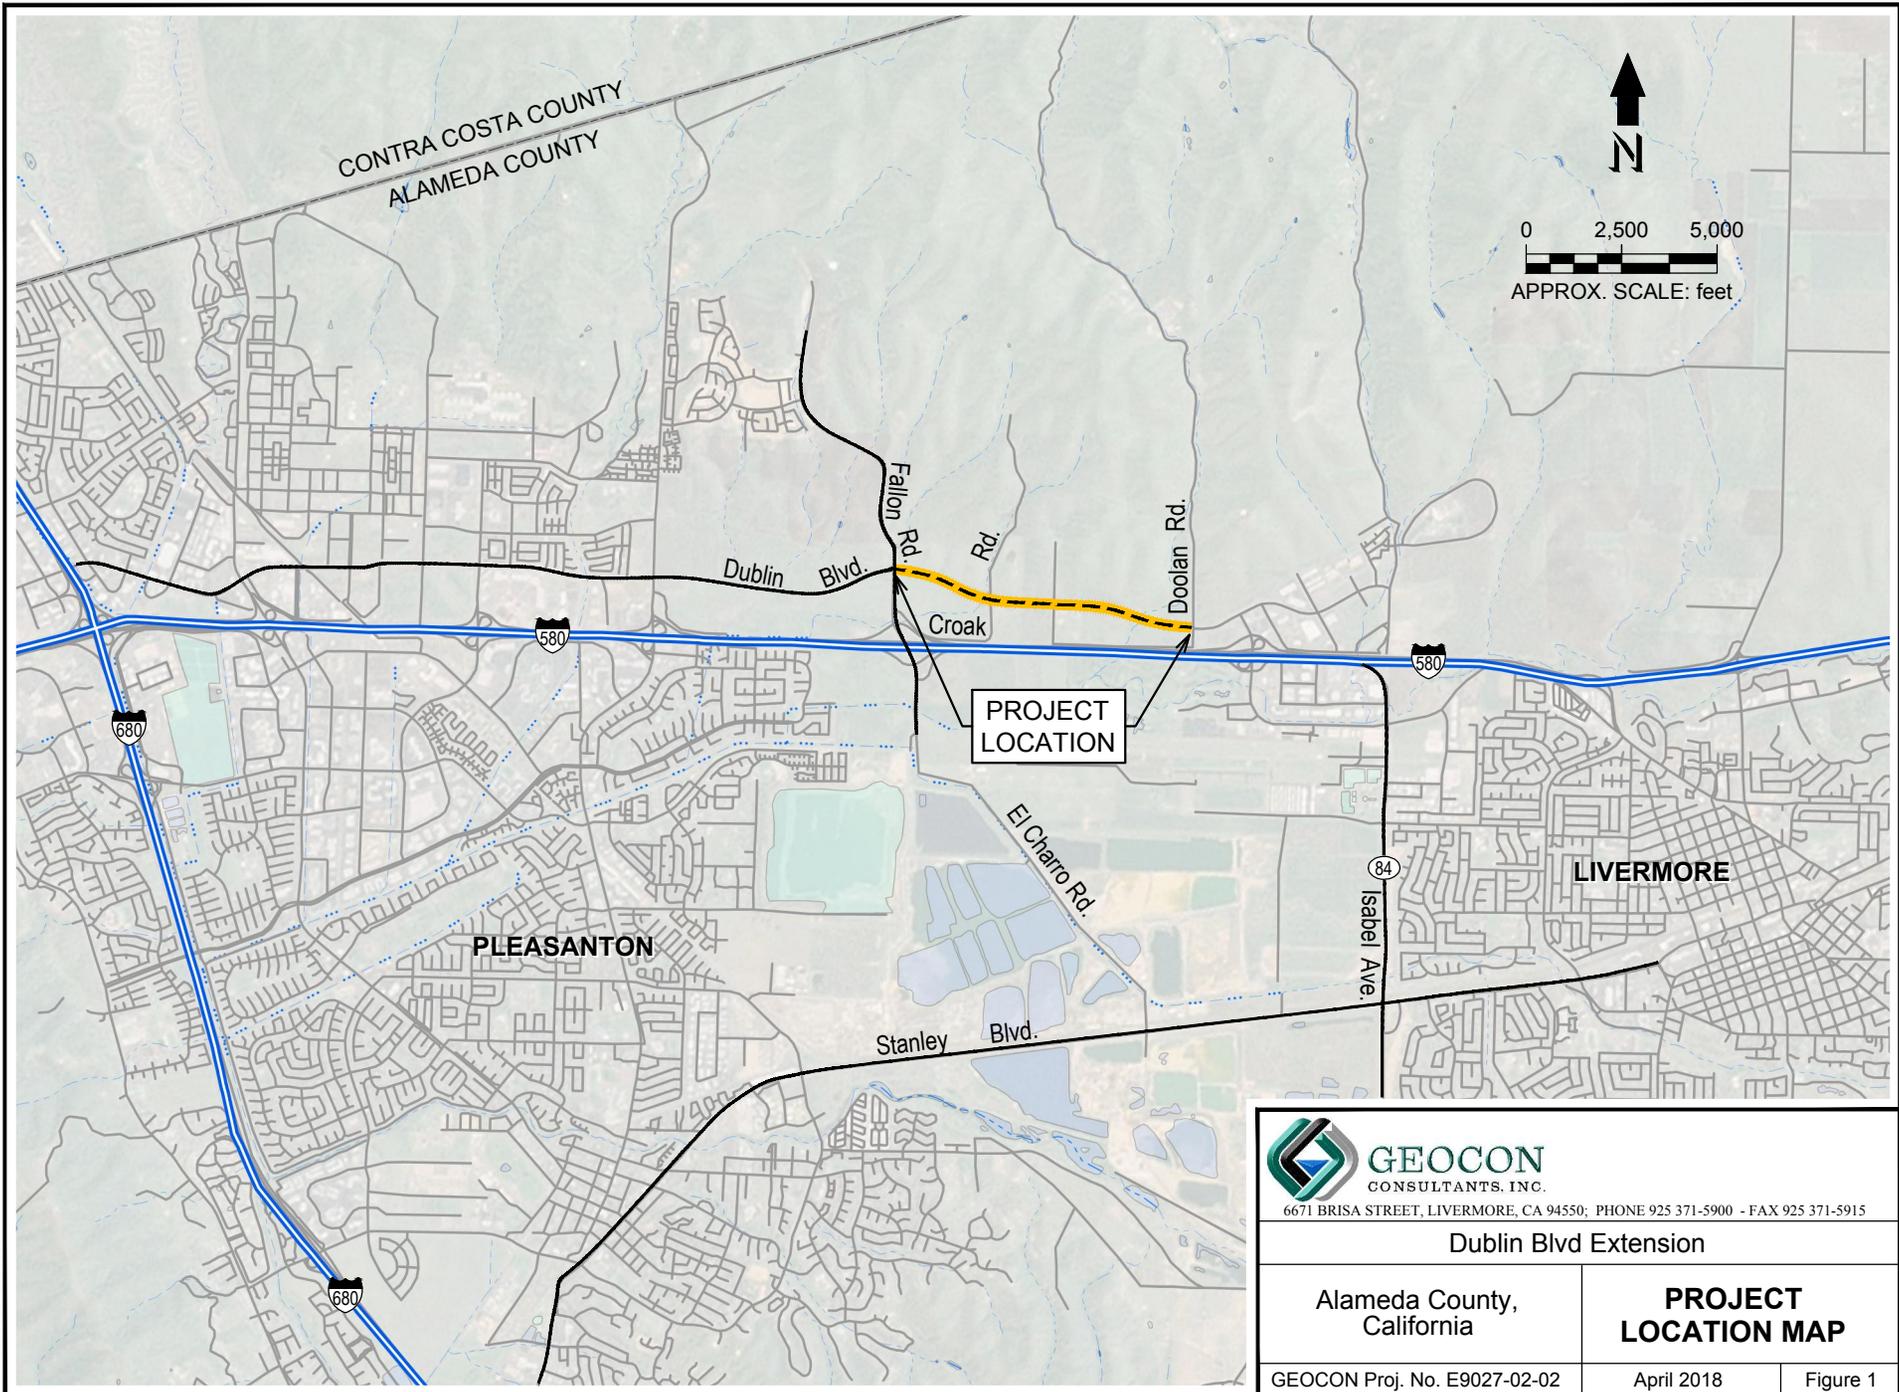

This Phase I ESA report was prepared by Luann Beadle and reviewed Mr. John Juhrend, PE, CEG, CEM.

Ms. Beadle has over 20 years of experience in environmental investigation and remediation projects including 12 years in the preparation of Phase I ESAs. Ms. Beadle has a BS degree in environmental and systematic biology, and has experience in the performance of Phase I and II ESAs of commercial, industrial, and agricultural properties, and transportation corridors.

Mr. Juhrend has over 30 years of experience in the environmental and geotechnical consulting industry in California and Nevada. Mr. Juhrend is a California Professional Engineer and Certified Engineering Geologist, with a BS degree in engineering geology and MS degree in civil engineering. His personal experience includes the performance of hundreds of environmental projects including Phase I and Phase II site assessments, remedial investigations and feasibility studies, corrective action programs and litigation support. His primary expertise includes environmental assessments of Brownfields properties, industrial, commercial and residential properties, and transportation corridors.

I declare that, to the best of my professional knowledge and belief, I meet the definition of environmental professional as defined in §312.10 of 40 CFR 312 and I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. I have developed and performed the all appropriate inquiries investigation in conformance with the standards and practices set forth in 40 CFR Part 312.

Luann Beadle

APPENDIX

Site Owner Questionnaire
Croak Rd. Dublin, CA
(APN 985-27-2)

The following questions are for (1) the current owner of the property, (2) any major occupant of the property or, if the property does not have any major occupants, at least 10% of the occupants of the property, and (3) in addition to the current owner and the occupants identified in (2), any occupant likely to be using, treating, generating, storing, or disposing of hazardous substances or petroleum products on or from the property. A major occupant is any occupant using at least 40% of the leasable area of the property or any anchor tenant when the property is a shopping center. In a multi-family property containing both residential and commercial uses, residential occupants do not need to respond to this questionnaire unless they are involved in or have knowledge of the commercial or other uses.

Description of Site: Address:

Fallon Road, Dublin, CA 94568 (chen property)

Question	Owner			Occupants (if applicable)		
	Yes	No	Unk	Yes	No	Unk
1a. Is the property used for an industrial use?		<input checked="" type="radio"/>				
1b. Is any adjoining property used for an industrial use?		<input checked="" type="radio"/>				
2a. Have you observed evidence of or do you have any knowledge that the property has been used for an industrial use in the past?		<input checked="" type="radio"/>				
2b. Have you observed evidence of or do you have any knowledge that any adjoining property has been used for an industrial use in the past?		<input checked="" type="radio"/>				
3a. Is the property used as a gasoline station, motor repair facility, commercial printing facility, dry cleaners, photo developing laboratory, junkyard or landfill, or as a waste treatment, storage, disposal, processing, or recycling facility (if applicable, identify which)?		<input checked="" type="radio"/>				
3b. Is any adjoining property used as a gasoline station, motor repair facility, commercial printing facility, dry cleaners, photo developing laboratory, junkyard or landfill, or as a waste treatment, storage, disposal, processing, or recycling facility (if applicable, identify which)?		<input checked="" type="radio"/>				
4a. Have you observed evidence of or do you have any knowledge that the property has been used as a gasoline station, motor repair facility, commercial printing facility, dry cleaners, photo developing laboratory, junkyard or landfill, or as a waste treatment, storage, disposal, processing, or recycling facility (if applicable, identify which)?		<input checked="" type="radio"/>

User Questionnaire
Dublin Blvd Extension, Alameda County, CA
Assessor's Parcel Numbers:
905-1-3-2 and 905-1-1-2

Please answer the following questions as they apply to all parcels if responses are consistent. If conditions apply to a single parcel or sub-group of parcels, please specify by APN. Use additional sheets if necessary.

1. Are you aware of any environmental cleanup liens against the property that are filed or recorded under federal, tribal, state or local law?
NO

2. Are you aware of any activity and land use limitations, such as engineering controls, land use restrictions or institutional controls that are in place at the site and/or have been filed or recorded in a registry under federal, tribal, state or local law?
East County Area Plan-Measure D

3. Do you have any specialized knowledge related to the property or nearby properties?
NO

4. Does the purchase price reasonably reflect the fair market value of the property?

Unknown

5. Do you know the past uses of the property?
NO

6. Do you know of specific chemicals that are present or once were present at the property?
NO

7. Do you know of spills or other chemical releases that have taken place at the property?
NO

8. Do you know of any environmental cleanups that have taken place at the property?
NO

9. Do you know whether any helpful documents exist and, if so, whether copies can and will be provided for this assessment? These documents may include: Environmental site assessment reports, Environmental compliance audit reports, Environmental permits, Registrations for storage tanks, Registrations for underground injection systems, or any other documents related to the property.
NO

User Questionnaire
Dublin Blvd Extension, Dublin and Livermore, CA
Assessor's Parcel Numbers:

905-1-4-4, 905-1-5-2, 985-27-2, and 905-1-6-3

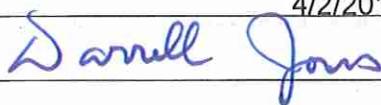

Please answer the following questions as they apply to all parcels if responses are consistent. If conditions apply to a single parcel or sub-group of parcels, please specify by APN. Use additional sheets if necessary.

1. Are you aware of any environmental cleanup liens against the property that are filed or recorded under federal, tribal, state or local law? **NO / FIRE**
2. Are you aware of any activity and land use limitations, such as engineering controls, land use restrictions or institutional controls that are in place at the site and/or have been filed or recorded in a registry under federal, tribal, state or local law? **NO / FIRE**
3. Do you have any specialized knowledge related to the property or nearby properties?
NO / FIRE
4. Does the purchase price reasonably reflect the fair market value of the property?
UNKNOWN / FIRE
5. Do you know the past uses of the property? **AGRICULTURAL / FIRE**
6. Do you know of specific chemicals that are present or once were present at the property?
NONE REPORTED / FIRE
7. Do you know of spills or other chemical releases that have taken place at the property?
NONE REPORTED / FIRE
8. Do you know of any environmental cleanups that have taken place at the property?
NONE REPORTED / FIRE

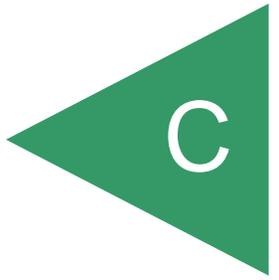

9. Do you know whether any helpful documents exist and, if so, whether copies can and will be provided for this assessment? These documents may include: Environmental site assessment reports, Environmental compliance audit reports, Environmental permits, Registrations for storage tanks, Registrations for underground injection systems, or any other documents related to the property.

NO / FIRE

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

EXECUTIVE SUMMARY

STANDARD ENVIRONMENTAL RECORDS

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 09/13/2017 has revealed that there is 1 RCRA-LQG site within approximately 0.25 miles of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
TARGET T2771	2800 DUBLIN BLVD	W 1/8 - 1/4 (0.223 mi.)	2	11

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-CESQG list, as provided by EDR, and dated 09/13/2017 has revealed that there is 1 RCRA-CESQG site within approximately 0.25 miles of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
CVS PHARMACY #17628	2800 DUBLIN BLVD STE	W 1/8 - 1/4 (0.241 mi.)	3	18

State- and tribal - equivalent CERCLIS

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 10/30/2017 has revealed that there are 6 ENVIROSTOR sites within approximately 1 mile of the target property.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Lists of Hazardous waste / Contaminated Sites

SCH: This category contains proposed and existing school sites that are being evaluated by DTSC for possible hazardous materials contamination. In some cases, these properties may be listed in the CalSites category, depending on the level of threat to public health and safety or the environment they pose.

A review of the SCH list, as provided by EDR, and dated 10/30/2017 has revealed that there is 1 SCH site within approximately 0.25 miles of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

Biennial Reports:

Last Biennial Reporting Year: 2017

Annual Waste Handled:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Amount (Lbs): 1515

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Amount (Lbs): 740

storage tank (UST), a diesel fuel drum-storage area, empty above ground storage tanks, 55-gallon waste oil drum, and circular "bare-earth zones identified in historic photographs. Results of a Phase II ESA performed in 2001 indicated an unauthorized release of petroleum hydrocarbons had occurred from the former UST. In 2006, a soil and groundwater investigation was conducted including installation of 5 groundwater monitoring wells and collection of soil, sediment, groundwater, and soil vapor samples to assess the potential presence of pesticides and herbicides in shallow soil, impacts related to two debris disposal areas, and soil vapor impacts related to the UST. The investigation results indicate elevated levels of petroleum hydrocarbons as gasoline in soil and groundwater, and elevated levels of benzene in groundwater and soil vapor samples. In 2006 a supplemental site investigation was conducted to delineate the horizontal extent of petroleum constituents detected in soil and groundwater. Based on results of three soil samples and three grab groundwater samples collected from three test pits, it was concluded that impacts are limited to the immediate vicinity of the former UST. Implementation of the CAP began in September 2011 and included soil excavation and ex-situ soil treatment in an on-site cell. Due to significant soil staining throughout the base and sidewalls of the initial excavation beginning at 14 feet bgs (PID reading of 2,000 ppm). The excavation extended to a depth of 25 feet which resulted in removal of approximately 200 cubic yards of impacted soil below the water table. Due to site access constraints, impacted soil below the water table was left in place. Maximum concentrations of TPHd and TPg detected in confirmation base samples were 790 mg/kg and 3,700 mg/kg, respectively. Due to geotechnical concerns, the excavation was immediately backfilled with drain rock below the water table and therefore groundwater extraction activities as proposed in the CAP (removal of 40,000 gallons of impacted groundwater from the open excavation pit) were not implemented. In total, approximately 450 cubic yards of impacted soil was excavated and placed in the ex-situ bioaugmentation treatment cell. In October 2011 groundwater remediation activities commenced with advancement of 27 injection points and pumping of the bioaugmentation liquid reagent BioCrittlers into the saturated zone. Five rounds of soil vapor sampling was completed in the area of the former UST tank pit between June 2012 and June 2014 to assess the potential for vapor intrusion to indoor air for future buildings. Based on the results of the soil vapor sampling, the residual contamination does not appear to pose a risk for vapor intrusion to indoor air for the planned development. The case was closed on January 14, 2016

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 12/11/2017	Source: EPA

Federal CERCLIS list

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 11/07/2016	Source: Environmental Protection Agency

Number of Days to Update: 92	Next Scheduled EDR Contact: 04/16/2018
	Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date Data Arrived at EDR: 12/22/2017	Telephone: 800-424-9346
Date Made Active in Reports: 01/12/2018	Last EDR Contact: 01/17/2018
Number of Days to Update: 21	Next Scheduled EDR Contact: 04/30/2018
	Data Release Frequency: Quarterly

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Date of Government Version: 12/11/2017	Source: EPA
Date Data Arrived at EDR: 12/22/2017	Telephone: 800-424-9346

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 09/13/2017	Source: Environmental Protection Agency
Date Data Arrived at EDR: 09/26/2017	Telephone: (415) 495-8895

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 09/13/2017	Source: Environmental Protection Agency
Date Data Arrived at EDR: 09/26/2017	Telephone: (415) 495-8895

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 09/13/2017	Source: Environmental Protection Agency
Date Data Arrived at EDR: 09/26/2017	Telephone: (415) 495-8895

Number of Days to Update: 10	Next Scheduled EDR Contact: 04/09/2018
	Data Release Frequency: Quarterly

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Federal institutional controls / engineering controls registries

LUCIS: Land Use Control Information System

LUCIS contains records of land use control information pertaining to the former Navy Base Realignment and Closure properties.

Date of Government Version: 05/22/2017	Source: Department of the Navy
Date Data Arrived at EDR: 06/13/2017	Telephone: 843-820-7326
Date Made Active in Reports: 09/15/2017	Last EDR Contact: 11/08/2017
Number of Days to Update: 94	Next Scheduled EDR Contact: 02/26/2018
	Data Release Frequency: Varies

US ENG CONTROLS: Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 08/10/2017	Source: Environmental Protection Agency
Date Data Arrived at EDR: 08/30/2017	Telephone: 703-603-0695
Date Made Active in Reports: 10/13/2017	Last EDR Contact: 01/19/2018
Number of Days to Update: 44	Next Scheduled EDR Contact: 03/12/2018
	Data Release Frequency: Varies

US INST CONTROL: Sites with Institutional Controls

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 08/10/2017	Source: Environmental Protection Agency
Date Data Arrived at EDR: 08/30/2017	Telephone: 703-603-0695

State- and tribal - equivalent CERCLIS

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Other Ascertainable Records

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Data Release Frequency: Varies

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

GEOCHECK[®] - PHYSICAL SETTING SOURCE ADDENDUM

TARGET PROPERTY ADDRESS

DUBLIN BLVD EXTENSION
BAYWOOD CMN
PLEASANTON, CA 94588

TARGET PROPERTY COORDINATES

Latitude (North):	37.704468 - 37° 42' 16.08"
Longitude (West):	121.837557 - 121° 50' 15.21"
Universal Transverse Mercator:	Zone 10
UTM X (Meters):	602471.9
UTM Y (Meters):	4173456.8
Elevation:	410 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	5640392 LIVERMORE, CA
Version Date:	2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

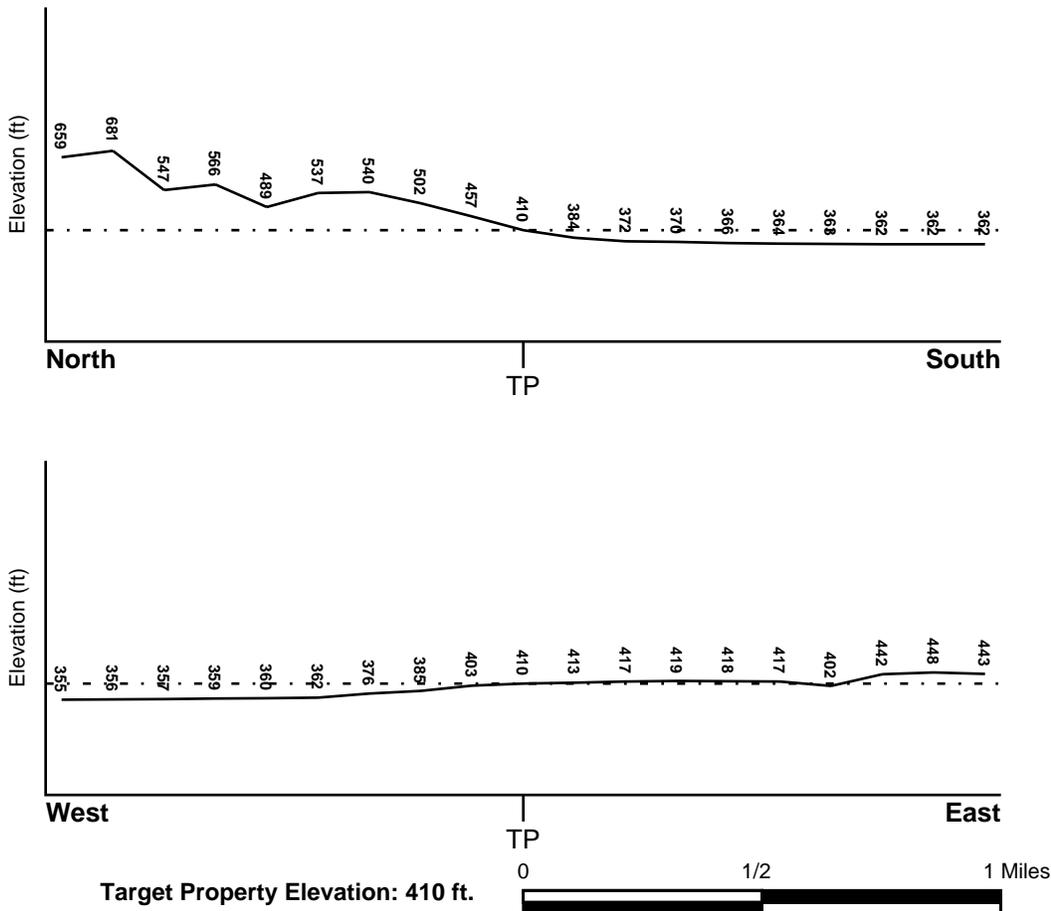

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SSW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

<u>Flood Plain Panel at Target Property</u>	<u>FEMA Source Type</u>
06001C0329G	FEMA FIRM Flood data
<u>Additional Panels in search area:</u>	<u>FEMA Source Type</u>
06013C0602F	FEMA FIRM Flood data
06001C0328G	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u>	<u>NWI Electronic Data Coverage</u>
LIVERMORE	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
13	1/2 - 1 Mile SW	SW
1G	1/2 - 1 Mile SW	SW

For additional site information, refer to Physical Setting Source Map Findings.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

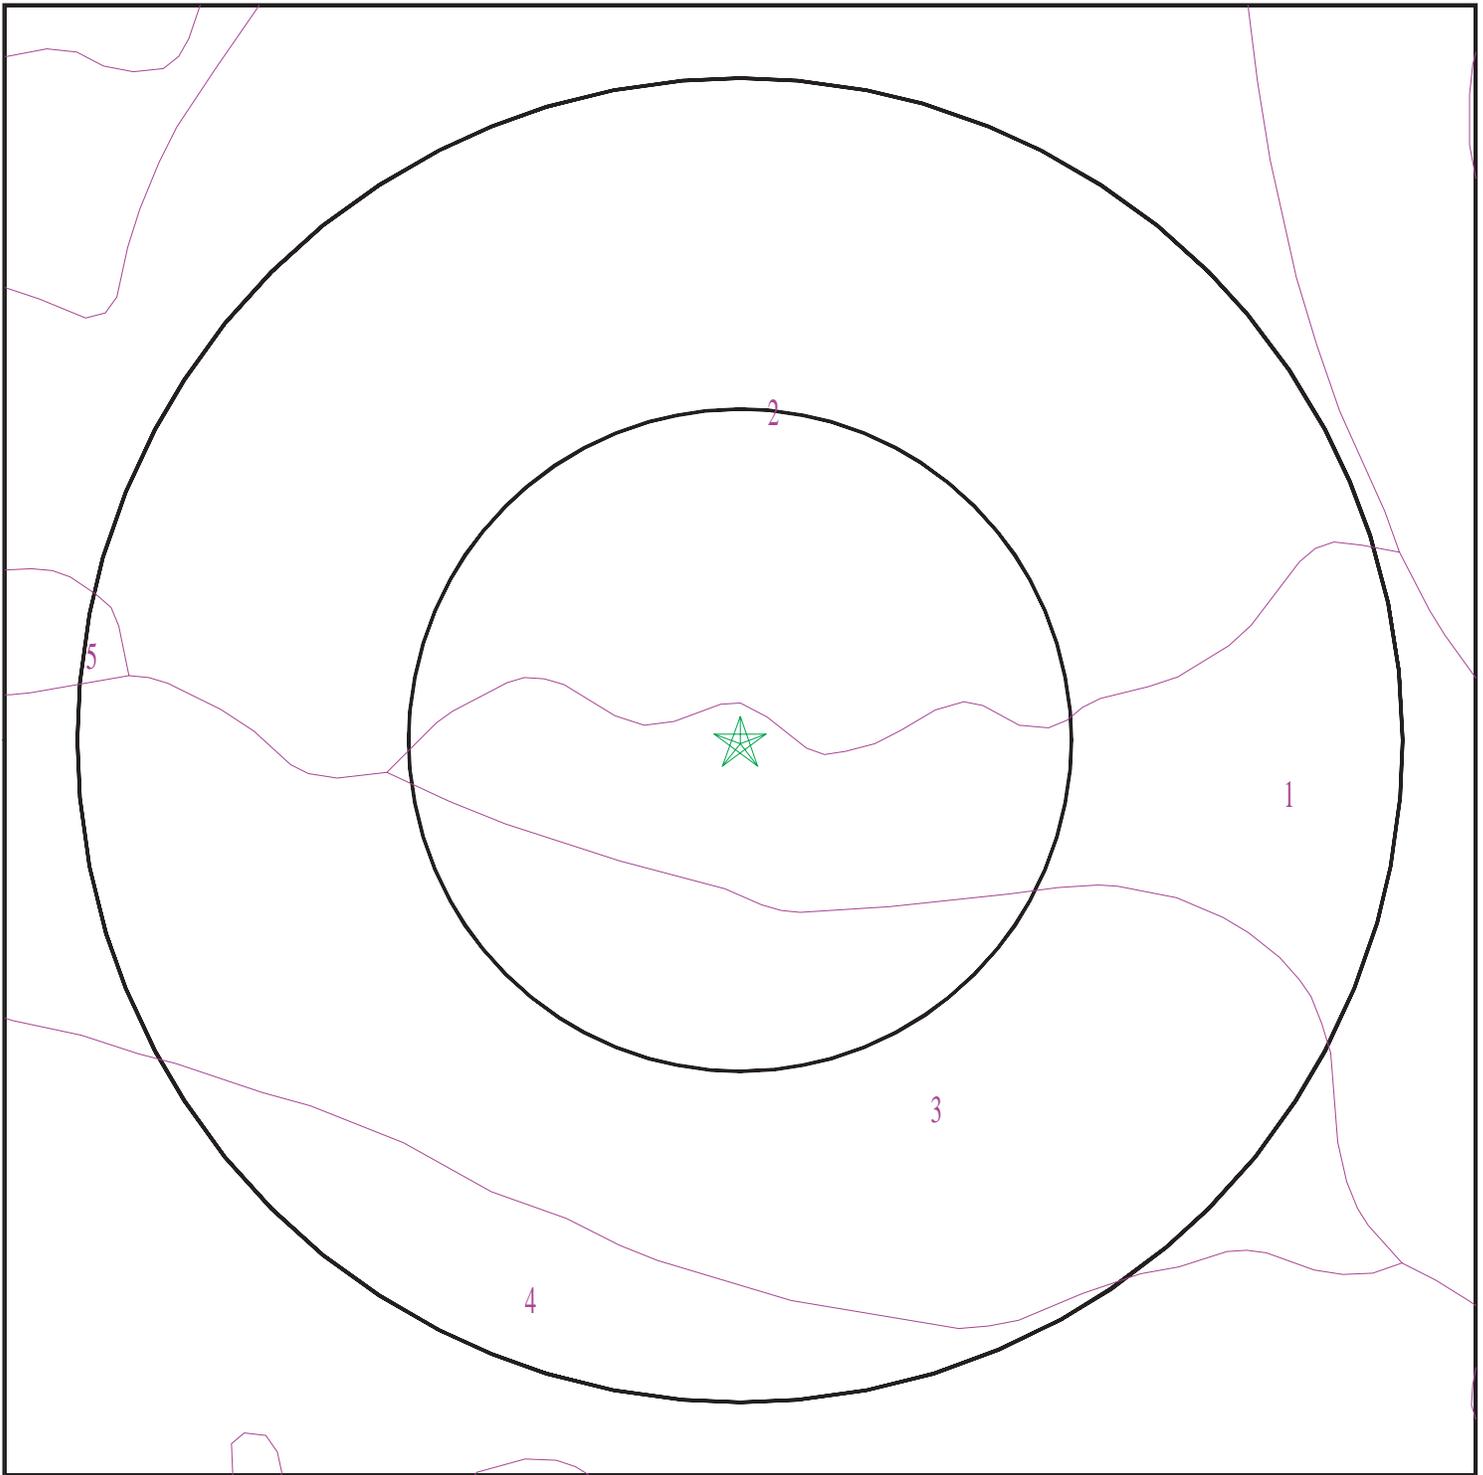

Era:	Cenozoic
System:	Tertiary
Series:	Pliocene
Code:	Tpc (<i>decoded above as Era, System & Series</i>)

GEOLOGIC AGE IDENTIFICATION

Category: Continental Deposits

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Diablo

Soil Surface Texture: clay

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Well drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	14 inches	clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit 50% or more), Fat Clay.	Max: 1.4 Min: 0.42	Max: 8.4 Min: 7.4
2	14 inches	42 inches	silty clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit 50% or more), Fat Clay.	Max: 1.4 Min: 0.42	Max: 8.4 Min: 7.4
3	42 inches	59 inches	silty clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit 50% or more), Fat Clay.	Max: 4 Min: 1.4	Max: 8.4 Min: 7.9

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Map ID: 2

Soil Component Name: Linne

Soil Surface Texture: clay loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Well drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	35 inches	clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 4 Min: 1.4	Max: 8.4 Min: 7.9
2	35 inches	40 inches	weathered bedrock	Not reported	Not reported	Max: 0 Min: 0	Max: Min:

Soil Map ID: 3

Soil Component Name: Rincon

Soil Surface Texture: clay loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory

Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

Water Well Database

Source: Department of Water Resources

Telephone: 916-651-9648

California Drinking Water Quality Database

Source: Department of Public Health

Telephone: 916-324-2319

The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

OTHER STATE DATABASE INFORMATION

California Oil and Gas Well Locations

Source: Department of Conservation

Telephone: 916-323-1779

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by GeoCon Environmental Cons. were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

UNMAPPED PROPERTY

This report certifies that the complete holdings of the Sanborn Library, LLC collection have been searched based on client supplied target property information, and fire insurance maps covering the target property were not found.

The Sanborn Library includes more than 1.2 million fire insurance maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow and others which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

- Library of Congress
- University Publications of America
- EDR Private Collection

The Sanborn Library LLC Since 1866™

Limited Permission To Make Copies

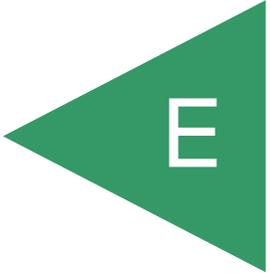

GeoCon Environmental Cons. (the client) is permitted to make up to FIVE photocopies of this Sanborn Map transmittal and each fire insurance map accompanying this report solely for the limited use of its customer. No one other than the client is authorized to make copies. Upon request made directly to an EDR Account Executive, the client may be permitted to make a limited number of additional photocopies. This permission is conditioned upon compliance by the client, its customer and their agents with EDR's copyright policy; a copy of which is available upon request.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available city directory data at 5 year intervals.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

Disclaimer - Copyright and Trademark Notice

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, Inc. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. **NO WARRANTY EXPRESSED OR IMPLIED, IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, INC. SPECIFICALLY DISCLAIMS THE MAKING OF ANY SUCH WARRANTIES, INCLUDING WITHOUT LIMITATION, MERCHANTABILITY OR FITNESS FOR A PARTICULAR USE OR PURPOSE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, INC. BE LIABLE TO ANYONE, WHETHER ARISING OUT OF ERRORS OR OMISSIONS, NEGLIGENCE, ACCIDENT OR ANY OTHER CAUSE, FOR ANY LOSS OR DAMAGE, INCLUDING, WITHOUT LIMITATION, SPECIAL, INCIDENTAL, CONSEQUENTIAL, OR EXEMPLARY DAMAGES. ANY LIABILITY ON THE PART OF ENVIRONMENTAL DATA RESOURCES, INC. IS STRICTLY LIMITED TO A REFUND OF THE AMOUNT PAID FOR THIS REPORT.** Purchaser accepts this Report "AS IS". Any analyses, estimates, ratings, environmental risk levels or risk codes provided in this Report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction or forecast of, any environmental risk for any property. Only a Phase I Environmental Site Assessment performed by an environmental professional can provide information regarding the environmental risk for any property. Additionally, the information provided in this Report is not to be construed as legal advice.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available city directory data at 5 year intervals.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.
