## Present Land Use/Zoning/General Plan Designation:

Public facility

Project Description: (please use a separate page if necessary)

The Proposed Project is the issuance of a long-term easement for the operation of the Donald C. Tillman Water Reclamation Plant (Plant) in the Sepulveda Dam Flood Control Reservoir. Issuance of a new easement requires raising the existing dikes to meet flood protection requirements. The Proposed Project also includes a suite of components that would be undertaken to update Plant facilities. These components include the construction of a Multi-Purpose Building in service to the Japanese Garden needs, and two capital improvement projects to improve flow-metering in maintenance vaults and sewer service within the Plant grounds.
