Type of Services	Phase I Environmental Site Assessment and Preliminary Soil, Soil Vapor, and Ground Water Quality Evaluation
Location	1433 - 1493 El Camino Real Santa Clara, California

## SECTION 1: INTRODUCTION

This report presents the results of the Phase I Environmental Site Assessment (ESA) and Preliminary Soil, Soil Vapor, and Ground Water Quality Evaluation performed at 1433 - 1493 El Camino Real in Santa Clara, California (Site) as shown on Figures 1 and 2. This work was performed for Bayview Development Group, Inc. (Bayview) in accordance with our March 22, 2017, March 31, 2017, and April 17, 2017 Agreements (Agreements).

### 1.1 PURPOSE

The scope of work presented in the Agreement was prepared in general accordance with ASTM E 1527-13 titled, "Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process" (ASTM Standard). The ASTM Standard is in general compliance with the Environmental Protection Agency (EPA) rule titled, "Standards and Practices for All Appropriate Inquiries; Final Rule" (AAI Rule). The purpose of this Phase I ESA is to strive to identify, to the extent feasible pursuant to the scope of work presented in the Agreement, Recognized Environmental Conditions at the property.

As defined by ASTM E 1527-13, the term Recognized Environmental Condition means the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. De minimis conditions are not Recognized Environmental Conditions.

Cornerstone Earth Group, Inc. (Cornerstone) understands that Bayview intends to purchase the property for redevelopment for commercial, residential or mixed use. We performed this Phase I ESA to support Bayview in evaluation of Recognized Environmental Conditions at the Site. This Phase I ESA is intended to reduce, but not eliminate, uncertainty regarding the potential for Recognized Environmental Conditions at the Site.

### 1.2 SCOPE OF WORK

As presented in our Agreement, the scope of work performed for this Phase I ESA and preliminary soil, soil vapor, and ground water quality evaluation included the following:

- A reconnaissance of the Site to note readily observable indications of significant hazardous materials releases to structures, soil or ground water.

- Drive-by observation of adjoining properties to note readily apparent hazardous materials activities that have or could significantly impact the Site.
- Acquisition and review of a regulatory agency database report of public records for the general area of the Site to evaluate potential impacts to the Site from reported contamination incidents at nearby facilities.
- Review of readily available information on file at selected governmental agencies to help evaluate past and current Site use and hazardous materials management practices.
- Review of readily available maps and aerial photographs to help evaluate past and current Site uses.
- Interviews with persons reportedly knowledgeable of existing and prior Site uses, including the current Site owners, and the current Site operator(s).
- Collection and laboratory analysis of soil, ground water, and soil vapor samples.
- Preparation of a written report summarizing our findings and recommendations.

The limitations for this report are presented in Section 11; the terms and conditions of our Agreement are presented in Appendix A.

### **1.3 ASSUMPTIONS**

In preparing this Phase I ESA, Cornerstone assumed that all information received from interviewed parties is true and accurate. In addition, we assumed that all records obtained by other parties, such as regulatory agency databases, maps, related documents and environmental reports prepared by others are accurate and complete. We also assumed that the boundaries of the Site, based on information provided by Bayview are as shown on Figure 2. We have not independently verified the accuracy or completeness of any data received.

### **1.4 ENVIRONMENTAL PROFESSIONAL**

This Phase I ESA was performed by Randall R. Bleichner, P.G., and Peter M. Langtry, P.G., C.E.G., Environmental Professionals who meet the qualification requirements described in ASTM E 1527-13 and 40 CFR 312 § 312.10 based on professional licensing, education, training and experience to assess a property of the nature, history and setting of the Site.

## **SECTION 2: SITE DESCRIPTION**

This section describes the Site as of the date of this Phase I ESA. The location of the Site is shown on Figures 1 and 2. Tables 1 through 3 summarize general characteristics of the Site and adjoining properties. The Site is described in more detail in Section 7, based on our on-Site observations.

### **2.1 LOCATION AND OWNERSHIP**

Table 1 describes the physical location, and ownership of the property, based on information provided by Bayview.

**Table 1. Location and Ownership**

<b>Assessor's Parcel No. (APN)</b>	224-48-004, 224-48-005, 224-48-006
<b>Reported Address/Location</b>	1433 - 1493 El Camino Real, California 95050
<b>Owner</b>	Ivancovich Properties, LLC
<b>Approximate Lot Size</b>	73,647 square feet
<b>Approximate Bldg. Size</b>	4,800 square feet - 1433 to 1463 El Camino Real 1,958 square feet - 1483 El Camino Real 9,711 square feet - 1493 El Camino Real

## 2.2 CURRENT/PROPOSED USE OF THE PROPERTY

The current and proposed uses of the property are summarized in Table 2.

**Table 2. Current and Proposed Uses**

<b>Current Use</b>	Two auto repair shops, former market, former car wash, and a single-family residence.
<b>Proposed Use</b>	Residential development.

## 2.3 SITE SETTING AND ADJOINING SITE USE

Land use in the general Site vicinity appears to be primarily a mix of commercial and residential. Based on our Site vicinity reconnaissance, adjoining Site uses are summarized below in Table 3.

**Table 3. Adjoining Site Uses**

<b>North</b>	Commercial
<b>South</b>	Residential/City of Santa Clara City Hall
<b>East</b>	Commercial
<b>West</b>	City Park

## SECTION 3: USER PROVIDED INFORMATION

The ASTM standard defines the User as the party seeking to use a Phase I ESA to evaluate the presence of Recognized Environmental Conditions associated with a property. For the purpose of this Phase I ESA, the User is Bayview Development Group. The "All Appropriate Inquiries" Final Rule (40 CFR Part 312) requires specific tasks be performed by or on behalf of the party seeking to qualify for Landowner Liability Protection under CERCLA (*i.e.*, the User).

Per the ASTM standard, if the User has information that is material to Recognized Environmental Conditions, such information should be provided to the Environmental Professional. This information includes: 1) specialized knowledge or experience of the User, 2) commonly known or reasonably ascertainable information within the local community, and 3) knowledge that the purchase price of the Site is lower than the fair market value due to

contamination. A search of title records for environmental liens and activity and use limitations also is required.

### 3.1 CHAIN OF TITLE

A chain-of-title was not provided for our review.

### 3.2 ENVIRONMENTAL LIENS OR ACTIVITY AND USE LIMITATIONS

An environmental lien is a financial instrument that may be used to recover past environmental cleanup costs. Activity and use limitations (AULs) include other environmental encumbrances, such as institutional and engineering controls. Institutional controls (ICs) are legal or regulatory restrictions on a property's use, while engineering controls (ECs) are physical mechanisms that restrict property access or use.

The regulatory agency database report described in Section 4.1 did not identify the Site as being in 1) US EPA databases that list properties subject to land use restrictions (*i.e.*, engineering and institutional controls) or Federal Superfund Liens or 2) lists maintained by the California Department of Toxic Substances Control (DTSC) of properties that are subject to AULs or environmental liens where the DTSC is a lien holder.

A title report (March 1, 2017, Chicago Title Company) provided by Bayview did not list any environmental liens or AULs for the Site.

### 3.3 SPECIALIZED KNOWLEDGE AND/OR COMMONLY KNOWN OR REASONABLY ASCERTAINABLE INFORMATION

Based on information provided by or discussions with Bayview, we understand that Bayview does not have specialized knowledge or experience, commonly known or reasonably ascertainable information regarding the Site, or other information that is material to Recognized Environmental Conditions.

### 3.4 DOCUMENTS PROVIDED BY BAYVIEW DEVELOPMENT GROUP, INC.

To help evaluate the presence of Recognized Environmental Conditions at the Site, Cornerstone reviewed and relied upon the documents provided by Bayview Development Group, Inc. listed in Table 4. Please note that Cornerstone cannot be liable for the accuracy of the information presented in these documents. ASTM E1527-13 does not require the Environmental Professional to verify independently the information provided; the Environmental Professional may rely on the information unless they have actual knowledge that certain information is incorrect. A summary of the provided documents is provided below; please refer to the original reports for complete details.

**Table 4. Documents Provided by Bayview Development Group, Inc.**

Date	Author	Title
September 11, 2000	Santa Clara Valley Water District (SCVWD)	Fuel Leak Site Case Closure – Santa Clara Car Wash, 1483 El Camino Real, Santa Clara

Based on our review of the document provided by Bayview Development, and other information reviewed, in 1964, three gasoline underground storage tanks (USTs) were installed on-Site at the former car wash located at 1483 El Camino Real. The USTs were located approximately adjacent to the car wash office, approximately 115 feet northwest from El Camino Real. In 1986, ground water monitoring well GX-64A, and soil vapor monitoring well GX-64B were installed on-Site. Five soil samples were collected from depths of 12 to 32 feet during GX-64A installation, and laboratory analysis of the soil samples detected concentrations of up to 254 parts per million (ppm) of total petroleum hydrocarbons in the gasoline range (TPHg) from a sample collected at 17 feet. Ground water was first encountered at a depth of 35 feet. Laboratory analysis of a ground water sample collected from the well detected 3,000 parts per billion (ppb) of TPHg. The UST monitoring reports note that in 1989, 1990, and 1991 a vapor reading of TPHg exceeding 500 ppm was recorded during monitoring events, and a 1992 monitoring record noted a subsurface release of petroleum hydrocarbons on-Site.

In August 1995, the three USTs were removed, and eight soil samples were collected from the excavation at approximate depths of 12 to 15 feet. Laboratory analysis of the soil samples detected up to 26,000 ppm TPHg, 19 ppm benzene, 340 ppm toluene, 1,500 ppm xylenes, and ethylbenzene 290 ppm. Laboratory analysis of ground water samples collected from the excavation detected 3,000 ppm TPHg, 9.7 ppm benzene, 1.5 ppm toluene, 9.6 ppm xylenes, and 2.9 ppm ethylbenzene. Approximately 250 cubic yards of excavated soil were stockpiled on-Site, but no disposal records were provided.

In June 2000, two borings were advanced near from the former USTs. Soil samples and ground water grab samples were collected from the two borings, and laboratory analysis of soil samples did not detect TPHg; benzene, toluene, ethylbenzene, or xylenes (collectively referred to as BTEX); or Methyl tert-butyl ether (MTBE). Laboratory analysis of the ground water samples detected 1.9 ppb of toluene. SCVWD determined that the residual contamination detected beneath the Site did not pose a significant risk to human health, and issued a case closure letter for the Site in 2000. A copy of the closure documentation is included in Appendix B.

Cornerstone contacted the SCVWD regarding well GX-64. Their records state that the well was destroyed in 2001 under oversight by the SCVWD.

## **SECTION 4: RECORDS REVIEW**

### **4.1 STANDARD ENVIRONMENTAL RECORD SOURCES**

Cornerstone conducted a review of federal, state and local regulatory agency databases provided by Environmental Data Resources (EDR) to evaluate the likelihood of contamination incidents at and near the Site. The database sources and the search distances are in general accordance with the requirements of ASTM E 1527-13. A list of the database sources reviewed, a description of the sources, and a radius map showing the location of reported facilities relative to the project Site are attached in Appendix C.

The purpose of the records review was to obtain reasonably available information to help identify Recognized Environmental Conditions. Accuracy and completeness of record information varies among information sources, including government sources. Record information is often inaccurate or incomplete. The Environmental Professional is not obligated to identify mistakes or insufficiencies or review every possible record that might exist with the Site. The customary practice is to review information from standard sources that is reasonably available within reasonable time and cost constraints.

#### 4.1.1 On-Site Database Listings

The Site address of 1483 El Camino Real was identified on the CA LUST, CA HIST UST, CA SWEEPS UST, HAZNET and CA HIST CORTESE databases, which all relate to the former on-Site USTs. The regulatory letter that was linked from the data for the case closure on the Geotracker website for 1483 El Camino Real was for an unrelated property located in San Jose. The LUST entry on the database report stated that the case was opened in 1988, with a site assessment occurring in 1995 and case closure in 2000. This is consistent with regulatory documents provided by Bayview.

The HAZNET database contains data extracted from the copies of hazardous waste manifests received each year by the DTSC. Listed wastes disposed in 1995 are categorized as “other empty containers 30 gallons or more.”

The Site address of 1463 El Camino Real was listed on the EDR historical Auto Stations database for the auto repair shops located in 1999 and 2000. The EDR database lists Civic Center Auto as the occupant.

#### 4.1.2 Adjoining Property Database Listings and Nearby Spill Incidents

Database listings for adjoining properties are summarized in Table 5. Based on the information presented in the agency database report, no off-Site spill incidents were reported that appear likely to significantly impact soil, soil vapor or ground water beneath the Site. The potential for impact was based on our interpretation of the types of incidents, the locations of the reported incidents in relation to the Site and the assumed ground water flow direction.

**Table 5. Adjoining Property Database Listings**

Facility Name and Address	Map I.D.	Approximate Distance and Direction from Site	Database Listings/Comments
MB Transmission 1399 El Camino Real	A7	Adjacent East	EDR Historical Auto Stations. No regulatory actions associated with this listing.
Ferriera Residence 1456 El Camino Real	A11/A20	Across El Camino Real	LUST, HIST LUST, HIST CORTESE. Two USTs were discovered during street-widening of El Camino Real in the 1990s. Analytical results detected up to 7,700 ppm TPHg in soil samples collected near the USTs, and 3 ppb of benzene was detected in a ground water sample collected from the property. The two USTs were removed from the property under agency oversight and soil that exceeded residential standards was reportedly excavated and removed from the property. Case closure was granted by the Water Board in 1996.
HIEP Auto Pro LLC/Homestead Auto Care	B8	Adjacent East	EDR Historical Auto Stations. No documents were readily accessible that indicated if USTs were present on this

Facility Name and Address	Map I.D.	Approximate Distance and Direction from Site	Database Listings/Comments
1389 El Camino Real			property. No violations or other indications of spills or leaks were noted.
Kent's Auto Service	B9	Across El Camino Real	LUST, HIST UST. A former UST and pump station were removed from the property during street widening in 1996. Over excavation of soil was completed to a depth of approximately 18 feet, and soil samples that were collected from the excavation reportedly did not detect fuel-related compounds. Soil beneath the pump station detected TPHg at up to 5,100 ppm. The soil beneath the pump station was over excavated and verification samples collected after excavation reportedly were non-detect for fuel-related compounds. The area of former UST and pump station are now located under El Camino Real.
GG Auto Electric Supply 1385 El Camino Real	B21	Adjacent East	EDR Historical Auto Stations. No documents were readily accessible that indicated if USTs were present on this property. No violations or other indications of spills or leaks were noted.
RTC Automotive Inc 1375 El Camino Real	B24	Adjacent East	EDR Historical Auto Stations. No documents were readily accessible that indicated if USTs were present on this property. No violations or other indications of spills or leaks were noted.
Champion Auto Body/Hanley H. Muray 1486 Jefferson Street	D23	Across El Camino Real	EDR Historical Auto Stations, HIST UST. Champion Auto Body listed as occupant from 1999 to 2012. No documents were readily accessible that indicated if USTs were present on this property. No violations or other indications of spills or leaks were noted.

Note: Facility name, address, distance and direction from Site, and database listing were provided by EDR. Cornerstone did not verify the accuracy or completeness of this information.

## 4.2 ENVIRONMENTAL RECORD SOURCES

The following additional sources of readily ascertainable public information for the Site also were reviewed during this Phase I ESA.

### 4.2.1 City and County Agency File Review

Cornerstone requested available files pertaining to 1433 - 1493 El Camino Real at the following public agencies: the Santa Clara Building Department (BD), Santa Clara Fire Department (FD), and the Santa Clara County Department of Environmental Health (DEH).

DEH had a copy of the files pertaining the UST removals in 1995, which were consistent with the documents provided by Bayview and summarized in section 3.4.

Building Department had records of electrical and parking permits for the various parcels. The BD had a permit for an auto shop for 1453/1463 El Camino Real dated 1959, a permit to install “gas storage tanks” at 1483 El Camino Real dated 1963, and a removal permit dated 1994.

The Fire Department had records pertaining to hazardous materials stored and used at the various business that occupied the Site. A hazardous material inventory for Ruff Ryder cycles that reportedly occupied 1433 El Camino Real in 2003 listed the storage of 55 gallons of waste motor oil and 20 gallons of petroleum naphthalene. The FD had a 2006 record for hazardous material closure of Double R Cycles at 1433 El Camino Real for closure of the motor cycle shop. Additional records pertaining to the facility closure were not provided by the Fire Department.

The FD had an inspection report from 2005 for 1463 El Camino Real regarding used oil disposal. The inspection noted that used oil should be disposed of at a certified used oil collection center. No other violations were noted in the inspection.

The FD had documents related to the car wash at 1483 El Camino Real that also were available through the Geotracker website regarding the UST removal. This UST removal is further discussed in Section 3.4.

The FD also had records of inspection of the facility, noting that all chemicals used at the facility were adequately labeled. The hazardous materials inventory from 2005, 2006, and 2009 for the car wash noted the facility stored isopropyl alcohol, “Kaady tire, wheel and body cleaner”, electroless cooper, and the tire dressing which was observed during our Site visit, as described in Section 7.2. Additional hazardous material inventories from 1989, 1990, 1991, and 1992 listed 12,000 gallons of gasoline on-Site.

#### **4.2.2 Division of Oil, Gas and Geothermal Resources Maps**

To evaluate the presence of oil or gas wells on-Site and in the immediate Site vicinity, maps available on-line at the California Department of Conservation, Division of Oil, Gas, and Geothermal Resources (<http://www.consrv.ca.gov/dog>) were reviewed. Review of the available data for the Site area did not show oil or gas wells on-Site or on the adjacent properties.

### **SECTION 5: PHYSICAL SETTING**

We reviewed readily available geologic and hydrogeologic information to evaluate the likelihood that chemicals of concern released on a nearby property could pose a significant threat to the Site and/or its intended use.

#### **5.1 RECENT USGS TOPOGRAPHIC MAP**

A 2012 USGS 7.5-minute topographic map was reviewed to evaluate the physical setting of the Site. The Site’s elevation is approximately 75 feet above mean sea level; topography in the vicinity of the Site slopes downward gently to the east, towards the Santa Clara Valley.

#### **5.2 HYDROGEOLOGY**

Based on our exploratory borings advanced in April 2017 and discussed below in Section 9, the shallow ground water beneath the Site was observed at depths of approximately 12 to 15 feet.

Ground water flow direction was not assessed during our subsurface evaluation. However, ground water likely flows toward the northeast, towards the San Francisco Bay.

## SECTION 6: HISTORICAL USE INFORMATION

The objective of the review of historical use information is to develop a history of the previous uses of the Site and surrounding area in order to help identify the likelihood of past uses having led to Recognized Environmental Conditions at the property. The ASTM standard requires the identification of all obvious uses of the property from the present back to the property's first developed use, or back to 1940, whichever is earlier, using reasonably ascertainable standard historical sources.

### 6.1 HISTORICAL SUMMARY OF SITE

The historical sources reviewed are summarized below. The results of our review of these sources are summarized in Table 6.

- **Historical Aerial Photographs:** We reviewed aerial photographs dated between 1939 and 2012 obtained from EDR of Milford, Connecticut; copies of aerial photographs reviewed are presented in Appendix D.
- **Historical Topographic Maps:** We reviewed USGS 15-minute and 7.5-minute historic topographic maps dated 1899, 1897, 1899, 1953, 1961, 1968, 1973, 1980, and 2012; copies of historic topographic maps reviewed are presented in Appendix D.
- **Historical Fire Insurance Maps:** We reviewed Sanborn fire insurance maps dated 1891, 1915, 1950, 1961, and 1966 obtained from EDR; copies of Sanborn maps are presented in Appendix D.
- **Local Street Directories:** We reviewed city directories obtained from EDR that were researched at approximately 5 year intervals between 1922 and 2014 to obtain information pertaining to past Site occupants. The city directory summary is presented in Appendix E.

**Table 6. Summary of Historical Source Information for Site**

Date	Source	Comment
1889, 1897, 1899	Topographic maps	No structures are shown on-Site.
1891	Sanborn map	Structures are depicted on-Site that appear to be a residence and associated outbuildings. The Site is shown to be located on Clay Street in Santa Clara
1915	Sanborn map	Previous on-Site structures are no longer shown.
1939, 1948, 1950, and 1956	Aerial photograph	The residence at 1493 El Camino Real is visible in the 1939 aerial photo. A structure may be present in the south-eastern corner of the Site. The rest of the Site appears undeveloped.
1950	Sanborn map	The on-Site residence is shown, in the southeastern corner of the Site a business labeled "Fruit Drying" is present.
1953, 1961	Topographic maps	No structures are depicted on-Site in this map. Greater development is present throughout Santa Clara. El Camino Real is present in the 1961 topographic map

Date	Source	Comment
1961, 1966	Sanborn map	In addition to the on-Site residence and car wash, the auto muffler service, auto service and auto upholstery businesses are labeled on this map.
1963	Aerial photograph	The Site appears as it does today, residence, carwash, and building associated with 1433 to 1463 El Camino is present
1963	City Directory	1453 El Camino Real occupant listed as Seat Cover King 1463 El Camino Real occupant listed as Santa Clara Muffler Service
1968, 1973, 1980	Topographic maps	No structures are depicted on-Site, increased development is prevalent throughout Santa Clara
1970	City Directory	1433 El Camino Real occupant listed as Morgan Auto Upholstery 1463 El Camino Real occupant listed as Santa Clara Muffler and Brake Service 1483 El Camino Real occupant listed as Santa Clara Car Wash 1493 El Camino Real occupant listed as Mrs. Anna Ivancovich
1974	City Directory	1433 El Camino Real occupant listed as Santa Clara Muffler and Smog
1975	City Directory	1493 El Camino Real occupant listed as J N Ivancovich
1974, 1982, 1993, 1998, 2005, 2006, 2009, 2010, and 2012	Aerial photographs	Site appears as it does today. No development appears to have occurred on-Site since the 1963 aerial photograph.
1985	City Directory	1463 El Camino Real occupant listed as Santa Clara Radiator Service
1991	City Directory	1433 El Camino Real occupant listed as Santa Clara Imports 1463 El Camino Real occupant listed as Civic Center Auto 1493 El Camino Real occupant listed as Craig Ivancovich and J N Ivancovich.
2010	City Directory	1463 El Camino Real occupant listed as All Volvo Auto 1483 El Camino Real occupant listed as Calbea LLC/Calham LLC.
2012	Topographic map	No structures are depicted on-Site.
2014	City Directory	1453 El Camino Real occupant listed as A1 Halal.

## 6.2 HISTORICAL SUMMARY OF SITE VICINITY

Based on our review of the information described in Section 6.1, the general Site vicinity appears to have historically consisted mainly of agricultural and residences starting in the 1880s. By the 1940s and 1950s, an increase in mainly residential development is apparent in the vicinity. During the 1960s and 1970s, further increases in nearby residential development is apparent, along with a substantial increase in commercial development. The properties adjacent to Site were developed for commercial use by 1963.

## **SECTION 7: SITE RECONNAISSANCE**

We performed a Site reconnaissance to evaluate current Site conditions and to attempt to identify Site Recognized Environmental Conditions. The results of the reconnaissance are discussed below. Additional Site observations are summarized in Table 7 in Section 7.2. Photographs of the Site are presented in Section 7.2.1.

### **7.1 METHODOLOGY AND LIMITING CONDITIONS**

To observe current Site conditions (readily observable environmental conditions indicative of a significant release of hazardous materials), Cornerstone staff Randall R. Bleichner visited the Site on April 6, 2017, and was unaccompanied. The Site reconnaissance was conducted by walking representative areas of the Site, including the interior(s) of the on-Site structure(s), the periphery of the structure(s) and the Site periphery. Cornerstone staff only observed those areas that were reasonably accessible, safe, and did not require movement of equipment, materials or other objects. Physical obstructions that limited our ability to view the ground surface at the Site included asphalt paved vehicle drives and parking areas (typical of developed properties), tall grass and weeds, and car parts.

### **7.2 OBSERVATIONS**

At the time of our Site visit, the interior of the residence at 1493 El Camino was not available for access. The surrounding grounds of the house contained three used 55-gallon barrels of non-hazardous “gel tire dressing,” and other debris that appeared to be associated with the adjacent car wash.

The car wash at 1483 was not operational and appeared abandoned. The automated car wash machinery and large industrial vacuums were present. Debris was observed throughout the car wash and surrounding area. An air compressor was observed within the car wash with some staining on the exterior. The ground surface beneath the compressor did not appear significantly stained. A sub-surface vault that contained the mechanical motor for the carwash was observed. A 55-gallon plastic drum labeled “Carpet Shampoo” was observed to be full of water in a shed behind the car wash.

The automobile service business, All Volvo, at 1463 El Camino was in operation at the time of our visit. Various auto parts were observed throughout the building. Containers of used oil were observed on-Site in plastic containers. Small quantities of various degreasers and solvents were observed throughout the business. The rear of the building housed car part storage where additional containers of used motor-oil were observed. The floor of the business was a raised wooden platform, where additional car part storage was observed underneath. An above ground electric hydraulic lift was observed during our Site visit. Behind the building various automobiles were observed in different states of repair, with containers of used motor-oil and gasoline were observed throughout the area. An out-of-use, vehicle maintenance access pit that was approximately 4 feet beneath the ground surface was observed behind the business and contained debris and water with an oily sheen.

The market at 1453 El Camino Real, A1 Halal, was closed at the time of our Site visit and was not accessible. The market appeared to be no longer in business. Multiple plastic containers of old cooking oil, cleaning products, empty propane tanks, and debris were observed behind the building.

The automobile business at 1433 El Camino Real, United Auto Group, was in operation at the time of our visit. The business reportedly sells used cars and performs minor automotive servicing. Plastic containers of used motor-oil, two old empty 55-gallon drums that previously contained motor oil, and cleaning products were observed during our Site visit.

The vacant field behind the Site appeared to be overgrown with weeds during our Site visit.

**Table 7. Summary of Readily Observable Site Features**

General Observation	Comments
Aboveground Storage Tanks	Not Observed
Agricultural Wells	Not Observed
Air Emission Control Systems	Not Observed
Boilers	Not Observed
Burning Areas	Not Observed
Chemical Mixing Areas	Not Observed
Chemical Storage Areas	Containers of used motor oil and automobile solvents observed in 1463 El Camino Real
Clean Rooms	Not Observed
Drainage Ditches	Not Observed
Elevators	Not Observed
Emergency Generators	Not Observed
Equipment Maintenance Areas	Not Observed
Fill Placement	Not Observed
Ground Water Monitoring Wells	Not Observed
High Power Transmission Lines	Not Observed
Hoods and Ducting	Not Observed
Hydraulic Lifts	Above ground electric lift in 1463 El Camino Real
Incinerator	Not Observed
Petroleum Pipelines	Not Observed
Petroleum Wells	Not Observed
Ponds or Streams	Not Observed
Railroad Lines	Not Observed
Row Crops or Orchards	Not Observed
Stockpiles of Soil or Debris	Not Observed
Sumps or Clarifiers	Not Observed
Transformers	Pole mounted transformer observed in front of 1493 El Camino Real.
Underground Storage Tanks	Not Observed
Vehicle Maintenance Areas	Observed
Vehicle Wash Areas	Observed
Wastewater Neutralization Systems	Not Observed

The comment "Not Observed" does not warrant that these features are not present on-Site; it only indicates that these features were not readily observed during the Site visit.

## **SECTION 8: ENVIRONMENTAL QUESTIONNAIRE AND INTERVIEWS**

### **8.1 ENVIRONMENTAL QUESTIONNAIRE / OWNER INTERVIEW**

To help obtain information on current and historical Site use and use/storage of hazardous materials on-Site, we provided an environmental questionnaire to Tom Qualia, who we understand is assisting Bayview Development Group. He was asked to forward the questionnaire to the Site owner for completion. The completed questionnaire is attached in Appendix F. Based on our review of the completed questionnaire, the properties were acquired by the Ivancovich Family Trust in 1988 and 1995. The questionnaire reported that two tenants remain in occupancy: A1 Halal Market and United Auto Group. The Ivancovich Family trust is aware that USTs were located on the property and provided case closure documents from the County, as described in section 3.4.

## **8.2 INTERVIEWS WITH PERSON(S) KNOWLEDGEABLE OF SITE USE**

Contact information for persons knowledgeable of existing and prior site uses was not provided to us prior to or at the Site visit.

## **8.3 INTERVIEWS WITH PREVIOUS OWNERS AND OCCUPANTS**

During our site visit we spoke with Bryan Mushtagh, the owner of All Volvo, at 1463 El Camino Real. Mr. Mushtagh informed Cornerstone that he has owned the business for approximately one year, and the prior occupant used the facility as an automotive repair shop and smog test center. Mr. Mushtagh said that used motor-oil was disposed of at appropriate facilities, and that no significant quantities of hazardous materials were used on-Site. Coolant and transmission flushes were infrequent, and waste materials were disposed of appropriately off-Site.

Cornerstone spoke with a representative of Nabi Zolyad, the owner of United Auto Group, at 1433 El Camino Real. The representative informed us that minor automobile servicing occurred on-Site which primarily consisted of oil changes in the vehicles. The representative stated that used oil was stored in appropriate containers, and was disposed of off-Site.

## **SECTION 9: PRELIMINARY SOIL QUALITY EVALUATION, GROUND WATER, AND SOIL VAPOR QUALITY EVALUATION**

On April 6, 2017, Cornerstone collected soil samples from three near surface borings and from one of three exploratory borings advanced to depths of approximately 20 feet. The three shallow borings were advanced within the vacant, unpaved area on the northern approximately half of the Site using hand sampling methods. One of the deeper exploratory borings was advanced near the approximate location of the reported UST excavation backfill. The two remaining exploratory borings were advanced at selected locations near the automotive businesses. Ground water grab samples were collected at the three exploratory borings. Temporary soil vapor probes were installed to depths of approximately 5 feet, adjacent to the three exploratory borings.

The exploratory borings were advanced using direct push technology equipped with a Dual Wall Sampling System. The Dual Wall Sampling System helps reduce cross contamination between sampling intervals. The Dual Wall Sampler was comprised of two main components: an exterior steel casing and an inner sample barrel (Single Wall Sampler). The outer casing had a 2-inch outer diameter (OD) and a 1.5-inch inner diameter (ID). The sample barrel (Single Wall Sampler) was 5 feet in length with a 1.375-inch outside diameter (OD) and a 1-inch inner diameter (ID). The Dual Wall sample barrel was loaded with a 5-foot acetate liner and installed inside the outer casing. The outer drive casing and inner sample barrel were then hydraulically pushed to a depth of approximately 5 feet. As these tools were advanced, the inner sampling barrel collected the soil core sample. This sampler was then retrieved while the outer casing remained in place, protecting the integrity of the hole. A new sampler was lowered into place and advanced another 5 feet to collect the next soil sample. This process continued until a desired depth was reached. The borings were advanced approximately 5 feet to 10 feet into the first water yielding zone.

### **9.1.1 Subsurface Materials**

The subsurface materials generally consisted of alternating layers of clayey sand and sandy clays were observed to a depth of 20 feet. Ground water was encountered at depths between

12 and 15 feet. Our lithologic observations are summarized in boring logs presented in Appendix G.

### **9.1.2 Organic Vapor Readings**

Soil samples retrieved from the borings were monitored with a MiniRAE 3000 Organic Vapor Meter (OVM) to record VOC vapors. Organic vapor readings typical of background concentrations (less than 1 part per million by volume [ppm<sub>v</sub>]) were recorded in EB-2 and EB-3. The highest concentration detected was 450.6 ppm<sub>v</sub> in EB-1 between 16 to 17 feet. The OVM readings are included on the boring logs in Appendix G.

## **9.2 SOIL SAMPLE COLLECTION AND ANALYSES**

The soil samples were collected in acetate and stainless steel liners, capped, labeled with a unique identification number, and placed in an ice-chilled cooler for transport to the project laboratory under chain of custody control. Samples analyzed for VOCs were collected in three 5-gram Core-N-One™ capsules. The samples collected were analyzed for the following: 17 California Assessment Manual (CAM) metals (EPA Test Method 6000/7000), petroleum hydrocarbons in the diesel (TPHd) and oil (TPHo) ranges (EPA Test Method 8015) with a silica gel cleanup, volatile organic compounds (VOCs) and petroleum hydrocarbons in the gasoline (TPHg) range (EPA Test Method 8260B), polynuclear aromatic hydrocarbons (PAHs) (EPA Test Method 8270SIM), organochlorine pesticides (OCPs) (EPA Test Method 8081), and polychlorinated biphenyls (PCBs) (EPA Test Method 8082).

## **9.3 GROUND WATER SAMPLE COLLECTION AND ANALYSES**

Ground water grab samples were collected from the three exploratory borings (EB-1, EB-2, and EB-3). At each location, a section a slotted PVC pipe was lowered into the exploratory boring to facilitate ground water sample collection. Ground water samples were collected using a check valve and clean tubing. The three ground water grab samples, EB-1 (W), EB-2 (W), and EB-3 (W), collected were analyzed for TPHd, TPHo, TPHg, and VOCs. Ground water grab samples were collected in appropriate containers and labeled with the sample ID. Samples were placed in an ice-chilled cooler and transported to a state-certified laboratory with chain of custody documentation.

## **9.4 SOIL VAPOR SAMPLE COLLECTION AND ANALYSES**

Three temporary soil vapor probes, EB-1, EB-2, and EB-3, were installed on April 6, 2017 to depths of approximately 5 feet for the collection of soil vapor samples. The temporary soil vapor probes were located adjacent to the exploratory borings that were advanced for the collection of soil and ground water samples.

The temporary soil vapor probes were installed following in general accordance with the July 2015 document entitled "Advisory – Active Soil Gas Investigations", prepared by the Department of Toxic Substances and Control and the California Regional Water Quality Control Board, Los Angeles Region. Each probe was completed with stainless steel expendable tip and screen affixed to stainless steel tubing. Each probe was constructed by first placing approximately ½ foot of coarse aquarium-type sand into the bottom of the boring. The stainless steel tip and tubing was then lowered into the boring via a tremie pipe. Additional sand was then placed in the boring via tremie when needed to create an approximately ½-foot sand pack interval around the vapor tip. Approximately ½-foot of granular bentonite was placed on top of the sand pack.

Hydrated bentonite was then placed down the boring; the mixture consisted of approximately 50 percent water to bentonite and was placed in less than ½ foot lifts to just below the surface. The stainless-steel tubing was labeled with depth of placement and capped utilizing a vapor-tight Swagelok valve set in the “off” position.

The temporary vapor probes were sampled on April 12, 2017. A 167 milliliters-per-minute flow regulator inclusive of a particulate filter was fitted to the shut-off valve and the other end to a “T” fitting. A Summa canister was connected to the “T” fitting. The other end of the “T” fitting was affixed to a digital vacuum gauge and a 1-liter Summa canister utilized for purging.

A minimum 10-minute vacuum tightness test was performed on the manifold and connections by opening and closing the 1-liter purge canister valve and applying and monitoring a vacuum on the vacuum gauge. The sample shut-off valve on the downhole side of the sampling manifold remained in the “off” position. When gauge vacuum was maintained for at least 10 minutes without any noticeable decrease (less than approximately 0.1 inches of mercury (Hg) for properly connected fittings), purging began. The downhole shut off valve was opened and approximately three purge volumes of vapor were removed using the purging 1-liter Summa. The volume of vapor removed was verified by the calculated versus observed pressure drop in the purging Summa canister. The purge volume was calculated based on the length and inner diameter of the sampling probe and the connected sampling tubing and equipment. Thus, the sand pack vapor space was not included in the purge volume calculation.

Each probe was allowed to equilibrate for at least 2 hours prior to sample collection per DTSC guidance. Three soil vapor samples were collected and submitted under a chain of custody to state certified analytical laboratory. Soil vapor samples were analyzed for VOCs and TPHg (EPA Test Method TO-15). One sample was also collected from the sampling shroud for isopropyl alcohol to evaluate if the effect of the shroud atmosphere on the samples collected, if any.

## 9.5 RESULTS

The results were compared to the Tier 1 Environmental Screening Levels (ESLs) <sup>1</sup> established by the San Francisco Bay Regional Water Quality Control Board (February, 2016). Arsenic concentrations were compared to natural background/ambient concentrations (Duverge, 2011)<sup>2</sup>. Where established, the total concentrations results were also compared to their respective Total Threshold Limit Concentration (TTLC) for determination of a non-RCRA (California) hazardous waste. The screening levels and background concentrations used are provided in the attached tables.

The laboratory reports are included in Appendix H.

---

<sup>1</sup> Environmental Screening Level (ESL), San Francisco Bay, Regional Water Quality Control Board, February, 2016

<sup>2</sup> Naturally occurring background concentrations of metals, such as arsenic in soil may exceed their respective screening levels. Cal/EPA generally does not require cleanup of soil to below background concentrations. Thus, for the metals detected, these data also were compared to regional published background concentrations.

### 9.5.1 Soil Analytical Results

The soil analytical results are presented in Tables A, B, and C, and are summarized below:

- Metal concentrations detected in soil samples appear consistent with published background concentrations.
- TPHg was detected at a concentration of 2,450 milligrams per kilogram (mg/kg or parts per million [ppm]) in sample EB-1 (16 to 17 feet below the ground surface [bgs]), above the Tier 1 ESL of 100 mg/kg.
- Toluene was detected at a concentration of 61.7 mg/kg in sample EB-1 (16 to 17 feet bgs), above the Tier 1 ESL of 2.9 mg/kg.
- Ethylbenzene was detected at a concentration of 26.1 mg/kg in sample EB-1 (16 to 17 feet bgs), above the Tier 1 ESL of 1.4 mg/kg.
- m,p-Xylene and o-Xylene were detected above their Tier 1 ESL of 2.3 mg/kg at concentrations of 96.9 mg/kg and 38.3 mg/kg, respectively in sample EB-1 (16 to 17 feet bgs).
- Dieldrin was detected in sample SS-3 (0 to 1/2 foot) at a concentration of 0.00368 mg/kg, above the Tier 1 ESL of 0.00017 mg/kg, based on leaching, but below the direct exposure ESL of 0.038 mg/kg.

All other analytical compounds detected were below their respective environmental screening levels.

Elevated concentrations of TPHg and fuel related VOCs (ethylbenzene, toluene, xylenes) detected were from the native soil sample collected beneath the UST backfill. The soil samples collected from the UST backfill material did not detect any TPH, VOCs, PCBs, OCPs, or metal above their respective screening criteria.

### 9.5.2 Ground Water Analytical Results

The ground water analytical results are included in Table D and are summarized below:

- TPHd was detected above the Tier 1 ESL of 100 µg/L, at a concentration of 86,500 µg/L in sample EB-1 (W).
- TPHg was detected above the Tier 1 ESL of 100 µg/L, at a concentration of 136,000 µg/L in sample EB-1 (W).
- Benzene was detected above the Tier 1 ESL of 1.0 µg/L, at a concentration of 3,000 µg/L in sample EB-1 (W).
- Toluene was detected above the Tier 1 ESL of 40 µg/L, at a concentration of 8,900 µg/L in sample EB-1 (W).
- Ethylbenzene was detected above the Tier 1 ESL of 13 µg/L, at a concentration of 5,200 µg/L, in sample EB-1 (W).

- m,p-Xylene and o-Xylene were detected above their Tier 1 ESL of 20 µg/L, at concentrations of 17,000 µg/L and 8,200 µg/L, respectively, in sample EB-1 (W).

All other VOCs were detected at concentrations below their respective environmental screening levels.

### 9.5.3 Soil Vapor Analytical Results

The detected VOC and TPHg soil vapor concentrations were below their respective Tier 1 ESL soil vapor screening criteria in all samples analyzed. The soil vapor analytical results are included in Table E.

## 9.6 ADDITIONAL GROUND WATER QUALITY EVALUATION

On April, 27, 2017, our field geologist advanced 10 additional borings to an approximate depth of 20 to 25 feet for the collection of ground water grab samples. The ten additional ground water grab samples (EB-4, EB-5, EB-6, EB-7, EB-8, EB-9, EB-10, EB-11, EB-12, and EB-13) collected were analyzed for TPHd, TPHo, TPHg, and VOCs. Ground water grab samples were collected in appropriate containers and labeled with the sample ID. Samples were placed in an ice-chilled cooler and transported to a state-certified laboratory with chain of custody documentation. Organic vapor readings typical of background concentrations (less than 1 part ppm<sub>v</sub>) were recorded in the borings.

### 9.6.1 Additional Ground Water Analytical Results

The ground water analytical results are included in Table D and are summarized below:

- TPHd was detected above the Tier 1 ESL of 100 µg/L, at concentrations of 141 µg/L, 238 µg/L, and 161 µg/L, in samples EB-6, EB-7, and EB-8, respectively.
- 1,2-Dichloroethane (1,2-DCA) was detected above the Tier 1 ESL of 0.5 µg/L, at a concentration of 0.75 µg/L, in sample EB-7.

TPHd concentrations detected above the ESL appear to be located in the assumed downgradient direction of the former UST location. All other TPH and VOCs were detected at concentrations below their respective environmental screening levels.

## SECTION 10: FINDINGS, OPINIONS AND CONCLUSIONS (WITH RECOMMENDATIONS)

Cornerstone performed this Phase I ESA in general accordance to ASTM E1527-13 to support Bayview Development Group, Inc. in evaluation of Recognized Environmental Conditions. Our findings, opinions and conclusions are summarized below.

### 10.1 HISTORICAL SITE USAGE

Based on the information obtained during this study, the Site was developed in the late 1800's with an apparent residence and associated out buildings as shown on the Sanborn map from 1891. On the 1915 Sanborn map, these structures are no longer depicted. By 1939 the residence at 1493 El Camino Real is visible on the aerial photo from this year. According to the

historical maps, El Camino Real was named Clay Street prior to 1950. During the 1950s a reported “Fruit Drying” business was present on the southeastern portion of the Site. During the 1960s the car wash at 1483 El Camino Real and the structure at 1433 to 1463 El Camino Real were built. This structure was reportedly used a sofa store and a muffle shop. In 1966 an auto upholstery occupied the former sofa store. From 1966 until the present the majority of use for this building was primarily used auto-sales, auto upholstery, or automobile repair. A market is reported to have occupied the middle unit of 1453 El Camino Real starting in 2014, but appeared closed during our Site visit.

## **10.2 CHEMICAL STORAGE AND USE**

Various cleaners and soaps were observed in the former car wash. Containers of used motor oil, gasoline, and various degreasers and solvents were observed in the two automobile associated business. No significant quantities of hazardous materials were observed during our Site visit. We recommend that the property owner remove all hazardous materials for appropriate off-Site disposal prior to purchasing the Site.

## **10.3 FORMER USTS**

In 1994, three USTs and associated fuel pumps and piping were removed from the Site under county oversight. Eight soil samples were collected from the excavation at approximate depths of 12 to 15 feet. Laboratory analysis of the soil samples and ground water collected from the excavation detected elevated concentrations of TPHg, benzene, toluene, xylenes, and ethylbenzene (BTEX).

In June 2000, two borings were advanced near from the former USTs. Soil samples and ground water grab samples were collected from the two borings, and laboratory analysis of soil samples did not detect TPHg, BTEX or Methyl tert-butyl ether (MTBE). Laboratory analysis of the ground water samples detected 1.9 ppb of toluene. SCVWD determined that the residual contamination detected beneath the Site did not pose a significant risk to human health and issued a case closure letter for the Site in 2000.

During our recent subsurface investigation, elevated concentrations of TPHg and BTEX were detected in a native soil sample collected from beneath the UST excavation backfill. Elevated concentrations of TPHd, TPHg and BTEX also were detected in the ground water collected from the former UST location. Soil vapor at this location does not appear significantly impacted. Because of the presence of residual petroleum compounds from the former fuel system, as a conservative measure, we recommend installing vapor mitigation measures on structures within close proximity to the former USTs.

Based on laboratory analysis of ground water grab samples collected from the presumed down-gradient direction from the former USTs, the impacted ground water appears limited to the general area of the former USTs.

We recommend discussing the former USTs and the results of our subsurface investigation with the Santa Clara County Health Department, the Local Oversight Program (LOP), to evaluate whether additional subsurface evaluation, remediation, and/or long-term monitoring may be required.

The excavation backfill will most likely require overexcavation and recompaction for geotechnical purposes. This should be performed in accordance with the Site Management Plan as discussed in section 10.9.

#### **10.4 GENERAL SOIL QUALITY**

Detected metal concentrations across the site appear consistent with published background concentrations. No organochlorine pesticides, including DDT compounds, were detected exceeding residential screening levels, with the exception of dieldrin. Dieldrin was detected above the Tier 1 ESL of 0.00017 mg/kg at a concentration of 0.00368 mg/kg in one sample collected from the upper ½ foot of soil from the unpaved vacant field, but was below the direct exposure ESL. The concentrations of dieldrin detected does not appear to present a significant risk to human health.

#### **10.5 POTENTIAL ENVIRONMENTAL CONCERNS WITHIN THE SITE VICINITY**

Based on the information obtained during this study, no hazardous material spill incidents have been reported in the Site vicinity that would be likely to significantly impact the Site. Properties located at 1456 El Camino Real, and 1430 El Camino Real, listed in the environmental database as former fuel leak cases (case closed); 1399 El Camino Real, 1389 El Camino Real, 1385 El Camino Real, 1375 El Camino Real, and 1486 Jefferson Street were listed as historic auto service stations with no releases reported.

#### **10.6 ENVIRONMENTAL ATTORNEY**

Due to known Recognized Environmental Conditions at the Site, consideration should be given to consulting with an environmental attorney regarding liabilities associated with acquiring the Site.

#### **10.7 ASBESTOS CONTAINING BUILDING MATERIALS (ACBMS)**

Due to the age of the on-Site structure(s), building materials may contain asbestos. If demolition, renovation, or re-roofing of the building is planned, an asbestos survey is required by local authorities and/or National Emissions Standards for Hazardous Air Pollutants (NESHAP) guidelines. NESHAP guidelines require the removal of potentially friable ACBMs prior to building demolition or renovation that may disturb the ACBM.

#### **10.8 LEAD-BASED PAINT**

The Consumer Product Safety Commission banned the use of lead as an additive in paint in 1978. Based on the age of the building, lead-based paint may be present. If demolition is planned, the removal of lead-based paint isn't required if it is bonded to the building materials. However, if the lead-based paint is flaking, peeling, or blistering, it should be removed prior to demolition. In either case, applicable OSHA regulations must be followed; these include requirements for worker training, air monitoring and dust control, among others. Any debris or soil containing lead must be disposed appropriately.

#### **10.9 SITE MANAGEMENT PLAN**

We recommend preparing a Site Management Plan (SMP) and Health and Safety Plan (HSP). The purpose of these documents will be to establish appropriate management practices for

handling impacted soil and ground water that may be encountered during construction activities which may require special monitoring, handling and/or disposal. These documents should include the following:

- Site control procedures to control the flow of personnel, vehicles and materials in and out of the Site.
- Measures to minimize dust generation, storm water runoff and tracking of soil off-Site.
- If excavation de-watering is required, protocols to evaluate water quality and discharge/disposal alternatives should be described.
- Protocols for conducting earthwork activities in areas where impacted soil, soil vapor and/or ground water are present or suspected. Worker training requirements, health and safety measures and soil handling procedures should be described.
- Protocols to be implemented if buried structures, wells, debris, or unidentified areas of impacted soil are encountered during construction activities.
- Protocols to evaluate the quality of soil suspected of being contaminated so that appropriate mitigation, disposal or reuse alternatives, if necessary, can be determined.
- Procedures to evaluate and document the quality of any soil imported to the Site. Soil containing chemicals exceeding residential (unrestricted use) screening levels or typical background concentrations of metals should not be accepted.
- Methods to monitor excavations for the potential presence of volatile chemical vapors.

#### **10.10 DATA GAPS**

ASTM Standard Designation E 1527-13 requires the Environmental Professional to comment on significant data gaps that affect our ability to identify Recognized Environmental Conditions. A data gap is a lack of or inability to obtain information required by ASTM Standard Designation E 1527-13 despite good faith efforts by the Environmental Professional to gather such information. A data gap by itself is not inherently significant; it only becomes significant if it raises reasonable concerns.

- Contact information for the former occupants and owners of the Site was not provided to us. Thus, former occupants and owners were not interviewed during this study. The general environmental setting of the Site appears to have been established based on the information reviewed from other data sources. We do not consider this data gap to be significant.

#### **10.11 DATA FAILURES**

As described by ASTM Standard Designation E 1527-13, a data failure occurs when all of the standard historical sources that are reasonably ascertainable and likely to be useful have been

reviewed and yet the historical research objectives have not been met. Data failures are not uncommon when attempting to identify the use of a Site at five year intervals back to the first use or to 1940 (whichever is earlier). ASTM Standard Designation E 1527-13 requires the Environmental Professional to comment on the significance of data failures and whether the data failure affects our ability to identify Recognized Environmental Conditions. A data failure by itself is not inherently significant; it only becomes significant if it raises reasonable concerns. No significant data failures were identified during this Phase I ESA. OR The following data failures were identified:

- The ASTM standard requires the identification of all obvious uses of the Site from the present back to the Site's first developed use, or back to 1940, whichever is earlier, using reasonably ascertainable standard historical sources. The earliest record obtained during this study was a Sanborn map from 1891 that shows the Site with unidentified structures present. These structures were demolished prior to the 1915 Sanborn map. This data failure is not considered to be significant.

### 10.11.1 Recognized Environmental Conditions

Cornerstone has performed a Phase I ESA in general conformance with the scope and limitations of ASTM E 1527-13 of 1433 - 1493 El Camino Real, Santa Clara, California. This assessment revealed the following Recognized Environmental Conditions<sup>3</sup>:

- Three former USTs were located at the former car wash at 1483 El Camino Real. The tanks were removed under county oversight and No Further Action was granted for the site. Cornerstone collected soil, ground water, and soil vapor samples from the approximate location of the former tanks. Elevated concentrations of TPHd, TPHg, benzene, toluene, ethyl benzene, and xylenes (BTEX) were detected above the Tier 1 ESLs from soil and ground water collected at this location.

This assessment revealed no Historical Recognized Environmental Conditions<sup>4</sup> or Controlled Recognized Environmental Conditions<sup>5</sup>.

## SECTION 11: LIMITATIONS

Cornerstone performed this Phase I ESA to support Bayview Development Group, Inc. in evaluation of Recognized Environmental Conditions associated with the Site. Bayview Development Group, Inc. understands that no Phase I ESA can wholly eliminate uncertainty regarding the potential for Recognized Environmental Conditions to be present at the Site. This Phase I ESA is intended to reduce, but not eliminate, uncertainty regarding the potential for Recognized Environmental Conditions. Bayview Development Group, Inc. understands that the

---

<sup>3</sup> The presence or likely presence of hazardous substances or petroleum products on the Site: 1) due to significant release to the environment; 2) under conditions indicative of a significant release to the environment; or 3) under conditions that pose a material threat of a future significant release to the environment.

<sup>4</sup> A past Recognized Environmental Condition has been addressed to the satisfaction of the applicable regulatory agency or meeting of unrestricted use criteria established by the applicable regulatory agency without subjecting the Site to required controls or restrictions.

<sup>5</sup> A Recognized Environmental Condition that has been addressed to the satisfaction of the applicable regulatory agency with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls or restrictions.

extent of information obtained is based on the reasonable limits of time and budgetary constraints.

Findings, opinions, conclusions and recommendations presented in this report are based on readily available information, conditions readily observed at the time of the Site visit, and/or information readily identified by the interviews and/or the records review process. Phase I ESAs are inherently limited because findings are developed based on information obtained from a non-intrusive Site evaluation. Cornerstone does not accept liability for deficiencies, errors, or misstatements that have resulted from inaccuracies in the publicly available information or from interviews of persons knowledgeable of Site use. In addition, publicly available information and field observations often cannot affirm the presence of Recognized Environmental Conditions; there is a possibility that such conditions exist.

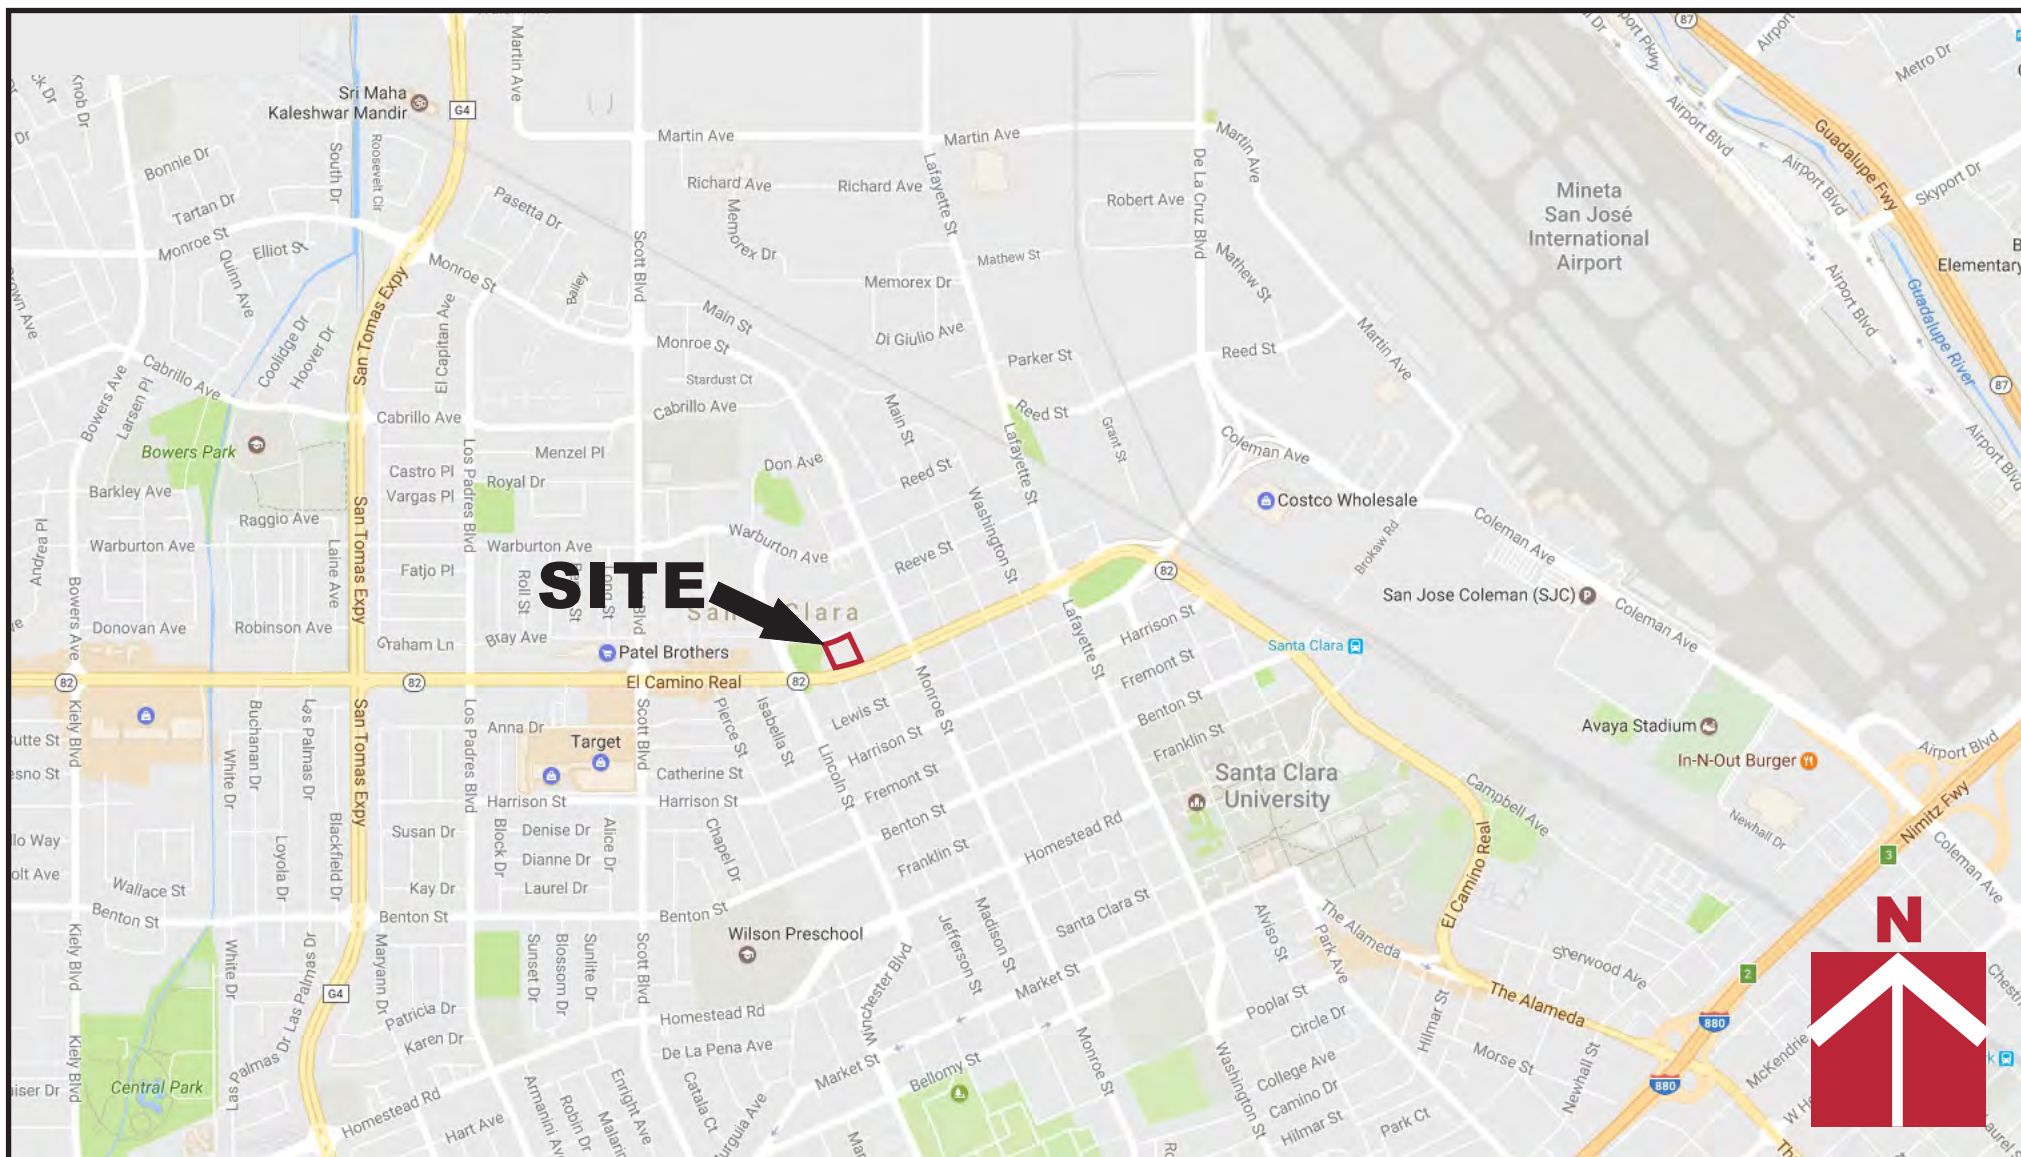

Cornerstone acquired an environmental database of selected publicly available information for the general area of the Site. Cornerstone cannot verify the accuracy or completeness of the database report, nor is Cornerstone obligated to identify mistakes or insufficiencies in the information provided (ASTM E 1527-13, Section 8.1.3). Due to inadequate address information, the environmental database may have mapped several facilities inaccurately or could not map the facilities. Releases from these facilities, if nearby, could impact the Site.

Bayview Development Group, Inc. may have provided Cornerstone environmental documents prepared by others. Bayview Development Group, Inc. understands that Cornerstone reviewed and relied on the information presented in these reports and cannot be responsible for their accuracy.

This report, an instrument of professional service, was prepared for the sole use of Bayview Development Group, Inc. and may not be reproduced or distributed without written authorization from Cornerstone. It is valid for 180 days. An electronic transmission of this report may also have been issued. While Cornerstone has taken precautions to produce a complete and secure electronic transmission, please check the electronic transmission against the hard copy version for conformity.

Cornerstone makes no warranty, expressed or implied, except that our services have been performed in accordance with the environmental principles generally accepted at this time and location.

## **APPENDIX A – TERMS AND CONDITIONS**

CORNERSTONE EARTH GROUP, INC.  
TERMS AND CONDITIONS

1. Agreement

1.1 Cornerstone Earth Group, Inc.'s ("Cornerstone") services are defined by and limited to (a) those services (the "Work") described in the attached proposal, which is incorporated herein by this reference, and (b) these Terms and Conditions of Agreement ("Terms and Conditions"). Together, the proposal and Terms and Conditions form the "Agreement." This Agreement represents the entire agreement between the Client and Cornerstone (collectively, the "Parties") and supersedes all prior negotiations, representations, or agreements, either written or oral. The Agreement can only be amended by a written instrument signed by both the Client and Cornerstone. In the event that the Client authorizes the Work by means of a purchase order or other writing ("Confirmation"), it is expressly agreed that these Terms and Conditions shall apply, and any terms, conditions or provisions appearing in the Confirmation are void and inapplicable except to the extent the Confirmation authorizes the Work and binds the Client to this Agreement.

1.2. Failure to immediately enforce any provision in this Agreement shall not constitute a waiver of the right to enforce that provision or any other provision. No waiver by the Parties of a breach of any term or covenant contained in this Agreement, whether by conduct or otherwise, in any one or more instances shall be deemed to be or construed as a further or continuing waiver of any such breach or as a waiver of a breach of any other term or covenant in this Agreement.

2. Scope of Services

2.1 Cornerstone will serve the Client by providing professional counsel and technical advice based on information furnished by the Client. The Client will make available to Cornerstone all known information regarding existing and proposed conditions of the site, and will immediately transmit any new information that becomes available or any change in plans. The Client and Cornerstone agree that Cornerstone, its officers, directors, employees, agents and/or subcontractors shall not be liable for any claims, damages, costs, or losses arising from or in any way related to conditions not actually encountered during the course of Cornerstone's Work and Cornerstone shall not have any liability or responsibility for losses resulting from inaccurate or incomplete information supplied by the Client, and the Client agrees to defend and indemnify Cornerstone, its officers, directors, employees, agents and/or subcontractors against claims, damages, costs or losses arising therefrom. Cornerstone, its officers, directors, employees, agents and/or subcontractors shall not be liable for failing to discover any condition the discovery of which would reasonably require the performance of services not authorized by the Client.

3. Terms of Payment

3.1 The Client's obligation to pay for the Work is in no way dependent upon the Client's ability to obtain financing. The Client's obligation to pay for the Work is in no way dependent upon the Client's successful completion of the Client's project. No provision of this Agreement shall be construed to constitute a "Pay-When-Paid" clause or a "Pay-If-Paid" clause.

3.2 Payment for the Work shall be due and payable upon receipt of Cornerstone's invoice. To be recognized, any dispute over charges must be claimed in writing within thirty (30) calendar days of the billing date. Any dispute over an invoice amount shall not affect the Client's obligation to pay invoice amounts not in dispute. Amounts unpaid thirty (30) calendar days after the issue date of Cornerstone's invoice shall be assessed a service charge of 1 percent per month on balances outstanding.

3.3 Timely payment is a substantial condition of the Client's performance under this Agreement. Cornerstone may at its option withhold delivery of reports or other work product or suspend performance of the Work pending receipt of payments for all past due invoices and Cornerstone, its officers, directors, employees, agents and/or subcontractors shall have no liability to the Client for delay or damage caused because of such withholding or suspension. In the event that Cornerstone must take legal action to enforce this Agreement for payment for the Work performed and Cornerstone prevails, Cornerstone will be reimbursed by the Client for all expenses, including but not limited to reasonable attorney's fees and litigation costs.

4. Standard of Care

4.1 While performing the Work under this Agreement, Cornerstone shall exercise the degree of care and skill ordinarily exercised under similar circumstances by members of the environmental and geotechnical engineering consulting professions, as applicable, performing the kind of services to be performed hereunder and practicing in the same or similar locality at the same period of time.

4.2 Except for the express promise set forth in Subsection 4.1 herein, Cornerstone neither makes, nor offers, nor shall Cornerstone be liable to the Client for any express or implied warranties with respect to the performance of the Work.

5. Force Majeure

5.1 Cornerstone will diligently proceed with its services and will complete the Work in a timely manner, but it is expressly agreed to and understood by the Client that Cornerstone shall not be held responsible for delays occasioned by factors beyond its control, nor by factors which could not reasonably have been foreseen at the time of the execution of the Agreement between the parties.

5.2 Except for the obligation to pay for the Work performed and expenses incurred, neither Cornerstone nor the Client shall be liable for its failure to perform hereunder, in whole or in part, due to contingencies beyond its reasonable control, included, but not limited to, strikes or other concerted acts of workmen not in Cornerstone's employ, whether direct or indirect, riots, war, acts of terrorism, fire, floods, storms, washouts, acts of God or the public enemy, explosions, accidents, epidemics, breakdowns, injunctions, compliance with any law, regulation or order, whether valid or invalid, of the United States of America or any governmental body or any instrumentality thereof, whether now existing or hereafter created.

6. Effect of Delay or Impediment to Work

6.1 If any event occurs which causes or may cause Cornerstone: (a) to be impeded in its performance of the Services; or (b) to be delayed in the completion of the Work within the time provided in the attached proposal and/or in an applicable Change Order due to any act or omission of the Client, its officers, directors, employees and agents, or the Client's contractors, or due to any contingency beyond Cornerstone's control as provided in Section 5 herein, Cornerstone shall notify the Client in writing within ten (10) business days of the date on which Cornerstone becomes aware of such event.

6.2 The Client shall notify Cornerstone in writing of the Client's agreement or disagreement with Cornerstone's claim of an impediment or delay to performance within five (5) business days after receipt of Cornerstone's notice under Subsection 6.1. If the Client agrees with Cornerstone's claim, the time for performance of such requirement may be extended as mutually agreed in writing by the parties as provided in Subsection 1.1. If the Client disputes Cornerstone's assertion of an impediment or delay, such dispute shall be resolved pursuant to Section 17.

6.3 Impediments or delays to performance, addressed pursuant to this Section, shall not (a) constitute a breach hereunder; (b) give rise to any special right to terminate this Agreement; or (c) give rise to a claim by the Client for damages or other relief, if and to the extent that such impediment or delay is due to any act or omission of the Client, its officers, directors, employees and agents, or the Client's contractors, or due to any contingency beyond Cornerstone's control as provided in Section 5.

7. Right of Entry

7.1 Unless otherwise agreed in writing, the Client shall furnish and/or secure right of entry to the Site described in the proposal for Cornerstone personnel and equipment in order for Cornerstone to perform the Work. The Client shall waive any claim against Cornerstone, its officers, directors, employees, agents and/or subcontractors and agree to defend and indemnify Cornerstone, its officers, directors, employees, agents and/or subcontractors from any claims arising from entry onto the Site which is the subject of the Work.

- 7.2 The Parties acknowledge and agree that although Cornerstone will take reasonable precautions to minimize damage to property, including landscapes, hardscapes, crops and underground utilities, any and all damages, losses or expenses which could result from damage to such property due to Cornerstone's performance of the Work under this Agreement shall be the sole and exclusive responsibility of the Client provided that such damages, losses or expenses are not the result of Cornerstone's breach of the standard of care set forth in Subsection 4.1 herein. The Client shall indemnify, defend and hold harmless Cornerstone, its officers, directors, employees, agents and/or subcontractors from any damages, losses or expenses including, without limitation, attorney's fees, sustained or incurred by Cornerstone, its officers, directors, employees, agents and/or subcontractors as a result of any and all claims arising out of any damage to subsurface utilities due to Cornerstone's performance of the Work under this Agreement, provided that such claims are not the result of Cornerstone's breach of the standard of care set forth in Subsection 4.1 herein.
8. Monitoring of Construction
- 8.1 The Client acknowledges and understands that unanticipated or changed conditions may be encountered during construction. There is a substantial risk to the Client and to Cornerstone if Cornerstone is not engaged to provide complete services, including but not limited to, construction observation services. Such risks include the increased likelihood of misinterpretation of Cornerstone's findings and conclusions and error in implementing recommendations by Cornerstone. If Client fails to retain Cornerstone to provide complete services, the Client agrees, notwithstanding any other provisions of this Agreement, to the fullest extent permitted by law, to indemnify and hold harmless Cornerstone, its officers, partners, employees and Cornerstones from and against any and all claims, suits, demands, liabilities, losses, damages or costs, including reasonable attorneys' fees and defense costs arising out of or in any way connected with the Work or arising out of implementing or interpreting Cornerstone's work product except when the Claim arises from the sole negligence of Cornerstone or where the Claim arises from the willful, wanton or reckless conduct of Cornerstone.
- 8.2 Cornerstone shall not be required to make exhaustive or continuous on-site observations to check the quality or quantity of the Work and shall not be responsible for any contractor's failure to carry out the work in accordance with the contract documents.
- 8.3 Cornerstone shall not be responsible for the acts or omissions of any contractor or subcontractor or any of the contractors' or subcontractors' agents or employees or other persons performing any work on the Project.
9. Changed Conditions
- 9.1 If, during the term of this Agreement, circumstances or conditions that were not originally contemplated by or known to Cornerstone are revealed, to the extent that they affect the scope of services, compensation, schedule, allocation of risks or other material terms of this Agreement, Cornerstone may call for renegotiation of appropriate portions of this Agreement. Cornerstone shall notify the Client of the changed conditions necessitating renegotiation, and Cornerstone and the Client shall promptly and in good faith enter into renegotiation of this Agreement to address the changed conditions. If terms cannot be agreed to, the parties agree that either party has the absolute right to terminate this Agreement, in accordance with the termination provision hereof.
10. Jobsite Safety
- 10.1 Neither the professional activities of Cornerstone nor the presence of Cornerstone or its employees, subconsultants and subcontractors shall relieve the Client or the Client's General Contractor of its obligations, duties and responsibilities, including, but not limited to, health and safety programs. Cornerstone and its personnel have no authority to exercise any control over the site or any construction contractor or its employees in connection with their work or any health or safety programs or procedures. The Client acknowledges and agrees that Cornerstone shall not be responsible for jobsite safety.
11. Hazardous Materials and Environmental Contamination
- 11.1 The Client hereby warrants that if it knows or has any reason to assume or suspect that hazardous or toxic substances, or any other type of environmental hazard, contamination or pollution may exist at the Site, the Client will immediately inform Cornerstone to the best of the Client's knowledge of such hazardous or toxic substances, environmental hazard, contamination or pollution's type, quantity and location.
- 11.2 Cornerstone, its officers, directors, employees, agents and/or subcontractors shall have no title to, ownership of, or legal responsibility and/or liability for any and all contamination at the Site, including, but not limited to, the groundwater thereunder. "Contamination at the Site" includes but is not limited to any hazardous or toxic substance, or any other type of environmental hazard, contamination or pollution present at or under the Site, including, but not limited to the ground water thereunder, which is not brought onto the Site by Cornerstone, its officers, directors, employees, agents and/or subcontractors.
- 11.3 Cornerstone and the Client agree that the discovery of unanticipated Contamination at the Site may constitute a changed condition mandating renegotiation and/or termination of this Agreement. Cornerstone and the Client agree that the discovery of unanticipated Contamination at the Site may make it necessary for Cornerstone to take immediate measures to protect the public health, safety and the environment. The Client agrees that Cornerstone may take any or all measures that in Cornerstone's professional opinion are justified to preserve and protect the health and safety of Cornerstone's personnel, the public and the environment, and the Client agrees to compensate Cornerstone for the cost of such services.
- 11.4 The Client agrees to indemnify, defend and hold harmless Cornerstone, its officers, directors, employees, agents and/or subcontractors from any and all damages, losses or expenses, including, but not limited to, reasonable attorney's fees and legal costs connected therewith, liabilities, penalties and fines sustained by Cornerstone, its officers, directors, employees, agents and/or subcontractors as a result of any and all claim with respect to and arising out of any and all Contamination at the Site, provided that such claims are not the result of Cornerstone's breach of the standard of care set forth in Subsection 4.1 herein.
- 11.5 Subsurface sampling may result in unavoidable contamination of certain subsurface areas, as when a probe or boring is advanced or drilled through a contaminated area into a clean soil or water-bearing zone. Because of the risks posed by such work, and because subsurface sampling is often a necessary part of Cornerstone's Work, the Client hereby agrees to waive all claims against Cornerstone, its officers, directors, employees, agents and/or subcontractors with respect to and arising out of any and all subsurface sampling, including but not limited to claims relating to cross-contamination occurring because of such subsurface sampling, provided that such claims are not the result of Cornerstone's breach of the standard of care set forth in Subsection 4.1 herein.
12. Disposal of Samples and Drill Cuttings
- 12.1 Unless mutually agreed in writing by the Parties as provided in Subsection 1.1 herein, Cornerstone shall hold samples collected during the performance of the Work no longer than thirty (30) calendar days after their date of collection. Drill cuttings and waste materials will be left on-Site. In the event that soil, rock, water, drill cuttings and/or other samples or materials are contaminated or are suspected to contain hazardous materials or other toxic substances hazardous or detrimental to public health, safety or the environment as defined by federal, state or local law, Cornerstone will, after completion of testing, notify the Client of the same in order for the Client to arrange for the disposal of the samples and/or materials. The Client recognizes and agrees that Cornerstone at no time assumes title to said samples and/or materials, and that the Client is responsible for the disposal of such samples and/or materials. The Client agrees to pay all costs associated with any storage, transport and/or disposal of samples and/or materials, and to defend and indemnify Cornerstone, its officers, directors, employees, agents and/or subcontractors from any and all claims arising out of or in any way related to the storage, transport and/or disposal of asbestos, hazardous or toxic substances, and/or pollutants, including but not limited to any samples and/or materials.
13. Use and Ownership of Documents
- 13.1 All reports, letters, plans, figures, specifications, computer files, field data, logs, notes and other documents and instruments prepared by Cornerstone as instruments of service shall remain the property of Cornerstone. Cornerstone shall retain all common law, statutory and other reserved rights, including copyright thereto. In the event the Client, the Client's contractors or subcontractors, or anyone for whom the Client is legally liable makes or permits to be made any changes to reports, letters, plans, figures, specifications, computer files, field data, logs, notes and other documents prepared by Cornerstone without obtaining Cornerstone's prior written consent, the Client shall assume full responsibility for the results of such changes. Therefore, the Client agrees to waive any claim against Cornerstone and to release Cornerstone from any liability arising directly or indirectly from such changes. In addition, the Client agrees, to the

fullest extent permitted by law, to indemnify and hold harmless Cornerstone from any damages, liabilities or costs, including reasonable attorney's fees and costs of defense, arising from such changes.

The Client agrees that all reports, letters, plans, figures, specifications, computer files, field data, logs, notes and other documents and other services furnished to the Client or its agents and/or employees by Cornerstone, which are not paid for, shall be immediately returned upon demand and may not be used by the Client for any purpose. Any reports, letters, plans, figures, specifications, computer files, field data, logs, notes and other documents, advice or opinions provided by Cornerstone to the Client as part of the Work are provided for the sole and exclusive use of the Client for specific application to the Site detailed in this Agreement. Any third party use of any drafts, reports, letters, plans, figures, specifications, computer files, field data, logs, notes and other documents, advice or opinion of Cornerstone is the sole responsibility of the Client.

14. Insurance

14.1 Cornerstone, its officers, directors, employees and agents have and shall maintain during the term of this Agreement insurance in the following types: (a) Worker's Compensation Insurance; (b) Employer's Liability Insurance; (c) Commercial General Liability Insurance (GLI); and (d) Professional Liability Insurance.

14.2 Cornerstone shall, at the Client's request, provide the Client with a certificate of insurance or other satisfactory evidence that such insurance has been obtained and are maintained in force through the term of this Agreement. Any additional insurance policy or increase in the coverage of existing insurance required by the Client shall constitute an additional expense under this Agreement, and the Client shall reimburse Cornerstone for any additional premiums and costs incurred by Cornerstone in connection with obtaining such additional insurance.

15. Prevailing Wage Obligations

15.1 The Client shall notify Cornerstone in writing if the Work contemplated by this Agreement constitutes a "public work" under any and all federal, state and/or local prevailing wage laws, and/or living wage laws, including but not limited to the Davis-Bacon Act and the provisions of California Labor Code §§ 1720 *et seq.* In addition, the Client shall notify Cornerstone if Cornerstone is obligated by statute, any public contracting authority and/or a developer to pay prevailing wages and benefits and/or any predetermined wages or benefits (collectively, "prevailing wage obligations"). In the event that Cornerstone must adhere to federal, state and/or local prevailing wage obligations for the Work performed, the Client shall provide Cornerstone with any and all prevailing wage determinations applicable to the Work to be performed under this Agreement. Any prevailing wage obligations might affect the payment terms contemplated by this Agreement and thus constitute a changed condition mandating renegotiation and/or termination of this Agreement. The Client understands and agrees that Cornerstone will rely on the representations made by the Client with regard to prevailing wage obligations and the Client agrees to indemnify Cornerstone, its officers, directors, employees, agents and/or subcontractors against any and all claims, liabilities, suits, demands, losses, costs and expenses, including but not limited to reasonable attorney's fees and legal costs, arising from Cornerstone's reliance upon the Client's representations regarding prevailing wage obligations.

16. Limitations—THIS CLAUSE LIMITS CORNERSTONE'S LIABILITY

16.1 Cornerstone shall not be responsible for the validity or accuracy of data collected by others or for interpretations made by others.

16.2 Cornerstone's relationship with the Client under this Agreement shall be that of an independent contractor. Nothing in this Agreement shall be construed to designate Cornerstone, its officers, directors, employees, agents and/or subcontractors as employees, agents, joint ventures or partners of the Client. Cornerstone shall have no authority to bind, commit or obligate the Client in any manner and shall not hold itself out to third parties as being capable of doing so.

16.3 The Client and Cornerstone have discussed the risks and rewards associated with this project, as well as Cornerstone's fee for services. After negotiation, the Client and Cornerstone have expressly agreed to allocate certain of the risks so that, to the fullest extent permitted by law, the total aggregate liability of Cornerstone, its officers, directors, employees, agents and subcontractors to the Client and all third-parties is limited to \$50,000 or the amount of Cornerstone's fee, whichever is greater, for any and all injuries, damages, claims, losses, expenses, or claim expenses (including attorney's fees) arising out of this Agreement from any cause or causes. Such causes include but are not limited to Cornerstone's negligence, errors, omissions, strict liability, breach of contract or breach of warranty. In no event shall Cornerstone, its officers, directors, employees, agents and/or subcontractors be liable in contract, tort, strict liability, warranty or otherwise, for any special, incidental or consequential damages, such as but not limited to delay, disruption, loss of product, loss of anticipated profits or revenue, loss of use of any equipment or system, non-operation or increased expense of operation of any equipment or systems, cost of capital, or cost of purchase or replacement equipment systems or power.

16.4 Notwithstanding any other provision of this Agreement, the total aggregate liability of Cornerstone, its officers, directors, employees, agents and subcontractors to the Client and all third parties, including attorney's fees awarded pursuant to this Agreement, for claims, damages or losses arising out of the treatment, transport, storage, discharge, dispersal or release of hazardous materials, shall be limited to \$50,000 or the amount of Cornerstone's fee, whichever is greater and regardless of the legal theory under which liability is imposed.

16.5 For an additional 5% of Cornerstone's total fee or \$500, whichever is greater, Cornerstone will raise the limitation of liability up to the amount that actually would be paid by Cornerstone's insurance carriers if Client and Cornerstone initial below:

LIMITATION INCREASE: THE LIMITATION OF LIABILITY IS INCREASED TO THE ACTUAL AMOUNT PAID BY CORNERSTONE'S INSURANCE CARRIERS IN EXCHANGE FOR AN ADDITIONAL FEE OF 5% OF THE TOTAL SERVICE CHARGE OR \$500, WHICHEVER IS GREATER.

	Client's Initial	Date	Cornerstone's Initial	Date
16.6	The Client shall indemnify, defend and hold harmless Cornerstone and its officers, directors, employees, agents and subcontractors from any and all damages, losses, or expenses, included but not limited to reasonable legal expenses and attorney's fees connected therewith, sustained by Cornerstone, its officers, directors, employees, agents and subcontractors as a result of any and all claims, demands, suits, causes of action, proceedings, judgments and liabilities for property damage, statutory penalty and/or personal injury with respect to and arising out of the Client's negligent acts, omissions or material breach of this Agreement. In the event a claim is the result of joint negligent acts or omissions of the Client and Cornerstone, the Client's duty of indemnification shall be in proportion to its respective allocable share of the joint negligence.			
16.7	Client acknowledges and agrees that in no event shall any action or proceeding be brought against Cornerstone or proceeding be brought against Cornerstone by Client or its assignees for any claim or cause of action arising from or in any way related to the Work or this Agreement unless such action or proceeding is commenced within three (3) years from the Date of Completion of Work provided by Cornerstone under this Agreement. The Date of Completion shall be the date of the final invoice for the Work performed under this Agreement.			
16.8	If Client requests that Cornerstone's work product be relied upon by a third party, including, but not limited to a lender, Client agrees to provide the third party with a copy of these terms and conditions, and Client agrees to require said third party to agree to limit Cornerstone's total liability to Client and any third party as described in paragraph 16.4 and Client agrees to indemnify Cornerstone, its officers, directors, employees, agents and/or subcontractors against any and all claims, liabilities, suits, demands, losses, costs and expenses, including but not limited to reasonable attorney's fees and legal costs, arising from third party claims, damages, costs and losses arising out of or in any way related to Work.			
17.	Disputing Cornerstone's Performance			
17.1	Except as provided in Section 6 and Subsection 17.2 herein, if Cornerstone shall breach any provision herein, the Client shall notify Cornerstone within five (5) business days of the Client's knowledge of such breach. Except as provided in Subsections 17.3 herein, upon receipt of the Client's notice, Cornerstone shall have the option to take such corrective measures, if any, to remedy the breach, and shall notify the Client within five (5) business days after receipt of the			

Client's notification of the corrective measures Cornerstone shall take and the estimated time period within which the corrective measures shall be taken. In no event shall Cornerstone be liable to the Client for any damages without being given a reasonable opportunity to remedy its breach as provided herein.

- 17.2 The Client shall make no claim for professional negligence unless the Client has first provided Cornerstone with a written certification executed by an independent Consultant currently practicing in the same discipline and locality as Cornerstone and licensed in the State of California. This certification shall (a) contain the name and license number of the certifier; (b) specify the acts or omissions that the certifier contends are not in conformance with the standard care for a Cornerstone performing professional services under similar circumstances; and (c) state in detail the basis for the certifier's opinion that such acts or omissions do not conform to the standard of care. This certificate shall be provided to Cornerstone no less than thirty (30) calendar days prior to the presentation of any claim or the institution of any mediation, arbitration or judicial proceeding.
- 17.3 Cornerstone agrees that upon receipt of written notice from the Client pursuant to Subsection 17.2 herein it will implement necessary corrections to the Work performed by Cornerstone that fails to conform to the standard of care that Cornerstone has accepted pursuant to Subsection 4.1, as mutually agreed in writing by the Parties as provided in Subsection 1.1. herein, if such written notice is received within one (1) year of the performance of the Work failing to conform to Subsection 4.1. If Cornerstone has been paid by the Client for such Work, Cornerstone shall perform the corrections at its own expense. If Cornerstone has not been paid by the Client for such Work, and the Work is subsequently corrected to conform with the standard of care that Cornerstone has accepted pursuant to Subsection 4.1, the Client shall pay Cornerstone in accordance with Section 3 herein.
- 17.4 In no event shall Cornerstone, its officers, directors, employees, agents and/or subcontractors be liable for any special, incidental or consequential damages, such as but not limited to delay, disruption, loss of product, loss of anticipated profits or revenue, loss of use of any equipment or system, non-operation or increased expense of operation of any equipment or systems, cost of capital, or cost of purchase or replacement equipment systems or power, or any other incidental, special, indirect or consequential damages of any kind or nature whatsoever resulting from Cornerstone's performance or failure to perform the Work in accordance with the standard of care that Cornerstone has accepted pursuant to Subsection 4.1.
18. Termination
- 18.1 Cornerstone shall have the right to terminate this Agreement ten (10) business days after written notice is sent to the Client if (a) the Client fails to pay any of Cornerstone's undisputed invoices within sixty (60) days from the date of the invoice; or (b) Cornerstone's attached proposal and/or the Work was based upon misinformation, whether by the Client or a third party, or upon information not fully disclosed to Cornerstone, whether by the Client or a third party.
- 18.2 Except as provided for in Section 6, and after compliance with Section 17, the Client shall have the right to terminate this Agreement ten (10) business days after written notice is sent to Cornerstone if Cornerstone fails to comply in any material respect with any of the material provisions herein and subsequently fails to notify the Client pursuant to Subsections 17.1 and 17.3 of the corrective measures Cornerstone intends to take.
- 18.3 The termination of this Agreement by Cornerstone under Subsection 18.1 herein, or by the Client under Subsection 18.2 herein, shall not relieve the Client of its obligations to pay Cornerstone for any of the Work performed and expenses incurred as of the date of termination, and shall not constitute a waiver by Cornerstone or the Client of any cause of action for breach of this Agreement or any provision herein.
19. Miscellaneous Provisions.
- 19.1 "Indemnity" Defined. The term "indemnify" shall mean indemnify, defend and hold harmless from and against any and all claims, liabilities, suits, demands, losses, costs and expenses, including but not limited to reasonable attorney's fees and all legal costs incurred on appeal, and all interest thereon, accruing or resulting to any and all persons, firms, or any other legal entities, on account of any damages or losses to property or persons, including death or economic losses, arising out of the item, matter, action or inaction specified in the specific provision.
- 19.2 Choice of Counsel. In any circumstance whereby Cornerstone is entitled to indemnification by the Client, Cornerstone shall have the right to select counsel of its choosing.
- 19.3 Successors and Assigns. This Agreement shall be binding upon and inure to the benefit of the Parties and their successors and assigns as provided herein. The Client shall not assign, sell, transfer or subcontract this Agreement or any interest herein without the prior written consent of Cornerstone. Cornerstone shall not assign, sell, transfer or subcontract this Agreement or any interest herein without the prior written consent of the Client. The Client hereby consents to the subcontracting of those portions of the Work as the attached proposal herein indicates are or will be subcontracted. Notwithstanding the above, Cornerstone shall have the right to assign monies due hereunder for the Work performed and expenses incurred.
- 19.4 Third Party Beneficiaries. The Parties agree that this Agreement is not intended by either Cornerstone or the Client to give any benefits, rights, privileges, actions or remedies to any person or entity, partnership, firm or corporation as a third party beneficiary or otherwise under any theory of law, that is not a signatory to this Agreement.
- 19.5 Survival. In order that the Parties may fully exercise their rights and perform their obligations arising from the performance of this Agreement, any provisions of this Agreement that are necessary to ensure such exercise or performance shall survive the termination of this Agreement.
- 19.6 Severability. If any part, term or provision of this Agreement shall be held illegal, unenforceable or in conflict with any federal, state or local law having jurisdiction over this Agreement, the validity of the remaining parts, terms or provisions of this Agreement shall not be affected thereby.
- 19.7 Choice of Law and Venue. This Agreement shall be governed by California law. The venue for any legal action brought pursuant to this Agreement shall be located within the County of Santa Clara, State of California.
- 19.8 Publicity. Unless otherwise mutually agreed in writing by the parties as provided in Subsection 1.1, Cornerstone may use and publish the Client's name and a general description of Cornerstone's services with respect to the Work in describing Cornerstone's experience and qualifications to other clients or prospective clients.
- 19.9 Signatories. Each undersigned representative of the Parties to this Agreement certifies that he or she is fully authorized to enter into the terms and conditions of this Agreement and to execute and legally bind such Party to this document.
- 19.10 Corporate Protection. It is intended by the parties to this Agreement that Cornerstone's services in connection with the Work shall not subject Cornerstone's individual employees, officers or directors to any personal legal exposure for the risks associated with this Project. Therefore, and notwithstanding anything to the contrary herein, the Client agrees that as the Client's sole and exclusive remedy, any claim, demand or suit shall be directed and/or asserted only against Cornerstone, a California Corporation, and not against any of Cornerstone's individual employees, officers or directors.
- 19.11 Code Compliance. Cornerstone shall exercise usual and customary professional care in its efforts to comply with applicable laws, codes and regulations as of the date of this Agreement.
- 19.12 Quotation. Unless stated in writing, this quotation shall not remain in effect after thirty (30) days of the Proposal date.
- 19.13 Contractors State License. Cornerstone maintains a General Engineering A license (No. 905816) with a Hazardous Substances Removal and Remedial Actions Certification with the State of California, which are regulated by the Contractors State License Board. Any questions concerning a contractor may be referred to the Registrar, Contractors State License Board, P.O. Box 26000, Sacramento, California 95826.

## APPENDIX B – USER-PROVIDED DOCUMENTS

September 11, 2000

Mr. Vincent C. Sevely  
Ms. Helen Sevely et al  
230 California Avenue, Suite 100  
Palo Alto, CA 94306

Mr. Jerald Gurley  
Lazano Westgate, Inc.  
661 Grape Avenue  
Sunnyvale, CA 94087

Dear Mr. Sevely, Ms. Sevely, and Mr. Gurley:

Subject: Fuel Leak Site Case Closure—Santa Clara Car Wash, 1483 El Camino Real, Santa Clara, CA 95050; Case No. 14-311

This letter transmits the enclosed underground storage tank (UST) case closure letter in accordance with Chapter 6.75 (Article 4, Section 25299.37[h]). The State Water Resources Control Board adopted this letter on February 20, 1997. As of March 1, 1997, the Santa Clara Valley Water District is required to use this case closure letter for all UST leak sites. We are also transmitting to you the enclosed case closure summary. These documents confirm the completion of the investigation and cleanup of the reported release at the subject site. The subject fuel leak case is closed.

If you have any questions, please call Rita S. Chan at (408) 265-2607, extension 2643. Thank you.

Sincerely,

*ORIGINAL SIGNED BY*

James S. Crowley, P.E.

Dear Mr. Sevely, Ms. Sevely, and Mr. Gurley:

Subject: Fuel Leak Site Case Closure—Santa Clara Car Wash, 1483 El Camino Real, Santa Clara, CA 95050; Case No. 14-311

This letter confirms the completion of a site investigation and remedial action for the underground storage tank(s) formerly located at the above-described location. Thank you for your cooperation throughout this investigation. Your willingness and promptness in responding to our inquiries concerning the former underground storage tank(s) are greatly appreciated.

Based on information in the above-referenced file and with the provision that the information provided to this agency was accurate and representative of site conditions, this agency finds that the site investigation and corrective action carried out at your underground storage tank(s) site is in compliance with the requirements of subdivisions (a) and (b) of Section 25299.37 of the Health and Safety Code and with corrective action regulations adopted pursuant to Section 25299.77 of the Health and Safety Code and that no further action related to the petroleum release(s) at the site is required.

This notice is issued pursuant to subdivision (h) of Section 25299.37 of the Health and Safety Code.

Please contact our office if you have any questions regarding this matter.

Sincerely,

*ORIGINAL SIGNED BY*

James S. Crowley, P.E.

# CASE CLOSURE SUMMARY LEAKING UNDERGROUND FUEL STORAGE TANK PROGRAM

## I. AGENCY INFORMATION

Date: August 22, 2000

Agency Name: Santa Clara Valley Water District	Address: 5750 Almaden Expressway
City/State/Zip: San Jose, CA 95118	Phone: (408) 265-2600
Responsible Staff Person: Rita S. Chan, P.E.	Title: Assistant Civil Engineer

## II. CASE INFORMATION

Site Facility Name: Santa Clara Car Wash		
Site Facility Address: 1483 El Camino Real, Santa Clara, CA 95050		
RB LUSTIS Case No.: ---	Local Case No.: 07S1W03H03f	LOP Case No.: 14-311
URF Filing Date: 10/06/88	SWEEPS No.: —	APN: 224-48-005
Responsible Parties	Addresses	Phone Number
Mr. Vincent C. Sevely Ms. Helen Sevely et al	230 California Avenue, Suite 100, Palo Alto, CA 94306	(650) 326-5025
Mr. Jerald Gurley Lazano Westgate, Inc.	661 Grape Avenue, Sunnyvale, CA 94087	(408) 749-9755

Tank I.D. No	Size in Gallons	Contents	Closed In Place/Removed?	Date
—	10,000	Gasoline	Removed	8/11/95
—	10,000	Gasoline	Removed	8/11/95
—	300	Gasoline	Removed	8/11/95
Piping			—	—

## III. RELEASE AND SITE CHARACTERIZATION INFORMATION

Cause and Type of Release: Unknown; one 0.5-inch-diameter hole was found on the bottom of one of the 10,000gallon tanks during tank removal.		
Site characterization complete? Yes	Date Approved By Oversight Agency: —	
Monitoring wells installed? Yes	Number: 2*	Proper screened interval? Yes**
Highest GW Depth Below Ground Surface: 10.73'	Lowest Depth: 32'	Flow Direction: Northeast***
Most Sensitive Current Use: Potential Drinking Water		

\* One groundwater monitoring well (GX-64A) was installed in 1986; in addition, one vapor monitoring well (GX-64B) was installed at the same time.

\*\* GX64A was properly screened at the time of installation. However, the well screen has been submerged.

\*\*\* Based on a nearby fuel leak site located approximately 450 feet southwest of the subject site.

Summary of Production Wells in Vicinity: A well search indicates that there is one active and two properly destroyed water production wells within ¼-mile radius of the site. The active well (07S01 W03H002) is located approximately 1033 ft NNW from the site. Based on the levels of residual contamination at the site and the vicinity of these wells to the site, they are not likely to be affected by the reported release.

Are drinking water wells affected? No

Aquifer Name: Santa Clara Valley Groundwater Basin

Is surface water affected? No

Nearest SW Name: San Tomas Aquino Creek, 4,460 feet west of the site

Off-Site Beneficial Use Impacts (Addresses/Locations): None reported

Reports on file? Yes

Where are reports filed? Santa Clara Valley Water District

#### TREATMENT AND DISPOSAL OF AFFECTED MATERIAL

Material	Amount (Include Units)	Action (Treatment or Disposal w/Destination)	Date
Tank	Two at 10,000 gallons One at 300 gallons	Disposed at Levin Metal Corporation, Richmond	8/11/95
Piping	—	—	—
Free Product	—	—	—
Soil	250 cubic yards	Unknown	8/11/95
Groundwater	—	—	—
Barrels	—	—	—

Description of Interim Remediation Activities: Tank removal in 1995

Analytical results for soil samples collected under the former underground storage tanks (UST) and dispenser area during tanks removal, August 1995.

<sup>2</sup> Analytical results for soil samples collected from borings SB-1 and SB-2 during most recent soil and groundwater investigation, June 2000.

<sup>3</sup> Analytical results for a groundwater sample collected from monitoring well GX-64A in June 1986.

<sup>4</sup> Analytical results for a groundwater sample collected from monitoring well GX-64A in September 1995.

<sup>5</sup> Analytical results for a grab groundwater sample collected from boring SB-1 in June 2000.

\* Fuel oxygenates analysis was performed for groundwater samples collected at GX-64A in December 1998 and grab groundwater samples collected at SB-1 and SB-2 in June 2000. Analytical results did not indicate the presence of Methyl tert-Butyl Ether, Ethyl tert-Butyl Ether, tert-Amyl Methyl Ether, Di-Isopropyl Ether, tert-Butanol, 1,2-Dichloroethane, and Ethylene Dibromide above detection limits.

#### IV. CLOSURE

Does completed corrective action protect existing beneficial uses per the Regional Board Basin Plan? Yes		
Does completed corrective action protect potential beneficial uses per the Regional Board Basin Plan? Yes		
Does corrective action protect public health for current land use? Santa Clara Valley Water District staff does not make specific determinations concerning public health risk. However, it does not appear that the release would present a risk to human health.		
Site Management Requirements: None		
Should corrective action be reviewed if land use changes? No		
Monitoring Wells Decommissioned: No	Number Decommissioned: 0	Number Retained: 2
List Enforcement Actions Taken: None		
List Enforcement Actions Rescinded: None		

#### V. ADDITIONAL COMMENTS, DATA, ETC.

##### Site History:

June 1986: One groundwater monitoring well (GX-64A) and one vapor monitoring well (GX-64B) were installed. Five soil samples were collected from GX-64A. Analytical results for soil samples indicated the presence of up to 254 parts per million (ppm) Total Petroleum Hydrocarbons as gasoline (TPHG). Analytical results for a groundwater sample collected from the well indicated 3,000 parts per billion (ppb) TPHG.

August 1995: Three USTs were removed from the site. Eight samples were collected from the excavation that formerly contained the two 10,000 gallon USTs at approximately 12 to 15 feet below ground surface (bgs). One sample was collected from beneath the center of each dispenser island and one sample was collected from the bottom of the excavation which formerly contained the 300 gallon UST. Analytical results for the soil samples collected beneath the two 10,000-gallon USTs indicated the presence of up to 19 ppm Benzene, 340 ppm Toluene, 290 ppm Ethylbenzene, 1,500ppm Xylenes, and 26,000 ppm TPHG. No detectable concentrations of TPHG or Benzene, Toluene, Ethylbenzene, Xylenes (BTEX) were detected in the soil samples collected from below the dispenser islands and the 300-gallon UST. Approximately 250 cubic yards of excavated soil was stockpiled at the site. However, no information is available regarding the disposal location of the soil. Analytical results for the stockpile samples indicated up to 320 ppm TPHG, 0.16 ppm Toluene, 0.21 ppm Ethylbenzene, and 2.2 ppm Xylenes.

Between September 1995 and December 1999: Groundwater sampling was performed at GX-64A.

June 2000: Two direct push borings (SB-1 and SB-2) were drilled approximately downgradient of the former UST area. Soil samples were collected from a depth of approximately 11 feet bgs. Grab groundwater samples were also collected. Analytical results for soil samples did not indicate BTEX, TPHG or MTBE. Analytical results for groundwater samples indicated the presence of 1.6 ppb Toluene; no Benzene, Ethylbenzene, Xylenes, TPHG or MTBE were detected.

##### Conclusion:

Although residual contamination exists at the site, it does not appear that the residual contamination would pose a significant risk to human health, safety, and the environment. Based on the most recent soil and groundwater investigation results, the Santa Clara Valley Water District staff does not believe that a continuing threat to soil and groundwater exists at the site; therefore, no further corrective action is necessary at this time.

#### VI. LOCAL AGENCY REPRESENTATIVE DATA

Prepared by: Rita S. Chan, P.E.	Title: Assistant Civil Engineer
Signature: <i>Rita Chan</i>	Date: <i>8/28/00</i>
Approved by: James S. Crowley, P.E.	Title: Engineering Unit Manager
Signature: <i>James S. Crowley</i>	Date: <i>09/05/00</i>

This closure approval is based upon the available information and with the provision that the information provided to this agency was accurate and representative of site conditions.

#### VII. REGIONAL BOARD NOTIFICATION

Mr. Larry Monette  
Santa Clara Fire Department  
777 Benton Street  
Santa Clara, CA 95050

Dear Mr. Monette:

The attached monitoring well installation and laboratory report summarizes the installation and laboratory testing of groundwater monitoring well GX-64A and vapor monitoring well GX-64B at:

Santa Clara Full Service Car Wash

to monitor its underground tank storage facility at:

1483 El Camino Real, Santa Clara, CA

During installation of GX-64A five soils samples were taken for laboratory analyses and one water sample was taken after the well was developed. Test results of the soils samples ranged from 12.07 UG/GM (PPM) to 254.17 UG/GM (PPM) total hydrocarbons (gasoline) as follows:

Sample #	Depth	Test Result
GX64A-1	12 ft	23.48 UG/GM (PPM)
GX64A-2	17 ft	254.17 UG/GM (PPM)
GX64A-3	22 ft	18.09 UG/GM (PPM)
GX64A-4	27 ft	12.07 UG/GM (PPM)
GX64A-5	32 ft	40.21 UG/GM (PPM)

Groundwater was first encountered at a depth of approximately 35 ft. After the well was developed, the water level stabilized at approximately 32 ft. The water sample GX64-AW, taken after the well was purged, tested 3.00 MG/LT (PPM). The sample of the native soil immediately below the tank backfill in well GX-64B (sample # GX64B) tested 67.61 UG/GM (PPM). The bottom of the tank backfill was approximately 11.5 ft.

Gasoline odors were generally evident in drill cuttings during drilling and installation of the wells. A reported surface discharge (overfill) in the past, (4-5 years ago), might explain the hydrocarbon concentrations that were detected.

Enclosed are copies of the drilling logs and the laboratory reports. If you have any questions regarding the installation please contact us or Mr. Gurley at Santa Clara Full Service Carwash.

Sincerely,

Frank W. Smith  
Geologist

## EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

### **EDR HIGH RISK HISTORICAL RECORDS**

#### ***EDR Exclusive Records***

EDR Hist Cleaner..... EDR Exclusive Historic Dry Cleaners

### **EDR RECOVERED GOVERNMENT ARCHIVES**

#### ***Exclusive Recovered Govt. Archives***

CA RGA LF..... Recovered Government Archive Solid Waste Facilities List

### **SURROUNDING SITES: SEARCH RESULTS**

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

## EXECUTIVE SUMMARY

### STANDARD ENVIRONMENTAL RECORDS

#### ***Federal RCRA CORRACTS facilities list***

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 12/12/2016 has revealed that there is 1 CORRACTS site within approximately 1 mile of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
<b>ECS REFINING, LLC</b>	<b>705 REED STREET</b>	<b>NE 1/2 - 1 (0.583 mi.)</b>	<b>S72</b>	<b>169</b>

#### ***Federal RCRA generators list***

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 12/12/2016 has revealed that there are 4 RCRA-SQG sites within approximately 0.25 miles of the target property.

#### ***State- and tribal - equivalent CERCLIS***

CA ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the CA ENVIROSTOR list, as provided by EDR, and dated 10/31/2016 has revealed that there

## EXECUTIVE SUMMARY

are 19 CA ENVIROSTOR sites within approximately 1 mile of the target property.

### State and tribal leaking storage tank lists

CA LUST: Leaking Underground Storage Tank (LUST) Sites included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the CA LUST list, as provided by EDR, has revealed that there are 33 CA LUST sites within approximately 0.5 miles of the target property.

## EXECUTIVE SUMMARY

CA SLIC: Cleanup Program Sites (CPS; also known as Site Cleanups [SC] and formerly known as Spills, Leaks, Investigations, and Cleanups [SLIC] sites) included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the CA SLIC list, as provided by EDR, has revealed that there are 6 CA SLIC sites within approximately 0.5 miles of the target property.

## EXECUTIVE SUMMARY

### **State and tribal voluntary cleanup sites**

CA VCP: Contains low threat level properties with either confirmed or unconfirmed releases and the project proponents have request that DTSC oversee investigation and/or cleanup activities and have agreed to provide coverage for DTSC's costs.

A review of the CA VCP list, as provided by EDR, and dated 10/31/2016 has revealed that there is 1 CA VCP site within approximately 0.5 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

### **State and tribal Brownfields sites**

CA BROWNFIELDS: A listing of sites the SWRCB considers to be Brownfields since these are sites have come to them through the MOA Process.

A review of the CA BROWNFIELDS list, as provided by EDR, and dated 01/03/2017 has revealed that there is 1 CA BROWNFIELDS site within approximately 0.5 miles of the target property.

### **ADDITIONAL ENVIRONMENTAL RECORDS**

#### **Local Lists of Registered Storage Tanks**

CA SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the CA SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there are 2 CA SWEEPS UST sites within approximately 0.25 miles of the target property.

## EXECUTIVE SUMMARY

CA HIST UST: Historical UST Registered Database.

A review of the CA HIST UST list, as provided by EDR, and dated 10/15/1990 has revealed that there are 4 CA HIST UST sites within approximately 0.25 miles of the target property.

### Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 12/12/2016 has revealed that there are 2 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

## EXECUTIVE SUMMARY

CA CUPA Listings: A listing of sites included in the county's Certified Unified Program Agency database. California's Secretary for Environmental Protection established the unified hazardous materials and hazardous waste regulatory program as required by chapter 6.11 of the California Health and Safety Code. The Unified Program consolidates the administration, permits, inspections, and enforcement activities.

A review of the CA CUPA Listings list, as provided by EDR, has revealed that there are 3 CA CUPA Listings sites within approximately 0.25 miles of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

## EXECUTIVE SUMMARY

### EDR HIGH RISK HISTORICAL RECORDS

#### ***EDR Exclusive Records***

EDR MGP: The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

A review of the EDR MGP list, as provided by EDR, has revealed that there is 1 EDR MGP site within approximately 1 mile of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
PG AND E GAS PLANT S	COR BENTON AND RAILR	ESE 1/4 - 1/2 (0.444 mi.)	65	144

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 9 EDR Hist Auto sites within approximately 0.125 miles of the target property.

**Environmental Interest/Information System**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

**Environmental Interest/Information System**

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

File Location: All Files are on GeoTracker or in the Local Agency Database  
Potential Media Affect: Other Groundwater (uses other than drinking water)  
Potential Contaminants of Concern: Gasoline  
Site History: Site improvements consist of an active auto body repair shop, a single-story residential building, and paved parking. The surrounding area is utilized for residential and commercial uses (Figure 1). This report documents our findings and was prepared for the exclusive use and sole reliance of the client On January 31, 1985, two 500-gallon and two 250-gallon gasoline underground storage tanks (USTs) were removed from the Site by JW Construction of San Jose, California. Subsurface soil was reportedly excavated to a depth of 20 feet, aerated, and placed back into the excavation during removal of the former USTs. Groundwater monitoring has been conducted at the Site since 1990. Based on historical analytical results, chemicals of concern (COCs) beneath the Site include total petroleum hydrocarbons as gasoline (TPH-g), benzene, toluene, ethylbenzene, and total xylene (BTEX), and methyl tert-butyl ether (MTBE). According to a review of

historical documentation, two 500-gallon and two 250-gallon gasoline underground storage tanks (USTs) were removed from the Site on January 31, 1985, by JW Construction of San Jose, California. During excavation activities soils beneath the USTs were screened with a combustible gas detector. Soil beneath one of the USTs contained concentrations greater than 15,000 parts per million (ppm) of petroleum hydrocarbons. The soil was excavated to a depth of 20 feet below ground surface (bgs) where concentrations greater than 15,000 ppm of petroleum hydrocarbons were encountered. A post excavation soil sample collected from the bottom of the excavation (20 feet) directly below one of the USTs contained 2,400 ppm petroleum hydrocarbons. No sample was collected from under the other three tanks. Based on fuel pump inspection stickers, it did not appear that fuel had been delivered to the site since the mid 1950s. Analytical results from subsequent site and remedial investigations confirmed the soil and groundwater in the vicinity of the USTs were impacted with petroleum hydrocarbons. In September 1990, three groundwater monitoring wells (MW-1, MW-2 and MW-3) were installed by On-Site Technologies, Inc. (OST) to assess the extent of petroleum hydrocarbons at the site. Petroleum hydrocarbons were detected in soil and groundwater at all three well locations. Light Non-Aqueous Phase Liquid (LNAPL) was measured to be 0.34 feet thick in monitoring well MW-2. On January 31 and February 1, 1991, two soil borings (SB-1 and SB-2) and two groundwater monitoring wells (MW-4 and MW-5) were completed to further define the lateral and vertical extent of impact to the soil and groundwater beneath the Site. In an attempt to complete the delineation of impacted soil and groundwater at the Site, OST installed two additional monitoring wells (MW-6 and MW-7) and advanced one additional soil boring (SB-3) between December 1991 and January 1992. According to the March 4, 1992 OST Remedial Investigation Report, soil and groundwater analytical results from this phase of the investigation indicated that impacts to soil and groundwater had been delineated. The soil analytical data indicated that the gasoline-impacted soil appeared to be limited to a radius of approximately 50 feet and 25 feet deep from the center of the source area. An extraction well, EW-1, was installed on October 27, 1992, and pump tests were subsequently performed to evaluate the aquifer characteristics. Results from the pump tests indicated that use of dual phase extraction (DPE) was a viable option for remedial measures. The treatment system selected utilized the three shallow soil vapor extraction wells (VE-1 through VE-3) and three groundwater extraction wells (EW-1, COEX-1, and COEX-2) which were installed in October 1995. The extracted vapor was treated using thermal oxidation before discharge to the atmosphere. The extracted groundwater was treated using granular activated carbon (GAC) filtration prior to discharge to the storm drain. The remediation system was installed and began operating at the Site full time in December 1996 until August 31, 2002. On August 31, 2002, the soil vapor extraction system was shut down (but groundwater extraction continued to operate) by ATC and the Santa Clara Valley Water District (SCVWD) as the hydrocarbon concentrations in the extracted soil vapor had decreased significantly and operation of the system was deemed ineffective. As a preliminary step towards the evaluation of the site for closure, the groundwater extraction and treatment was discontinued on May 22, 2003. Two groundwater sampling events were performed to evaluate rebound of contaminant concentrations. Laboratory analytical results from groundwater samples collected during these events indicated that

benzene concentrations in groundwater rebounded significantly in the extraction wells EW-1, COEX-1, and COEX-2. Due to the rebound of benzene in groundwater and a rise in groundwater elevations, the system was converted to a dual phase extraction system utilizing stingers and restarted on November 17, 2003. The system operated periodically until September 2005 when it was decommissioned and removed from the Site. Over the course of the active remediation phase, approximately 3 million gallons of groundwater with 440 pounds of petroleum hydrocarbons and over 150 million cubic feet of soil vapor with 4,500 pounds of hydrocarbons have been removed from subsurface. In an attempt to further evaluate the vertical and horizontal extent of petroleum impacted soil and groundwater, ATC installed four shallow groundwater monitoring wells adjacent to the existing deeper monitoring wells (MW-1 through MW-4) in November 2008. However, groundwater was not encountered in these boring, therefore wells were not installed. Analytical results from soil samples collected at these borings (ATC-1 through ATC-4) confirmed that past operation of vapor extraction wells (VE-1 through VE-3) had significantly reduced hydrocarbon concentrations in vadose zone soil. In November 2000, MW-7 was destroyed when the northern adjacent property was redeveloped into a city park. Prior to its destruction, low levels of petroleum constituents had been detected in groundwater samples collected from the well.

**FINDS:**

Registry ID: 110002911911

**Environmental Interest/Information System**

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

**Environmental Interest/Information System**

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Case Type: Cleanup Program Site  
Case Worker: Not reported  
Local Agency: Not reported  
RB Case Number: 007  
File Location: All Files are on GeoTracker or in the Local Agency Database  
Potential Media Affected: Other Groundwater (uses other than drinking water)  
Potential Contaminants of Concern: Waste Oil / Motor / Hydraulic / Lubricating  
Site History: Hydraulic lift for elevator leaked and hydraulic fluid was found on groundwater in April 2010. Some product recovery was conducted and some soil excavation was conducted. Replacement lift installed and hole closed. Soil and groundwater contamination limited to inside the building. Groundwater not impacted with volatile organics or PCBs.

**Handler Activities Summary:**

U.S. importer of hazardous waste: No  
Mixed waste (haz. and radioactive): No  
Recycler of hazardous waste: No  
Transporter of hazardous waste: No  
Treater, storer or disposer of HW: No  
Underground injection activity: No  
On-site burner exemption: No  
Furnace exemption: No  
Used oil fuel burner: No  
Used oil processor: No  
User oil refiner: No  
Used oil fuel marketer to burner: No  
Used oil Specification marketer: No  
Used oil transfer facility: No  
Used oil transporter: No

Violation Status: No violations found

**FINDS:**

Registry ID: 110002826461

**Environmental Interest/Information System**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

File Location: All Files are on GeoTracker or in the Local Agency Database  
Potential Media Affect: Other Groundwater (uses other than drinking water)  
Potential Contaminants of Concern: MTBE / TBA / Other Fuel Oxygenates, Gasoline  
Site History: 1985 In March, 3 underground storage tanks (USTs) were removed from the site. 4 soil samples (#1 through #4) were collected from 15.5 to 16 feet below the ground surface (ft bgs) and analyzed for Total Petroleum Hydrocarbons as Gasoline (TPHg). No samples were required below the 10,000-gallon UST. The maximum concentration of TPHg was 6,600 parts per million (ppm) in sample #2. In April, 3 additional soil samples (#1R through #3R) were collected from 18 to 18.5 ft bgs. The maximum concentration of TPHg was 2,500 ppm in sample #1R. In August, 1 monitoring well (MW1) was installed to a depth of 53.5 ft bgs within the UST excavation. 4 soil samples were collected and analyzed for Benzene, Toluene, Ethylbenzene and Xylenes, Chlorobenzene, 1,2-Dichlorobenzene, 1,3-Dichlorobenzene, and 1,4-Dichlorobenzene. Maximum concentrations were reported at 9.0 ppm Benzene, 40 ppm Toluene, and 100 ppm Xylenes and Ethylbenzene (quantified together). A groundwater sample from the well was reported to contain 61,000 parts per billion (ppb) TPHg. In November, 10-inches of free product was measured in a bailer lowered into well MW1. 1986 In January, 3 monitoring wells (MW2 through MW4) were installed on-site to approximately 55 ft bgs. Soil samples were not submitted for chemical analysis. Groundwater samples collected from these new wells were not reported to have detectable concentrations of TPHg, Benzene, Toluene, Ethylbenzene and Xylenes (BTEX) above the laboratory reporting limit of 1,000 ppb. Well MW1 was not sampled or gauged at this time. 1991 In February, MW1 was destroyed due to an obstruction at 12 ft bgs. It does not appear the well MW1 was sampled any other time than in 8/85. 2 monitoring wells (MW5 and MW6) were installed to approximately 51.5 ft bgs. 10 soil samples were collected and were analyzed for TPHg and BTEX. A maximum concentration of 390 ppm TPHg was reported for the sample collected from 25.5 ft bgs in MW5 and very low concentrations of BTEX were reported for the other samples. In July, 6 soil borings (SB1 through SB6) and 1 monitoring well (MW7) were advanced onsite to depths of 37 40.5 ft bgs and 50 ft bgs, respectively. 22 soil samples were collected and reported to have maximum concentrations of 3,200 ppm TPHg, 22 ppm Benzene, 210 ppm Toluene, 4,800 ppm Ethylbenzene, and 420 ppm Xylenes. The highest concentrations were reported for samples collected from boring B4, which was advanced within the tank

excavation. Grab groundwater samples were collected from borings B1, B2, B3 and B6 and were reported only to have low concentrations of TPHg. BTEX were not reported to be present above the laboratory reporting limits. In October, 1 groundwater extraction well (EX1) was installed to approximately 53 ft bgs. No soil samples were submitted for chemical analysis. 1992 In October, 3 nested vapor piezometers (VMW1 through VMW3), and 1 vapor extraction well (VEW1) were installed. 24 soil samples were collected from the VMW1 through VMW3 and reported to have a maximum concentration of 780 ppm TPHg, 3 ppm Benzene, 17 ppm Toluene, 17 ppm Ethylbenzene, and 83 ppm Xylenes. In November, a soil vapor extraction pilot test was conducted. Approximately 100 pounds of petroleum hydrocarbons were removed during this test. The radius of influence was estimated to be 40-45 ft. In December, a step-drawdown aquifer test was conducted. Drawdown was relatively small ranging from 0.06 to 0.14 ft. 1994 In September, wells MW2 and MW3 were destroyed. El Camino Real (Route 82) was widened and the wells were now located within the street. 1995 In June, 3 borings (B7 through B9) onsite and 2 hydropunch borings (HP1 and HP2) off-site were advanced to depths ranging between 24 and 48 ft bgs. 18 soil samples were collected and only 3 samples were reported to have low concentrations of TPHg and BTEX. Grab groundwater samples were collected from the hydropunch borings and were not reported to have concentrations of TPHg and BTEX above the laboratory reporting limits. In July, 2 monitoring wells (MW8 and MW9) were installed to approximately 35 ft bgs. Soil samples were not submitted for chemical analysis. These wells were incorporated into the groundwater monitoring program. It was noted in the report that groundwater at the site has risen approximately 20 feet since investigation began at the site. 1996 In July, 1 monitoring well (MW10) was installed to 32 ft bgs offsite and downgradient. No soil samples were reported to have been submitted for chemical analysis. 2001 In October, 3 temporary wells (GW1 through GW3) were installed to 20 ft bgs in order to collect grab groundwater samples. The grab groundwater sampling was conducted because groundwater has been rising since monitoring began at the site in 1990. Also samples were collected from the vapor wells. Sample GW3 was collected from within the UST excavation and was reported to have the highest concentrations of TPHg (27,000 ppb) for the grab groundwater samples. The maximum concentrations were reported for the sample collected from well VEX1, also located within the UST excavation, of 130,000 ppb TPHg, 5,800 ppb Benzene, 24,000 ppb Toluene, 4,300 ppb Ethylbenzene, and 15,000 ppb Xylenes. MtBE was reported at a maximum concentration of 580 ppb in well VMW2. 2002 In June, groundwater samples from MW9, MW7, and VEX1 were analyzed for bacterial populations and were shown to have depressed values across the site. In July, 9 borings were advanced in the area of the UST excavation and Oxygen Release Compound (ORC) was injected beginning between 30 and 35 ft bgs to the surface. Also at this time, well MW11 was installed to 28 ft bgs. Groundwater was sampled for 3 quarters following the ORC injection. The monitoring included analysis for bacterial populations, which showed an increase across the site of aerobic hydrocarbon degrading bacteria as well as total heterotrophic bacteria. 2004 In January, 16 borings were advanced in the area of the UST excavation and ORC was injected beginning between 35 and 40 ft bgs to the surface. 2007 In June, 24 borings were advanced in the area of the UST excavation and ORC Advanced was injected beginning at 30 ft bgs to the surface. In November, wells MW4, EX1, and VMW3 were

destroyed. Well MW4 had 45 feet of well screen and was obstructed at approximately 36 ft bgs. Well EX1 had not been sampled since 9/94 and the nested vapor piezometer VMW3 had not been sampled since 10/01. Well MW4 was replaced with well MW4R, which was advanced to a depth of 28 ft bgs. Groundwater was first encountered at 28 ft bgs. Groundwater at this site has risen approximately 20 feet since investigation began. Soil samples were not collected from this new well.

Environmental Interest/Information System

AIR EMISSIONS CLASSIFICATION UNKNOWN

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Potential Media Affect: Other Groundwater (uses other than drinking water)  
Potential Contaminants of Concern: Gasoline  
Site History: In January 1985, Mr. Russell Thornhill with Valley Rockery Inc. contacted the Santa Clara Fire Department regarding removal/decommissioning of the empty and unused 1,000-gallon gasoline UST located partially under the current building. A letter dated January 31, 1985 from the City of Santa Clara Fire Department signed by Richard Peterson, Deputy Fire Marshal and Bill Gianatasio, Fire Marshal, stated that waiver of U.F.C. Section 79.113(e) (Tank Removal) will be granted, provided compliance with Local Ordinance

#1490 is met. The letter also indicated that Valley Rockery had thirty days to submit a letter of intent and 90 days to complete the required work. In a letter dated February 11, 1985, Mr. Thornhill indicated that Valley Rockery would obtain the required soil samples. On April 26, 1985, one exploratory boring was advanced to a depth of 21.5 feet below ground surface (bgs) immediately north of the UST. One soil sample was collected from a depth of 15 feet bgs and submitted for analysis. The sample was analyzed for benzene, toluene, ethylbenzene and total xylenes (BTEX), and the other sample was analyzed for total hydrocarbons and reported concentrations of BTEX at 0.0312 milligrams per kilogram (mg/kg), 0.5992 mg/kg, 2.213 mg/kg, and 1.081 mg/kg, respectively. Groundwater was not encountered during the investigation. AEI performed a subsurface investigation at the subject property on August 25, 2006. Four (4) soil borings (SB-1, SB-2, SB-3, and SB-4) were advanced in the area of the UST, which was located under a landscaped area between the driveway and the building. Soil boring SB-1 encountered the north end of the UST at a depth of five (5) feet bgs. The locations of these soil borings are shown on Figure 2, Site Plan and Figure 3, Detailed Site Plan. The results of TPH-g analyses on soil samples collected from borings SB-2 through SB-4 ranged from 34 mg/kg (SB3-10) to 8,500 mg/kg (SB2-8.5). The results of TPH-d analyses ranged from 2.0 mg/kg (SB3-10) to 1,800 mg/kg (SB2-8.5). The results of TPH-mo analyses ranged from ND<5.0 mg/kg (SB3-10 and SB4-8) to ND<250 mg/kg (SB2-8.5). Analysis by Method 8021B found no detectable concentrations of methyl tertiary butyl ether (MTBE) at reporting limits of 0.50 mg/kg (SB3-10 and SB4-8) and elevated reporting limit of 50 mg/kg in boring SB2-8.5. Grab groundwater samples were collected from the borings and reported to have maximum concentrations of 240,000 ppb TPHg, 140,000 ppb TPHd, 22,000 ppb Benzene, 25,000 ppb Toluene, 5,000 ppb Ethylbenzene, 23,000 ppb xylenes, and 1,000 ppb MtBE (EPA Method No. 8021B). 12/06 additional 9 soil borings (SB5-SB13) were advanced onsite. TPH-g was reported at concentrations ranging from 23 mg/kg (SB-5-10) to 190 mg/kg (SB-7- 9.5). TPH-d was reported at concentrations ranging from 5.5 mg/kg (SB-5-10) to 57 mg/kg (SB-7-9.5). Analysis by Method 8021B found no detectable concentrations of MTBE at or above reporting limits ranging from 0.50 mg/kg (SB3-10 and SB4-8) to 50 mg/kg (SB2-8.5). The maximum concentrations of BTEX reported were 0.42 mg/kg (SB-10-10), 0.69 mg/kg (SB-7-9.5), 0.079 mg/kg (SB-10-10), and 0.12 mg/kg (SB-10-10), respectively. Light non-aqueous phase liquid (LNAPL) was seen in the groundwater grab samples from borings SB-7 and SB-10. LNAPL sheen was seen on the sampler in soil boring SB-5 at a depth of 12 feet bgs. 8/07 - 4 monitoring wells were installed and groundwater monitoring began.

Description:	Per NRC report: "A fire started in an outdoor cardboard storage box at an electronics and photographic waste recycling company, sending clouds of black smoke into the air. A shelter-in-place was issued for the surrounding area; the blaze was controlled by later afternoon. REMEDIAL ACTIONS: Santa Clara Fire Dept. responded, also firefighters from San Jose and Mountain View; blaze controlled by using up to 4, 000 gallons of water per minute; shelter-in-place issued using the "alertscc" system. ESTIMATED DURATION: "3 hour" ADDITIONAL INFORMATION: "EPA Reg 9 EOC learned of the release via news reports but has not received any reports from the NRC or Cal EMA on the incident".

CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Amount (Lbs): 235

Waste code: D002

Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Amount (Lbs): 10

Waste code: D008

Waste name: LEAD

Amount (Lbs): 2141

Waste code: D011

Waste name: SILVER

Amount (Lbs): 0

**Environmental Interest/Information System**

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

STATE MASTER

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and its Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Removal Action Workplan  
Completed Date: 05/10/2012  
Comments: 30-day public comment period ended on April 30, 2012. No comments received. DTSC approved the Removal Action Workplan without modifications.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Removal Action Completion Report  
Completed Date: 03/01/2013  
Comments: The Report documents the removal action, which consisted of excavating soil contaminated with arsenic and total petroleum hydrocarbons in the first two feet of soil, backfilling with clean imported fill, and confirmation soil sampling. Since residual soil contamination above levels that allow for unrestricted land use remains deeper than two feet below the ground surface, the remedy includes a Land Use Covenant restricting sensitive land uses on the site and requiring a soil management plan if soil deeper than two feet is disturbed.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: \*Correspondence - Received  
Completed Date: 10/07/2010  
Comments: The extension is being requested because delays in completing the building demolition and debris disposal continue to prevent access to soil sampling locations. Extension request was granted. New due date for the Supplemental Site Investigation Report is December 1, 2010.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Community Profile  
Completed Date: 12/29/2010  
Comments: Site Community Profile completed. The Community Profile describes the community and identifies community concerns regarding the investigation of environmental conditions of the Bradford Manufacturing, Reed and Grant Streets Site.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Fact Sheets  
Completed Date: 03/30/2012  
Comments: The fact sheet announces the Grant & Reed Streets Property Draft RAW public comment period from March 30, 2012 through April 30, 2012.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Remedial Investigation Workplan  
Completed Date: 03/09/2011  
Comments: Groundwater Investigation Workplan was prepared to fill in data gaps necessary to help define the extent of TPH contamination in the groundwater in the Northeastern portion of the Site.

Completed Document Type: \*Correspondence - Received  
Completed Date: 10/07/2010  
Comments: The extension is being requested because delays in completing the building demolition and debris disposal continue to prevent access to soil sampling locations. Extension request was granted. New due date for the Supplemental Site Investigation Report is December 1, 2010.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Community Profile  
Completed Date: 12/29/2010  
Comments: Site Community Profile completed. The Community Profile describes the community and identifies community concerns regarding the investigation of environmental conditions of the Bradford Manufacturing, Reed and Grant Streets Site.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Fact Sheets  
Completed Date: 03/30/2012  
Comments: The fact sheet announces the Grant & Reed Streets Property Draft RAW public comment period from March 30, 2012 through April 30, 2012.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Remedial Investigation Workplan  
Completed Date: 03/09/2011  
Comments: Groundwater Investigation Workplan was prepared to fill in data gaps necessary to help define the extent of TPH contamination in the groundwater in the Northeastern portion of the Site.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Fieldwork  
Completed Date: 12/14/2012  
Comments: Removal Action Workplan implementation completed.

Registry ID: 110002914721

**Environmental Interest/Information System**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Region: STATE  
**Facility Status:** **Open - Verification Monitoring**  
Status Date: 01/21/2009  
Global Id: SL18258679  
Lead Agency: SAN FRANCISCO BAY RWQCB (REGION 2)  
Lead Agency Case Number: 1825800  
Latitude: 37.3617495473265  
Longitude: -121.95300579071  
Case Type: Cleanup Program Site  
Case Worker: MS  
Local Agency: Not reported  
RB Case Number: 43S0076  
File Location: Regional Board  
Potential Media Affected: Other Groundwater (uses other than drinking water)  
Potential Contaminants of Concern: Other Chlorinated Hydrocarbons, Acetone, Other Solvent or Non-Petroleum Hydrocarbon, Toluene, Xylene  
Site History: Tape manufacturing has been ongoing at this site for over 20 years. The discharger has operated solvent storage, distribution, and recovery systems which include USTs used to store methyl ethyl ketone, xylenes, cyclohexanone, isopropanol, acetate, and diesel. Memorex ceased all manufacturing activities at the site on November 16, 1993. Current owner is renting the property to industrial tenants.

**AIR EMISSIONS CLASSIFICATION UNKNOWN**

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits

issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

STATE MASTER

HAZARDOUS WASTE BIENNIAL REPORTER

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.  
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Completed Date: 12/11/2015  
Comments: California Environmental Management, the consultant to the owner of Pyramid Circuits, submitted an "Environmental Assessment for Closure" report to DTSC to provide the basis for changing the site status to no further action. The report details the regulatory closure of the Pyramid Circuits facility under the oversight of the Santa Clara Fire Department (the Certified Unified Program Agency with jurisdiction), the cleanup and removal of minor copper contamination in soil, and the cyanide detections in soil and evaluation of the results. No releases at the site have been documented and hazardous materials usage occurred within a designated section of the building with containment. The cyanide detected in soil was at levels well below screening levels that are protective of human health.

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and its Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Completed Date: 05/04/1999  
Comments: The remedial actions consisted of debris removal, excavation and encapsulation of 5,560 cubic yards of lampblack and metal contaminated soil in two onsite consolidation areas, excavation and offsite disposal of approximately 5,720 cubic yards of hydrocarbon impacted soil, removal of a 400-gallon underground storage tank and other concrete debris, as well as proper closure and destruction of four previously unknown onsite abandoned water supply wells. A two-foot cap of clean material including the parking lot baserock layer asphalt concrete layer was then installed over the excavated and consolidated lampblack impacted soil. The impacted soils were consolidated under an asphalt parking area.

Completed Document Type: 5 Year Review Reports  
Completed Date: 03/23/2016  
Comments: ATC, on the behalf of the City of Santa Clara, performed a 5-year review of the capped consolidation cells. A site visit was conducted on December 14, 2015 to assess the City's compliance with the Land Use Covenant and the Operation and Maintenance Agreement requirements for the consolidation cells. The asphalt consolidation area cap appeared to be well- maintained and in good condition, and there appeared to be no significant drainage problem affecting the consolidation cells. Based on a technical assessment as part of the 5-year review, it was concluded that the site remedial actions remain protective of human health and the environment.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Operations and Maintenance Report  
Completed Date: 03/06/2012  
Comments: The City of Santa Clara submitted its Annual Summary Report as required by the Land Use Covenant and Operation and Maintenance Agreement. The cap was observed to be in good condition during a January 24, 2012 inspection.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Operations and Maintenance Report  
Completed Date: 02/19/2013  
Comments: The City of Santa Clara conducted an annual inspection and submitted the annual summary report as required by section 1.02 of the Land Use Covenant and section 2.4 of the Operation and Maintenance Agreement. About 20 feet of small cracks were observed in the asphalt of the parking lot over the cells where contaminated soil is contained. The cracks are small and will not let significant water penetrate the asphalt. The City Street Department plans to seal the cracks when the

Completed Sub Area Name: Not reported  
Completed Document Type: 5 Year Review Reports  
Completed Date: 03/23/2016  
Comments: ATC, on the behalf of the City of Santa Clara, performed a 5-year review of the capped consolidation cells. A site visit was conducted on December 14, 2015 to assess the City's compliance with the Land Use Covenant and the Operation and Maintenance Agreement requirements for the consolidation cells. The asphalt consolidation area cap appeared to be well- maintained and in good condition, and there appeared to be no significant drainage problem affecting the consolidation cells. Based on a technical assessment as part of the 5-year review, it was concluded that the site remedial actions remain protective of human health and the environment.

**SANTA CLARA POLICE STATION (Continued)**

**S102860957**

Comments: The City of Santa Clara submitted its Annual Summary Report as required by the Land Use Covenant and Operation and Maintenance Agreement. The cap was observed to be in good condition during a January 24, 2012 inspection.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Operations and Maintenance Report  
Completed Date: 02/19/2013  
Comments: The City of Santa Clara conducted an annual inspection and submitted the annual summary report as required by section 1.02 of the Land Use Covenant and section 2.4 of the Operation and Maintenance Agreement. About 20 feet of small cracks were observed in the asphalt of the parking lot over the cells where contaminated soil is contained. The cracks are small and will not let significant water penetrate the asphalt. The City Street Department plans to seal the cracks when the weather is drier and warmer.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Operations and Maintenance Report  
Completed Date: 03/11/2014  
Comments: The City of Santa Clara performed an annual inspection of the parking lot of the City police station where contaminated soil remains in place. During the inspection, the parking lot pavement that serves as a cap was observed to be in good condition with a approximately 20 lineal feet of minor visible cracks. No significant deterioration that would allow surface water to penetrate to cap was observed..

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Operations and Maintenance Report  
Completed Date: 02/05/2015  
Comments: The annual inspection was conducted as required by the Land Use Covenant and Operation and Maintenance Plan/Agreement. The cap was observed to be in good condition and showed no signs of significant deterioration that would allow surface water to penetrate through the cap.

Completed Document Type: Site Screening  
Completed Date: 04/08/1993  
Comments: The Lombardo site is approximately 2 acres in size and used for parking and storage of vehicles, heavy equipment and supplies by the company in its concrete cutting business. Lombardo has owned this property since April 1985. Historical information indicates that from the 1960's to the 1970's, metal coating company, a galvanizing facility operated onsite. Available information likewise indicates that metal coating may have discharged waste pickling and washing solution on-site, resulting to soil and ground- water contamination prior to Lombardo's purchase of the property in 1985. Sampling results in 1991 showed zinc in soil as high as 34,000 ppm; and 364 ppm in groundwater. The San Francisco Regional Water Quality Control

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

**Number of Days to Update:** Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

## STANDARD ENVIRONMENTAL RECORDS

### ***Federal NPL site list***

#### **NPL: National Priority List**

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 12/05/2016	Source: EPA
Date Data Arrived at EDR: 01/05/2017	Telephone: N/A
Date Made Active in Reports: 02/03/2017	Last EDR Contact: 03/02/2017
Number of Days to Update: 29	Next Scheduled EDR Contact: 04/17/2017
	Data Release Frequency: Quarterly

#### **Proposed NPL: Proposed National Priority List Sites**

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 12/05/2016	Source: EPA
Date Data Arrived at EDR: 01/05/2017	Telephone: N/A
Date Made Active in Reports: 02/03/2017	Last EDR Contact: 03/02/2017
Number of Days to Update: 29	Next Scheduled EDR Contact: 04/17/2017
	Data Release Frequency: Quarterly

#### **NPL LIENS: Federal Superfund Liens**

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991	Source: EPA
Date Data Arrived at EDR: 02/02/1994	Telephone: 202-564-4267
Date Made Active in Reports: 03/30/1994	Last EDR Contact: 08/15/2011
Number of Days to Update: 56	Next Scheduled EDR Contact: 11/28/2011
	Data Release Frequency: No Update Planned

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

### ***Federal Delisted NPL site list***

#### Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 12/05/2016	Source: EPA
Date Data Arrived at EDR: 01/05/2017	Telephone: N/A
Date Made Active in Reports: 02/03/2017	Last EDR Contact: 03/02/2017
Number of Days to Update: 29	Next Scheduled EDR Contact: 04/17/2017
	Data Release Frequency: Quarterly

### ***Federal CERCLIS list***

#### FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 09/14/2016	Source: Environmental Protection Agency
Date Data Arrived at EDR: 10/04/2016	Telephone: 703-603-8704
Date Made Active in Reports: 10/21/2016	Last EDR Contact: 01/05/2017
Number of Days to Update: 17	Next Scheduled EDR Contact: 04/17/2017
	Data Release Frequency: Varies

#### SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 10/10/2016	Source: EPA
Date Data Arrived at EDR: 10/20/2016	Telephone: 800-424-9346
Date Made Active in Reports: 01/06/2017	Last EDR Contact: 03/02/2017
Number of Days to Update: 78	Next Scheduled EDR Contact: 05/01/2017
	Data Release Frequency: Quarterly

### ***Federal CERCLIS NFRAP site list***

#### SEMS-ARCHIVE: Superfund Enterprise Management System Archive

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Date of Government Version: 10/10/2016	Source: EPA
Date Data Arrived at EDR: 10/20/2016	Telephone: 800-424-9346
Date Made Active in Reports: 01/06/2017	Last EDR Contact: 03/02/2017
Number of Days to Update: 78	Next Scheduled EDR Contact: 05/01/2017
	Data Release Frequency: Quarterly

### ***Federal RCRA CORRACTS facilities list***

CORRACTS: Corrective Action Report

CORRACTS identifies hazardous waste handlers with RCRA corrective action activity.

Date of Government Version: 12/12/2016	Source: EPA
Date Data Arrived at EDR: 12/28/2016	Telephone: 800-424-9346
Date Made Active in Reports: 02/10/2017	Last EDR Contact: 03/02/2017
Number of Days to Update: 44	Next Scheduled EDR Contact: 04/10/2017
	Data Release Frequency: Quarterly

### ***Federal RCRA non-CORRACTS TSD facilities list***

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 12/12/2016	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/28/2016	Telephone: (415) 495-8895
Date Made Active in Reports: 02/10/2017	Last EDR Contact: 03/02/2017
Number of Days to Update: 44	Next Scheduled EDR Contact: 04/10/2017
	Data Release Frequency: Quarterly

### ***Federal RCRA generators list***

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 12/12/2016	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/28/2016	Telephone: (415) 495-8895
Date Made Active in Reports: 02/10/2017	Last EDR Contact: 03/02/2017
Number of Days to Update: 44	Next Scheduled EDR Contact: 04/10/2017
	Data Release Frequency: Quarterly

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

### RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 12/12/2016	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/28/2016	Telephone: (415) 495-8895
Date Made Active in Reports: 02/10/2017	Last EDR Contact: 03/02/2017
Number of Days to Update: 44	Next Scheduled EDR Contact: 04/10/2017
	Data Release Frequency: Quarterly

### RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 12/12/2016	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/28/2016	Telephone: (415) 495-8895
Date Made Active in Reports: 02/10/2017	Last EDR Contact: 03/02/2017
Number of Days to Update: 44	Next Scheduled EDR Contact: 04/10/2017
	Data Release Frequency: Varies

### ***Federal institutional controls / engineering controls registries***

#### LUCIS: Land Use Control Information System

LUCIS contains records of land use control information pertaining to the former Navy Base Realignment and Closure properties.

Date of Government Version: 05/28/2015	Source: Department of the Navy
Date Data Arrived at EDR: 05/29/2015	Telephone: 843-820-7326
Date Made Active in Reports: 06/11/2015	Last EDR Contact: 02/13/2017
Number of Days to Update: 13	Next Scheduled EDR Contact: 05/29/2017
	Data Release Frequency: Varies

#### US ENG CONTROLS: Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 11/15/2016	Source: Environmental Protection Agency
Date Data Arrived at EDR: 11/29/2016	Telephone: 703-603-0695
Date Made Active in Reports: 02/03/2017	Last EDR Contact: 02/28/2017
Number of Days to Update: 66	Next Scheduled EDR Contact: 06/12/2017
	Data Release Frequency: Varies

#### US INST CONTROL: Sites with Institutional Controls

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## ***Federal ERNS list***

ERNS: Emergency Response Notification System

Emergency Response Notification System. ERNS records and stores information on reported releases of oil and hazardous substances.

Date of Government Version: 09/26/2016

Date Data Arrived at EDR: 09/29/2016

Date Made Active in Reports: 11/11/2016

Number of Days to Update: 43

Source: National Response Center, United States Coast Guard

Telephone: 202-267-2180

Last EDR Contact: 12/28/2016

Next Scheduled EDR Contact: 04/10/2017

Data Release Frequency: Annually

## ***State- and tribal - equivalent NPL***

RESPONSE: State Response Sites

Identifies confirmed release sites where DTSC is involved in remediation, either in a lead or oversight capacity.

These confirmed release sites are generally high-priority and high potential risk.

Date of Government Version: 10/31/2016

Date Data Arrived at EDR: 11/01/2016

Date Made Active in Reports: 01/18/2017

Number of Days to Update: 78

Source: Department of Toxic Substances Control

Telephone: 916-323-3400

Last EDR Contact: 01/31/2017

Next Scheduled EDR Contact: 05/08/2017

Data Release Frequency: Quarterly

## ***State- and tribal - equivalent CERCLIS***

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

Date of Government Version: 10/31/2016

Date Data Arrived at EDR: 11/01/2016

Date Made Active in Reports: 01/18/2017

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

### INDIAN UST R10: Underground Storage Tanks on Indian Land

The Indian Underground Storage Tank (UST) database provides information about underground storage tanks on Indian land in EPA Region 10 (Alaska, Idaho, Oregon, Washington, and Tribal Nations).

Date of Government Version: 01/07/2016	Source: EPA Region 10
Date Data Arrived at EDR: 01/08/2016	Telephone: 206-553-2857
Date Made Active in Reports: 02/18/2016	Last EDR Contact: 01/26/2017
Number of Days to Update: 41	Next Scheduled EDR Contact: 05/08/2017
	Data Release Frequency: Quarterly

### INDIAN UST R7: Underground Storage Tanks on Indian Land

The Indian Underground Storage Tank (UST) database provides information about underground storage tanks on Indian land in EPA Region 7 (Iowa, Kansas, Missouri, Nebraska, and 9 Tribal Nations).

Date of Government Version: 09/23/2014	Source: EPA Region 7
Date Data Arrived at EDR: 11/25/2014	Telephone: 913-551-7003
Date Made Active in Reports: 01/29/2015	Last EDR Contact: 01/26/2017
Number of Days to Update: 65	Next Scheduled EDR Contact: 05/08/2017
	Data Release Frequency: Varies

### INDIAN UST R9: Underground Storage Tanks on Indian Land

The Indian Underground Storage Tank (UST) database provides information about underground storage tanks on Indian land in EPA Region 9 (Arizona, California, Hawaii, Nevada, the Pacific Islands, and Tribal Nations).

Date of Government Version: 02/25/2016	Source: EPA Region 9
Date Data Arrived at EDR: 04/27/2016	Telephone: 415-972-3368
Date Made Active in Reports: 06/03/2016	Last EDR Contact: 01/26/2017
Number of Days to Update: 37	Next Scheduled EDR Contact: 05/08/2017
	Data Release Frequency: Quarterly

### INDIAN UST R8: Underground Storage Tanks on Indian Land

The Indian Underground Storage Tank (UST) database provides information about underground storage tanks on Indian land in EPA Region 8 (Colorado, Montana, North Dakota, South Dakota, Utah, Wyoming and 27 Tribal Nations).

Date of Government Version: 01/26/2016	Source: EPA Region 8
Date Data Arrived at EDR: 02/05/2016	Telephone: 303-312-6137
Date Made Active in Reports: 06/03/2016	Last EDR Contact: 01/26/2017
Number of Days to Update: 119	Next Scheduled EDR Contact: 05/08/2017
	Data Release Frequency: Quarterly

### ***State and tribal voluntary cleanup sites***

#### VCP: Voluntary Cleanup Program Properties

Contains low threat level properties with either confirmed or unconfirmed releases and the project proponents have request that DTSC oversee investigation and/or cleanup activities and have agreed to provide coverage for DTSC's costs.

Date of Government Version: 10/31/2016	Source: Department of Toxic Substances Control
Date Data Arrived at EDR: 11/01/2016	Telephone: 916-323-3400
Date Made Active in Reports: 01/18/2017	Last EDR Contact: 01/31/2017
Number of Days to Update: 78	Next Scheduled EDR Contact: 05/08/2017
	Data Release Frequency: Quarterly

#### INDIAN VCP R7: Voluntary Cleanup Priority Listing

A listing of voluntary cleanup priority sites located on Indian Land located in Region 7.

Date of Government Version: 03/20/2008	Source: EPA, Region 7
Date Data Arrived at EDR: 04/22/2008	Telephone: 913-551-7365
Date Made Active in Reports: 05/19/2008	Last EDR Contact: 04/20/2009
Number of Days to Update: 27	Next Scheduled EDR Contact: 07/20/2009
	Data Release Frequency: Varies

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## INDIAN VCP R1: Voluntary Cleanup Priority Listing

A listing of voluntary cleanup priority sites located on Indian Land located in Region 1.

Date of Government Version: 07/27/2015  
Date Data Arrived at EDR: 09/29/2015  
Date Made Active in Reports: 02/18/2016  
Number of Days to Update: 142

Data Release Frequency: Varies

## **ADDITIONAL ENVIRONMENTAL RECORDS**

### ***Local Brownfield lists***

#### US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

Date of Government Version: 12/19/2016

Data Release Frequency: Varies

### TOXIC PITS: Toxic Pits Cleanup Act Sites

Toxic PITS Cleanup Act Sites. TOXIC PITS identifies sites suspected of containing hazardous substances where cleanup has not yet been completed.

Date of Government Version: 07/01/1995  
Date Data Arrived at EDR: 08/30/1995  
Date Made Active in Reports: 09/26/1995  
Number of Days to Update: 27

Source: State Water Resources Control Board  
Telephone: 916-227-4364  
Last EDR Contact: 01/26/2009  
Next Scheduled EDR Contact: 04/27/2009  
Data Release Frequency: No Update Planned

### US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 09/30/2016  
Date Data Arrived at EDR: 12/05/2016  
Date Made Active in Reports: 02/10/2017  
Number of Days to Update: 67

Source: Drug Enforcement Administration

Number of Days to Update: 37	Next Scheduled EDR Contact: 05/08/2017
	Data Release Frequency: Varies

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

### DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Date of Government Version: 12/06/2016	Source: DTSC and SWRCB
Date Data Arrived at EDR: 12/06/2016	Telephone: 916-323-3400

Number of Days to Update: 45	Next Scheduled EDR Contact: 06/19/2017
	Data Release Frequency: Semi-Annually

### **Records of Emergency Release Reports**

#### HMIRS: Hazardous Materials Information Reporting System

Hazardous Materials Incident Report System. HMIRS contains hazardous material spill incidents reported to DOT.

Date of Government Version: 12/28/2016	Source: U.S. Department of Transportation
Date Data Arrived at EDR: 12/28/2016	Telephone: 202-366-4555
Date Made Active in Reports: 02/03/2017	Last EDR Contact: 12/28/2016
Number of Days to Update: 37	Next Scheduled EDR Contact: 04/10/2017
	Data Release Frequency: Annually

#### CHMIRS: California Hazardous Material Incident Report System

California Hazardous Material Incident Reporting System. CHMIRS contains information on reported hazardous material incidents (accidental releases or spills).

Date of Government Version: 09/26/2016	Source: Office of Emergency Services
Date Data Arrived at EDR: 10/26/2016	Telephone: 916-845-8400
Date Made Active in Reports: 01/17/2017	Last EDR Contact: 01/25/2017
Number of Days to Update: 83	Next Scheduled EDR Contact: 05/08/2017
	Data Release Frequency: Varies

#### LDS: Land Disposal Sites Listing

Land Disposal sites (Landfills) included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

Date of Government Version: 12/12/2016	Source: State Water Quality Control Board
Date Data Arrived at EDR: 12/14/2016	Telephone: 866-480-1028
Date Made Active in Reports: 01/20/2017	Last EDR Contact: 03/14/2017
Number of Days to Update: 37	Next Scheduled EDR Contact: 06/26/2017
	Data Release Frequency: Quarterly

#### MCS: Military Cleanup Sites Listing

Military sites (consisting of: Military UST sites; Military Privatized sites; and Military Cleanup sites [formerly known as DoD non UST]) included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

Date of Government Version: 12/12/2016	Source: State Water Resources Control Board
Date Data Arrived at EDR: 12/14/2016	Telephone: 866-480-1028
Date Made Active in Reports: 01/20/2017	Last EDR Contact: 03/14/2017
Number of Days to Update: 37	Next Scheduled EDR Contact: 06/26/2017
	Data Release Frequency: Quarterly

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

### SPILLS 90: SPILLS90 data from FirstSearch

Spills 90 includes those spill and release records available exclusively from FirstSearch databases. Typically, they may include chemical, oil and/or hazardous substance spills recorded after 1990. Duplicate records that are already included in EDR incident and release records are not included in Spills 90.

Date of Government Version: 06/06/2012

#### SCRD DRYCLEANERS: State Coalition for Remediation of Drycleaners Listing

The State Coalition for Remediation of Drycleaners was established in 1998, with support from the U.S. EPA Office of Superfund Remediation and Technology Innovation. It is comprised of representatives of states with established drycleaner remediation programs. Currently the member states are Alabama, Connecticut, Florida, Illinois, Kansas, Minnesota, Missouri, North Carolina, Oregon, South Carolina, Tennessee, Texas, and Wisconsin.

Data Release Frequency: Quarterly

### EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

Date of Government Version: 08/30/2013

Data Release Frequency: Quarterly

### 2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

Data Release Frequency: Annually

### RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

Data Release Frequency: Varies

### RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Date of Government Version: 04/17/1995

	Data Release Frequency: Quarterly

### HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/01/2007	Telephone: 202-564-2501
Date Made Active in Reports: 04/10/2007	Last EDR Contact: 12/17/2007
Number of Days to Update: 40	Next Scheduled EDR Contact: 03/17/2008
	Data Release Frequency: No Update Planned

### HIST FTTS INSP: FIFRA/TSCA Tracking System Inspection & Enforcement Case Listing

A complete inspection and enforcement case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Data Release Frequency: Varies

### UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

### US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

Data Release Frequency: Varies

### HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

Data Release Frequency: Varies

### WASTEWATER PITS: Oil Wastewater Pits Listing

Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water board's review found that more than one-third of the region's active disposal pits are operating without permission.

Data Release Frequency: Varies

### ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

### **EDR HIGH RISK HISTORICAL RECORDS**

#### ***EDR Exclusive Records***

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

### EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

### EDR Hist Auto: EDR Exclusive Historic Gas Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

### OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

### CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 07/30/2013  
Date Data Arrived at EDR: 08/19/2013

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

**Sensitive Receptors:** There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

**AHA Hospitals:**

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

**Medical Centers: Provider of Services Listing**

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

**Nursing Homes**

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

**Public Schools**

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

**Private Schools**

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on private school locations in the United States.

**Daycare Centers: Licensed Facilities**

Source: Department of Social Services

Telephone: 916-657-4041

**Flood Zone Data:** This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

**NWI: National Wetlands Inventory.** This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

Elevation:	77 ft. above sea level

### **USGS TOPOGRAPHIC MAP**

Target Property Map:	5640416 SAN JOSE WEST, CA
Version Date:	2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

### GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

### TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

### TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General North

### SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

### HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

### FEMA FLOOD ZONE

<u>Flood Plain Panel at Target Property</u>	<u>FEMA Source Type</u>
06085C0227H	FEMA FIRM Flood data
<u>Additional Panels in search area:</u>	<u>FEMA Source Type</u>
06085C0226H	FEMA FIRM Flood data
06085C0231H	FEMA FIRM Flood data
06085C0229H	FEMA FIRM Flood data

### NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u>	<u>NWI Electronic Data Coverage</u>
SAN JOSE WEST	YES - refer to the Overview Map and Detail Map

### HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

#### ***Site-Specific Hydrogeological Data\*:***

Search Radius:	1.25 miles
Location Relative to TP:	1/2 - 1 Mile NNE
Site Name:	Unisys
Site EPA ID Number:	CAD982400392
Groundwater Flow Direction:	NOT AVAILABLE.
Inferred Depth to Water:	15 feet.
Hydraulic Connection:	The surficial and lower aquifers are hydraulically connected.
Sole Source Aquifer:	No information about a sole source aquifer is available
Data Quality:	Information is inferred in the CERCLIS investigation report(s)

### AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
Not Reported		

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

### GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

### GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

#### ROCK STRATIGRAPHIC UNIT

Era:	Cenozoic
System:	Quaternary
Series:	Quaternary
Code:	Q (decoded above as Era, System & Series)

#### GEOLOGIC AGE IDENTIFICATION

Category: Stratified Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

### DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: BOTELLA

Soil Surface Texture: clay loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: MODERATE

Depth to Bedrock Min: > 60 inches

Depth to Bedrock Max: > 60 inches

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Permeability Rate (in/hr)	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	9 inches	clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 0.60 Min: 0.20	Max: 7.30 Min: 5.60
2	9 inches	41 inches	silty clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 0.60 Min: 0.20	Max: 7.80 Min: 5.60
3	41 inches	76 inches	sandy clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Clayey sand.	Max: 0.60 Min: 0.20	Max: 7.80 Min: 5.60

### OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: No Other Soil Types

Surficial Soil Types: No Other Soil Types

Shallow Soil Types: No Other Soil Types

Deeper Soil Types: No Other Soil Types

### LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

## **TOPOGRAPHIC INFORMATION**

### USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

### Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

## **HYDROLOGIC INFORMATION**

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

### State Wetlands Data: Wetland Inventory

Source: Department of Fish & Game

Telephone: 916-445-0411

## **HYDROGEOLOGIC INFORMATION**

### AQUIFLOW<sup>R</sup> Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

## **GEOLOGIC INFORMATION**

### Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

### STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

### SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

## LOCAL / REGIONAL WATER AGENCY RECORDS

### FEDERAL WATER WELLS

#### PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

#### PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

#### USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

### STATE RECORDS

#### Water Well Database

Source: Department of Water Resources

Telephone: 916-651-9648

#### California Drinking Water Quality Database

Source: Department of Public Health

Telephone: 916-324-2319

The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

## OTHER STATE DATABASE INFORMATION

#### California Oil and Gas Well Locations

Source: Department of Conservation

Telephone: 916-323-1779

Oil and Gas well locations in the state.

### RADON

#### State Database: CA Radon

Source: Department of Health Services

Telephone: 916-324-2208

Radon Database for California

#### Area Radon Information

Source: USGS

Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

#### EPA Radon Zones

Source: EPA

Telephone: 703-356-4020

Sections 307 & 309 of IRRA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

EDR Topographic Map Library has been searched by EDR and maps covering the target property location as provided by Cornerstone Earth Group were identified for the years listed below. EDR's Historical Topo Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDR's Historical Topo Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the late 1800s.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Cornerstone Earth Group were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting [www.edrnet.com/sanborn](http://www.edrnet.com/sanborn).

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

## EXECUTIVE SUMMARY

### DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1922 through 2014. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

### RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

## APPENDIX F – QUESTIONNAIRE

### General Environmental Questionnaire

Cornerstone Earth Group is performing a Phase I environmental site assessment (ESA). The purpose of the ESA is to evaluate current and historic uses of the property that may have involved the use, generation, or storage of hazardous materials. Please respond to these questions to the best of your knowledge.

**Return the completed, signed questionnaire by fax at (925) 988-9501 or by mail to the address below. Alternatively, a scanned copy can be emailed to [plangtry@cornerstoneearth.com](mailto:plangtry@cornerstoneearth.com).** The completed questionnaire will be attached to the ESA report. Thank you for your assistance and timely response.

### GENERAL PROPERTY INFORMATION

- 1) **Site Address(es) and Assessor's Parcel Number(s):** Please list all current and former addresses. Some sites have multiple addresses; all are needed, even if they are not in current use.

<u>Address(es)</u>	<u>APN Number(s)</u>
1483-1493 El Camino Real, Santa Clara, CA 95050	224-48-004
	224-48-005
	224-48-006

- 2) **Property Size:** see attached (Sq. Ft. or Acres [circle one])

- 3) **Current site owner(s) and purchase date:**

<u>Current Owner Name</u>	<u>Year Purchased</u>
Ivancovich Properties, LLC	no purchase, contributed by owners

- 4) **Previous site owner(s) and dates of ownership:**

<u>Prior Owner Name</u>	<u>Year Purchased</u>	<u>Year Sold</u>
Anthony Schillage, Successor Trustee of the Family Trust pursuant to the Schillage Living Trust		
<u>Vincent C. and Helen Sevely, Co-Trustees of the Sevely 1999 Family Trust</u>		
Linda L. Mancini, Trustee Linda Mancini 1998 Trust		
<del>Rita Ivancovich, Successor Trustee of the Survivor's Trust and Decedent's Trust pursuant to the</del>		
<del>Ivancovich 1999 Family Trust</del>		

\*\*\*Part acquired by gifts from 1988-1993; balance by inheritance in 1995

### STRUCTURES AND OCCUPANTS

- 5) **Please describe all on-site buildings:**

<u>Building Size (sq. ft)</u>	<u>Building Use</u>	<u>Date of Construction</u>
see attached		

Potable Water Source (e.g., city or other water agency, on-site well, etc.): no info

Sewage Disposal System (e.g., city sewer, septic tank, etc.): no info

Heating/Cooling System and Fuel Source (e.g., electric, natural gas, fuel oil, etc.): no info

**6) Current site use and years of occupancy:**

<u>Site Use</u>	<u>Years of Occupancy</u> (e.g., From 1995 to 2007)
2 tenants remain in occupancy:	
A1 Halal Market/Asim Pasha	6/20/2012
United Auto Group/Nabi Zolyad	11/1/2011

**7) Prior site owner(s), site use, and years of occupancy:**

<u>Owner</u>	<u>Site Use</u>	<u>Years of Occupancy</u> (e.g., From 1975 to 1983)
no info		

**8) Has fill been imported and placed on-site? If yes, from what source? Where was it placed? What is its estimated volume? What is the estimated thickness? When was it placed?**

no info

**9) Has the property been used for agricultural purposes? If yes, row crops or orchards and were agricultural chemicals used? What type of agricultural chemicals and dates used?**

no info

## OTHER SITE FEATURES AND INFORMATION

10) Please indicate if you are aware of any of the following structures, features, or activities currently or formerly at the site.

Structure/Feature	Yes	No	Do Not Know
Aboveground Storage Tanks (ASTs)			
Agricultural fields			
Agricultural or drinking water supply wells			
Air emission control systems			
Areas where garbage or other wastes have been disposed on-site			
Boilers			
Chemical mixing or processing activities			
Chemical storage areas			
Current or former drainage ditches, ponds, or streams			
Dry cleaning equipment			
Dry wells			
Elevators			
Emergency generators			
Equipment maintenance or repair areas			
Fill materials placed on-site (i.e., fill used to build up the site elevation to current level)			
Ground water monitoring wells			
Ground water or soil remediation systems			
Hydraulic lifts			
Incinerators			
Manufacturing machinery			
Medical Waste			
Oil or gas wells			
Petroleum pipelines			
Railroad lines			
Septic tanks			
Stockpiles of soil or debris			
Storage sheds			
Sumps, clarifiers, oil/water separators, or similar structures			
Transformers			
Underground Storage Tanks (USTs)	X		
Vapor or dust control hoods and ducting			
Waste burning areas (i.e. burn pit) or ash disposal area			

If you checked yes to any of the above, please provide additional information here or attach to this questionnaire.

see attached closure report

10) Please indicate if, to your knowledge, any of the following documents exist:

Document	Yes	No	Do Not Know
Phase I Environmental Site Assessments			
Phase II Soil, Ground Water or Soil Vapor Sampling and Analyses			
Environmental permits or violation notices			
Underground or above ground storage tank documents/permits			
Geotechnical reports or hydrogeologic studies	X		
Risk assessments			
Hazardous materials management plans or chemical inventories			
Safety/emergency response plans or spill prevention plans			
Compliance audits or community right-to-know plans			
Asbestos or lead based paint surveys			

If you checked yes to any of the above, please indicate the location of the documents.

Can copies be provided? Yes \_\_\_\_\_ No \_\_\_\_\_

see attached

11) Have significant quantities of hazardous materials been used, stored, or generated on-site?

Yes X No \_\_\_\_\_

If so, please list types and quantities and where these materials are or were located.

see attached tank closure report

12) Are you aware of commonly known or reasonably ascertainable information about the site that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example, do you know of past uses of the site, specific chemicals that were or are present at the site, have knowledge of spills or other chemical releases at the site, or any environmental cleanups at the site.

Yes X No \_\_\_\_\_

If so, please briefly describe below, including whether reports documenting the activities are available for review by Cornerstone Earth Group.

see attached

13) Are you aware of any environmental cleanup liens against the site that are filed or recorded under federal, tribal, state, or local law?

Yes \_\_\_\_\_ No X

- 13) Are you aware of any activity or use limitations (UALs), such as engineering controls, land use restrictions, or institutional controls that are in place at the site and/or have been filed or recorded in a registry under federal, tribal, state, or local law?

Yes \_\_\_\_\_ No   X  

If so, please briefly describe below.

---

---

- 14) Are you aware of 1) any pending, threatened or past litigation, or administrative proceedings relevant to hazardous substances or petroleum products at the site, or 2) any notices from any governmental entity regarding possible violations of environmental laws or possible liability related to hazardous substances or petroleum products?

Yes \_\_\_\_\_ No   X  

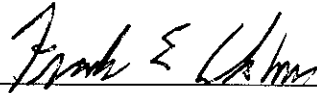

If so, please briefly describe below.

## **APPENDIX H – LABORATORY ANALYTICAL REPORTS**

Cornerstone Earth Group  
1259 Oakmead Parkway  
Sunnyvale, California 94035  
Tel: (408) 245-4600  
Fax: (408) 245-4620  
RE: 1433-1493 El Camino Real

Work Order No.: 1704032

Dear Randall Bleichner:

Torrent Laboratory, Inc. received 7 sample(s) on April 06, 2017 for the analyses presented in the following Report.

As requested on the Chain of Custody, two samples were placed on hold.

All data for associated QC met EPA or laboratory specification(s) except where noted in the case narrative.

Torrent Laboratory, Inc. is certified by the State of California, ELAP #1991. If you have any questions regarding these test results, please feel free to contact the Project Management Team at (408)263-5258; ext 204.

A handwritten signature in blue ink, appearing to read "Patti L. Sandroock", is written over a light blue horizontal line.

**Date:** 4/12/2017

---

**Client:** Cornerstone Earth Group

**Project:** 1433-1493 El Camino Real

**Work Order:** 1704032

### **CASE NARRATIVE**

---

No issues encountered with the receiving, preparation, analysis or reporting of the results associated with this work order.

Unless otherwise indicated in the following narrative, no results have been method and/or field blank corrected.

Reported results relate only to the items/samples tested by the laboratory.

This report shall not be reproduced, except in full, without the written approval of Torrent Analytical, Inc.

Note: for 8260B/GCMS-GRO: Final result & MDL/PQL (Detection Limit/Reporting limit) have been corrected for actual mass removed from the Encore/Terra Core container.

Analytical comments for METHOD\_PAHSIM\_S: Although the Method Blank associated with QC Batch ID 6076 had a reportable level of Fluoranthene, no batch associated samples had detectable levels of Fluoranthene. No corrective action is required.

A Preliminary report was issued on 4/11/17 without Thallium. This is the final report.

## Sample Result Summary

## Laboratory Qualifiers and Definitions

### DEFINITIONS:

<b>Accuracy/Bias (% Recovery)</b> - The closeness of agreement between an observed value and an accepted reference value.
<b>Blank (Method/Preparation Blank)</b> -MB/PB - An analyte-free matrix to which all reagents are added in the same volumes/proportions as used in sample processing. The method blank is used to document contamination resulting from the analytical process.
<b>Duplicate</b> - a field sample and/or laboratory QC sample prepared in duplicate following all of the same processes and procedures used on the original sample (sample duplicate, LCSD, MSD)
<b>Laboratory Control Sample (LCS ad LCSD)</b> - A known matrix spiked with compounds representative of the target analyte(s). This is used to document laboratory performance.
<b>Matrix</b> - the component or substrate that contains the analyte of interest (e.g., - groundwater, sediment, soil, waste water, etc)
<b>Matrix Spike (MS/MSD)</b> - Client sample spiked with identical concentrations of target analyte (s). The spiking occurs prior to the sample preparation and analysis. They are used to document the precision and bias of a method in a given sample matrix.
<b>Method Detection Limit (MDL)</b> - the minimum concentration of a substance that can be measured and reported with a 99% confidence that the analyte concentration is greater than zero
<b>Practical Quantitation Limit/Reporting Limit/Limit of Quantitation (PQL/RL/LOQ)</b> - a laboratory determined value at 2 to 5 times above the MDL that can be reproduced in a manner that results in a 99% confidence level that the result is both accurate and precise. PQLs/RLs/LODs reflect all preparation factors and/or dilution factors that have been applied to the sample during the preparation and/or analytical processes.
<b>Precision (%RPD)</b> - The agreement among a set of replicate/duplicate measurements without regard to known value of the replicates
<b>Surrogate (S) or (Surr)</b> - An organic compound which is similar to the target analyte(s) in chemical composition and behavior in the analytical process, but which is not normally found in environmental samples. Surrogates are used in most organic analysis to demonstrate matrix compatibility with the chosen method of analysis
<b>Tentatively Identified Compound (TIC)</b> - A compound not contained within the analytical calibration standards but present in the GCMS library of defined compounds. When the library is searched for an unknown compound, it can frequently give a tentative identification to the compound based on retention time and primary and secondary ion match. TICs are reported as estimates and are candidates for further investigation.
<b>Units:</b> the unit of measure used to express the reported result - <b>mg/L</b> and <b>mg/Kg</b> (equivalent to PPM - parts per million in <b>liquid</b> and <b>solid</b> ), <b>ug/L</b> and <b>ug/Kg</b> (equivalent to PPB - parts per billion in <b>liquid</b> and <b>solid</b> ), <b>ug/m3</b> , <b>mg/m3</b> , <b>ppbv</b> and <b>ppmv</b> (all units of measure for reporting concentrations in air), % (equivalent to 10000 ppm or 1,000,000 ppb), <b>ug/Wipe</b> (concentration found on the surface of a single Wipe usually taken over a 100cm <sup>2</sup> surface)

### LABORATORY QUALIFIERS:

**B** - Indicates when the analyte is found in the associated method or preparation blank  
**D** - Surrogate is not recoverable due to the necessary dilution of the sample  
**E** - Indicates the reportable value is outside of the calibration range of the instrument but within the linear range of the instrument (unless otherwise noted) Values reported with an E qualifier should be considered as estimated.  
**H**- Indicates that the recommended holding time for the analyte or compound has been exceeded  
**J**- Indicates a value between the method MDL and PQL and that the reported concentration should be considered as estimated rather the quantitative  
**NA** - Not Analyzed  
**N/A** - Not Applicable  
**ND** - Not Detected at a concentration greater than the PQL/RL or, if reported to the MDL, at greater than the MDL.  
**NR** - Not recoverable - a matrix spike concentration is not recoverable due to a concentration within the original sample that is greater than four times the spike concentration added  
**R**- The % RPD between a duplicate set of samples is outside of the absolute values established by laboratory control charts  
**S**- Spike recovery is outside of established method and/or laboratory control limits. Further explanation of the use of this qualifier should be included within a case narrative  
**X** -Used to indicate that a value based on pattern identification is within the pattern range but not typical of the pattern found in standards. Further explanation may or may not be provided within the sample footnote and/or the case narrative.

## Sample Receipt Checklist

Client Name: Cornerstone Earth Group

Project Name: 1433-1493 El Camino Real

Work Order No.: 1704032

Work Order No.: 1704033

Dear Randall Bleichner:

Torrent Laboratory, Inc. received 6 sample(s) on April 06, 2017 for the analyses presented in the following Report.

As requested on the Chain of Custody, three samples were placed on hold.

All data for associated QC met EPA or laboratory specification(s) except where noted in the case narrative.

Torrent Laboratory, Inc. is certified by the State of California, ELAP #1991. If you have any questions regarding these test results, please feel free to contact the Project Management Team at (408)263-5258; ext 204.

A handwritten signature in blue ink, appearing to read "Belinda Vega", with a checkmark at the end.

### **CASE NARRATIVE**

---

No issues encountered with the receiving, preparation, analysis or reporting of the results associated with this work order.

Unless otherwise indicated in the following narrative, no results have been method and/or field blank corrected.

Reported results relate only to the items/samples tested by the laboratory.

This report shall not be reproduced, except in full, without the written approval of Torrent Analytical, Inc.

## Laboratory Qualifiers and Definitions

### DEFINITIONS:

<b>Accuracy/Bias (% Recovery)</b> - The closeness of agreement between an observed value and an accepted reference value.
<b>Blank (Method/Preparation Blank)</b> -MB/PB - An analyte-free matrix to which all reagents are added in the same volumes/proportions as used in sample processing. The method blank is used to document contamination resulting from the analytical process.
<b>Duplicate</b> - a field sample and/or laboratory QC sample prepared in duplicate following all of the same processes and procedures used on the original sample (sample duplicate, LCSD, MSD)
<b>Laboratory Control Sample (LCS ad LCSD)</b> - A known matrix spiked with compounds representative of the target analyte(s). This is used to document laboratory performance.
<b>Matrix</b> - the component or substrate that contains the analyte of interest (e.g., - groundwater, sediment, soil, waste water, etc)
<b>Matrix Spike (MS/MSD)</b> - Client sample spiked with identical concentrations of target analyte (s). The spiking occurs prior to the sample preparation and analysis. They are used to document the precision and bias of a method in a given sample matrix.
<b>Method Detection Limit (MDL)</b> - the minimum concentration of a substance that can be measured and reported with a 99% confidence that the analyte concentration is greater than zero
<b>Practical Quantitation Limit/Reporting Limit/Limit of Quantitation (PQL/RL/LOQ)</b> - a laboratory determined value at 2 to 5 times above the MDL that can be reproduced in a manner that results in a 99% confidence level that the result is both accurate and precise. PQLs/RLs/LODs reflect all preparation factors and/or dilution factors that have been applied to the sample during the preparation and/or analytical processes.
<b>Precision (%RPD)</b> - The agreement among a set of replicate/duplicate measurements without regard to known value of the replicates
<b>Surrogate (S) or (Surr)</b> - An organic compound which is similar to the target analyte(s) in chemical composition and behavior in the analytical process, but which is not normally found in environmental samples. Surrogates are used in most organic analysis to demonstrate matrix compatibility with the chosen method of analysis
<b>Tentatively Identified Compound (TIC)</b> - A compound not contained within the analytical calibration standards but present in the GCMS library of defined compounds. When the library is searched for an unknown compound, it can frequently give a tentative identification to the compound based on retention time and primary and secondary ion match. TICs are reported as estimates and are candidates for further investigation.
<b>Units:</b> the unit of measure used to express the reported result - <b>mg/L</b> and <b>mg/Kg</b> (equivalent to PPM - parts per million in <b>liquid</b> and <b>solid</b> ), <b>ug/L</b> and <b>ug/Kg</b> (equivalent to PPB - parts per billion in <b>liquid</b> and <b>solid</b> ), <b>ug/m3</b> , <b>mg/m3</b> , <b>ppbv</b> and <b>ppmv</b> (all units of measure for reporting concentrations in air), % (equivalent to 10000 ppm or 1,000,000 ppb), <b>ug/Wipe</b> (concentration found on the surface of a single Wipe usually taken over a 100cm <sup>2</sup> surface)

### LABORATORY QUALIFIERS:

<b>B</b> - Indicates when the analyte is found in the associated method or preparation blank
<b>D</b> - Surrogate is not recoverable due to the necessary dilution of the sample
<b>E</b> - Indicates the reportable value is outside of the calibration range of the instrument but within the linear range of the instrument (unless otherwise noted) Values reported with an E qualifier should be considered as estimated.
<b>H</b> - Indicates that the recommended holding time for the analyte or compound has been exceeded
<b>J</b> - Indicates a value between the method MDL and PQL and that the reported concentration should be considered as estimated rather the quantitative
<b>NA</b> - Not Analyzed
<b>N/A</b> - Not Applicable
<b>ND</b> - Not Detected at a concentration greater than the PQL/RL or, if reported to the MDL, at greater than the MDL.
<b>NR</b> - Not recoverable - a matrix spike concentration is not recoverable due to a concentration within the original sample that is greater than four times the spike concentration added
<b>R</b> - The % RPD between a duplicate set of samples is outside of the absolute values established by laboratory control charts
<b>S</b> - Spike recovery is outside of established method and/or laboratory control limits. Further explanation of the use of this qualifier should be included within a case narrative
<b>X</b> -Used to indicate that a value based on pattern identification is within the pattern range but not typical of the pattern found in standards. Further explanation may or may not be provided within the sample footnote and/or the case narrative.

## Sample Receipt Checklist

Client Name: Cornerstone Earth Group

Project Name: 1433-1493-El Camino Real

Work Order No.: 1704033

Date and Time Received: 4/6/2017 2:43:00PM

Received By: Lorna Imbat

Physically Logged By: Lorna Imbat

Checklist Completed By:

Carrier Name: Client Drop Off

### Chain of Custody (COC) Information

Chain of custody present?	<u>Yes</u>
Chain of custody signed when relinquished and received?	<u>Yes</u>
Chain of custody agrees with sample labels?	<u>Yes</u>
Custody seals intact on sample bottles?	<u>Not Present</u>

### Sample Receipt Information

Custody seals intact on shipping container/cooler?	<u>Not Present</u>
Shipping Container/Cooler In Good Condition?	<u>Yes</u>
Samples in proper container/bottle?	<u>Yes</u>
Samples containers intact?	<u>Yes</u>
Sufficient sample volume for indicated test?	<u>Yes</u>

### Sample Preservation and Hold Time (HT) Information

All samples received within holding time?	<u>Yes</u>	
Container/Temp Blank temperature in compliance?	<u>Yes</u>	Temperature: 4.0 °C
Water-VOA vials have zero headspace?	<u>No VOA vials submitted</u>	
Water-pH acceptable upon receipt?	<u>N/A</u>	
pH Checked by: n/a	pH Adjusted by: n/a

RE: 1433-1493 El Camino Real

Work Order No.: 1704031

Dear Randall Bleichner:

Torrent Laboratory, Inc. received 3 sample(s) on April 06, 2017 for the analyses presented in the following Report.

All data for associated QC met EPA or laboratory specification(s) except where noted in the case narrative.

Torrent Laboratory, Inc. is certified by the State of California, ELAP #1991. If you have any questions regarding these test results, please feel free to contact the Project Management Team at (408)263-5258; ext 204.

A handwritten signature in blue ink, appearing to read "Belinda Vega", with a checkmark at the end.

---

Belinda Vega  
Vice President of Operations

April 11, 2017

**Client:** Cornerstone Earth Group

**Project:** 1433-1493 El Camino Real

**Work Order:** 1704031

### **CASE NARRATIVE**

---

No issues encountered with the receiving, preparation, analysis or reporting of the results associated with this work order.

Unless otherwise indicated in the following narrative, no results have been method and/or field blank corrected.

Reported results relate only to the items/samples tested by the laboratory.

This report shall not be reproduced, except in full, without the written approval of Torrent Analytical, Inc.

## Sample Result Summary

Report prepared for: Randall Bleichner  
Cornerstone Earth Group

Date Received: 04/06/17

Date Reported: 04/11/17

### EB-1 (W)

## Laboratory Qualifiers and Definitions

### DEFINITIONS:

<b>Accuracy/Bias (% Recovery)</b> - The closeness of agreement between an observed value and an accepted reference value.
<b>Blank (Method/Preparation Blank)</b> -MB/PB - An analyte-free matrix to which all reagents are added in the same volumes/proportions as used in sample processing. The method blank is used to document contamination resulting from the analytical process.
<b>Duplicate</b> - a field sample and/or laboratory QC sample prepared in duplicate following all of the same processes and procedures used on the original sample (sample duplicate, LCSD, MSD)
<b>Laboratory Control Sample (LCS ad LCSD)</b> - A known matrix spiked with compounds representative of the target analyte(s). This is used to document laboratory performance.
<b>Matrix</b> - the component or substrate that contains the analyte of interest (e.g., - groundwater, sediment, soil, waste water, etc)
<b>Matrix Spike (MS/MSD)</b> - Client sample spiked with identical concentrations of target analyte (s). The spiking occurs prior to the sample preparation and analysis. They are used to document the precision and bias of a method in a given sample matrix.
<b>Method Detection Limit (MDL)</b> - the minimum concentration of a substance that can be measured and reported with a 99% confidence that the analyte concentration is greater than zero
<b>Practical Quantitation Limit/Reporting Limit/Limit of Quantitation (PQL/RL/LOQ)</b> - a laboratory determined value at 2 to 5 times above the MDL that can be reproduced in a manner that results in a 99% confidence level that the result is both accurate and precise. PQLs/RLs/LODs reflect all preparation factors and/or dilution factors that have been applied to the sample during the preparation and/or analytical processes.
<b>Precision (%RPD)</b> - The agreement among a set of replicate/duplicate measurements without regard to known value of the replicates
<b>Surrogate (S) or (Surr)</b> - An organic compound which is similar to the target analyte(s) in chemical composition and behavior in the analytical process, but which is not normally found in environmental samples. Surrogates are used in most organic analysis to demonstrate matrix compatibility with the chosen method of analysis
<b>Tentatively Identified Compound (TIC)</b> - A compound not contained within the analytical calibration standards but present in the GCMS library of defined compounds. When the library is searched for an unknown compound, it can frequently give a tentative identification to the compound based on retention time and primary and secondary ion match. TICs are reported as estimates and are candidates for further investigation.
<b>Units:</b> the unit of measure used to express the reported result - <b>mg/L</b> and <b>mg/Kg</b> (equivalent to PPM - parts per million in <b>liquid</b> and <b>solid</b> ), <b>ug/L</b> and <b>ug/Kg</b> (equivalent to PPB - parts per billion in <b>liquid</b> and <b>solid</b> ), <b>ug/m3</b> , <b>mg/m3</b> , <b>ppbv</b> and <b>ppmv</b> (all units of measure for reporting concentrations in air), % (equivalent to 10000 ppm or 1,000,000 ppb), <b>ug/Wipe</b> (concentration found on the surface of a single Wipe usually taken over a 100cm <sup>2</sup> surface)

### LABORATORY QUALIFIERS:

<b>B</b> - Indicates when the analyte is found in the associated method or preparation blank
<b>D</b> - Surrogate is not recoverable due to the necessary dilution of the sample
<b>E</b> - Indicates the reportable value is outside of the calibration range of the instrument but within the linear range of the instrument (unless otherwise noted) Values reported with an E qualifier should be considered as estimated.
<b>H</b> - Indicates that the recommended holding time for the analyte or compound has been exceeded
<b>J</b> - Indicates a value between the method MDL and PQL and that the reported concentration should be considered as estimated rather the quantitative
<b>NA</b> - Not Analyzed
<b>N/A</b> - Not Applicable
<b>ND</b> - Not Detected at a concentration greater than the PQL/RL or, if reported to the MDL, at greater than the MDL.
<b>NR</b> - Not recoverable - a matrix spike concentration is not recoverable due to a concentration within the original sample that is greater than four times the spike concentration added
<b>R</b> - The % RPD between a duplicate set of samples is outside of the absolute values established by laboratory control charts
<b>S</b> - Spike recovery is outside of established method and/or laboratory control limits. Further explanation of the use of this qualifier should be included within a case narrative
<b>X</b> -Used to indicate that a value based on pattern identification is within the pattern range but not typical of the pattern found in standards. Further explanation may or may not be provided within the sample footnote and/or the case narrative.

## Sample Receipt Checklist

Client Name: Cornerstone Earth Group

Project Name: 1433-1493 El Camino Real

Work Order No.: 1704031

Date and Time Received: 4/6/2017 2:43:00PM

Received By: Lorna Imbat

Physically Logged By: Lorna Imbat

Checklist Completed By:

Carrier Name: Client Drop Off

### Chain of Custody (COC) Information

Chain of custody present?	<u>Yes</u>
Chain of custody signed when relinquished and received?	<u>Yes</u>
Chain of custody agrees with sample labels?	<u>Yes</u>
Custody seals intact on sample bottles?	<u>Not Present</u>

### Sample Receipt Information

Custody seals intact on shipping container/cooler?	<u>Not Present</u>
Shipping Container/Cooler In Good Condition?	<u>Yes</u>
Samples in proper container/bottle?	<u>Yes</u>
Samples containers intact?	<u>Yes</u>
Sufficient sample volume for indicated test?	<u>Yes</u>

### Sample Preservation and Hold Time (HT) Information

All samples received within holding time?	<u>Yes</u>	
Container/Temp Blank temperature in compliance?	<u>Yes</u>	Temperature: 4.0 °C
Water-VOA vials have zero headspace?	<u>Yes</u>	
Water-pH acceptable upon receipt?		
pH Checked by: Lorna Imbat	pH Adjusted by: Lorna Imbat

Workorder #: 1704205A

Dear Mr. Chris Heiny

The following report includes the data for the above referenced project for sample(s) received on 4/13/2017 at Air Toxics Ltd.

The data and associated QC analyzed by TO-15 are compliant with the project requirements or laboratory criteria with the exception of the deviations noted in the attached case narrative.

Thank you for choosing Eurofins Air Toxics Inc. for your air analysis needs. Eurofins Air Toxics Inc. is committed to providing accurate data of the highest quality. Please feel free to contact the Project Manager: Rachel Selenis at 916-985-1000 if you have any questions regarding the data in this report.

Regards,

Rachel Selenis  
Project Manager

**LABORATORY NARRATIVE**  
**EPA Method TO-15**  
**Cornerstone Earth Group**  
**Workorder# 1704205A**

Three 1 Liter Summa Canister samples were received on April 13, 2017. The laboratory performed analysis via EPA Method TO-15 using GC/MS in the full scan mode.

This workorder was independently validated prior to submittal using 'USEPA National Functional Guidelines' as generally applied to the analysis of volatile organic compounds in air. A rules-based, logic driven, independent validation engine was employed to assess completeness, evaluate pass/fail of relevant project quality control requirements and verification of all quantified amounts.

**Receiving Notes**

There were no receiving discrepancies.

**Analytical Notes**

A single point calibration for TPH referenced to Gasoline was performed for each daily analytical batch. Recovery is reported as 100% in the associated results for each CCV.

**Definition of Data Qualifying Flags**

Eight qualifiers may have been used on the data analysis sheets and indicates as follows:

B - Compound present in laboratory blank greater than reporting limit (background subtraction not performed).

J - Estimated value.

E - Exceeds instrument calibration range.

S - Saturated peak.

Q - Exceeds quality control limits.

U - Compound analyzed for but not detected above the reporting limit, LOD, or MDL value. See data page for project specific U-flag definition.

UJ- Non-detected compound associated with low bias in the CCV

N - The identification is based on presumptive evidence.

File extensions may have been used on the data analysis sheets and indicates as follows:

a-File was requantified

b-File was quantified by a second column and detector

r1-File was requantified for the purpose of reissue

## Summary of Detected Compounds

### EPA METHOD TO-15 GC/MS FULL SCAN

**Client Sample ID: EB-1**

Workorder #: 1704205B

Dear Mr. Chris Heiny

The following report includes the data for the above referenced project for sample(s) received on 4/13/2017 at Air Toxics Ltd.

The data and associated QC analyzed by Modified TO-15 (5&20 ppbv) are compliant with the project requirements or laboratory criteria with the exception of the deviations noted in the attached case narrative.

Thank you for choosing Eurofins Air Toxics Inc. for your air analysis needs. Eurofins Air Toxics Inc. is committed to providing accurate data of the highest quality. Please feel free to contact the Project Manager: Rachel Selenis at 916-985-1000 if you have any questions regarding the data in this report.

Regards,

Rachel Selenis  
Project Manager

**LABORATORY NARRATIVE**  
**EPA Method TO-15 Soil Gas**  
**Cornerstone Earth Group**  
**Workorder# 1704205B**

One PAC250 Canister sample was received on April 13, 2017. The laboratory performed analysis via EPA Method TO-15 using GC/MS in the full scan mode. The method involves concentrating up to 50 mLs of air. The concentrated aliquot is then flash vaporized and swept through a water management system to remove water vapor. Following dehumidification, the sample passes directly into the GC/MS for analysis.

This workorder was independently validated prior to submittal using 'USEPA National Functional Guidelines' as generally applied to the analysis of volatile organic compounds in air. A rules-based, logic driven, independent validation engine was employed to assess completeness, evaluate pass/fail of relevant project quality control requirements and verification of all quantified amounts.

**Receiving Notes**

There were no receiving discrepancies.

**Analytical Notes**

Dilution was performed on sample EB-3 (IPA) due to the presence of high level target species.

**Definition of Data Qualifying Flags**

Eight qualifiers may have been used on the data analysis sheets and indicates as follows:

B - Compound present in laboratory blank greater than reporting limit (background subtraction not performed).

J - Estimated value.

E - Exceeds instrument calibration range.

S - Saturated peak.

Q - Exceeds quality control limits.

U - Compound analyzed for but not detected above the reporting limit, LOD, or MDL value. See data page for project specific U-flag definition.

UJ- Non-detected compound associated with low bias in the CCV

N - The identification is based on presumptive evidence.

File extensions may have been used on the data analysis sheets and indicates as follows:

a-File was requantified

b-File was quantified by a second column and detector

r1-File was requantified for the purpose of reissue

Work Order No.: 1704189

Dear Peter Langtry:

Torrent Laboratory, Inc. received 10 sample(s) on April 27, 2017 for the analyses presented in the following Report.

All data for associated QC met EPA or laboratory specification(s) except where noted in the case narrative.

Torrent Laboratory, Inc. is certified by the State of California, ELAP #1991. If you have any questions regarding these test results, please feel free to contact the Project Management Team at (408)263-5258; ext 204.

## Laboratory Qualifiers and Definitions

### DEFINITIONS:

<b>Accuracy/Bias (% Recovery)</b> - The closeness of agreement between an observed value and an accepted reference value.
<b>Blank (Method/Preparation Blank)</b> -MB/PB - An analyte-free matrix to which all reagents are added in the same volumes/proportions as used in sample processing. The method blank is used to document contamination resulting from the analytical process.
<b>Duplicate</b> - a field sample and/or laboratory QC sample prepared in duplicate following all of the same processes and procedures used on the original sample (sample duplicate, LCSD, MSD)
<b>Laboratory Control Sample (LCS ad LCSD)</b> - A known matrix spiked with compounds representative of the target analyte(s). This is used to document laboratory performance.
<b>Matrix</b> - the component or substrate that contains the analyte of interest (e.g., - groundwater, sediment, soil, waste water, etc)
<b>Matrix Spike (MS/MSD)</b> - Client sample spiked with identical concentrations of target analyte (s). The spiking occurs prior to the sample preparation and analysis. They are used to document the precision and bias of a method in a given sample matrix.
<b>Method Detection Limit (MDL)</b> - the minimum concentration of a substance that can be measured and reported with a 99% confidence that the analyte concentration is greater than zero
<b>Practical Quantitation Limit/Reporting Limit/Limit of Quantitation (PQL/RL/LOQ)</b> - a laboratory determined value at 2 to 5 times above the MDL that can be reproduced in a manner that results in a 99% confidence level that the result is both accurate and precise. PQLs/RLs/LODs reflect all preparation factors and/or dilution factors that have been applied to the sample during the preparation and/or analytical processes.
<b>Precision (%RPD)</b> - The agreement among a set of replicate/duplicate measurements without regard to known value of the replicates
<b>Surrogate (S) or (Surr)</b> - An organic compound which is similar to the target analyte(s) in chemical composition and behavior in the analytical process, but which is not normally found in environmental samples. Surrogates are used in most organic analysis to demonstrate matrix compatibility with the chosen method of analysis
<b>Tentatively Identified Compound (TIC)</b> - A compound not contained within the analytical calibration standards but present in the GCMS library of defined compounds. When the library is searched for an unknown compound, it can frequently give a tentative identification to the compound based on retention time and primary and secondary ion match. TICs are reported as estimates and are candidates for further investigation.
<b>Units:</b> the unit of measure used to express the reported result - <b>mg/L</b> and <b>mg/Kg</b> (equivalent to PPM - parts per million in <b>liquid</b> and <b>solid</b> ), <b>ug/L</b> and <b>ug/Kg</b> (equivalent to PPB - parts per billion in <b>liquid</b> and <b>solid</b> ), <b>ug/m3</b> , <b>mg/m3</b> , <b>ppbv</b> and <b>ppmv</b> (all units of measure for reporting concentrations in air), % (equivalent to 10000 ppm or 1,000,000 ppb), <b>ug/Wipe</b> (concentration found on the surface of a single Wipe usually taken over a 100cm <sup>2</sup> surface)

### LABORATORY QUALIFIERS:

<p><b>B</b> - Indicates when the analyte is found in the associated method or preparation blank</p> <p><b>D</b> - Surrogate is not recoverable due to the necessary dilution of the sample</p> <p><b>E</b> - Indicates the reportable value is outside of the calibration range of the instrument but within the linear range of the instrument (unless otherwise noted) Values reported with an E qualifier should be considered as estimated.</p> <p><b>H</b>- Indicates that the recommended holding time for the analyte or compound has been exceeded</p> <p><b>J</b>- Indicates a value between the method MDL and PQL and that the reported concentration should be considered as estimated rather the quantitative</p> <p><b>NA</b> - Not Analyzed</p> <p><b>N/A</b> - Not Applicable</p> <p><b>ND</b> - Not Detected at a concentration greater than the PQL/RL or, if reported to the MDL, at greater than the MDL.</p> <p><b>NR</b> - Not recoverable - a matrix spike concentration is not recoverable due to a concentration within the original sample that is greater than four times the spike concentration added</p> <p><b>R</b>- The % RPD between a duplicate set of samples is outside of the absolute values established by laboratory control charts</p> <p><b>S</b>- Spike recovery is outside of established method and/or laboratory control limits. Further explanation of the use of this qualifier should be included within a case narrative</p> <p><b>X</b> -Used to indicate that a value based on pattern identification is within the pattern range but not typical of the pattern found in standards. Further explanation may or may not be provided within the sample footnote and/or the case narrative.</p>
---

## Sample Receipt Checklist

Client Name: Cornerstone(Walnut Creek)

Date and Time Received: 4/27/2017 5:10:00PM

Project Name: 1433-1493 El Camino Real

Received By: ng

Work Order No.: 1704189

Physically Logged By: Lorna Imbat

Checklist Completed By:

Carrier Name: First Courier

### Chain of Custody (COC) Information

Chain of custody present?	<u>Yes</u>
Chain of custody signed when relinquished and received?	<u>Yes</u>
Chain of custody agrees with sample labels?	<u>Yes</u>
Custody seals intact on sample bottles?	<u>Not Present</u>

### Sample Receipt Information

Custody seals intact on shipping container/cooler?	<u>Not Present</u>
Shipping Container/Cooler In Good Condition?	<u>Yes</u>
Samples in proper container/bottle?	<u>Yes</u>
Samples containers intact?	<u>Yes</u>
Sufficient sample volume for indicated test?	<u>Yes</u>

### Sample Preservation and Hold Time (HT) Information

All samples received within holding time?	<u>Yes</u>	
Container/Temp Blank temperature in compliance?	<u>Yes</u>	Temperature: 7.0 °C
Water-VOA vials have zero headspace?		
Water-pH acceptable upon receipt?		
pH Checked by: Lorna Imbat	pH Adjusted by: Lorna Imbat	

### Comments:

6 to 7 samples in Amber bottles received with Bi-phasic matrix.
