

# Summary Form for Electronic Document Submittal

Form F

Lead agencies may include 15 hardcopies of this document when submitting electronic copies of Environmental Impact Reports, Negative Declarations, Mitigated Negative Declarations, or Notices of Preparation to the State Clearinghouse (SCH). The SCH also accepts other summaries, such as EIR Executive Summaries prepared pursuant to CEQA Guidelines Section 15123. Please include one copy of the Notice of Completion Form (NOC) with your submission and attach the summary to each electronic copy of the document.

Project Title: CPUC SDG&E San Marcos to Escondido Tie Line (TL) 6975 69kV Project **2019049009**

Lead Agency: California Public Utilities Commission

Contact Name: Joyce Steingass

Email: Joyce.Steingass@cpuc.ca.gov

Phone Number: 415-703-1810

Project Location: San Marcos, Vista, Carlsbad, and Escondido  
City

San Diego County  
County

Project Description (Proposed actions, location, and/or consequences).

The proposed Project is located in the cities of San Marcos, Vista, Carlsbad, Escondido, and unincorporated areas in northern San Diego County, California. It would originate at the San Marcos Substation on the west and terminate at the Escondido Substation on the east and would be located within SDG&E right-of-way (ROW). To fully accommodate the proposed Project, 1.2 acres of additional ROW would be acquired in San Marcos. The proposed Project would include a combination of approximately 12 miles of new overhead single-circuit electric power line structures, rebuild of existing structures from single circuit to double circuit, and the reconductoring and re-energizing of existing conductors.

Identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.

The proposed Project's potentially significant effects include those associated with biological resources, cultural resources, geology, soils, seismicity and paleontological resources, hazards and hazardous materials, hydrology, and water quality, noise, public services, recreation, transportation, tribal cultural resources, utilities, and wildfire. All of these impacts would be reduced to less than significant levels by implementation of Applicant Proposed Measures and additional mitigation measures as presented in the IS/MND.

If applicable, describe any of the project's areas of controversy known to the Lead Agency, including issues raised by agencies and the public.

One possible area of controversy known to the Lead Agency is the rise of wildfire and its effects on surrounding communities with limited access roads during an emergency.

Provide a list of the responsible or trustee agencies for the project.

California Department of Fish and Wildlife  
State Water Resources Control Board  
California Department of Transportation
