Franklin Canyon Recycling Facility

County File #LP17-2002

Notice of Completion Cont'd

Project Location (cont'd)

Within 2 Miles

Railroads: Southern Pacific Railroad & Atchison, Topeka and Santa Fe Railway

Project Description (cont'd)

When there is additional capacity available, the facility would accept material from other licensed commercial haulers, but the facility would not be open to the general public or self-haulers. The incoming materials would arrive to the site presorted. Incoming soil would only be accepted with a soil analysis report to assure it has no contamination. Incidental organic material in the soil would be removed and hauled to another facility that is permitted to recycle or dispose of organic material. The rock, asphalt and concrete would be processed and resold as aggregate material, and the soil would be stored on-site and sold without processing.

Site improvements include the construction of six separate concrete pad areas for equipment operation and storage, the storage of incoming and processed materials, and access and parking area improvements, totaling approximately 56,000 square feet. Additionally, there would be minor grading required for the preparation of the pad areas and the installation of drainage and stormwater control facilities. The proposed facility would employ four full-time employees and one manager, and the equipment proposed to be used by the facility includes a diesel-powered grinder for the grinding of incoming material and a front loader for the movement of material around the facility.

The applicant has submitted a preliminary Storm Water Control Plan that includes large bioretention areas within a proposed four-foot-wide drainage swale, which would intercept storm water collected in the storm drains or surface areas, remove pollutants from storm water, and allow for percolation into the ground or into existing CalTrans drainage facilities. This project is subject to California Code of Regulations Title 14 – Natural Resources, and Title 14, Division 7 – Department of Resources Recycling and Recovery. As an inert debris processing facility, an Enforcement Agency Notification is required. Contra Costa Environmental Health will act as the Local Enforcement Agency (LEA) for CalRecycle.
