Project Description: (please use a separate page if necessary)

The District is pursuing development of the surface water delivery system in phases. The first phase is to develop an open channel, gravity conveyance system beginning from the end of the existing West Main Canal and terminating in one of the basin alternatives. The facility will primarily run along the Avenue 116 alignment starting at Road 116 and end between Road 84 and Road 76, with two basin alternatives. Alternative one is the Road 84 basin, and alternative two is the Road 76 basin. Additionally, as a second phase, the District is pursuing options to retrofit the Deer Creek Check Structure with an automated gate system for better managing Friant water flows in Deer Creek for beneficial use within the District. Both Project sites are located in Tulare County, CA, just west of Highway 99.
