Project Applicant: Jason Rios, TA Ma	anufacturing				
Approval Action Under Consideration	on by DTSC:	١.			
 □ Removal Action Workplan □ Corrective Measure Study/Statement of Basis □ Remedial Action Plan ☑ Emergency Permit 		☐ Initial Permit Issuance ☐ Permit Modification ☐ Regulations ☐ Other (specify):		☐ Permit Re-Issuance ☐ Closure Plan ☐ Interim Removal	
Statutory Authority:	•				
☐ California H&SC, Chap. 6.5 ☐ Ca		Chan 60 🖂 Oth	/		

Project Description:

The California Department of Toxic Substances Control (DTSC), pursuant to authority granted under California Code of Regulations, Title 22, Division 4.5, Chapter 20, Section 66270.61, has issued an Emergency Permit to TA Manufacturing (EPA ID: CAR000039230) to treat hazardous waste through a controlled reaction with a chemical solution. Specifically, three 50-gram containers of Benzoyl Peroxide, must be stabilized prior to transport to a permitted treatment, storage, and disposal facility.

The hazardous waste items are expired and currently being stored at TA Manufacturing located at 28065 Franklin Parkway in Valencia, California. DTSC has determined as a safety precaution to prevent an accident or severe injury, an Emergency Permit should be issued to chemically stabilize the hazardous waste prior to storage and eventual transportation off-site by Clean Harbors Environmental Services (CHES).

Background:

Benzoyl Peroxide is a strong oxidizer which can react violently with combustible materials in addition to friction, sudden shocks, and temperature changes. Benzoyl Peroxide becomes increasingly unstable as it degrades (i.e. after the product's expiration date). Static electricity or heating from sunlight may be enough to trigger a reaction, making transport of non-stabilized Benzoyl Peroxide hazardous. Additionally, poisonous gases are produced in fires involving Benzoyl Peroxide. Chemical stabilization is recommended prior to transport to a permitted treatment, storage, and disposal facility.

Project Activities:

The treatment of the hazardous waste involves the addition of solution to the containers in a controlled manner to reduce the reactive or ignitable characteristics of the chemical. Treatment will take place within a designated exclusion zone. Only technicians from CHES will be allowed in the exclusion zone. Movement, preparation, and treatment of the items will be in accordance with established standards.

Within 10 business days of the expiration of this permit, TA Manufacturing will submit a final report, signed in accordance with Title 22, California Code of Regulations section 66270.11(d). The report shall include certification that the treatment area has been cleared of all residual hazardous waste generated from this emergency treatment and all generated waste has been properly managed.

The Emergency Permit is effective beginning July 5, 2019 and shall expire on September 2, 2019.

Name of Public Agency Approving Project: Department of Toxic Substances Control

Name of Person or Agency Carrying Out Project: Clean Harbors Environmental Services on behalf of TA Manufacturing

April 2010	

State of California - California Environmental Protection Ag	Department of Toxic Substances Control					
 ☑ Emergency Project [PRC, Sec. 21080(b)(4); ☑ Categorical Exemption: [CCR Title 14, Sec. ☑ Statutory Exemptions: [State Code Section No. 100] ☑ Common Sense Exemption [CCR, Sec. 1506] 	019068132					
Exemption Title: Specific actions necessary to prevent or mitigate an emergency.						
Reasons Why Project is Exempt: This action is necessary to prevent an emergency. Chemical stabilization of the Benzoyl Peroxide is necessary prior to transportation to a permitted treatment, storage, and disposal facility to prevent accidental fire and/or explosion during transport.						
The administrative record for this project is available.	The administrative record for this project is available for inspection at:
