

Summary Form for Electronic Document Submittal

Form F

Lead agencies may include 15 hardcopies of this document when submitting electronic copies of Environmental Impact Reports, Negative Declarations, Mitigated Negative Declarations, or Notices of Preparation to the State Clearinghouse (SCH). The SCH also accepts other summaries, such as EIR Executive Summaries prepared pursuant to CEQA Guidelines Section 15123. Please include one copy of the Notice of Completion Form (NOC) with your submission and attach the summary to each electronic copy of the document.

Project Title: Charles F. Kettering Elementary School Fencing Plan

Lead Agency: Long Beach Unified School District

Contact Name: Jacquelyn Roberts, Project Manager

Email: JRRoberts@lbschools.net Phone Number: (562) 997-7550

Project Location: Long Beach Los Angeles
City *County*

Project Description (Proposed actions, location, and/or consequences).

The proposed would be installed at Charles F. Kettering Elementary School campus. The approximately 10.32-acre school is at 550 Silvera Avenue, in the southeast portion of the city of Long Beach in Los Angeles County, California. The entire campus is surrounded by either wrought iron or chain link fencing except for three entry points along the west and south side. The Long Beach Unified School District is proposing to install three sections of fencing and the replace one section, to fully secure the Kettering ES campus. The goal of the project is to increase student and staff safety and security while on campus, and to protect school facilities. With the exception of these changes all remaining fencing would remain in its current condition.

When classes start all gates would be locked and the front administration building door would be closed. All school visitors would be required to ring the buzzer at the front administration building door, and then wait for school staff to grant entry. At the end of the school day the gates and the administration building door would be opened so students can exit the campus. The school campus would be secured and locked-down by the night custodial staff no later than 6:30 PM. On holidays and weekends the school campus would be secured with all gates and doors locked.

Identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.

The Initial Study for the proposed project substantiates that implementation of the proposed project would not result in any significant impacts or require the implementation of mitigation measures. The Initial Study supports adoption of a Negative Declaration.
