Attn: Alyssa Bell, Ph.D., Senior Paleontologist

re: Paleontological resources for the proposed Walnut Specific Plan Project, Rincon Project # 14-01063, in the City of Walnut, Los Angeles County, project area

Dear Alyssa:

I have conducted a thorough search of our paleontology collection records for the locality and specimen data for the proposed Walnut Specific Plan Project, Rincon Project # 14-01063, in the City of Walnut, Los Angeles County, project area as outlined on the portion of the San Dimas USGS topographic quadrangle map that you sent to me via e-mail on 10 August 2017. We do not have any vertebrate fossil localities that lie directly within the proposed project area boundaries, but we do have fossil localities nearby from the same deposits that occur in the proposed project area.

In the lower lying terrain in the southwestern portion and the eastern margin of the proposed project area the surface deposits consist of younger Quaternary Alluvium. These deposits typically do not contain significant vertebrate fossils, at least in the uppermost layers, but they may be underlain by older sedimentary deposits that do contain significant fossil vertebrate remains. Our closest vertebrate fossil locality from similar older Quaternary deposits is LACM 8014, just south of east of the proposed project area in the northeastern Chino Hills just southwest of the intersection of the Riverside Freeway (Highway 60) & the Corona Freeway (Highway 71), that produced a fossil specimen of bison, *Bison*.

In the more elevated terrain in almost all of the proposed project area though there are exposures of the marine late Miocene Puente Formation, also sometimes considered to be part of the Monterey Formation in this area. Our closest vertebrate fossil locality from the Puente Formation is LACM 7153, just east of north of the proposed project area south of Temple Avenue and west of Valley Boulevard, that produced many specimens of fossil pipefish including the holotype (name bearing specimen of a species new to science) of the pipefish *Syngnathus emeritus*, published by R. A. Fritzsche in 1980 (Revision of the eastern Pacific Syngnathidae (Pisces: Syngnathiformes), including both Recent and fossil forms. Proceedings of the California Academy of Sciences, 42(6):181-227). Our next closest fossil vertebrate locality from the Puente Formation is LACM 7190, southeast of the proposed project area south and west of the intersection of the Pomona Freeway (Highway 60) and the Orange Freeway (Highway 57), that produced a fauna of fossil fish including deep sea smelts, Bathylagidae, lantern fish, Myctophidae, jacks, Carangidae, and herrings, *Ganolytes* and *Etringus*. In the San Jose Hills northwest of the proposed project area, near Mount San Antonio Junior College, our Puente Formation locality LACM 6171 produced a fossil fish specimen of herring, *Ganolytes*.

Shallow excavations in the younger Quaternary Alluvium exposed in the lower lying portions of the proposed project area probably will not uncover significant vertebrate fossil remains. Deeper excavations there that extend down into older deposits, however, as well as any excavations in the Puente Formation exposures in the elevated terrain in almost all of the proposed project area, however, may well encounter significant fossil vertebrate specimens. Any substantial excavations in the proposed project area, therefore, should be monitored closely to quickly and professionally recover any fossil remains discovered while not impeding development. Sediment samples should also be collected and processed to determine the small fossil potential in the proposed project area. Any fossils recovered during mitigation should be deposited in an accredited and permanent scientific institution for the benefit of current and future generations.

This records search covers only the vertebrate paleontology records of the Natural History Museum of Los Angeles County. It is not intended to be a thorough paleontological survey of the proposed project area covering other institutional records, a literature survey, or any potential on-site survey.

Sincerely,

Samuel A. McLeod, Ph.D.

Subject: Sacred Lands File Search and Native American Contact List for the Walnut Ridge Specific Plan Project, City of Walnut, Los Angeles County, California

Dear NAHC:

Rincon Consultants, Inc. (Rincon) has been retained to conduct a cultural resources study for the Walnut Ridge Specific Plan Project (project). Rincon understands the project to involve commercial, retail, and low and high density residential development on a 49-acre project site in the City of Walnut.

As part of this effort, Rincon will contact any Native American tribal organizations or individuals who may have knowledge of cultural resources existing within the project area. The project boundary is depicted on Township 1S, 9W, Sections 32, 33 and 34, and Township 2S, 9W, Sections 3, 4 and 5 of the U.S. Geological Survey *San Dimas, CA* 7.5-minute topographic quadrangles. The Records Search Map (attached) includes a 0.5-mile buffer.

Thank you for your assistance with Rincon's efforts to address any possible Native American concerns that may arise from the proposed project. If you have any questions or need additional information, please contact me by phone at 805 644 4455 extension 165, or by email at mszromba@rinconconsultants.com.

Sincerely,

Rincon Consultants, Inc.

RE: Proposed Walnut Ridge Specific Plan Project, City of Walnut; San Dimas USGS
Quadrangle, Los Angeles County, California

Dear Ms. Szromba:

A record search of the Native American Heritage Commission (NAHC) *Sacred Lands File* was completed for the area of potential project effect (APE) referenced above with negative results. Please note that the absence of specific site information in the *Sacred Lands File* does not indicate the absence of Native American cultural resources in any APE.

Attached is a list of tribes culturally affiliated to the project area. I suggest you contact all of the listed Tribes. If they cannot supply information, they might recommend others with specific knowledge. The list should provide a starting place to locate areas of potential adverse impact within the APE. By contacting all those on the list, your organization will be better able to respond to claims of failure to consult. If a response has not been received within two weeks of notification, the NAHC requests that you follow-up with a telephone call to ensure that the project information has been received.

If you receive notification of change of addresses and phone numbers from any of these individuals or groups, please notify me. With your assistance we are able to assure that our lists contain current information. If you have any questions or need additional information, please contact via email: gayle.totton@nahc.ca.gov.

Sincerely,

A handwritten signature in blue ink that reads "Gayle Totton".

Contact

Subject: Cultural Resources Study for the Walnut Ridge Specific Plan Project
City of Walnut, Los Angeles County, California

Dear Contact:

Rincon Consultants, Inc. (Rincon) has been retained to conduct a cultural resources study for the Walnut Ridge Specific Plan Project (project). Rincon understands the project to propose the commercial, retail, and low and high density residential development on a 49-acre project site in the City of Walnut. This project is subject to the California Environmental Quality Act (CEQA).

This letter serves to inquire about your knowledge of potential cultural resources within the vicinity that may be impacted by project development. Rincon contacted the Native American Heritage Commission to request a Sacred Lands File search of the project area that was returned with negative results. However, we are aware that this does not negate the possibility of cultural resources existing within the area. A Records Search Map is enclosed with this letter for your reference which includes a 0.5-mile buffer.

If you have knowledge of cultural resources that may exist within or near the project area, please contact me at (805) 644 4455 extension 165, or at mszromba@rinconconsultants.com. Thank you for your assistance.

Sincerely,

Rincon Consultants, Inc.

RE: SB 18 Consultation for the Terraces at Walnut Specific Plan EIR Project, City of Walnut, Los Angeles County, California

Dear Andrew Salas:

The City of Walnut is preparing a Specific Plan Environmental Impact Report (EIR) for the Terraces at Walnut Project. The proposed project consists of the development of commercial, retail, and low and high density residential development on a 49-acre project site in the City of Walnut. Specific project development would consist of up to 187,333 square feet of retail, office and/or restaurant uses, four residential housing types, including detached, single-family dwellings, terrace townhomes, traditional townhomes and condominium units, and approximately 1.8 acres of open space in the form of pocket parks or dog parks. The proposed project is subject to the California Environmental Quality Act (CEQA).

This project requires a Specific Plan, and therefore, must comply with California Public Resources Code § 65352.3 – 65352.4 (Senate Bill 18), which requires local governments to conduct meaningful consultation with California Native American tribes on the contact list maintained by the Native American Heritage Commission prior to the adoption or amendment of a city or county general plan for the purpose of protecting cultural places on lands affected by the proposal.

On August 2, 2017, a letter was sent to the Native American Heritage Commission (NAHC) requesting a Sacred Lands File Search and a current SB 18 Native American Contact List for the vicinity of the project area. The response, dated August 23, 2017, stated that any information regarding assessments of cultural resources that have been performed within a potential “area of project affect” and any and all related information should be provided. The NAHC further recommended that we contact you to see if you have any knowledge of cultural resources within

the project vicinity or if you would like to request consultation with the City of Walnut regarding the Specific Plan.

Your Gabrieleno's input is important to the City of Walnut's planning process. We request that you advise us as early as possible if you wish to consult on the proposed project. The Gabrieleno Band of Mission Indians- Kizh Nation, under the provisions of SB 18, has 90 days from the date of receipt of this notice to advise the City of Walnut if you are interested in further consultation. If you require any additional information or have any questions, please contact me at (909) 595-7543 or via e-mail at tweiner@cityofwalnut.org.

Thank you for your assistance.

RE: SB 18 Consultation for the Terraces at Walnut Specific Plan EIR Project, City of Walnut, Los Angeles County, California

Dear Charles Alvarez:

The City of Walnut is preparing a Specific Plan Environmental Impact Report (EIR) for the Terraces at Walnut Project. The proposed project consists of the development of commercial, retail, and low and high density residential development on a 49-acre project site in the City of Walnut. Specific project development would consist of up to 187,333 square feet of retail, office and/or restaurant uses, four residential housing types, including detached, single-family dwellings, terrace townhomes, traditional townhomes and condominium units, and approximately 1.8 acres of open space in the form of pocket parks or dog parks. The proposed project is subject to the California Environmental Quality Act (CEQA).

This project requires a Specific Plan, and therefore, must comply with California Public Resources Code § 65352.3 – 65352.4 (Senate Bill 18), which requires local governments to conduct meaningful consultation with California Native American tribes on the contact list maintained by the Native American Heritage Commission prior to the adoption or amendment of a city or county general plan for the purpose of protecting cultural places on lands affected by the proposal.

On August 2, 2017, a letter was sent to the Native American Heritage Commission (NAHC) requesting a Sacred Lands File Search and a current SB 18 Native American Contact List for the vicinity of the project area. The response, dated August 23, 2017, stated that any information regarding assessments of cultural resources that have been performed within a potential “area of project affect” and any and all related information should be provided. The NAHC further recommended that we contact you to see if you have any knowledge of cultural resources within

the project vicinity or if you would like to request consultation with the City of Walnut regarding the Specific Plan.

Your Gabrielino's input is important to the City of Walnut's planning process. We request that you advise us as early as possible if you wish to consult on the proposed project. The Gabrielino-Tongva Tribe, under the provisions of SB 18, has 90 days from the date of receipt of this notice to advise the City of Walnut if you are interested in further consultation. If you require any additional information or have any questions, please contact me at (909) 595-7543 or via e-mail at tweiner@cityofwalnut.org.

Thank you for your assistance.

Sincerely,

Tom Weiner

Los Angeles, CA, 90012

RE: AB 52 Consultation for the Terraces at Walnut Specific Plan EIR Project, City of Walnut, Los Angeles County, California

Dear Sandonne Goad:

The City of Walnut is preparing a Specific Plan Environmental Impact Report (EIR) for the Terraces at Walnut Project (project). The proposed project consists of the development of commercial, retail, and low and high density residential development on a 49-acre project site in the City of Walnut. Specific project development would consist of up to 187,333 square feet of retail, office and/or restaurant uses, four residential housing types, including detached, single-family dwellings, terrace townhomes, traditional townhomes and condominium units, and approximately 1.8 acres of open space in the form of pocket parks or dog parks. The proposed project is subject to the California Environmental Quality Act (CEQA).

A cultural resources records search was performed for the project site and a 0.5-mile radius surrounding it which was negative. Additionally, a Sacred Lands File search was requested for the project area, which is pending results.

The proposed project must comply with California Public Resources Code § 21080.3.1 (Assembly Bill [AB] 52 of 2014), which requires local governments to conduct meaningful consultation with California Native American tribes that have requested to be notified about projects in the geographic area with which the tribe is traditionally and culturally affiliated.

The input of the Gabrielinos is important to the City of Walnut's planning process. Under AB 52, you have 30 days from receipt of this letter to respond in writing if you wish you consult on the proposed project. If you require any additional information or have any questions, please contact me at (909) 595-7543 or via e-mail at tweiner@cityofwalnut.org.

Thank you for your assistance.

Kizh Gabrieleño Band of Mission Indians

Re: Cultural Resources Mitigation Measures, regarding Tribal Cultural Resources and Human Remains and associated funerary objects within Kizh Gabrieleño Tribal Territory.

***Note:** The Gabrieleño Band of Mission Indians Kizh -Nation ONLY replies to projects within their ANCESTRAL territory, because it's the highest degree of relationship to the land, even over culturally or traditionally affiliated, and our Oral History and documented information pertain to our Tribe's village areas, commerce areas, recreation areas, and burial locations within our tribe's ancestral territory. Therefore, in order to protect these irreplaceable Tribal Cultural Resources within our ancestral tribal territory, Native American Monitors shall be from the Gabrieleño Band of Mission Indians Kizh -Nation.*

Retain a Native American Monitor: The project Applicant will be required to obtain the services of a qualified Native American Monitor(s) during construction-related ground disturbance activities. Ground disturbance is defined by the Tribal Representatives from the Gabrieleño Band of Mission Indians-Kizh Nation as activities that include, but are not limited to, pavement removal, pot-holing or auguring, grubbing, weed abatement, boring, grading, excavation, drilling, and trenching, within the project area. The monitor(s) must be approved by the Tribal Representatives and will be present on-site during the construction phases that involve any ground disturbing activities. The Native American Monitor(s) will complete monitoring logs on a daily basis. The logs will provide descriptions of the daily activities, including construction activities, locations, soil, and any cultural materials identified. The monitor(s) shall possess Hazardous Waste Operations and Emergency Response (HAZWOPER) certification. In addition, the monitor(s) will be required to provide insurance certificates, including liability insurance, for any archaeological resource(s) encountered during grading and excavation activities pertinent to the provisions outlined in the California Environmental Quality Act, California Public Resources Code Division 13, Section 21083.2 (a) through (k). The on-site monitoring shall end when the project site grading and excavation activities are completed, or when the Tribal Representatives and monitor have indicated that the site has a low potential for archeological resources.

***Hawzoper is needed only if the site has hazardous concerns.*

Unanticipated Discovery of Tribal Cultural Resources: All archaeological resources unearthed by project construction activities shall be evaluated by the Qualified Archaeologist and Native Monitor. If the resources are Native American in origin, the Tribe shall coordinate with the landowner regarding treatment and curation of these resources. Typically, the Tribe will request reburial or preservation for educational purposes. If a resource is determined by the Qualified Archaeologist to constitute a "historical resource" pursuant to CEQA Guidelines Section 15064.5(a) or has a "unique archaeological resource" pursuant to Public Resources Code Section 21083.2(g), the Qualified Archaeologist shall coordinate with the applicant and the City to develop a formal treatment plan that would serve to reduce impacts to the resources. The treatment plan established for the resources shall be in accordance with CEQA Guidelines Section 15064.5(f) for historical resources and Public Resources Code Sections 21083.2(b) for unique archaeological resources. Preservation in place (i.e., avoidance) is the preferred manner of treatment. If preservation in place is not feasible, treatment may include implementation of archaeological data recovery excavations to remove the resource along with

subsequent laboratory processing and analysis. Any historic archaeological material that is not Native American in origin shall be curated at a public, non-profit institution with a research interest in the materials, such as the Natural History Museum of Los Angeles County or the Fowler Museum, if such an institution agrees to accept the material. If no institution accepts the archaeological material, they shall be donated to a local school or historical society in the area for educational purposes.

Unanticipated Discovery of Human remains and associated funerary objects: Human remains are defined as any physical remains of a human being. The term “human remains” encompasses more than human bones. In ancient as well as historic times, Tribal Traditions included, but were not limited to, the burial of associated cultural resources (Funerary objects) with the deceased, and the ceremonial burning of human remains. These remains are to be treated in the same manner as bone fragments that remain intact. Associated funerary objects are objects that, as part of the death rite or ceremony of a culture, are reasonably believed to have been placed with individual human remains either at the time of death or later; other items made exclusively for burial purposes or to contain human remains can also be considered as associated funerary objects. NAGPRA guidance specifically states that the federal agencies will consult with organizations on whose aboriginal lands the remains and cultural items might be discovered, who are reasonably known to have a cultural relationship to the human remains and other cultural items. Therefore, for this project site, it is appropriate to consult with the Gabrieleno Band of Mission Indians – Kizh Nation as recommended by the NAHC.

Prior to the start of ground disturbing activities, the land owner shall arrange a designated site location within the footprint of the project for the respectful reburial of the human remains and/or ceremonial objects. Any discoveries of human skeletal material shall be immediately reported to the County Coroner. The monitor will immediately divert work at minimum of 50 feet and place an exclusion zone around the burial. The monitor will then notify the Qualified Archaeologist and the construction manager who will call the coroner. Work will continue to be diverted while the coroner determines whether the remains are Native American. The discovery is to be kept confidential and secure to prevent any further disturbance. If Native American, the coroner will notify the NAHC as mandated by state law who will then appoint a Most Likely Descendent. In the case where discovered human remains cannot be fully documented and recovered on the same day, the remains will be covered with muslin cloth and a steel plate that can be moved by heavy equipment placed over the excavation opening to protect the remains. If this type of steel plate is not available, a 24 hour guard should be posted outside of working hours. The Tribe will make every effort to recommend diverting the project and keeping the remains in situ and protected. If the project cannot be diverted, it may be determined that burials will be removed. The Tribe will work closely with the Qualified Archaeologist to ensure that the excavation is treated carefully, ethically and respectfully. If data recovery is approved by the Tribe, documentation shall be taken which includes at a minimum detailed descriptive notes and sketches. Additional types of documentation shall be approved by the Tribe for data recovery purposes. Cremations will either be removed in bulk or by means as necessary to ensure completely recovery of all material. If the discovery of human remains includes 4 or more burials, the location is considered a cemetery and a separate treatment plan shall be created. The project applicant shall consult with the Tribe regarding avoidance of all cemetery sites. Once complete, a final report of all activities are to be submitted to the NAHC. The Tribe does NOT authorize any scientific study or the utilization of any invasive diagnostics on human remains.

If the coroner determines the remains represent a historic non-Native American burial, the burial shall be treated in the same manner of respect with agreement of the coroner. Reburial will be in an appropriate setting. If the coroner determines the remains to be modern, the coroner will take custody of the remains.

Each occurrence of human remains and associated funerary objects will be stored using opaque cloth bags. All human remains, funerary objects, sacred objects and objects of cultural patrimony will be removed to a secure container on site if possible. These items should be retained and reburied within six months of recovery. The site of reburial/repatriation shall be on the project site but at a location mitigated between the Tribe and the landowner at a site to be protected in perpetuity. There shall be no publicity regarding any cultural materials recovered.

Professional Standards: Archaeological and Native American monitoring and excavation during construction projects will be consistent with current professional standards. All feasible care to avoid any unnecessary disturbance, physical modification, or separation of human remains and associated funerary objects shall be taken. Principal personnel must meet the Secretary of Interior standards for archaeology and have a minimum of 10 years of experience as a principal investigator working with Tribal Cultural Resources in southern California. The Qualified Archaeologist shall ensure that all other personnel are appropriately trained and qualified.
